Rhode Island Increases Preschool Enrollment & Spending; Progress is Need to Reach More Children

Federal/State Partnership Needed to Better Serve Young Children and their Families

NEW BRUNSWICK, NJ—The COVID-19 pandemic set back state preschool enrollment and funding across the country, according to the 2020 edition of *The State of Preschool Yearbook* by the National Institute for Early Education Research (NIEER) at the Rutgers Graduate School of Education.

Pre-pandemic, Rhode Island saw an increase in enrollment and inflation-adjusted spending. The state once again met all 10 minimum standards for high quality preschool.

Now is the time for a renewed commitment to high-quality pre-K for all, beginning with those in the lowest income families.

Nationally, the report found that:

- Growth in state-funded preschool was slowing before the pandemic.
- The pandemic imposed serious setbacks and reversed recent progress.
- Uneven progress among states is worsening inequality in children's access to high-quality preschool.
- Most states spend too little per child to support high-quality, full-day pre-K and few reach all their 3- and 4-year-olds.

RHODE ISLAND: 2020 FAST FACTS

Met 10 of 10 quality standards benchmarks.

Enrolled 1,420 children, an increase of 340 from 2018-19.

Total state funding was \$13,804,779, an increase of \$6,490,325 from 2018-19 (inflation adjusted).

State spending-per-child was \$9,722 compared to \$6,773 in 2018-19 (inflation adjusted).

Rhode Island national rankings:

- 32 in access for 4-year-olds
- 5 in state spending per child

“Rhode Island stepped up to substantially increase preschool funding when their initial federal Preschool Development Grant ended,” said Steven Barnett, Ph.D., NIEER’s founder and senior co-director. “The state has been committed to increasing access, but still only reaches a small fraction of young children.”

Nationwide, enrollment in state-funded preschool increased slightly in 2019-2020, but took a hit in 2020-2021 as many programs closed or only offered virtual learning and parents were hesitant to send children to in-person school during the pandemic.

“Rhode Island must act now to mitigate the pandemic’s impacts on young children and pre-K programs and remain committed to long-term progress,” said Barnett. “The federal government should provide support for, and states commit to, high-quality pre-K. While federal rescue and recovery dollars can help, a new federal initiative NIEER has proposed could bring \$19.8 million in federal support to Rhode Island for preschool during the next four years.”

Across the country the survey reveals bipartisan support for preschool with both "red" and "blue" states among the nation's leaders in high quality pre-K. That offers hope that the nation can move ahead to expand access to high-quality pre-K more rapidly in the future.

The 2020 State of Preschool Yearbook was supported with funding from the Heising-Simons Foundation and the Bill and Melinda Gates Foundation. Cost modeling and funding analyses were supported with funding from the PNC Foundation.
