# Executive Summary

## THE CHANGING LANDSCAPE OF STATE-FUNDED PRESCHOOL

*The State of Preschool 2018* is the 16th edition of NIEER's annual report tracking state-funded preschool access, resources, and quality. Since 2002, the preschool landscape has changed in many ways; and in others, it has remained the same – highlighting the need for a renewed commitment to progress.

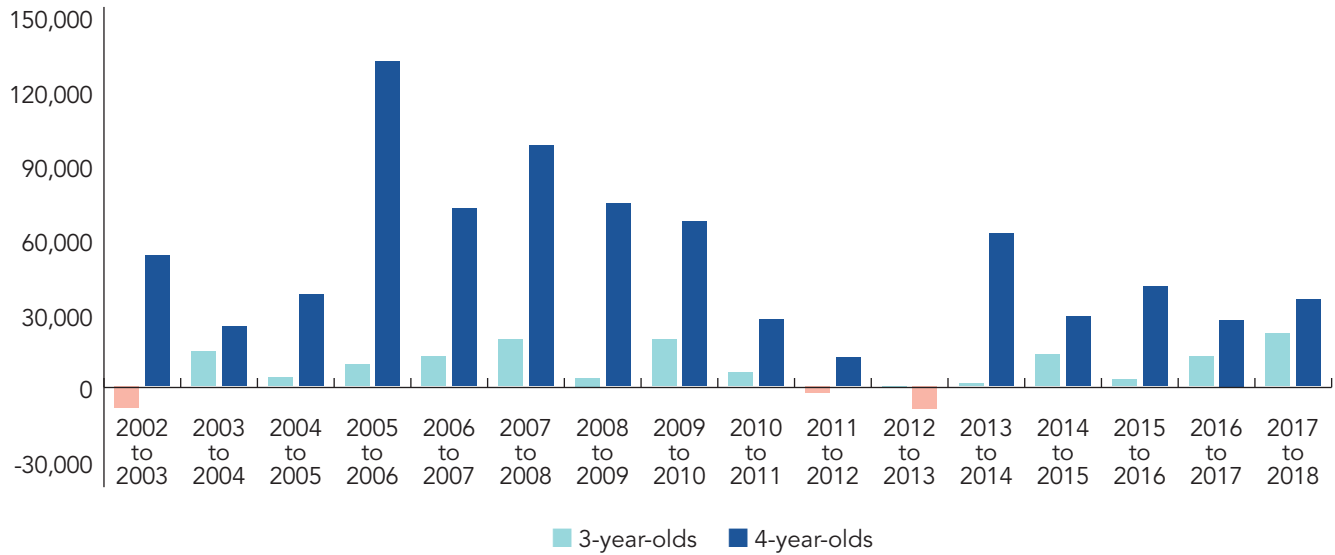

Since 2002 when NIEER began tracking preschool enrollment, states have added more than 882,000 seats in state-funded preschool, mostly for four-year-olds. Progress has been uneven both across states and over time. The annual change in the number of children served in state-funded preschool has varied from an increase of nearly 140,000 children between 2004-2005 and 2005-2006—a nearly 18% jump—to a decrease between 2011-2012 and 2012-2013.

Figure 1 shows how the annual change in the number of 3- and 4-year-olds served in state-funded preschool has evolved over the last 16 years. For the most part, preschool enrollment grew steadily up until the Great Recession. Beginning in 2008, annual increases shrink, hitting a low point in 2012 when the number of children enrolled decreased. The recovery in state pre-K growth has been anemic from 2013 to the present, with average annual increases below the pre-recession level.

At the current pace, it would take states nearly 20 years to serve just half of all 4-year-olds in preschool. And with the sun-setting of federal PDG support, some states may struggle to even sustain current levels of enrollment. It would take nearly a century to reach the 50% mark for 3-year-olds at the current pace. As federal support for preschool wanes, states need to renew their commitment to high-quality preschool or risk leaving too many children behind. In many places, cities have stepped up to the challenge of going beyond what states provide and have emerged as leaders—examples include New York City, Austin, Boston, Philadelphia, Seattle, San Antonio, Denver, Columbus, Cleveland, Cincinnati, and San Francisco.

Over the last decade, in addition to expanding access to state-funded preschool, many states have made concerted efforts to increase enrollment in school-day or longer programs. This shift to a longer program duration supports children's development as long as quality is high and better accommodates the needs of working parents. Not all states are able to report enrollment of children by operating schedule, but among those that can, there has been a trend toward more children in longer program days.

**FIGURE 1. ANNUAL CHANGE IN THE NUMBER OF 3- AND 4-YEAR-OLDS SERVED IN STATE-FUNDED PRESCHOOL**

**FIGURE 2. ANNUAL CHANGE IN THE TOTAL STATE SPENDING ON PRESCHOOL (IN 2018 DOLLARS, BILLIONS OF DOLLARS)**

The annual (inflation-adjusted) change in total state spending on preschool also varied greatly over the last 16 years and followed a similar pattern to enrollment (see Figure 2). Prior to the Great Recession, the annual average increase grew larger each year. From 2010-2011 to 2013-2014, state preschool spending bottomed out, decreasing by nearly \$600 million dollars in the worst year. Spending rebounded in 2014, with the largest single year increase of \$1.2 billion, but the rate of increase has fallen sharply since. Last year’s increase was just a quarter of the size of the largest increase. This pattern of spending changes is reflected in enrollment. However, spending levels also relate to length of day and quality standards. Some states have made progress on all of these dimensions, while others have not. Unless state spending begins to grow faster, it will not be possible for states to make much progress in access, quality, or the provision of longer days.

## WHAT'S NEW?

### Resources

- Total state funding for preschool programs was more than \$8.15 billion across the 44 states and D.C.\* that offered preschool during the 2017-2018 school year. State funding surpassed \$8 billion for the first time after an inflation-adjusted increase of \$286 million (or 3.6%) over 2016-2017. This increase was nearly double last year's increase in state funding.
- Average state funding per child was \$5,175 in 2017-2018. Although there was a small increase (\$168) in nominal spending per child, spending per child decreased by \$8 after adjusting for inflation.
- Eight states reported an increase in total state preschool spending (inflation-adjusted) of more than \$10 million. Four states increased their inflation-adjusted preschool spending by more than 50%.
- Sixteen states increased spending per child (inflation-adjusted), including three states that increased this by more than \$1,000 per child.
- In 18 states 2014 competitive federal Preschool Development Grants (PDG) provided almost \$244 million in 2017-2018. Approximately \$102 million of the federal PDG supported increased enrollment or quality enhancements in state preschool, while the remaining funds supported children in other preschool programs.

### Enrollment

- States enrolled almost 1.58 million children in state-funded preschool, including more than 1.3 million 4-year-olds—one-third of all 4-year-olds in the country. Enrollment of 3-year-olds was just more than 227,000, or nearly 5.7% of 3-year-olds.
- Nearly 56,000 4-year-old children enrolled in state-funded preschool were supported either entirely or partially by federal PDG, an increase of about 7,300 from last year.
- Enrollment in state-funded preschool nationwide increased by only 33,827 4-year-olds and 21,292 3-year-olds from 2016-2017. Though small, these are larger than last year's increases. Much of the increase in 4-year-olds enrolled can be attributed to additional seats funded by federal PDG.
- Eighteen states decreased enrollment of 3- and 4-year-olds, including Indiana which did not lower enrollment but changed the rules for program eligibility so that it no longer met the definition of state-funded preschool used in this report. On the flip side, 13 states increased enrollment of 3- and 4-year-olds by more than 1,000.
- Ten states served nearly 50% or more of 4-year-olds in their states. Four states served more than 70%. D.C. and Vermont are the only two states to serve more than 50% of 3-year-olds.
- Across all public programs—preschool general and special education plus federal and state-funded Head Start—44% of 4-year-olds and 16% of 3-year-olds were served. Since NIEER began tracking enrollment in 2002, enrollment of 4-year-olds across these programs has increased by 13.5 percentage points, and enrollment of 3-year-olds has increased by only 2.8 percentage points.

PERCENT OF STATE POPULATION ENROLLED

AVERAGE STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

\*Consistent with U.S. government statistical reporting practices, the District of Columbia will be referred to as a "state" throughout this report. Hence, we report 45 "states" providing state-funded preschool.

## Quality

- For the third year, NIEER assessed state preschool policies using an updated set of minimum quality standards benchmarks focusing on process quality and reflecting recent research on effective early childhood education. This year we report only on these new quality standards benchmarks.
- Alabama, Michigan, and Rhode Island were the only three states to meet all 10 of NIEER's benchmarks for minimum state preschool quality standards. Alabama and Rhode Island expanded access while leading on quality; Michigan expanded access to school-day services.
- As a result of policy changes, Tennessee met two additional quality standards benchmarks—Early Learning and Development Standards (ELDS) and Curriculum supports, Connecticut CDCC met one additional quality standards benchmark—ELDS, and Oklahoma met one additional quality standards benchmark—staff professional development. Two programs also met fewer quality standards benchmarks this year due to policy changes—Alaska and the Kansas Preschool Pilot Program.
- Twelve programs met fewer than half of the quality standards benchmarks, including states with the largest numbers of children in state-funded preschool, and largest numbers of children in poverty.

## Important Developments

- Montana and North Dakota each offered a state-funded preschool program included in this report for the first time in 2017-2018. Montana enrolled 306 children (2% of 4-year-olds) and met six quality standards benchmarks. North Dakota enrolled 965 4-year-olds (9%) and met just two quality standards benchmarks.
- Indiana's On My Way Pre-K Program no longer meets the definition of a state-funded preschool program used in this report due to changes that link program eligibility to parent work status. However, in 2017-2018, On My Way Pre-K served 2,423 children.
- For the second time, NIEER included a supplemental survey about preschool policies to support the preschool workforce, particularly around compensation parity with K-3.
- Only four states, Hawaii, New Jersey, Oklahoma, and Rhode Island, require all preschool teachers to have a bachelor's degree and teaching certification, while also requiring salary parity between preschool and K-3 teachers.
- All but one state has specific in-service professional development requirements for preschool teachers, but in many states requirements differ for preschool teachers in public schools and nonpublic settings. And, many fewer programs have policies requiring equivalent paid professional development time between preschool teachers and K-3 teachers.
- Eighteen states used federal funding from the 2014 PDG to support enrollment of low-income 4-year-olds in high-quality preschool. Almost \$244 million was used to support 55,925 high-needs four-year-olds and to raise pre-K quality. About 42% of that funding was used to support more than 35,000 four-year-olds enrolled in state-funded preschool programs. While the PDG has contributed to the progress in enrollment of 4-year-olds over the past several years, for many states, this is the last year of their federal PDG funding. Eight states reported plans to sustain the PDG-level of funding and enrollment using other means, and another nine reported they were working on a plan. This reduction in federal funding presents a challenge for maintaining and expanding access to quality pre-K.
- In December 2018, 47 states and 2 territories were awarded federal Preschool Development Grant Birth through Five (PDG B-5) awards. Unlike the 2014 PDG, the PDG B-5 is a planning grant to improve state early childhood systems, and funding may not be used to support enrollment. One-year PDG B-5 awards ranged from \$538,000 to \$10.6 million.

**TABLE 1: STATE RANKINGS AND QUALITY CHECKLIST SUMS**

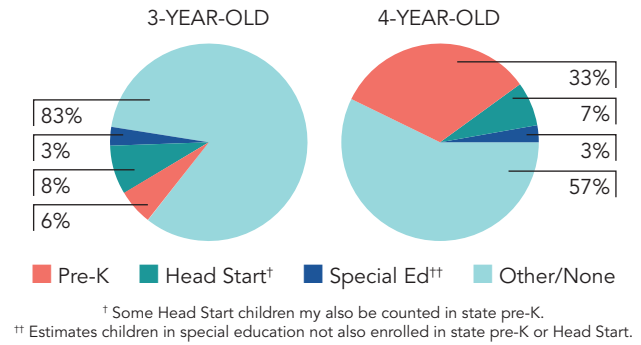

STATE	Access for 4-Year-Olds Rank	Access for 3-Year-Olds Rank	Resources Rank Based on State Spending	Resources Rank Based on All Reported Spending	Quality Standards Checklist Sum (Maximum of 10)

## NATIONAL RESOURCES

Total state pre-K spending.....	\$8,157,721,430 <sup>5</sup>
Local match required?.....	14 state programs require a local match
State Head Start spending.....	\$180,244,924 <sup>6</sup>
State spending per child enrolled.....	\$5,175 <sup>5</sup>
All reported spending per child enrolled*.....	\$5,943

\* Pre-K programs may receive additional funds from federal or local sources that are not included in this figure.

\*\* Head Start per-child spending includes funding only for 3- and 4-year-olds.

\*\*\* K-12 expenditures include capital spending as well as current operating expenditures.

## SPENDING PER CHILD ENROLLED

<sup>1</sup> Throughout this report, the District of Columbia is included like a state, resulting in a list of 45 states for rankings. In 2015-2016, Guam began offering a "state"-funded pre-K program but is not included in totals or rankings in this report.

<sup>2</sup> NIEER's definitions of hours of operation are as follows: part-day programs serve children for fewer than 4 hours per day; school-day programs serve children at least 4 hours per day but fewer than 6.5 hours per day; and extended-day programs serve children for 6.5 or more hours per day. Some programs offer multiple hours of operation but only the minimum one is listed here.

<sup>3</sup> The enrollment figures for federal Head Start include children enrolled in the program in all 50 states, D.C., and the U.S. territories, as well as enrollment in the Migrant & Seasonal and American Indian/Native Alaskan programs. These numbers do not include children funded by state match.

<sup>4</sup> This figure is based on the Head Start enrollment supported by state match as reported by ACF and additional information from surveys of state supplemental Head Start programs. This figure includes 15,425 children who attended programs that were considered to be state-funded preschool programs and are also included in the state-funded preschool enrollment total.

<sup>5</sup> This figure included federal TANF funds directed toward preschool at states' discretion.

<sup>6</sup> This figure includes \$146,128,634 also included in the total state pre-K spending.

# National Overview

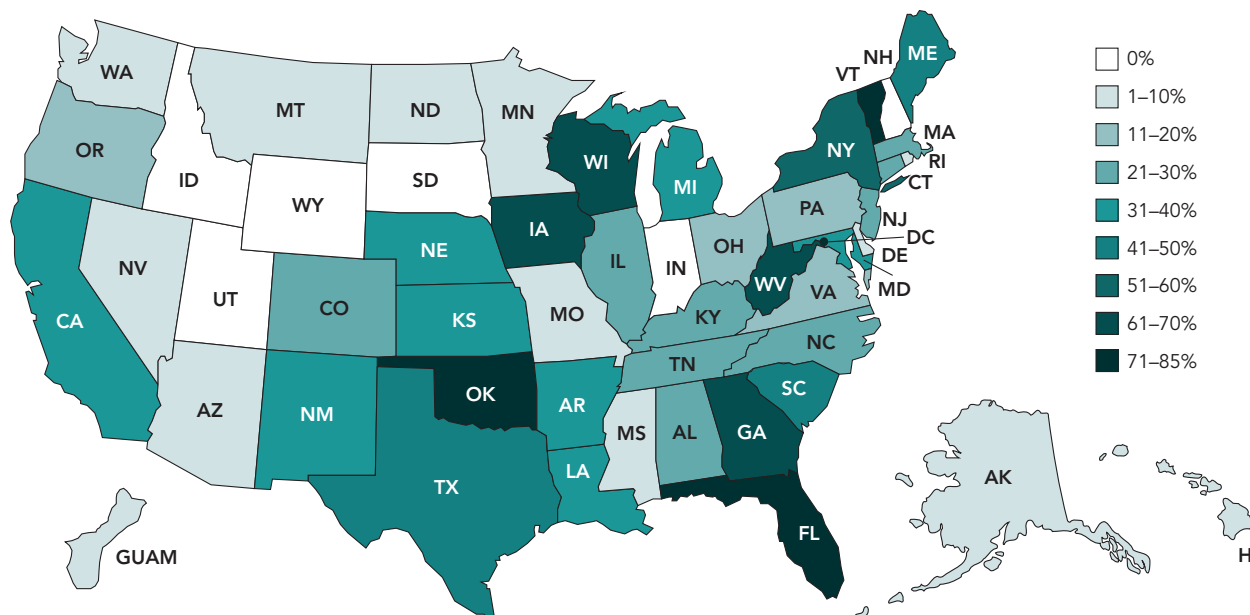

## ENROLLMENT: SLOW TO NO GROWTH

State-funded preschool served 1,577,761 children during the 2017-2018 school year. The vast majority—85% or 1,338,127 children—were 4-year-olds, as state-funded preschool continues to be a program predominantly for 4-year-old children. Table 2 reports the number and percentage of the population of 3- and 4-year-olds enrolled by state, and nationally. Nationwide, 33% of 4-year-olds and 5.7% of 3-year-olds were enrolled in state-funded preschool in 2017-2018.

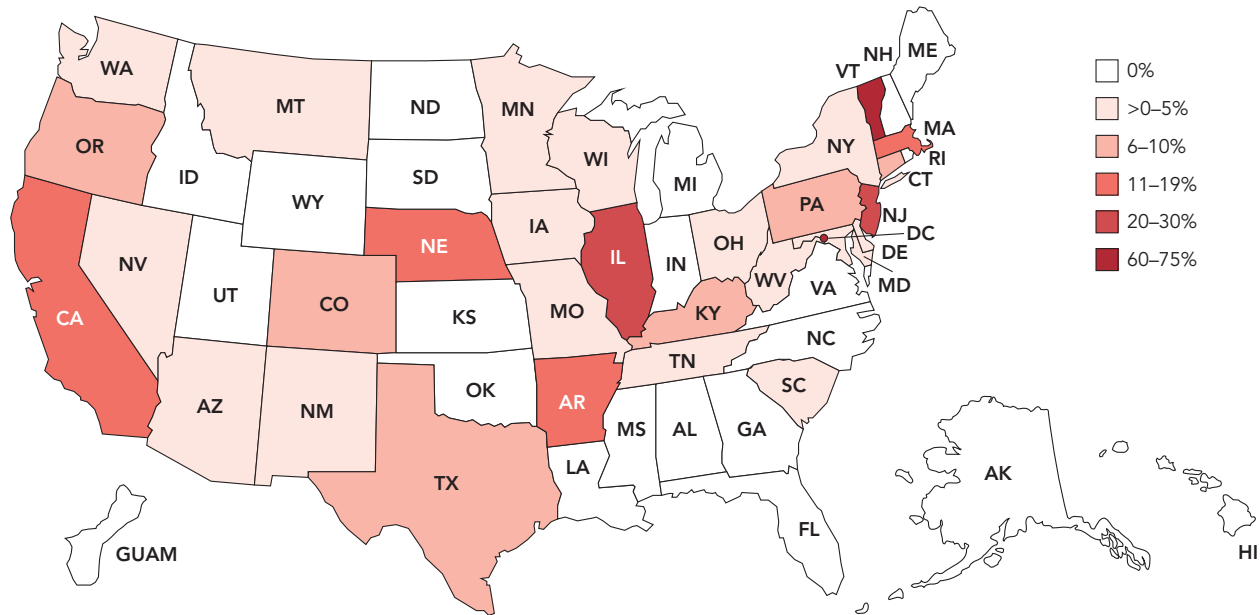

Despite the overall lackluster picture, there was some good news last year. Montana and North Dakota began state-funded preschool programs, moving off of the “No program” list. Massachusetts’ Chapter 70 program is included in the report for the first time, and has a substantial enrollment, though their Inclusive Preschool Learning Environment Grant is being phased out and is no longer included in the report. Guam continued to offer pre-K, the only U.S. territory to fund a preschool program.

Total enrollment in state-funded preschool increased slowly once again. States added only 21,292 three-year-olds and 33,827 four-year-olds over the prior year totals. These small increases amount to only half a percentage point for 3-year-olds and less than a percentage point for 4-year-olds. Although these increases were larger than last year, the difference is small, and there has been little progress towards increased enrollment for several years. Additionally, some of the increase in enrollment of 4-year-olds can be attributed to the federal PDG program, funding for which runs out soon, and not all states have made plans to sustain the funding and enrollment from this program. Thirteen states added more than 1,000 3- and 4-year-olds, including Massachusetts where an additional 24,000 children were enrolled due to inclusion of their Chapter 70 program in the report for the first time. Unfortunately, five states decreased enrollment by more than 1,000 three- and four-year-olds (Michigan, New Jersey, New Mexico, New York, and Wisconsin). Table 3 reports the changes in the number and percent of children served from the first year NIEER started tracking state preschool enrollment (2001-2002) and from last year (2016-2017).

**FIGURE 3: PERCENT OF 4-YEAR-OLDS SERVED IN STATE PRESCHOOL VARIES WIDELY**

**FIGURE 4: PERCENT OF 3-YEAR-OLDS SERVED IN STATE PRESCHOOL LOW IN MOST STATES**

Enrollment varies greatly by state. The District of Columbia ranks first in access for both 3- and 4-year-olds, serving 73% of 3-year-olds and 85% of 4-year-olds. Three other states (Florida, Vermont, and Oklahoma) served more than 70% of 4-year-olds. And another six states served about half of all the state's 4-year-olds (Wisconsin, West Virginia, Iowa, Georgia, New York, and Texas). Conversely, 11 states enrolled less than 10% of 4-year-olds (Minnesota, North Dakota, Washington, Delaware, Nevada, Mississippi, Arizona, Alaska, Missouri, Montana, and Hawaii). Several of these states have demonstrated little progress in increasing enrollment, but others are new to providing preschool and North Dakota did reach 9% of 4-year-olds during its first year of program operation. Six states did not operate a preschool program in 2017-2018 that met the definition of a state-funded preschool program used in this report. Figure 3 displays a map of the percent of 4-year-olds enrolled in state-funded preschool in each state.

Enrollment of 3-year-olds in state-funded preschool continues to lag far behind and grow very slowly, increasing from 2.7% in 2001-2002 to only 5.7% in 2017-2018. Only 30 states fund enrollment of 3-year-olds in state-funded preschool but a few others allow 3-year-olds to be served in state-funded preschool classrooms supported by other sources of funding. D.C. and Vermont are exceptional in serving more than half of their 3-year-olds. Illinois, New Jersey, and Arkansas follow, serving close to or more than one-fifth of 3-year-olds. Figure 4 displays a map of the percent of 3-year-olds enrolled in state-funded preschool in each state.

### STATE PRESCHOOL POLICIES RELATED TO PROGRAM QUALITY: IN NEED OF IMPROVEMENT

A primary goal of state-funded preschool education is to support the learning and development of young children as a means of improving the quality of their lives now and in the future. Research finds that preschool programs can accomplish this goal, but that doing so at scale has proven difficult.<sup>1</sup> Only high-quality preschool programs can be expected to produce large and lasting gains in outcomes such as achievement, educational attainment, personal and social behavior (e.g., reductions in crime), and adult health and economic productivity.<sup>2</sup>

NIEER has developed a rating system for 10 preschool policy standards related to quality to help guide policymakers seeking to enhance and support high quality. To do this, we employed a process that business and government commonly use to design for success: "benchmarking" against acknowledged leaders. Benchmarking identifies common features of highly successful organizations as well as what differentiates them from the rest.

We began by identifying preschool programs that research has found to produce large, broad, and lasting improvements in children's learning and development.<sup>3</sup> Not surprisingly, the quality of a child's experiences in the classroom is a key to success. Public policies cannot directly control quality, but they can specify program features and state operations that support classroom quality. We identified 10 key features common to highly effective programs that can be determined by policy, and set "benchmarks" for policies related to those features.

Since NIEER first developed the benchmarks, both policies and research on program effectiveness have advanced. As the Yearbook has documented, most states have strengthened their preschool policies. All or nearly all states now meet several of the original benchmarks. In addition, the field has learned more about how program features contribute to quality and effectiveness at scale.<sup>4</sup> Based on progress and a review of the new evidence, we revised our benchmarks for state policy. The revised benchmarks place less emphasis on structural quality and monitoring, and more emphasis on a coherent system of continuous improvement for process quality. We believe these revisions are a shift in favor of policies better able to shape classroom experiences in ways that can strongly enhance learning and development.

The benchmarks provide a coherent set of *minimum* policies to support meaningful, persistent gains in learning and development that can enhance later educational and adult life achievement. Programs supported by these policies will be more likely to achieve their goals. However, the benchmarks cannot guarantee success, which depends on other factors including adequate funding and strong implementation of both policy and practice. Even the best policies can be undermined by lack of funding or inattention to full implementation.

Below, we explain each benchmark, along with the evidence and reasoning behind it. We hope this will increase understanding of the benchmarks and why they matter.

**Benchmark 1. Early Learning and Development Standards (ELDS).** A state’s ELDS specify a program’s goals. Clear and appropriate expectations for learning and development across multiple domains are an essential starting place for quality.<sup>5</sup> States should have comprehensive ELDS covering all areas identified as fundamental by the National Education Goals Panel<sup>6</sup>—children’s physical well-being and motor development, social/emotional development, approaches toward learning, language development, and cognition and general knowledge. Neglecting any of these development domains could weaken both short- and long-term effectiveness.<sup>7</sup>

To meet the benchmark, ELDS should be specific to preschool-aged children and vertically aligned with state standards for younger and older children so that children’s experiences at each stage build on what has gone before.<sup>8</sup> ELDS also should be aligned with any required child assessments, and sensitive to children’s diverse cultural and language backgrounds.<sup>9</sup> Finally, the state must provide some support for those charged with implementing the ELDS so they understand them, such as professional development and additional resources.

**Benchmark 2. Curriculum supports.** A strong curriculum that is well-implemented increases support for learning and development broadly, and includes specificity regarding key domains of language, literacy, mathematics, and social-emotional development.<sup>10</sup> To meet the benchmark for curriculum support, states must provide (a) guidance or an approval process for selecting curricula, and (b) training or ongoing technical assistance to facilitate adequate implementation of the curriculum.

**Benchmark 3. Teacher degree.** To meet the benchmark, state policy must require lead teachers in every classroom to have at least a bachelor’s degree. This follows recommendations from multiple studies by the Institute of Medicine (IOM) and National Research Council (NRC) of the National Academy of Science recommending that preschool teachers have a BA with specialized knowledge and training in early childhood education.<sup>11</sup> Their conclusions are supported by an analysis of what teachers are expected to know and do in order to be highly effective. Also, a comprehensive review finds that teachers with higher educational levels generally provide higher quality educational environments for young children.<sup>12</sup>

Much of the research has approached the question of teacher degree requirements incorrectly by assuming that teacher qualifications and other program features act independently, are unconstrained by regulation, and are independent of unmeasured contexts that affect outcomes.<sup>13</sup> When multiple program features are interdependent, benchmarking is a more appropriate approach for identifying the features associated with success.<sup>14</sup> We found no examples of programs that have produced large persistent gains in achievement without well-qualified teachers.

It also follows that teacher qualifications should not be expected to have an effect in isolation. Compensation must be adequate to attract and retain strong teachers, regardless of qualifications requirements.<sup>15</sup> We have not made this part of the benchmark due to the difficulty of ascertaining exactly what “adequate compensation” is for each state—but that does not lessen its importance. Compensation is the focus of a supplemental section in this report.

**Benchmark 4. Teacher specialized training.** IOM/NRC reports have also emphasized that preschool lead teachers should have specialized preparation that includes knowledge of learning, development, and pedagogy specific to preschool-age children.<sup>16</sup> To meet the benchmark, policy must require specialized training in early childhood education and/or child development. We recognize that early childhood teacher preparation programs are variable. States may wish to consider supports to improve programs offered by their state institutions of higher education and alignment with the state ELDS.<sup>17</sup>

**Benchmark 5. Assistant teacher degree.** All members of a teaching team benefit from preservice preparation. The Child Development Associate (CDA) was developed as the entry-level qualification for the field.<sup>18</sup> Other certifications or coursework can provide similar preparation. There has been limited research specific to the qualifications of assistant teachers, but evidence indicates that assistant teacher qualifications are associated with teaching quality. To meet the benchmark, policy must require that assistant teachers hold a CDA or have equivalent preparation.

**Benchmark 6. Staff professional development.** To meet this benchmark both teachers and assistant teachers must be required to have at least 15 hours of annual in-service training. In addition, some professional development must be provided through coaching or similar ongoing classroom-embedded support. Lead and assistant teachers are also required to have annual written individualized professional development plans. Research indicates regular professional learning, including coaching, supports teaching practices related to high-quality experiences for children.<sup>19</sup> Individualized professional development focused on helping teachers improve in their own classrooms has been found more effective than traditional workshops and general professional development.<sup>20</sup> Good teachers actively engage in learning and regular professional development, and there is some evidence for a 15-hour threshold.<sup>21</sup>

**Benchmarks 7 and 8. Maximum class size (20) and staff-child ratio (1:10).** These two benchmarks are addressed together as they are highly linked in policy and practice. To meet benchmark 7, class size should be limited to at most 20 children. To meet benchmark 8, classes should be permitted to have no more than 10 children per classroom teaching staff member. Small class size and corresponding teacher-child ratios characterize the most effective programs, even though many studies find weak or no association between these features and effectiveness.<sup>22</sup> Yet, it seems clear that smaller classes and fewer children per teacher enable teachers to interact with each child more frequently, to work with smaller groups, and offer each child more individualized attention, which results in better outcomes. The smaller the class, the easier it is for a teacher to develop a good understanding of each child's interests, needs, and capabilities.

What may be the best designed large-scale randomized trial of class size for young children to date found substantive and lasting impacts on achievement and educational success for smaller class sizes in kindergarten.<sup>23</sup> Subsequent efforts to reproduce these results through policy changes elsewhere have been far less successful. Again, we note that key policies regarding program features are not independent of other policies, context, and implementation.

A staff-child ratio of 1:10 is lower than in programs found to have the largest persistent effects, but it is generally accepted by professional opinion. A recent meta-analysis suggests an even lower threshold, below 1 to 7.5 (class size of 15), would be better, and that finding is consistent with experimental evidence for kindergarten.<sup>24</sup> On the other hand, at least one program has produced large short-term gains with a maximum class size of 22 and 1:11 staff to child ratio, just outside the benchmarks.<sup>25</sup>

**Benchmark 9. Screenings and referrals.** To meet the benchmark, policies should require that preschool programs ensure children receive vision, hearing, and other health screenings and referrals.<sup>26</sup> This benchmark recognizes that children's overall well-being and educational success involve not only cognitive development but also physical and mental health.<sup>27</sup>

**Benchmark 10. Continuous Quality Improvement System (CQIS).** An effective CQIS operates at local and state levels to ensure that information is gathered regularly on processes and outcomes, and that this information is used to guide program improvement. To meet this benchmark, policy must at a minimum require that (1) data on classroom quality is systematically collected at least annually, and (2) local programs and the state both use information from the CQIS to help improve policy or practice. The use of a cycle of planning, observation, and feedback has characterized highly effective programs.<sup>28</sup>

The *State of Preschool 2018* reports on 10 quality standards benchmarks that are viewed as minimums for effective preschool education. These are briefly described in Figure 5 which also outlines how the current quality standards benchmarks differ from those used prior to 2016. Table 5 summarizes the quality standards benchmarks met by each program.

**FIGURE 5: CURRENT AND FORMER QUALITY STANDARDS BENCHMARKS**

Alabama, Michigan, and Rhode Island met all ten of NIEER’s quality standards benchmarks. Six other programs met nine benchmarks (Louisiana NSECD, Maine, Mississippi, New Mexico, Oklahoma, and West Virginia). Twelve programs met less than half of the quality standards benchmarks: Kansas’ two programs, Pennsylvania RTL, and Texas met four; Alaska, Arizona, District of Columbia, Pennsylvania K4/SBPK, and Wisconsin 4K met three; and California TK, Florida, and North Dakota met two. The District of Columbia falls short because charter schools serving a substantial part of the population (more than 50%) are not required to meet the district’s preschool standards.

Progress on policies to support quality practices was minimal. Only three states enacted new policies that led to meeting additional NIEER quality standards benchmarks in 2017-2018. Tennessee met two additional benchmarks: Early Learning and Development Standards (ELDS) and Curriculum Supports. Connecticut CDCC also newly met the ELDS benchmark. Oklahoma passed a new law that resulted in the state meeting the staff professional development benchmark for the first time. A few programs moved in the wrong direction, changing policies that resulted in meeting fewer quality standards benchmarks.

Looking at the four benchmarks that focus on process quality (ELDS, Curriculum Supports, Professional Development, and CQIS), only seven programs met all four (Alabama, Georgia, Michigan, New Mexico, Oklahoma, Rhode Island, and South Carolina). For the first time, there were no programs that did not meet any of these benchmarks. However, eight only met one. Figure 6 displays the number of these four benchmarks met by each state.

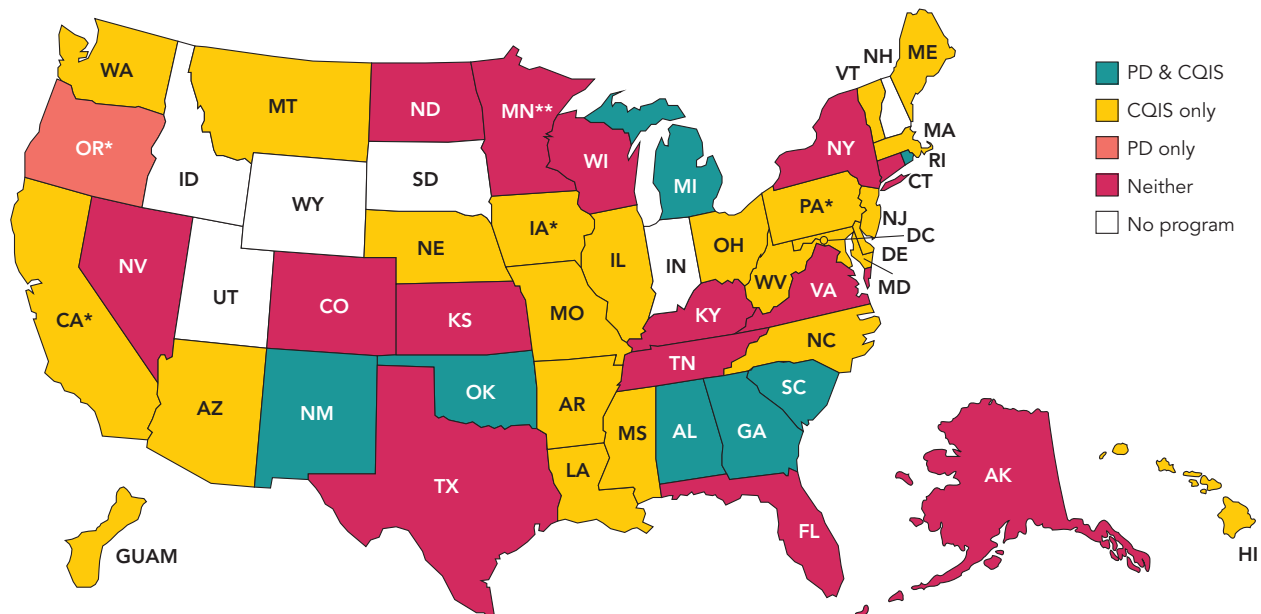

The Professional Development benchmark was met by the fewest programs: only nine (Alabama, Georgia, Michigan, Minnesota Head Start, New Mexico, Oklahoma, Oregon Head Start, Rhode Island, and South Carolina). Thirty-five states met the CQIS benchmark. Figure 7 shows which states met the Professional Development and CQIS benchmarks in 2017-2018.

**FIGURE 6: ONLY SEVEN STATES MEET ALL FOUR PROCESS-QUALITY FOCUSED QUALITY STANDARDS BENCHMARKS**

\* These multi-program states have programs with different quality standards. Data displayed on the map reflect quality standards benchmarks in the largest program in the state.

**FIGURE 7: ONLY SEVEN STATES MEET BOTH THE PROFESSIONAL DEVELOPMENT (PD) AND CONTINUOUS QUALITY IMPROVEMENT SYSTEM (CQIS) QUALITY STANDARDS BENCHMARKS**

\* These multi-program states have programs with different quality standards regarding PD and CQIS. Data displayed on the map reflect quality standards benchmarks in the largest program in the state.

\*\* Minnesota's smaller program meets the PD benchmark, but not CQIS.

## RESOURCES: CAN'T KEEP UP

In 2017-2018, 44 states and the District of Columbia spent more than \$8.15 billion on preschool, topping the \$8 billion mark for the first time. California alone spent more than \$1.85 billion, which is over \$1 billion more than Texas, which had the next largest investment in state-funded preschool. California's spending on its two programs amounts to nearly one-quarter of all state funding for preschool in the nation. Total state funding for preschool rose by \$286 million, adjusted for inflation, a 3.6% increase in spending from 2016-2017. This increase is about 50% larger than last year's 2% increase. Table 6 reports state spending per child and in total, as well as changes in spending from the previous year.

State spending per child was \$5,175. Though this is a nominal increase of \$168 over last year, it is an \$8 decrease when adjusting for inflation, continuing last year's downward trend in real spending. The inflation-adjusted decrease in state spending per child also suggests that states tend to prioritize enrollment expansion over quality.

State spending per child varied widely across the states, with the gap between the highest and lowest even larger than last year. At the high end, the District of Columbia spent \$17,545 per child. New Jersey and Alaska also spent more than \$10,000 per child. At the low end, North Dakota (in its first year of operation) spent only \$777 per child. Nebraska and Kansas also spent less than \$2,000 per child and five other states spent less than \$3,000 per child (Mississippi, Florida, Massachusetts, Colorado, and South Carolina). This is many times more unequal than state spending on K-12 education.

Many states (including some of those with the lowest state spending per child), rely on federal and local sources to provide additional funds for their preschool programs. As stated above, 2014 federal PDG dollars helped support preschool in 18 states, contributing a total of almost \$244 million, including \$102 million that supported either new or enhanced seats in state-funded preschool. As this federal grant is ending in 2019, states need to plan to sustain funding through other means in order to continue serving the same number of children.

Some states provide for local education agencies to share preschool costs through a funding formula, as they do for K-12 education—and these states are more likely to provide salary parity for preschool teachers. Funding from all sources is a better indicator of the total resources available to support preschool (though not a better indicator of a state's financial commitment). Unfortunately, not all states can fully, or even partially, report spending on their programs from local and/or federal sources. As a result, the "all-reported" spending per child numbers in Table 6 underestimate total spending by an unknown amount, and meaningful comparisons across states are limited by differences in reporting.

Local and federal funds added more than \$1.2 billion to state preschool during the 2017-2018 school year, including approximately \$102 million, or 8%, from the 2014 federal PDG. Spending from all reported sources totaled more than \$9.3 billion in 2017-2018, an all time high. All-reported funding increased by almost \$380 million since the previous year, adjusted for inflation. Non-state funds reported include \$504 million in required local funds, almost \$245 million in non-required local funds, and \$461 million in non-TANF federal funds (including 2014 PDG). All reported spending per child was \$5,943, an inflation-adjusted increase of \$28 from 2016-2017. Reported local and federal spending added more than \$5,000 in Nebraska and Rhode Island and more than doubled the funding per child in Maryland, Oklahoma, Maine, Mississippi, and Nebraska.

## FEDERAL PRESCHOOL DEVELOPMENT GRANTS (PDG)

Preschool Development Grants were competitive federal grants awarded to 18 states to (1) build the state’s capacity to provide high-quality preschool or (2) to expand access to high-quality preschool for high-need communities. The PDG program was part of the Preschool for All initiative jointly administered by the Department of Education and the Department of Health and Human Services (HHS). In December 2014, 18 states were awarded federal PDG grants. These states received four years of funding and 2017-2018 was the third full school year during which PDG funding was utilized by states. The recent Every Student Succeeds Act moved PDG administration solely to HHS, and the purpose of PDG Birth through Five grants is to support planning rather than jointly fund direct services for children.

In 2017-2018, states used almost \$244 million in federal PDG funding. In some states, all PDG funding was used to create new seats in state-funded preschool and/or enhance the quality of (including extending the length of the day) existing state-funded preschool seats. In other states, PDG funding supported enrollment of children in preschool programs outside of state-funded preschool, or in a combination of state preschool and other programs. PDG-funded seats were required to meet 12 quality standards including the provision of a full school day. Many of the required PDG standards align with NIEER’s quality standards benchmarks.

In 2017-2018, 42% of PDG funding (approximately \$102 million) was used to serve children in state-funded preschool (either through the creation of new seats or enhancing the quality of existing seats). We estimate that federal PDG supported almost 56,000 children in 2017-2018 through either new seats or quality enhancements. Approximately 35,000 of these children were served in state preschool programs. Figure 8 describes PDG funding and the enrollment it supported in each of the 18 states receiving federal PDG grants.

PDG is an example of an effective federal-state partnership that has helped states provide high-quality preschool to more children. Rhode Island and Alabama are two states that used PDG funding to substantially increase enrollment of 4-year-olds while maintaining high quality. And, using PDG funding, Nevada served 90% of children enrolled in state-funded preschool in school-day programs, up from just 40% the previous year. Yet PDG enrollment is set to sunset soon—the 2018-2019 school year is the last year it will support preschool enrollment, and it has not been renewed by the federal government. Of the 18 states with PDG funding, eight reported that they have a plan to sustain PDG funding using state or other sources; nine reported that they are working on a plan, and one reported that they did not have a plan. It remains to be seen how the loss of federal PDG funding will affect access to high quality preschool for children in low-income families.

**FIGURE 8: FEDERAL PRESCHOOL DEVELOPMENT GRANT (PDG) ENROLLMENT AND SPENDING**

STATE	PDG-SUPPORTED ENROLLMENT					PDG SPENDING		
	Total	Total new seats	Total enhanced seats	New seats in state pre-K	Enhanced seats in state pre-K	Total	Included in state preschool spending*	Plans to sustain funding?

Tennessee	5,643	240	5,403	120	4,077	\$18,225,394	\$1,947,875	In progress
Vermont	448	0	448	0	448	\$4,713,681	\$4,713,681	No
Virginia	3,450	1,441	2,009	0	2,009	\$17,500,000	\$1,158,812	In progress
<b>TOTAL</b>	<b>55,925</b>	<b>23,261</b>	<b>32,664</b>	<b>9,551</b>	<b>25,483</b>	<b>\$243,684,585</b>	<b>\$102,423,253</b>	

\* Federal PDG funding is included in the total, or all-reported, spending numbers.

Note: Data come from the survey of state preschool administrators and states’ PDG Annual Performance Reports. Where possible, PDG funding is reported for the 2017-2018 school year, but some states can only report information for the calendar year.

In some PDG states, NIEER’s calculation of state spending per child can be distorted compared to other years by PDG funding. State spending is divided by total enrollment, which includes children supported entirely and/or partially by federal PDG funds. For PDG states, the all-reported spending per child may better represent the level of support in comparison to prior years (before PDG).

## PROGRESS TOWARD PRESCHOOL FOR ALL

Four states stand out as leaders in providing universal access to preschool for 4-year-olds: The District of Columbia, Florida, Vermont, and Oklahoma. Each of these four states serve more than three quarters of the state's 4-year-olds in state-funded preschool, and approximately 85% of 4-year-olds across state-funded preschool, preschool special education, and Head Start. However, that is where the similarities end.

In addition to ranking 1st in access for 4-year-olds, the District of Columbia also provides nearly universal access to preschool for 3-year-olds (ranking 1st in access for 3-year-olds too), serving all children in school-day programs. D.C. also ranks first in state spending per child (\$17,545) and all-reported spending per child (\$18,580), surpassing the next highest state by more than \$4,000 per child. However, D.C. meets only 3 of NIEER's quality standard benchmarks, in large part because public charter schools have authority to set their own standards. More than 50% of children attend D.C. Public Pre-K in public charter schools. The consequences of this for quality are unclear, but it is cause for concern.

Like D.C., Vermont also provides nearly universal access for 3-year-olds, ranking 2nd. However, state-funding supports a part-day program with a minimum of 10 hours per week. Vermont spends \$6,622 per child, though this increases to \$7,941 when including local and federal funding. An unknown in Vermont is the extent to which most children's participation exceeds the minimum number of hours. The state meets 7 of NIEER's quality standards benchmarks.

Unlike D.C. and Vermont, state funding for preschool in Oklahoma and Florida is for 4-year-olds only. Oklahoma is one of the first states to commit to universal access to preschool for 4-year-olds, doing so in 1980. Nearly 90% of children in preschool attend school-day programs. Oklahoma spends only \$3,644 per child but local and federal funding substantially increase this amount to \$8,024 per child. Oklahoma meets 9 of NIEER's quality standards benchmarks and a rigorous evaluation has shown it to have positive impacts on children's kindergarten readiness.

Florida serves 4-year-olds with parents choosing either a school-year or summer program. Most children attend the part-day school year program. While Florida's program reaches more than three-quarters of 4-year-olds, resources are limited as the state spends only \$2,177 per child with no reported additional local or federal preschool spending. It is therefore unsurprising that Florida meets only 2 of NIEER's quality standards benchmarks. While it is possible that for some children additional funding from the local schools, communities, and other sources enable programs to provide high quality services, it is worrisome that state funding is a small fraction of that in other states offering pre-K for all.

## STATES ON THE MOVE

Despite the limited progress that characterizes the nation as a whole, another set of states stand out as “On the Move.” These states do not yet provide universal access to 4-year-olds, but have committed to improving access, funding, and/or quality standards.

**Alabama** has increased enrollment by over 15,000 4-year-olds, or 26 percentage points, since 2002, while increasing standards and then maintaining high quality. The state more than quadrupled enrollment in the last five years, aided in part by a federal PDG grant as well as strong state leadership. Alabama spent \$13 million more this year than last year on state preschool, further demonstrating a commitment to increasing access and quality. The state has a sustainability plan in place to maintain enrollment as the federal PDG grant runs out. Alabama is one of three states to meet all 10 of NIEER’s quality standards benchmarks, and has conducted evaluations that indicate the program has substantive impacts on long-term achievement and school success.

**California** began offering Transitional Kindergarten (TK) during the 2012-2013 school year to children born between September 2nd and December 2nd who miss the kindergarten cut off. Enrollment in TK has increased steadily, exceeding 100,000 4-year-olds in 2017-2018. Combined with nearly 139,000 children in California’s State Preschool Program, more than 15% of all children in state-funded preschool nationwide are in California. Moreover, the state’s investment in preschool has increased—by more than \$364 million in the last year, resulting in a more than \$1,000 per child increase. California also appears to be moving towards improving program quality, which is greatly needed as the state currently meets just 4.3 of NIEER’s quality standards benchmarks.

**Illinois** has made progress recently after years of stagnation due to budget problems in the state. The Illinois General Assembly appropriated an additional \$50 million to the Early Childhood Block Grant which funds Preschool for All in the state. As a result, in 2017-2018, state spending for preschool increased by over \$40 million. Illinois served an additional 3,000 children and spending per child increased by \$380. Illinois met 8 of NIEER’s quality standards benchmarks. Illinois still has a long way to go to reach its goal of serving all 3- and 4-year-olds, a goal originally slated for 2012, but it seems progress has restarted.

**Maryland** increased spending for the Maryland Prekindergarten Program by \$16 million in 2017-2018 resulting in a \$500 increase in spending per child. In 2014, the Prekindergarten Expansion Act added \$4.3 million annually to increase access for children from families up to 300% FPL. The state has also benefited from a federal PDG award for \$15 million per year. More recently, in 2018, the state passed legislation to sustain the federal PDG funding when it runs out. Maryland's Commission on Innovation and Excellence in Education (Kirwan Commission) is finalizing recommendations to expand access to free, full-day preschool to all 3- and 4-year-olds from families up to 300% FPL. Maryland met 7 of NIEER's quality standard benchmarks. Following the Kirwan Commission report recommendation could boost enrollment growth, which has stagnated in recent years.

**Massachusetts** substantially increased preschool access and funding this year. The state's Chapter 70 program, included in this report for the first time this year, served over 30,000 children in public school-based programs. Enrollment of 3-year-olds in the state increased by 12 percentage points (to 17%) and enrollment of 4-year-olds by 22 percentage points (to 30%). Spending on preschool increased by over \$40 million, though average state spending per child declined by more than \$1,000. The state's programs met an average of 6.2 of NIEER's quality standards benchmarks. Within the state, Boston is a leader in providing high-quality preschool and the mayor recently announced plans to provide \$15 million to provide universal access to high-quality preschool for all 4-year-olds within the next five years.

**Minnesota** began its Voluntary Pre-Kindergarten (VPK) program in 2016-2017 serving 3,106 4-year-olds during its first year of operation. In 2017-2018, the state began the School Readiness Plus (SRP) program and districts could choose to operate either program. Between SRP and VPK (and the state's supplement to Head Start), enrollment in preschool increased this year by more than 3,000 children. In two years, Minnesota went from serving just 1% of 4-year-olds to 10%. Another 1,000 new seats are allocated for next year. Spending also increased by more than \$19 million but spending per child declined slightly. Minnesota met 5.5 of NIEER's quality standards benchmarks. And while VPK teachers are not required to have a BA, they are required to have salary and benefit parity with public K-3 teachers of comparable qualifications.

**Montana** launched their first state-funded preschool initiative (Montana STARS Preschool Pilot) in 2017-2018, enrolling 306 children. The state spent \$2.57 million, or \$8,411 per child during the first year of operation and met 6 of NIEER's quality standards benchmarks. An additional 1,000 4-year-olds were enrolled in high-quality preschool in the state through their federal PDG grant. Montana has a long way to go to increase preschool access, spending, and quality, but early childhood education is finally moving forward.

**Pennsylvania** has four separate state-funded preschool initiatives that together serve 7% of 3-year-olds and 14% of 4-year-olds. Enrollment in preschool increased by 1,694 children, driven by increases for the state's largest, and highest quality program—Pre-K Counts. Spending for preschool increased by almost \$31 million, also driven by Pre-K Counts. Before this year's progress, enrollment had been relatively flat for a decade. Pennsylvania met an average of 7 of NIEER's quality standards benchmarks.

**Washington** has the stated goal of serving all eligible children not served by Head Start in the Early Childhood Education and Assistance Program (ECEAP) by 2022-2023. The state was half-way there by 2016-2017 and served an additional 800 children this year. Though Washington still only serves only 9% of 4-year-olds and 5% of 3-year-olds, the state planned to serve an additional 1,000 children in 2018-2019. Much larger annual enrollment increases will be needed to meet the state's goal for 2022-2023. State spending increased this year by more than \$14 million, resulting in a 7% increase in spending per child. Washington met 8 of NIEER's quality standards benchmarks.

**TABLE 2: STATE PRESCHOOL ACCESS BY STATE**

ACCESS FOR 4-YEAR-OLDS RANK	STATE	PERCENT OF CHILDREN ENROLLED IN STATE PREKINDERGARTEN (2017-2018)			NUMBER OF CHILDREN ENROLLED IN STATE PREKINDERGARTEN (2017-2018)

\* These states serve special education children in their state pre-K programs but were not able to provide the number of children for at least one of their programs. Estimates were used based on the average percent of special education students in state pre-K across all programs and enrollment numbers for each program.

\*\* These states serve special education children in their state-funded Head Start pre-K programs but were not able to provide the number of children. Estimates were used based on the percent of children with IEPs in Head Start in the state as reported by the PIR.

† At least one program in these states was able to report the number of children enrolled in state pre-K and Head Start. Information was used to estimate an unduplicated count of Head Start enrollment.

†† Totals can overestimate public enrollment in state pre-K, pre-K special education, and Head Start as some or all of Head Start children may be served in a state's pre-K program and many states could not report this information.

For details about how these figures were calculated, see the Methodology section and the Roadmap to the State Profile Pages.

For details about how these figures were calculated, see the Methodology section and Roadmap to the State Profile Pages.

\*Vermont could not break out the state, local, and federal spending (other PDG) from the total amount reported. Therefore, the portions of total spending attributable to state, local, and federal sources were estimated based on K-12 spending.

\*\* Wisconsin 4K could not break out the state and local spending from the total amount reported. Therefore, the portions of total spending attributable to state and local sources were estimated based on information from 2016-2017..

\*\*\*1,510 5-year-olds and children with instructional IEPs were served in Iowas' SWVPP program but were funded by sources not reported by the state. Similar to prior years, these children were removed from the per-child spending calculations.

# Special Report: Supporting Teachers in State-Funded Preschool

The 2017-2018 State of Preschool survey included supplemental questions intended to paint a clearer picture of state policies to support lead teachers in state-funded preschool. This is the second time a state preschool workforce supplement has been collected; the first was in the 2014-2015 survey. The new survey includes questions from the prior survey with modifications and additions to further clarify preschool program policies that specifically relate to state-funded preschool teachers in public schools and private provider settings.

The supplemental survey addressed three primary topics. The first is teacher qualifications, salary, and salary parity within state preschool and between preschool and public primary schools. States were asked to report the average salary for state-funded preschool teachers in public school and private settings, as well as if the preschool workforce is covered by a collective bargaining agreement. The second extended this review to fringe benefits including retirement, health care, and paid time off. The third topic is professional development supports including loan forgiveness and scholarships, mentoring, job-embedded professional development, paid planning time, and bonuses. While the tables in this section reflect policies at the program level, the analysis that follows focuses only on the largest program in states that fund more than one preschool program.

### MANY STATES LACK PRESCHOOL TEACHER COMPENSATION POLICIES

As can be seen in Workforce Tables 1 and 2, most states do not have policies supporting compensation parity (including salary and benefits) for the state-funded preschool workforce. Those that do rarely include state-funded preschool teachers in private settings. Most states are silent on whether preschool teachers should be included in collective bargaining agreements, regardless of setting. Where collective bargaining policies are present, they apply only to preschool teachers in public schools.

Most state preschool programs allow preschool teachers to be paid less than early elementary school teachers (K-3), even when preschool teachers must have the same qualifications. Although 25 states require all preschool teachers to hold a bachelor's degree and certification, only Hawaii, New Jersey, Oklahoma, and Rhode Island also require equal starting salaries and salary schedules between all preschool and K-3 teachers. Alabama requires all preschool teachers to hold a bachelor's degree and has policies to ensure equal starting salaries and salary schedules with K-3 teachers, but does not require certification. Ten states require state-funded preschool teachers in both public and nonpublic settings to have a bachelor's degree but have starting salary and salary schedule parity policies only for preschool teachers in public schools. Twelve other states require a bachelor's degree but report no preschool teacher salary parity policies.

The lack of state policies for preschool teacher salary parity is clearly linked to disparities between public school and private sector teachers in state-funded preschool, as well as large gaps between preschool and K-3 teachers. As seen in Workforce Table 3, 28 states reported average preschool teacher salaries. In states requiring the same degree requirements for all teachers, almost 70% (of those with data) reported wage disparities where preschool public school teachers earned up to \$21,136 more than private preschool teachers in the same program. Disparities are even larger when comparing state-funded preschool teachers where a bachelor's degree is required to public school K-3 teachers. Preschool pay gaps of \$20,000 to \$30,000 per year are common.

Though infrequently recognized in state preschool policies, retirement, health care, and paid time off are important aspects of teachers' overall compensation. Workforce Table 2 shows that 21 states report having no policies to ensure comparable benefits with K-3 teachers. Of those states with policies in place, only Minnesota and Tennessee include state-funded preschool teachers in private settings for all reported benefits.

### FEW STATES REQUIRE EQUAL SALARY FOR PRE-K AND K-3 TEACHERS WITH SIMILAR QUALIFICATIONS

states require at least a BA

states require BA  
+ certification

states require BA  
+ certification  
+ salary parity

**WORKFORCE TABLE 1: STATE POLICIES FOR PRESCHOOL TEACHER SALARY PARITY**

### **TEACHER “SUPPORTS” RARELY SUPPORT PROFESSIONAL DEVELOPMENT**

All but one state (Wisconsin 4K) has specific in-service professional development requirements for preschool teachers, and in states with mixed-delivery systems, nearly all have equivalent requirements for teachers in public school and private settings (see Workforce Table 4). Requirements differ across auspice in New Mexico but meet NIEER’s threshold of 15 hours per year in both settings. In D.C., private charter schools can set their own professional development policies, but the requirements for other public schools and nonpublic settings also meet NIEER’s threshold. However, many fewer states have policies requiring equivalent paid professional development time between preschool teachers and K–3 teachers, a gulf that only becomes larger when comparing state-funded preschool teachers in public schools with those in private providers.

Only 18 states have policies requiring K–3 equivalent paid professional development time for public school preschool teachers and nine have policies for preschool teachers in private settings. Similarly, 16 states have policies requiring K–3 equivalent paid time for public preschool teachers for planning, meetings, and reporting, which slides down to 7 states for private provider teachers. A slightly better picture emerges when looking at on-going classroom embedded support for preschool teachers, where 25 states report providing supports for some or all teachers in public schools and 22 for all or some teachers in private settings.

Workforce Table 5 reports on additional state policies to support teachers—scholarships and loan forgiveness, mentoring, coaching, and bonuses. Coaching was by far the most common support (similar to classroom embedded supports more generally), followed by scholarships. A small number of states offered loan forgiveness, primarily to teachers in public schools. Bonuses were offered by just 7 states, one of two benefits that were more likely to be offered to teachers in private providers than public school.

## WORKFORCE TABLE 3: PRESCHOOL TEACHER DEGREE REQUIREMENTS AND SALARY GAPS

## WHAT QUALIFIES AS A STATE PRESCHOOL PROGRAM?

NIEER's *State Preschool Yearbook* series focuses on state-funded preschool education programs meeting the following criteria:

- The program is funded, controlled, and directed by the state.
- The program serves children of preschool age, usually 3 and/or 4 years old. Although programs in some states serve broader age ranges, programs that serve only infants and toddlers are excluded. The program must reach at least one percent of the 3- or 4-year-old population in the state to be included.
- Early childhood education is the primary focus of the program. This does not exclude programs that offer parent education but does exclude programs that mainly focus on parent education. Programs that focus on parent work status or programs where child eligibility is tied to work status are also excluded.
- The program offers a group learning experience to children at least two days per week.
- State-funded preschool education programs must be distinct from the state's system for subsidized child care. However, preschool programs may be *coordinated* and *integrated* with the subsidy system for child care.
- The program is *not* primarily designed to serve children with disabilities, but services may be offered to children with disabilities.
- State supplements to the federal Head Start program are considered to constitute de facto state preschool programs if they substantially expand the number of children served, and if the state assumes some administrative responsibility for the program. State supplements to fund quality improvements, extended days, or other program enhancements, or to fund expanded enrollment only minimally, are not considered equivalent to a state preschool program.

While ideally this report would identify all preschool education funding streams at the federal, state, and local levels, there are a number of limitations of the data that make this extremely difficult to do. For example, preschool is only one of several types of education programs toward which local districts can target their Title I funds. Many states do not track how Title I funds are used at the local level, and therefore do not know the extent to which they are spent on preschool education. Another challenge involves tracking total state spending for child care, using a variety of available sources, such as CCDF dollars, TANF funds, and any state funding above and beyond the required matches for federal funds. Although some of these child care funds may be used for high quality, educational, center-based programs for 3- and 4-year-olds that closely resemble programs supported by state-funded preschool education initiatives, it is nearly impossible to determine what proportion of child care funds are spent this way.

### AGE GROUPINGS USED IN THIS REPORT

Children considered to be 3 years old during the 2017-2018 school year are those who will be eligible to enter kindergarten two years later, during the 2019-2020 school year. Children considered to be 4 years old during the 2017-2018 school year were eligible to enter kindergarten one year later, during the 2018-2019 school year. Children considered to be 5 years old during the 2017-2018 school year were already eligible for kindergarten at the beginning of the 2017-2018 school year.

# Roadmap to the State Profile Pages

## *How to interpret data on the individual state profiles*

For each state with a preschool education program, we include one page with a description of the state’s program, followed by a page with data on the program’s key features, focusing on access, quality, and resources.

The first page for each state begins with two sets of bar graphs. The first set shows percentages of the state’s 3-year-olds and 4-year-olds enrolled in the state preschool program. The second set shows the state’s spending per child enrolled in the state preschool program. Both sets of bar graphs depict changes in state preschool over time, from fiscal year 2002 (which corresponds to the 2001-2002 school year) through fiscal year 2018 (which corresponds to the 2017-2018 school year). Due to space constraints, not all years can be included. Instead, data is included for the years ending in 2002, 2005, 2008, 2011, 2014, 2017, and 2018. Most of the data used for comparison purposes come from NIEER’s previous Yearbooks, although spending figures are adjusted for inflation and represent 2018 dollars. In addition, there are some exceptions in cases where states revised data or reported data differently. The percent of children enrolled is calculated using Census estimates of 3- and 4-year-old children in each state.

Following the bar graphs is a brief narrative providing information on the main features of the state’s program(s). This includes an overview of preschool enrollment, spending and quality; any new developments; details such as the program’s history, the types of settings in which state-funded preschool can be offered, and eligibility criteria. In many cases, the narrative also describes unique or particularly interesting aspects of the state’s program(s) that may not be highlighted elsewhere in the report, as well as expected changes for the 2018-2019 school year. Some descriptive information in the narratives was originally based on information found in the reports *Seeds of Success* from the Children’s Defense Fund and *Quality Counts 2002* from Education Week.

For the 44 states with preschool programs and the District of Columbia, the bottom of the first page of each state profile presents four numbers showing the state’s ranking on the following measures:

- The percentage of the state’s 4-year-old population enrolled in the state’s preschool program (Access Rankings – 4-Year-Olds)
- The percentage of the state’s 3-year-old population enrolled in the state’s preschool program (Access Rankings – 3-Year-Olds)
- State expenditures per child enrolled in the program (Resources Rankings – State Spending)
- All reported expenditures per child enrolled in the program, including local and federal spending as well as state spending (Resources Rankings – All Reported Spending).

The All Reported Spending ranking often provides a more complete picture of preschool spending in states using local and federal funding sources than the State Spending ranking alone. Because states vary in their ability to report spending from these other sources, however, this ranking is imperfect and sometimes underestimates total spending.

The bottom of the first page of each state profile (including Guam) also presents a box indicating the total number of quality standards benchmarks met.

California, Connecticut, Iowa, Kansas, Louisiana, Massachusetts, Minnesota, New Jersey, Oregon, Pennsylvania, and Wisconsin each have more than one distinct preschool education initiative. Therefore, information is presented slightly differently for these states and is explained on their individual profiles.

State profile pages are also given for the five states that did not fund preschool education programs in the 2017-2018 school year. For these states, the table of quality standards is omitted. These profiles do report enrollment data for special education and federally funded Head Start, however. In addition, data on per-child spending for K-12 education and federal Head Start are included. State-funded Head Start spending and enrollment are also provided for no-program states. Profile pages are also included for five U.S. territories that do not offer “state-funded” preschool (American Samoa, Northern Mariana Islands, Palau, Puerto Rico, and the Virgin Islands). For these five territories, a narrative is provided, as is information about Head Start and special education.

The following sections provide an overview of information contained in the data tables on the state profile pages and explain why these elements are important. Data in the tables are for the 2017-2018 school year except where noted.

## ACCESS

The Access data table begins with the total state preschool enrollment, which is the number of children of all ages enrolled at a specific point in time. Following that is the percentage of school districts (or other local education authorities, such as counties or parishes) providing state-funded preschool programs. This information shows the extent of the initiative's geographic coverage. Next, the table shows what, if any, income requirement is used in determining eligibility for the program.

Data on the minimum hours of operation (hours per day and days per week) and operating schedule (academic or full calendar year) are shown as additional measures of access because working parents may find it difficult to get their children to and from programs that operate only a few hours a day or week. The amount of time children participate in a preschool program also matters for other reasons, such as influencing the program's effects on children's development and learning.

The Access data table also shows enrollment of 3- and 4-year-old children in two federally funded programs: preschool special education and Head Start. The Head Start enrollment total includes children in the American Indian/Alaskan Native and Migrant & Seasonal Head Start programs where applicable. The final item in the table reports how many children ages 3 and 4 years old are participating in Head Start through state supplemental funds.

Two Access pie charts illustrate the percentages of the state's 3- and 4-year-olds enrolled in the state-funded preschool program(s), special education, and Head Start. The remaining children are categorized as enrolled in "Other/None." These children may be enrolled in another type of private or publicly funded program (e.g., state-subsidized child care) or may not be attending a center-based program at all. We calculated an unduplicated count for special education enrollment in order to more accurately represent the percentage of children served in the state. The special education percentage in the pie chart represents children who are in special education but not enrolled in Head Start or state preschool programs. For the fourth time, in the 2018 report, we also calculated an unduplicated count for Head Start enrollment in order to avoid double counting Head Start children enrolled in state-funded preschool. For the states that were able to report this information, the Head Start percentage does not include children also enrolled in state-funded preschool.

## QUALITY

State policies in critical areas related to quality are shown in the Quality Standards Checklist table. This year we replace the original 10 policies and benchmarks, dating back to 2002, with an updated set first presented in 2016. For each policy area, states receive a checkmark when their policy meets or exceeds the related benchmark standard. The first column in the Quality Standards Checklist table lists the policy that is being evaluated. The second column presents information about each state program's requirements regarding each policy. The third column lists the benchmark for each policy—that is, the rigor of the state requirement needed to meet the benchmark. The fourth column depicts whether the state preschool program's requirements met the benchmark. A box at the bottom of the fourth column displays the total number of benchmarks met by the state program.

The Quality Standards Checklist represents a set of minimum criteria, established by state policy, needed to ensure the effectiveness of preschool education programs, especially when serving children who are at-risk for school failure. Although the checklist is not intended to be an exhaustive inventory of all the features of a high-quality program, each of these research-based standards is essential for setting the groundwork for high-quality experiences for children. Meeting all 10 standards does not necessarily guarantee that a program is of high quality, but no state's prekindergarten policies should be considered fully satisfactory unless all 10 benchmarks are met. Although programs may routinely engage in practices meeting criteria for quality standards, credit is given only when the practices are explicitly required in state policy.

Judgment inevitably plays a role in setting specific benchmarks based on evidence, as research rarely is completely definitive. We have given more weight to the risk of losing substantial benefits by setting benchmarks too low than to the risk of unnecessarily raising costs by setting benchmarks too high, because research has found the benefits of high-quality programs to be substantially greater than the costs. In other words, there is more to lose when programs are weak or ineffective. Nevertheless, the original benchmarks were still conceived as minimum standards. The current benchmarks raise the bar somewhat.

Based on advances in research over the decade and a half since establishing the original quality standards benchmarks, we have created the current set. These shift the focus somewhat from policies regarding classroom structure toward policies that shape classroom processes associated with positive child developmental outcomes.<sup>1</sup> Specifically, the current benchmarks introduce one new quality standards benchmark and make substantial changes or enhancements to three others. The rationale for each benchmark is fully explained in the Executive Summary. Below, we briefly describe the criteria used to assess whether state policies meet each benchmark.

Early learning and development standards (ELDS) offer programs guidance and ensure that they cover the full range of areas essential to children’s learning and development. To meet the ELDS benchmark, states should have comprehensive ELDS covering all areas identified as fundamental by the National Education Goals Panel<sup>2</sup>—children’s physical well-being and motor development, social/emotional development, approaches toward learning, language development, and cognition and general knowledge. These standards should be specifically tailored to the learning of preschool-age children so that they are appropriate for their level of development. The ELDS should also be vertically aligned with the state’s infant and toddler standards and either K–3 or college- and career-ready standards, as well as horizontally aligned with preschool child assessments (when assessments are required). The state should have supports in place for the ELDS such as professional development and resources. The ELDS should also be sensitive to children’s diverse cultural and language backgrounds.

To meet the curriculum supports benchmark, state policies must provide guidance or have an approval process for curriculum selection and provide support for curriculum implementation, such as training or ongoing technical assistance. States do not need to mandate the use of specific curriculum models to meet the benchmark.

Of the 10 standards we use to gauge the quality of state-funded preschool programs, four involve teacher qualifications or training. State preschool policies are evaluated based on whether programs require teachers in all classrooms to have at least a bachelor’s degree, whether they require teachers to have specialization in preschool education, and whether they require assistant teachers in all classrooms to have at least a Child Development Associate (CDA) or equivalent credential based on coursework. The fourth benchmark requires both teachers and assistant teachers to have at least 15 hours of annual in-service training and individualized, annual professional development plans. In addition, to meet the professional development benchmark, state policies must also require that all classrooms receive coaching, or ongoing classroom-embedded support.

Class size and staff-child ratios are also emphasized in the Quality Standards Checklist, with the expectation that states will limit class sizes to 20 children at the most and have no more than 10 children per classroom teaching staff member.

To meet the screening and referral benchmark, states must require vision and hearing screenings, and at least one additional health screening; as well as referrals when needed. This quality standards benchmark no longer assesses provision of support services. Nearly all state-funded pre-K programs have some requirement for parent engagement and support, and we could not set an evidence-based benchmark that differentiated among them based on effectiveness.

The original Quality Standards Checklist required that programs should provide at least one meal per day. While nutritious meals are important, this requirement has been removed from the Checklist because whether a program met the requirement was largely determined by whether the program operated for a half day or full school day.

The final benchmark focuses on state requirements regarding a continuous quality improvement system (CQIS). This reflects a shift in focus from compliance to state support for continuous improvement. Minimum requirements for a CQIS to meet the benchmark are: (1) the use of data to support planning and support for improvement of policy or practice at local and state levels, and (2) a requirement for annual systematic collection of classroom observation data for use in continuous improvement.

## RESOURCES

The table in the Resources section provides the following information: total state spending for the state preschool program; whether a local match, monetary or in-kind, is required; amount of state Head Start spending; state spending per child enrolled in the program; and all reported (local, state, and federal) spending per child enrolled in the program. These measures show various views of the resources dedicated to state preschool programs, which allows for a more complete picture of a state's commitment to preschool education. For example, a state's total spending may appear low, but may prove to be high relative to the number of children enrolled. On the other hand, a state with a high total funding level may have a low per-pupil spending level if it enrolls a large number of children. In some states, local communities contribute substantial additional funds to state preschool education by using local funding sources or by leveraging federal funding sources. In such cases, the figure that includes all reported spending is the best gauge of the level of available resources, to the extent that information about local and locally allocated federal spending is available. In 2017-2018, several states also utilized federal Preschool Development grant (PDG) dollars which is reflected in the all reported spending number.

The bar chart in the Resources section compares per-child spending in state-funded preschool programs to federal Head Start and K-12 per-child spending. Head Start per-child spending for the 2017-2018 year includes funding only for 3- and 4-year-olds served. Past years' figures have unintentionally included funds for Early Head Start, which made per-child amounts seem artificially higher (although this has been corrected for the past several years). Different colors indicate the different funding sources (local, state, and federal). Separate colors are used to indicate any TANF funds that a state directs toward its preschool initiative. While TANF funds are federal dollars, it is the state's decision to devote these funds to preschool education, as opposed to other purposes. Data on the amounts of local and federal preschool funds are included in the bar chart when available.

# Guide to State Profiles

## ACCESS

Total state pre-K enrollment .....	Number of children of all ages in state pre-K program
School districts that offer state program .....	Percentage of school districts in state where program is offered
Income requirement .....	Maximum family income for program eligibility
Minimum hours of operation .....	Minimum hours per day and days per week program operates
Operating schedule.....	Annual schedule of operation (school/academic year or full calendar year)
Special education enrollment, ages 3 and 4 .....	Number of 3- and 4-year-olds served by the Preschool Grants Program of the Individuals with Disabilities Education Act
Federally funded Head Start enrollment, ages 3 and 4 .....	Number of slots for 3- and 4-year-olds in Head Start funded with federal money
State-funded Head Start enrollment, ages 3 and 4.....	Number of slots for 3- and 4-year-olds in Head Start funded with state money

## QUALITY STANDARDS CHECKLIST

### POLICY

### STATE PRE-K REQUIREMENT

Early learning & development standards .....	Comprehensive, aligned with state infant & toddler and K-3 or college & career ready standards, aligned with child assessments, supported, and culturally sensitive
Curriculum supports .....	Approval process for selecting curricula and supports in place for curriculum implementation
Teacher degree.....	Lead teacher must have a BA, at minimum
Teacher specialized training .....	Lead teacher must have specialized training in a pre-K area
Assistant teacher degree.....	Assistant teacher must have a CDA or equivalent, at minimum
Staff professional development.....	Teacher and assistant teacher must receive at least 15 hours/year of in-service professional development and training, individualized annual professional development plans, and coaching
Maximum class size .....	Maximum number of children per classroom must be 20 or fewer
Staff-child ratio .....	Lowest acceptable ratio of staff to children in classroom (e.g., maximum number of students per teacher) must be 1:10 or better
Screening & referral.....	Screenings and referrals for vision, hearing, and health must be required
Continuous quality improvement system .....	Systematic structured observations of classroom quality and information collected is used for classroom/program improvement at the state and local levels

## RESOURCES

Total state pre-K spending .....	Total state funds spent on state pre-K program
Local match required? .....	Whether state requires local providers to match state monetary contributions to program
State Head Start spending .....	Total state funds spent to supplement Head Start program
State spending per child enrolled .....	Amount of state funds spent per child participating in pre-K program
All reported spending per child enrolled .....	Amount of all reported funds (local, state, and federal) spent per child participating in pre-K program

# State Profiles

# Alabama

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Alabama preschool enrolled 16,051 children in 2017-2018, an increase of 2,019 children from the prior year. State funding totaled \$77,462,050, up \$10,785,777 (16%), adjusted for inflation, since last year. State spending per child equaled \$4,826 in 2017-2018, up \$74 from 2016-2017, adjusted for inflation. Alabama met 10 of 10 quality standards benchmarks.

## WHAT'S NEW

During the 2017-2018 school year, Alabama worked to strengthen their Pre-K through 3rd grade Integrated Approach to Early Learning to expand the success seen from the First Class Pre-K: the Alabama Voluntary Pre-Kindergarten (FCVPK) program to the higher grades. The Alabama Department of Early Childhood Education was awarded a Preschool Development Grant Birth through Five award in 2018 for \$10.6 million to further develop and implement a unified system that includes a comprehensive and coordinated effort to provide from existing federal, state, local and non-governmental resources effective and efficient services to meet the needs of children and parents.

## BACKGROUND

FCVPK is a grant program administered by the Office of School Readiness within the Alabama Department of Early Childhood Education (DECE) under the Governor's Office. The program funds full-day, full-year preschool education for all 4-year-olds in every county in a variety of settings, including public schools, private centers, Head Start programs, community organizations, faith-based centers, colleges and universities, and military agencies. Using a multi-pronged approach, the DECE Office of School Readiness has implemented evidence-based strategies and methods grounded in research literature to assure that all Alabama 4-year-olds have access to excellent early learning classrooms in their communities.

Funding for FCVPK is distributed by the Alabama Education Trust Fund Budget through competitive grants at three levels for pre-K programs: (1) Pre-K Excellence Grants (up to \$45,000) are awarded on a 3-year cycle to help programs meet quality standards and are not intended as the primary source of funding; (2) Pre-K Tiered Grants (\$80,200 to \$92,700 per grant) are awarded on a 3-year cycle to classrooms serving a certain share of the free and reduced-price lunch eligible child population and are primary sources of pre-K funding; (3) New Classroom or Plus Grants of (\$120,000 to \$150,000 per grant) cover costs of materials, equipment, furnishings, and general operating expenses in new classrooms for one year. Grantees must match the awards locally, which can include sliding-scale fee revenue.

FCVPK is also supported by a \$17.5 million federal Preschool Development Grant to expand pre-K access across the state in high-risk areas. The state has sustainability plans for each PDG-funded classroom which entails using state and local funding once the federal grant ends.

All teachers in First Class Pre-K classroom must center their instructional strategies, classroom environment and activities according to the Alabama First Class Frame Work, first implemented beginning in the 2013-2014 academic year. FCVPK requires use of a curriculum incorporating early learning standards aligned to kindergarten content standards and Teaching Strategies GOLD objectives, the required formative assessment tool. All FCVPK classrooms are supported by a coach and monitored for continuous improvement. Alabama requires each classroom to have a lead teacher with a BA plus an early learning credential and, in 2015, introduced policies to support salary parity.

## SPENDING PER CHILD ENROLLED

# Alaska

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Alaska preschool enrolled 315 children in 2017-2018, a decrease of 43 children from the prior year. State funding totaled \$3,200,000, up \$1,131,301 (55%), adjusted for inflation, since last year. State spending per child equaled \$10,159 in 2017-2018, up \$4,380 from 2016-2017, adjusted for inflation. Alaska met 3 of 10 quality standards benchmarks.

## WHAT'S NEW

During the 2017-2018 school year, state legislature approved an additional \$6 million for Alaska Pre-Elementary programs for the next two years (2018-2020). Additionally, the Alaska Department of Education and Early Development was awarded a Preschool Development Grant Birth through Five award in 2018 for \$2.6 million to conduct a statewide needs assessment and a strategic plan that maximizes parental choice. The state also plans to share best practice by revising the 2009 Early Learning Guidelines; expanding provider trainings and coaching activities; developing a trauma-informed module; creating an Alaska version of Strengthening Families training; offering rural author mini-grants; and expediting fingerprint background check process.

## BACKGROUND

Since the 1980s, Alaska has supplemented federal funding for Head Start programs in an effort to enhance school readiness and professional development, and expand opportunities for children and families. In 2009-2010, the state launched the Alaska Pre-Kindergarten pilot program, now known as the Alaska Pre-Elementary program. During the 2017-2018 school year, the program was open to preschool-age children in 11 of the 54 school districts statewide. Alaska has offered a supplement to federally recognized Head Start programs since the 1980s. During the 2017-2018 program year, the state provided \$6.8 million to support Head Start programs in Alaska. The financial support is part of an effort to develop program quality through school readiness activities and professional improvement. The funds also offer admission to additional children and families whenever possible.

In 2015, the state changed the way competitive grants are offered to include two types of grantees. Districts new to the program may apply for a 3-year pre-elementary development grant geared toward strategic planning to begin implementing or supporting existing Pre-Elementary goals. Previously funded grantees may apply for three-year renewal grants to support the program while the districts worked towards sustainability of the program once the state grant funding ends. Development grants are geared toward strategic planning to begin implementing or support existing Pre-Elementary goals until they can be switched to renewal grants.

Budget reductions have continued to be a challenge, as inconsistent funding has affected program implementation and quality. Alaska receives no federal funding for the Pre-Elementary program, though some districts utilize Title IA or Title IC funding for preschool. Funding for the Alaska Pre-Elementary program goes directly to school districts or Head Start agencies. Participating programs may subcontract with public schools, Head Start programs, or private agencies.

The Teaching Strategies assessment was piloted by the state during the 2011-2012 school year. State policy requires all programs to use this tool multiple times throughout the year. In addition to classroom quality observations, Education Northwest is planning to conduct a formal assessment of the programs using the 3-year Developmental grants.

### SPENDING PER CHILD ENROLLED

# Arizona

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Arizona preschool enrolled 5,256 children in 2017-2018, a decrease of 29 children from the prior year. State funding totaled \$21,307,301, up \$1,682,864 (9%), adjusted for inflation, since last year. State spending per child equaled \$4,054 in 2017-2018, up \$341 from 2016-2017, adjusted for inflation. Arizona met 3 of 10 quality standards benchmarks.

## WHAT'S NEW

The Arizona Department of Education was awarded a Preschool Development Grant Birth through Five award in 2018 for nearly \$1.4 million to accelerate its collaborative work on two key Arizona Education Progress Meter goals: first to increase the percentage of 3- and 4-year-old children enrolled in high-quality early learning settings; and second to increase the percentage of 3rd grade students who score Proficient or Highly Proficient on the AzMerit Grade 3 English Language Arts assessment.

## BACKGROUND

Arizona began funding preschool programs in 1991 with supplemental services for preschool, full-day kindergarten, and first through third grade education supported by the federal Early Childhood Block Grant (ECBG) from 1996 until 2010 when that funding ended.

In 2006, Arizona voters earmarked tobacco tax revenues for early childhood development and health programs and created the Early Childhood Development and Health Board, known as First Things First (FTF), to oversee those funds. FTF allocates those funds to communities based on the birth to five population and percentage of young children in poverty. Volunteer regional councils recommend early childhood programs to fund. These public funds can be used for various early childhood programs, including increasing access to early learning. This is accomplished through Quality First (QF) Scholarships serving young children living at or below 200% FPL.

Private child care, public schools, Head Start settings, tribally regulated programs, family child care homes, and faith-based programs are eligible to receive QF Scholarships as long as they participate in Quality First, the state's Quality Improvement and Rating System (QIRS) and have met at least a three-star rating on the QIRS quality standards. QF Scholarship reimbursement rates vary by program type.

Dramatic decreases in tobacco tax revenues in recent years prompted sharp drops in program funding, including Quality First (QF) Scholarships (a 24% drop in tobacco tax revenue between 2007 to 2015, about \$40 million less per year). Regular projections of the tobacco tax revenue indicate this decrease would continue. In response, the FTF Board determined that a budget reset was necessary to ensure consistent funding levels over the next nine to fifteen years.

Arizona also received federal funding to support pre-K programs through the Preschool Development Grant (PDG) in 15 high-needs communities during 2017-2018 and to enhance quality through the state QRIS. As a result of four years of PDG funding, 4,569 children received their early education from providers committed to continuous quality improvement, including 3,486 children (76%) whose early learning provider met or exceeded quality standards. Participation in the state QRIS provides programs with on-site coaching, mental health consultation, child care health consultation, professional development and college scholarships for early educators, along with financial incentives. In addition, FTF collaborates with the state to meet federal match requirements to draw down more than \$184 million per year in federal Child Care and Development Fund (CCDF) funds.

### SPENDING PER CHILD ENROLLED

# Arkansas

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Arkansas preschool enrolled 20,618 children in 2017-2018, an increase of 333 children from the prior year. State funding totaled \$106,500,000 and \$7,500,000 in TANF funds were also used to support program, down \$812,767 (1%), adjusted for inflation, since last year. State spending per child (including TANF funds) equaled \$5,529 in 2017-2018, down \$131 from 2016-2017, adjusted for inflation. Arkansas met 8 of 10 quality standards benchmarks.

## WHAT'S NEW

Beginning with the 2017-2018 school year, the Governor committed an additional \$3 million per year to improve the quality of Arkansas Better Chance (ABC) pre-K programs, including funds to improve and reward teacher quality and to encourage and enhance innovation in the programs. Additionally, the Arkansas Department of Human Services (DHS)/Division of Child Care and Early Childhood Education (DCCEDE) was awarded a Preschool Development Grant Birth through Five award in 2018 for \$3.5 million to address the need for Adverse Childhood Experiences (ACEs) work across the state. Through this grant, the DCCEDE will update the existing needs assessment to identify research gaps on trauma and ACEs, use this data to update the existing strategic plan, and work with identified stakeholders to further the ACEs work in Arkansas by broadening our reach through education on trauma informed care.

## BACKGROUND

The Arkansas Better Chance (ABC) program began in 1991 as part of a statewide education reform initiative, with funding (\$10 Million) earmarked to serve children birth to 5 years old based on family income, developmental, and/or economic risk factors. In 2003, legislation known as Arkansas Better Chance for School Success (ABCSS) set priorities for funding supporting 3- and 4-year-olds in households with incomes up to 200% of the federal poverty level. School districts with 75% or more of students scoring below proficient in literacy and math on the State Benchmark exams, and children in schools designated as "school improvement status" received funding priority. To date, a total of \$111 Million is appropriated for ABC/ABCSS programs which provide pre-K access in a diverse set of mixed-delivery settings.

During the 2017-2018 school year, ABC/ABCSS was administered by the Arkansas DCCEDE which is responsible for operations through a shared governance structure with ADE and the State Board of Education. In 2014, Arkansas was awarded a \$14.9 million federal Preschool Development Grant (PDG) enabling the state to expand quality services to 1,363 additional children and enhance preschool services for 1,509 children already enrolled during the 2017-2018 school year. Arkansas is working on a plan to sustain PDG funding after the grant ends in June 2019.

ABC/ABCSS components intended to ensure quality include teachers with at least a bachelor's degree in public classrooms and an associate's degree in nonpublic classrooms; teacher assistants/paraprofessionals with a minimum of a CDA or equivalent; low child-to-teacher ratios (1:10); health and development screenings; parent involvement and community engagement; statewide evaluation (Work Sampling); an approved list of curriculum aligned with the 2016 Arkansas Child Development and Early Learning Standards; and classroom quality observations to inform technical assistance; and an evaluation of child outcomes through a longitudinal study.

Arkansas provides additional pathways for those working with young children to gain advanced knowledge and skill, such as Birth through Kindergarten Licensure and a Birth through Prekindergarten Teaching Credential. These options provide a route to higher education for preparation of teachers and teacher assistants for all children, birth through age five, including children with special needs.

## SPENDING PER CHILD ENROLLED

# California

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

California preschool programs enrolled 242,297 children in 2017-2018, an increase of 6,646 children from the prior year. State funding totaled \$1,854,832,577, up \$313,106,275 (20%), adjusted for inflation, since last year. State spending per child equaled \$7,655 in 2017-2018, up \$1,113 from 2016-2017, adjusted for inflation. California met an average of 4.3 of 10 quality standards benchmarks.

## WHAT'S NEW

The California Department of Education was awarded a Preschool Development Grant Birth through Five award in 2018 for \$10.62 million to conduct a comprehensive needs assessment to understand the gaps, needs, and barriers to providing quality Early Learning in California. In addition, the funds will be used to develop a 10-year strategic plan with actionable steps to build a comprehensive early learning system that meets the needs of California's children and their families. Additionally, beginning in the 2018-2019 school year, children funded by CSPP and TK funding can be served in the same classroom.

## BACKGROUND

In 2008, the California State Preschool Program Act created the California State Preschool Program (CSPP) by consolidating several early childhood initiatives into one funding stream. CSPP encompasses (1) the CSPP that began in 1965 for children at risk for neglect, abuse, or family violence, or receiving protective services; (2) the 2007 Prekindergarten and Family Literacy Program (PKFLP) which added a literacy component to CSPP; and (3) General Child Care programs.

CSPP provides both part- and full-day preschool to 3- and 4-year-olds with a family income at or below 70% of the state median income. Children at risk of abuse, neglect, or exploitation, receiving protective services, are homeless, or who are receiving CalWORKS cash aid are also eligible.

CSPP awards funding through a competitive application process to school districts, private and faith-based agencies, and Head Start programs. Children are served in either full-day or part-day programs, depending on family eligibility and need. Children must remain eligible throughout the year to receive full-day services but can remain in part-day programs regardless of changes to eligibility. Teachers are required to have California Child Development Associate Teacher Permits, and can receive grants for professional learning. CSPP classrooms receive structured quality observations using the Early Childhood Environment Rating Scale, Revised Edition (ECERS-R) at least once a year.

California Transitional Kindergarten (TK) began during the 2012-2013 school year as a result of the kindergarten age eligibility moving from December 2 to September 1, as part of the state's Kindergarten Readiness Act of 2010. TK is the first year of a two-year kindergarten program for children born between September 2 and December 2. In June 2015 an amendment allowed children turning 5 years old after December 2 to attend TK at the beginning of the school year, at the discretion of the local educational agency. TK follows kindergarten regulations for class size, teacher qualifications, program standards, funding, and serving English language learners. TK is profiled as a separate preschool program in this report.

Both CSPP and TK are guided by the California Preschool Learning Foundations, which are aligned with the Common Core State Standards, California Infant and Toddler Learning and Development Foundations, California Content Standards, and the Head Start Child Development and Early Learning Framework.

Using local and state funding, the California Quality Rating and Improvement System (CA-QRIS) Consortium was established to continue work initiated by the state's federal Race to the Top-Early Learning Challenge (RTT-ELC) grant. The goal is to ensure children have access to high-quality programs so they thrive in their early learning settings and succeed in kindergarten and beyond. The CA-QRIS Consortium focuses on three areas: child development and readiness for school, teachers and teaching, and program and environment quality.

California's overall support for state-funded preschool, including enrollment and funding for both CSPP and TK, is depicted in the first two pages of this state profile. The third page focuses solely on CSPP and the fourth page provides information on TK.

SPENDING PER CHILD ENROLLED

# Colorado

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Colorado preschool enrolled 21,446 children in 2017-2018, a decrease of 176 children from the prior year. State funding totaled \$54,374,180, down \$7,633,514 (12%), adjusted for inflation, since last year. State spending per child equaled \$2,535 in 2017-2018, down \$332 from 2016-2017, adjusted for inflation. Colorado met 5 of 10 quality standards benchmarks.

## WHAT'S NEW

During the 2017-2018 school year, Colorado integrated a P-3 approach to build a comprehensive, high-quality continuum of learning from birth to age 8 that vertically and horizontally aligns to support the unique needs of all children. Additionally, the state revised the Colorado Academic Standards, which are set to be fully implemented by Fall 2020. The state also passed legislation to add 1,000 additional slots to the Colorado Preschool Program (CPP) for the 2018-2019 school year.

The Colorado Department of Human Services was awarded a Preschool Development Grant Birth through Five award in 2018 for \$5.8 million to help build a quality early learning system for children birth to age five and their families. Colorado aims to do this through Colorado Shines Brighter. Colorado Shines Brighter is based on the state's shared vision to ensure all children are ready for school when entering kindergarten. The program will work towards three outcomes: (1) increased access to and choice of quality formal early childhood care and education settings which best meet the needs of each child and family; (2) enhanced informal early childhood care and education environments (parental, friend, family, and neighbor care) to enrich and support children's physical, social, emotional, and cognitive development; and (3) coordination and alignment of Colorado's B-5 early childhood state system to enhance the resources available to families and improve the quality of relationships among families, caregivers, and children.

## BACKGROUND

The Colorado Preschool Program (CPP) launched in 1988 for 3- and 4-year-olds who needed language development support in hopes of lowering school dropout rates and reducing dependence on public assistance. In 1992, CPP became a permanent program and expanded eligibility to young children lacking overall school readiness due to family risk factors, as defined by statute, including eligibility for free or reduced-price meals, being a dual language learner, being in foster care, a family history of abuse or neglect, homelessness, parental substance abuse, or having a teen parent, as well as locally determined risk factors. Four-year-olds must meet at least one risk factor to enroll in CPP, while 3-year-olds are required to meet a minimum of three risk factors.

In the 2017-2018 school year, 98% of the state's 179 school districts offered CPP. CPP slots can serve eligible pre-K students, and Early Childhood At-Risk Enhancement (ECARE) slots can serve either pre-K students or provide full-day services for eligible kindergartners. Two half-day slots can be combined to create full-day opportunities for pre-K children with very high needs. Schools may provide pre-K service by subcontracting with private child care centers, Head Start, or other community-based or public agencies. Funding is awarded competitively with priority given to districts with exemplary implementation plans and/or not currently participating in CPP.

CPP funding is determined by the Colorado school finance formula, with preschoolers receiving half the amount for students in grades 1 through 12. Funds are distributed directly to school districts, which are given a predetermined number of half-day slots to serve eligible children. CPP providers may use additional funding sources, such as federal Head Start money, to extend the program day, supplement services, or provide wraparound care.

## SPENDING PER CHILD ENROLLED

# Connecticut

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Connecticut preschool programs enrolled 14,585 children in 2017-2018, a decrease of 193 children from the prior year. State funding totaled \$111,027,561, down \$8,455,029 (7%), adjusted for inflation, since last year. State spending per child equaled \$7,612 in 2017-2018, down \$473 from 2016-2017, adjusted for inflation. Connecticut met an average of 5 of 10 quality standards benchmarks.

## WHAT'S NEW

The Connecticut Office of Early Childhood (OEC) was awarded a Preschool Development Grant Birth through Five award in 2018 for \$8.59 million to increase the state's ability to link families to needed services through aligning and improving coordination among existing agencies and programs; advance an infrastructure for data sharing across the silos of government to better support families; and design and implement a performance management approach focused on measurable child and family outcomes.

## BACKGROUND

Connecticut serves prekindergarten children in three state-funded programs: School Readiness Program (SR), Child Day Care Contracts (CDCC), and Smart Start, all supervised by the OEC. Non-Head Start SR, CDCC, and Smart Start programs have three years to become NAEYC accredited. Programs not NAEYC accredited or Head Start approved are required to have annual ECERS ratings by state-approved raters to help prepare them for accreditation.

Connecticut has provided funding for CDCC for 40 years through a purchase-of-service contracting system. CDCCs are jointly funded through state funding and the Social Service Block Grant (SSBG) and must operate for at least 10 hours per day. CDCC has been included in this report since 2014-2015, when the program's finance structure was revised in ways that meet the NIEER definition for a state-funded pre-K program. In 2017-2018, CDCC served 3,817 children, including 2,178 preschool-aged children. Eligibility requirements target children with household incomes below 75% SMI for state funding and/or children with household incomes below 200% of the federal poverty level for SSBG funds. CDCC programs, which must be licensed as a child care facility by the state, may operate under the contract held by an elementary or secondary school, nursery school, preschool, day care center, group day care home, family day care home, family resource center, Head Start program, or local or regional board of education.

SR was founded in 1997 to expand access to early childhood programs for 3- and 4-year-olds. Financial support is available to 21 Priority School Readiness districts, as defined by legislation, and 46 Competitive School Readiness municipalities that have at least one school in which 40% or more of children are eligible for free or reduced-price lunch, or fall within the 50 lowest wealth-ranked towns in the state. Any family can apply for School Readiness spaces in designated Priority or Competitive municipalities; however, 60% of children enrolled in each municipality must meet the income guideline of at-or-below 75% of the SMI.

Smart Start was created during the 2014 legislative session to expand publicly funded pre-K for 3- and 4-year-olds in public school settings. Funding is distributed to local or regional boards of education through a competitive grant process. In 2017-2018, 24 school districts received funding to offer, at minimum, a six-hour, five-day-a-week program that operated for at least 1,080 hours per year.

In 2014, Connecticut received a federal Preschool Development Grant-Expansion. In 2017-2018, there were a total of 740 PDG-funded preschool spaces in the state: 439 were new preschool slots that operated separately from the three state-funded preschool programs, 256 spaces were dually funded in combination with SR, and 45 spaces were dually funded with CDCC. These dually funded spaces are included in the programs' total enrollment counts.

Connecticut's overall support for state-funded preschool, including enrollment and funding for CDCC, SR, and Smart Start is depicted in the first two pages of this state profile. The fourth page focuses solely on CDCC, the fifth on SR, and the sixth on Smart Start.

## SPENDING PER CHILD ENROLLED

# Delaware

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Delaware preschool enrolled 845 children in 2017-2018, an increase of 14 children from the prior year. State funding totaled \$6,149,300, down \$211,224 (3%), adjusted for inflation, since last year. State spending per child equaled \$7,277 in 2017-2018, down \$377 from 2016-2017, adjusted for inflation. Delaware met 7 of 10 quality standards benchmarks.

## WHAT'S NEW

In 2017-2018, the state expanded eligibility for Delaware Early Childhood Assistance Program (ECAP)-funded programs to 3-year-olds to move toward a system of continuity within the state.

The Delaware Department of Education was awarded a Preschool Development Grant Birth through Five award in 2018 for \$4.2 million. Through this opportunity, Delaware seeks to understand the experiences of families and early childhood professionals navigating the existing birth to five system through its comprehensive needs assessment. As a result, subsequent policy and identified solutions will be found through an analysis of the true needs of Delaware's children and families. The subsequent strategic plan will renew the state's current five-year early childhood strategic plan that ended in 2018.

## BACKGROUND

The Delaware Early Childhood Assistance Program (ECAP) began in 1994, providing comprehensive early learning services for 4-year-olds eligible for the federal Head Start program. Eligibility expanded to 3-year-olds in 2017-2018.

Modeled after the federal Head Start program, ECAP requires participating programs to follow the federal Head Start Program Performance Standards. Ten percent of enrollment slots are reserved for children with disabilities; the majority of participating children must live in families with incomes at or below 100% FPL, but since 2007 up to 35% of enrolled children may live in households up to 130% of FPL. ECAP grants are available to for-profit child care, Head Start agencies, public schools, community-based organizations, and private and faith-based centers, based on Community Needs Assessment Data determinations.

Additional changes are expected as programs adjust policies, procedures, and practices to meet the new requirements in the 2016 update to the Head Start Program Performance Standards. Delaware is providing professional development and technical assistance to help programs meet these new standards. For example, each ECAP program is awarded a Training/Technical Assistance award to utilize towards individualized program professional development. In addition, every ECAP program is allotted funds for covering on-site training(s) provided by the Delaware Institute for Excellence in Early Childhood (DIEEC).

In 2012, Delaware began requiring all ECAP programs to participate in Delaware Stars, the state quality rating improvement system (QRIS) for early childhood programs, which is aligned with the Head Start Program Performance Standards. All ECAP programs are required to maintain at least a Star 4 rating.

## SPENDING PER CHILD ENROLLED

# District of Columbia

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

District of Columbia preschool enrolled 13,492 children in 2017-2018, an increase of 415 children from the prior year. State funding totaled \$236,712,885, up \$6,821,142 (3%), adjusted for inflation, since last year. State spending per child equaled \$17,545 in 2017-2018, down \$35 from 2016-2017, adjusted for inflation. District of Columbia met 3 of 10 quality standards benchmarks.

## WHAT'S NEW

In 2018, the District of Columbia Council passed the Birth to Three for All DC Act, increasing DC's investment in quality early learning. One provision mandates that DC develop a competitive salary scale for early childhood educators (for FY 2019), to increase salaries for early educators and provide more support for teachers to achieve higher credentials and degrees, including those providing pre-K services. Additionally, the District of Columbia Education Office was awarded a \$10.6 million Preschool Development Grant Birth through Five award in 2018 to strengthen DC's B-5 system of programs and services promoting children's health, well-being and early childhood care and education through more coordination and collaboration to improve outcomes for young children and their families.

## BACKGROUND

Among the first in the nation to invest in early education, DC has offered pre-K since the 1960s. DC began to bolster its investment in pre-K significantly in 2008 through the Pre-K Enhancement and Expansion Amendment Act of 2008 (Pre-K Act). The Pre-K Act expanded the DC public pre-K program to provide quality, universally accessible pre-K via a mixed-delivery system in DC Public Schools (DCPS), public charter schools (PCS), and community-based organizations (CBOs). The Office of the State Superintendent (OSSE) oversees DC's Universal Pre-K Program, including programs in DCPS and CBOs. PCSs are authorized and monitored by the DC Public Charter School Board (PCSB).

Pre-K programs operate five-days-a-week for a minimum of 6.5 hours per day and a minimum of 180 instructional days per year. Given the high availability and participation, this program can be considered universal, as the District of Columbia has a higher percentage of 3- and 4-year olds enrolled than any U.S. state or territory. Funding for public pre-K programs is based on the school funding formula used for K-12 (the Uniform Per Student Funding Formula), with spending per pupil adjusted through a series of weights for at-risk, English Language Learners and students with special needs.

The common measure of quality for pre-K classrooms in DC is the Classroom Assessment Scoring System (CLASS). CLASS data is used by OSSE, in partnership with DC Public Schools and the PCSB, as part of the STAR Framework, which results in a school rating and is included on each school's DC School Report Card. The PCSB also uses CLASS in its Performance Management Framework, which provides all public charter local education agencies with an annual score. OSSE contracts with an external evaluator to conduct annual CLASS assessments in CBOs to determine each facility's rating for Capital Quality, DC's Quality Rating and Improvement System (QRIS).

### SPENDING PER CHILD ENROLLED

# Florida

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Florida preschool enrolled 174,574 children in 2017-2018, an increase of 322 children from the prior year. State funding totaled \$379,969,502, down \$31,389,754 (8%), adjusted for inflation, since last year. State spending per child equaled \$2,177 in 2017-2018, down \$184 from 2016-2017, adjusted for inflation. Florida met 2 of 10 quality standards benchmarks.

## WHAT'S NEW

The Florida Department of Education Office of Early Learning (OEL) was awarded a Preschool Development Grant Birth through Five award in 2018 for \$8.52 million to increase the quality, coordination, alignment and efficiency of the state's programs and services to support families' needs and children's readiness and early grade success, particularly for vulnerable and underserved children.

## BACKGROUND

Florida's Voluntary Prekindergarten (VPK) Education Program was launched in 2005 after voters in 2002 approved a constitutional amendment providing prekindergarten access for all 4-year-olds. Recently, state policy was changed so that, beginning in 2016-2017, parents may postpone enrollment of young 4-year-olds in the VPK program for a year, consequently making 5-year-olds eligible. The program is managed by OEL, which was established as an independent agency affiliated with the state Department of Education.

Age-eligible children are enrolled in either a 300-hour summer program, which every school district is mandated to offer, or a school-year program totaling 540 instructional hours. Teachers in the school-year program are required to have at least a Child Development Associate (CDA) degree or equivalent credential. Teachers in the summer program are required to have a bachelor's degree.

VPK is provided in a variety of settings such as public schools, accredited nonpublic schools, licensed child care centers, accredited faith-based centers, and licensed family child care homes. Most children attend VPK in nonpublic school settings. Regional early learning coalitions monitor programs for compliance and administer VPK, distributing funding based on a fixed hourly rate. Programs are required to meet the Florida Early Learning and Developmental Standards for Four-Year-Olds, which were revised in 2017.

Funding is determined by state legislators after review during the annual state appropriations process. The State Board of Education is required to establish a minimum kindergarten readiness rate to assess delivery of the VPK Education Program by providers and schools. All providers are required to administer the Florida VPK assessment at the beginning and end of the school year, with results used as a pre- and post-assessment to demonstrate learning gains.

Florida's School Readiness Program is a separate initiative, started in 1999 and expanded in 2001 by incorporating two other state programs—the Prekindergarten Early Intervention Program, focusing on young children's health, and the State Migrant Prekindergarten Program, serving 3- and 4-year-olds whose parents are migratory agricultural or fishing industry laborers. The program offers financial assistance for child care to qualified parents. This report focuses solely on the VPK program.

## SPENDING PER CHILD ENROLLED

# Georgia

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Georgia preschool enrolled 80,536 children in 2017-2018, a decrease of 338 children from the prior year. State funding totaled \$355,281,106, down \$5,665,217 (2%), adjusted for inflation, since last year. State spending per child equaled \$4,411 in 2017-2018, down \$52 from 2016-2017, adjusted for inflation. Georgia met 8 of 10 quality standards benchmarks.

## WHAT'S NEW

All lead and assistant teachers in Georgia's Pre-K Program received a 2% salary increase for the 2017-2018 school year. This increase occurred after a prior 2% salary increase for both lead and assistant teachers in 2016-2017 when a new salary scale for lead teachers was also implemented in order to support salary parity between pre-K and K-12 teachers.

Georgia's Department of Early Care and Learning (DECAL) was awarded a Preschool Development Grant Birth through Five award in 2018 for \$2.96 million. The grant will focus on conducting a statewide needs assessment and strategic plan to support increased quality and access of early learning services in the state.

## BACKGROUND

Georgia's Pre-K Program launched in 1992 as a small pilot program and expanded in 1995 to become the nation's first state-funded universal preschool program for 4-year-olds. State lottery revenues generate funding for the program, which is provided in a variety of settings including public schools, private child-care centers, faith-based organizations, Head Start agencies, state colleges and universities, and military facilities. The program also received funding to serve 3,236 children in Summer Transition programs during the 2017-2018 school year.

An evaluation of the program, launched in 2011 by the Georgia General Assembly, is underway. Researchers from the Frank Porter Graham Child Development Institute at the University of North Carolina at Chapel Hill have released data on the first two phases of the study following children who attended Georgia's Preschool Program through kindergarten and first grade, finding demonstrated significant gains for children participating in the program across all domains of learning. Researchers are continuing to follow the representative sample of children through fifth grade. In addition, the DECAL has commissioned studies related to professional development for teachers and the summer transition program.

Budgetary constraints during the 2011-2012 school year prompted the state to adopt a higher student-teacher ratio of 11:1, with maximum class size growing to 22 students, still in effect.

### SPENDING PER CHILD ENROLLED

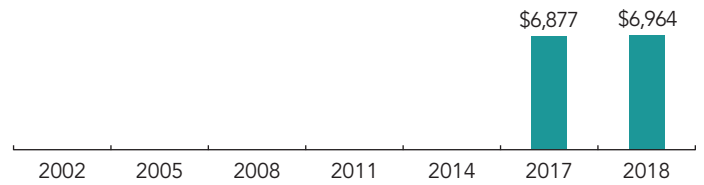

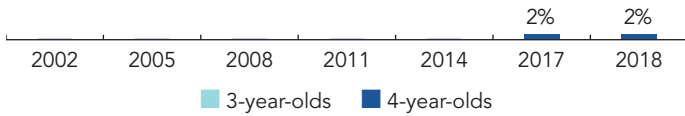

# Hawaii

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

Hawaii preschool enrolled 373 children in 2017-2018, a decrease of 3 children from the prior year. State funding totaled \$2,597,734, up \$11,861 (0.5%), adjusted for inflation, since last year. State spending per child equaled \$6,964 in 2017-2018, up \$87 from 2016-2017, adjusted for inflation. Hawaii met 7 of 10 quality standards benchmarks.

## WHAT'S NEW

In 2017-2018, funds were provided through the legislature to implement an Early Learning Induction Program required for school teams prior to opening a new Executive Office on Early Learning (EOEL) Public Prekindergarten Program classroom. This professional learning opportunity helped school principals prepare to open new classrooms.

EOEL was able to open one additional Public Prekindergarten Program classroom at each of five schools during the 2018-2019 school year, allowing the state to increase access to high quality early learning programs for 100 additional preschool children in Hawaii. In addition, the Hawaii Department of Human Services was awarded \$965,530 under the Preschool Development Grant Birth through Five in December 2018.

## BACKGROUND

EOEL launched Hawaii's first publicly funded pre-K program in 2014-2015 with an initial \$3 million investment. Shortly after, EOEL became attached to Hawaii's Department of Education (DOE) for administrative purposes, though EOEL is not considered a part of the DOE. All of Hawaii's publicly funded pre-K classrooms are in public schools, as mandated by a provision in the Hawaii state constitution barring distribution of public funds to privately run education programs.

In Hawaii, public pre-K programs serve 4-year-old children, with priority given to students considered to be "at-risk," including those from low-income families, now defined as 300% FPL. The EOEL Public Prekindergarten Program is required to operate on the same schedule as public elementary schools, providing services for 1,080 hours a year.

Teachers in the EOEL Public Prekindergarten Program are part of the Hawaii State Teachers Association and, as such, receive salary and benefit parity with teachers in K-12 classrooms. Lead teachers in the Public Prekindergarten Program are required to have a bachelor's degree with licensure, while assistant teachers are required to have an associate's degree. The union contract requires all lead teachers to participate in 21 hours of in-service training each year. At least 60 additional hours per year of EOEL-led professional development in Early Childhood Education are also required for lead teachers in the EOEL Public Prekindergarten Program.

EOEL Public Prekindergarten Program classrooms receive CLASS observations twice a year, and formative child assessments using Teaching Strategies GOLD are conducted throughout the year with three checkpoints. In addition, all programs undergo fiscal monitoring annually and a review of program records more than once per year.

In 2014, Hawaii was awarded a federal Preschool Development Grant (PDG), administered by the Hawaii State Public Charter School Commission. Under the grant, 259 preschool children were served in charter schools across four islands during the 2017-2018 school year. In some PDG classrooms, there is a specific focus on Hawaiian culture instruction including infusion of cultural elements into instruction, Hawaiian immersion programs, classrooms with culture and language embedded throughout instruction, and family engagement activities.

## SPENDING PER CHILD ENROLLED

## NO PROGRAM

Idaho does not have a state funded preschool program, but some TANF money goes to early education. The state invests \$1.5 million in TANF funding to support 162 slots for Head Start. Additionally, in 2018 the Migrant Seasonal Head Start Program received \$550,000 to serve 28 children through an Early Head Start Child Care Partnership Grant in Canyon and Twin Fall Counties.

Idaho's Early Learning eGuidelines cover a broad range of early learning domains, including: motor development, physical well-being, and health; approaches to learning and cognitive development; general knowledge; social-emotional development; and communication, language, and literacy. Approaches to learning, social and emotional development, and cognition domains include guidance through third grade while the other domains cover birth through kindergarten. The eGuidelines are aligned with the Idaho Core Standards, the Head Start Child Outcome Framework, and the National Association for the Education of Young Children (NAEYC) standards. The Idaho State Head Start Collaboration Office, with the Idaho Department of Education, is planning to revise the Early Learning eGuidelines in 2019.

The Idaho STARS project is a multi-agency collaboration and operates in all 7 regions of the state. Idaho STARS encompasses four core function areas: Continuous Quality Improvement, Professional Development System (PDS), Operations and Policy, and Outreach. These core function areas include Idaho's QRIS – Steps to Quality (STQ), Professional Development System Registry, Training Development, Program Assessment, Child Care Health Consultants, Child Care Resource and Referrals, State Licensing and Subsidy support, and Training and Academic Scholarships. Participation in Idaho STARS is voluntary. Steps to Quality enrollment increased by 5% while the PDS Registry enrollment increased by 11% from January 2017 to January 2018.

A coalition of early childhood advocates continues to advance efforts for state investments in high-quality preschool options, and several polls have shown that close to 80% of respondents are supportive of state investments in early learning options for Idaho families. Idaho's early learning supporters continue outreach and education for early learning and have formed Preschool the Idaho Way as an effort to galvanize and organize support. Optimistically, program work is currently underway to offer planning and implementation grants in key Idaho areas that will allow local communities to create and sustain preschools that are centered by a collaborative community effort to increase high-quality preschool seats in their area.

While early learning supporters take meaningful steps to ensure that Idaho meets the demand for early education, the Statehouse has failed to move with the same urgency. The Idaho School Readiness Act is one policy solution that has been proposed to address needed state investments in quality programs for 4-year-old children. During the 2019 session, the bill failed an initial vote to be printed and considered in the House Education Committee, despite having the support of the Chair and Vice-Chair. Although Idaho residents appear to be in favor of early learning investments, the Idaho legislature has failed to pass meaningful legislation to address state-funded preschool.

SPENDING PER CHILD ENROLLED

# Illinois

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Illinois preschool enrolled 75,139 children in 2017-2018, an increase of 3,132 children from the prior year. State funding totaled \$346,097,978, up \$31,330,320 (10%), adjusted for inflation, since last year. State spending per child equaled \$4,606 in 2017-2018, up \$235 from 2016-2017, adjusted for inflation. Illinois met 8 of 10 quality standards benchmarks.

## WHAT'S NEW

The Illinois General Assembly appropriated an additional \$50 million dollars to the Early Childhood Block Grant (ECGB) for the 2017-2018 school year, resulting in an enrollment increase of over 3,500 children. In addition, the Illinois legislature passed legislation addressing chronic absenteeism and suspension and expulsion in preschool programs. Also, the Illinois Office of the Governor was awarded \$3,702,937 under the Preschool Development Grant Birth through Five in December 2018.

## BACKGROUND

The Illinois Prekindergarten Program for At-Risk Children was founded in 1985. The Illinois Preschool for All initiative began in 2006 with the goal of providing pre-K to all 3- and 4-year-olds by 2012. The program operates now in all counties, however, enrollment priority continues to be for children who are considered at-risk. This is due to budget constraints preventing the ability to serve all children who might wish to attend. The program is funded through the state Early Childhood Block Grant (ECBG), which also supports the Prevention Initiative for children birth to age three. ECBG funding must be used to serve children age three or younger, in addition to 4-year-olds.

Funding for Preschool for All is awarded on a competitive basis to public schools, private child care, Head Start, faith-based centers, higher education institutions, and regional offices of education. To be eligible, children must have at least two risk factors, such as low income, history of family neglect, violence, or abuse, exposure to drug or alcohol abuse in the family, developmental delays, low parent education, and homelessness or unstable housing. A second level of priority for Preschool for All enrollment includes families with incomes at 400% of FPL, but currently there is no funding available for programs to serve children at this second priority level.

Preschool for All programs are required to provide instruction in children's home language if there are 20 or more English Language Learners (ELLs) with the same home language enrolled in a program. All pre-K teachers are required to meet bilingual education certification requirements. Language of instruction is determined locally if there are fewer than 20 ELLs with the same home language, however English as a Second Language and other home language supports may be provided.

Federal grant funding has supported enhancement in both preschool program implementation and access in Illinois. The Preschool Development Grant, awarded to Illinois in 2014, supported 2,745 new preschool slots and 2,170 enhanced preschool slots during the 2017-2018 school year. In addition, Race to the Top grants allowed Illinois to implement a Quality Recognition and Improvement System (QRIS) called ExceleRate Illinois, revise and align the Illinois Early Learning and Development Standards with Common Core State Standards and the Head Start Framework, and, in the 2017-2018 school year, implement the Kindergarten Individual Development Survey (KIDS) assessment.

## SPENDING PER CHILD ENROLLED

# Indiana

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## NO PROGRAM

The state of Indiana does not offer a state-funded preschool program according to definitions used in this report. However, Indiana operates a preschool program with the goal of expanding enrollment of low-income 4-year-old children in high-quality early childhood education. The On My Way Pre-K program was signed into law in 2014 to provide grants to eligible, low-income 4-year-old children for qualified early education services, and operated across four counties in 2014-2015. The 2015-2016 school year marked the first full year of the On My Way Pre-K program, and in 2016-2017, the program operated in five counties. During the 2017-2018 school year, 2,423 children were enrolled in On My Way Pre-K, supported by \$4.5 million in state funding as well as \$9.6 million in federal funding. However, beginning with the 2017-2018 school year, eligibility for On My Way Pre-K was targeted towards low income families who were working and/or attending an accredited or certified education or training program. A longitudinal study through third grade of the preschool children supported by these grants and a control group will be completed by Purdue University.

During the 2013 legislative session, the Indiana General Assembly enacted the Early Education Matching Grant (EEMG) through 2018. EEMG has now been consolidated with On My Way Pre-K.

In 2017, the Indiana General Assembly passed new legislation to expand access to preschool to an additional 15 counties by the 2018-2019 school year. The new legislation also makes previously approved EEMG sites eligible to accept On My Way Pre-K grants, adding another eight individual sites in additional counties to the 2018-2019 expansion. Under the new legislation, all pre-K providers must be eligible to accept CCDF funding, providing families with a guaranteed 53-week subsidy period and continuity of care for their child if needed before and after kindergarten, if the family remains eligible at reauthorization.

On My Way Pre-K and EEMG both require services to be delivered via public schools, licensed or registered child care providers who have achieved Level 3 or Level 4 in Paths to QUALITY™, and, for On My Way Pre-K, accredited private schools. The programs have encouraged expansion of the number of Level 3 and Level 4 high-quality programs in Indiana, affecting not only the 4-year-old children enrolled with state funding, but also other children enrolled in these programs. Together, On My Way Pre-K and EEMG also have increased the number of high-quality slots in Indiana for low-income children, who now have an opportunity to both attend pre-K and to be better prepared for kindergarten.

Looking ahead, at the end of 2018, the Indiana Family and Social Services Administration was awarded \$6,895,336 under the Preschool Development Grant Birth through Five competition to build a robust system of coordinated supports for Hoosier families. These supports will increase opportunities for infants and toddlers and there will be greater access to well-educated, trained early educators who can facilitate seamless transitions to early elementary school.

SPENDING PER CHILD ENROLLED

<sup>1</sup> On My Way Pre-K no longer meets the definition of a state-funded preschool program used in this report. However, the state spent \$4,541,885 to enroll 2,423 children in this program.

# Iowa

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

Iowa preschool programs enrolled 27,451 children in 2017-2018, an increase of 1,141 children from the prior year. State funding totaled \$86,997,650, up \$327,735 (0.4%), adjusted for inflation, since last year. State spending per child equaled \$3,354 in 2017-2018, down \$96 from 2016-2017, adjusted for inflation. Iowa met an average of 7.9 of 10 quality standards benchmarks.

## WHAT'S NEW

The Iowa Department of Management was awarded a Preschool Development Grant Birth through Five award in 2018 for \$2.19 million to develop an integrated data system to strengthen professional development networks for the early childhood workforce, inform families of high-quality early childhood programs, and to support the state's strategic planning and decision making.

Funding for Shared Visions was reduced in fiscal years 2018 and 2019 resulting in fewer children served and a reduction in comprehensive services being offered to families. New legislation also passed allowing Statewide Voluntary Preschool Program providers more flexibility in using unspent funds for general (non-preschool) purposes.

## BACKGROUND

Iowa has two state-funded preschool programs: Shared Visions and the Statewide Voluntary Preschool Program (SWVPP). The Shared Visions program has provided services to 3-, 4-, and 5-year-olds since 1989 through competitive grants to public schools, licensed non-profit child care centers, other public non-profit agencies, and Head Start. Shared Visions serves children in part-, school-, or extended-day programs, and all programs are required to meet NAEYC standards.

In 2007, Iowa began the SWVPP to increase 4-year-olds' access to preschool. All 4-year-olds in the state are eligible to attend SWVPP. Funding for SWVPP is based on a school funding formula in which 4-year-olds are funded at 50% of the K-12 student aid amount. SWVPP operates at least 10 hours per week and programs may collaborate with Head Start, other preschool programs, or child care programs to provide the SWVPP and/or offer full-day services.

Both SWVPP and Shared Visions have undergone formal evaluations and an additional evaluation is currently underway for the SWVPP. Internal evaluations are completed annually for the SWVPP. Additionally, as part of the state longitudinal data system, all children enrolled in both programs receive a unique state identification number. Beginning in the 2016-2017 school year, the Differentiated Accountability Model was scaled statewide to offer universal, supplemental, or intensive supports as needed.

An important difference between the two state-funded preschool programs concerns child eligibility. Shared Visions is a targeted program where at least 80% of children are required to meet income eligibility guidelines (family income at or below 130% FPL). Children can also qualify for the program based on other risk factors but may be required to pay a fee based on a sliding scale. Services within this program are provided in 31 locations (through 32 grants), representing less than 7% of school districts. In addition, services are provided in 34 other community-based locations, representing 16 organizations (through 35 grants). In contrast, SWVPP is available in 97% of school districts and all children in the state who turn 4 by September 15 are eligible to attend.

Shared Visions lead teachers are required to have at least a BA degree if they are employed by public schools. Lead teachers employed by nonpublic settings follow NAEYC standards which require at least 75% to have a BA in ECE or a related field. The other teachers are required to have at least an AA degree in ECE or CD. All SWVPP lead teachers must have at least a BA and an Iowa teaching license with an early childhood endorsement.

Iowa's overall support for state-funded preschool, including enrollment and funding for both Shared Visions and SWVPP, is depicted in the first two pages of this state profile. The third page focuses solely on Shared Visions and the fourth page provides information on SWVPP.

## SPENDING PER CHILD ENROLLED

# Kansas

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

Kansas preschool programs enrolled 14,022 children in 2017-2018, an increase of 6,011 children from the prior year. State funding totaled \$14,549,792 and \$4,132,317 in TANF funds were also used to support the program, up \$494,628 (3%), adjusted for inflation, since last year. State spending per child (including TANF funds) equaled \$1,332 in 2017-2018, down \$938 from 2016-2017, adjusted for inflation. Kansas met an average of 4 of 10 quality standards benchmarks.

## WHAT'S NEW

In 2018, Kansas was awarded \$4,482,305 under the Preschool Development Grant Birth through Five to engage in a collaborative effort to shape the state's future direction for early childhood in 2019.

## BACKGROUND

Kansas supports two state-funded prekindergarten programs. The first, established in 1998, is the State Pre-K 4 Year Old At-Risk Program (also known as the State Pre-Kindergarten Program and the preschool-aged at-risk program). The second is the Kansas Preschool Pilot, first offered in the 2006-2007 school year.

The State Pre-K 4 Year Old At-Risk Program, operated by the Kansas Department of Education (KSDE), was available in 197 out of 286 school districts during the 2017-2018 school year, and increased to 216 districts in 2018-2019. To be eligible, four-year-old children must meet at least one of eight risk factors: eligibility for free lunch (130% FPL), academic or developmental delay based upon validated assessments, Limited English Proficiency status, migrant status, a parent lacking a high school diploma or GED, having a single parent, having a teen parent, or having a referral from the Kansas Department for Children and Families.

The Kansas Preschool Pilot (KPP), also operated by the KSDE, is available in 12 sites, serving 14 of 105 counties. KPP was first funded exclusively with tobacco settlement dollars, and then later funded exclusively by TANF in 2016-2017 and 2017-2018. Beginning in 2018-2019, KPP is funded by both tobacco settlement dollars and TANF.

In the 2017-2018 school year, KSDE significantly restructured the program to align with the State Pre-K 4 Year Old At-Risk Program, naming the consolidated application the Early Learning Kansans (ELK) Program. Both programs use the Kansas Early Learning Standards, aligned with Kansas Curricular Standards, and Pre-K providers may participate in both programs. In addition to funding the 12 KPP sites, KSDE used TANF KPP funds to supplement the State Pre-K 4 Year Old-At Risk Program slots. This supplemental funding was provided to 202 of the state's school districts. However, in 2018-2019 KSDE reverted back to administering the programs separately.

Kansas also funds the Kansas Parents as Teachers Program, serving families with children from prenatal to 72 months. This program, also managed by KSDE, offers services through local school districts and coordination with other communities.

Kansas' overall support for state-funded preschool, including enrollment and funding for both the Kansas Preschool Pilot and the State Pre-K 4 Year Old At-Risk Program, is depicted in the first two pages of this state profile. The third page focuses solely on the Kansas Preschool Pilot and the fourth page provides information on the State Pre-K 4 Year Old At-Risk Program.

## SPENDING PER CHILD ENROLLED

# Kentucky

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Kentucky preschool enrolled 21,270 children in 2017-2018, an increase of 1,835 children from the prior year. State funding totaled \$96,011,951, up \$1,226,477 (1%), adjusted for inflation, since last year. State spending per child equaled \$4,514 in 2017-2018, down \$363 from 2016-2017, adjusted for inflation. Kentucky met 7 of 10 quality standards benchmarks.

## WHAT'S NEW

The Commonwealth of Kentucky was awarded a Preschool Development Grant Birth through Five award in 2018 for \$10.62 million to strengthen its comprehensive early childhood system to support all young children and their caregivers, with an emphasis on highly vulnerable children and children in rural or limited accessibility areas of the state.

In 2018-2019, Kentucky began a new monitoring system, the Kentucky Preschool Evaluation System, which is aligned with the Kentucky All STARS quality rating system and requires all programs to be evaluated once every three years during a six-year cycle.

## BACKGROUND

The Kentucky Preschool Program (KPP), launched in 1990, is available to 4-year-olds from low-income families, as well as 3- and 4-year-olds with disabilities. KPP programs operate either half- or full-day, for at least 2.5 hours per day, four or five days per week. Income eligibility increased from 150% to 160% of FPL beginning with the 2015-2016 school year. Children who do not meet state eligibility requirements may still participate, depending on space availability, although they are funded either by the school district or tuition rather than state dollars.

KPP is administered by the Kentucky Department of Education (KDE), Office of Special Education and Early Learning, Division of IDEA Implementation and Preschool, School Readiness Branch. Funds are distributed to school districts through a funding formula. Each of Kentucky's 173 school districts offered KPP services in 2017-2018. School districts may subcontract with private child care centers, Head Start programs, and special education providers to offer preschool services.

The KDE launched a grant program in 2016-2017 to encourage cooperative public/private partnerships between public school districts and child care providers to increase the number of Child Care Assistance Program (CCAP) eligible preschool children served in high-quality, full-day programs. High-quality is defined as achievement of three or more STARS in the state's QRIS.

All early childhood programs that receive public funds, including KPP, participate in the Kentucky All STARS quality rating system. In 2017-2018, the ECERS-3 was used to evaluate preschool classrooms.

## SPENDING PER CHILD ENROLLED

# Louisiana

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

Louisiana preschool programs enrolled 18,911 children in 2017-2018, a decrease of 143 children from the prior year. State funding totaled \$49,120,615 and \$40,492,803 in TANF funds were also used to support program, down \$3,131,792 (3%), adjusted for inflation, since last year. State spending per child (including TANF funds) equaled \$4,739 in 2017-2018, down \$129 from 2016-2017, adjusted for inflation. Louisiana met an average of 8 of 10 quality standards benchmarks.

## WHAT'S NEW

On August 20, 2018, the eligibility requirement for LA 4 and NSECD changed from 185% FPL to 200% FPL in an effort to align pre-K program eligibility with Louisiana's K-12 definition of Economically Disadvantaged. Additionally, the Louisiana Department of Education (DOE) was awarded a Preschool Development Grant Birth through Five award in 2018 for \$7.1 million.

## BACKGROUND

Louisiana has three distinct state funded preschool programs: the 8(g) Student Enhancement Block Grant Program (8(g)), the Cecil J. Picard LA 4 Early Childhood Program (LA 4), and the Nonpublic Schools Early Childhood Development Program (NSECD). The state also provides early childhood education through the federally funded Preschool Expansion Grant. Many school districts also use federal Title I funding to provide high-quality pre-K to 4-year-olds in public schools, typically adopting the same standards as LA4.

The first of Louisiana's state-funded pre-k programs, initially established in 1988, is the 8(g) Student Enhancement Block Grant Program. It was created to compensate for the loss of the Model Early Childhood Program when matching annual appropriations for that program ended. The 8(g) program serves 4-year-old children and priority is given to students who qualify for free or reduced-price lunch. However, if all income-eligible children are served, additional students may be served if they are deemed "developmentally unprepared." During the 2017-2018 school year, 65 out of 70 school districts in Louisiana offer this program, though funds for the program are available to any district that chooses to offer the program.

The largest of the three state-funded pre-K programs, The Cecil J. Picard LA 4 Early Childhood Program (LA 4) (formerly LA 4 and Starting Points), was established in 2001 and serves 4-year-old children in public schools, independent LEA charter schools, and tribal schools. Additionally, programs can subcontract with Head Start programs, private agencies, and non-independent LEA charter schools to deliver the LA 4 program. Teachers in LA 4 are required to have a minimum of a bachelor's degree and meet all the qualifications required for public school teachers, regardless of where the program is located. Eligibility for this program is based on income: all children must be at or below 185% FPL to enroll but as of August 2018, this was raised to 200% FPL. During the 2017-2018 school year, LA 4 was available in 64 of Louisiana's 70 school districts.

Also established in 2001, the Nonpublic Schools Early Childhood Development program (NSECD) supports high-quality pre-K for 4-year-olds in nonpublic settings. Teachers in the NSECD program are required to have a bachelor's degree and assistant teachers are required to have at least a CDA. NSECD has the same eligibility requirements as the LA 4 program. During the 2017-2018 school year, programs operated 15 out of 64 parishes in Louisiana. Funding is available for this program on a competitive basis.

During the 2012 session, the Louisiana Legislature passed Act 3, unifying multiple early childhood initiatives under the DOE and in collaboration with other state agencies. This system contains aligned program standards, a quality rating and improvement accountability system in which all programs receiving state and/or federal funds are required to participate, a unified professional development system, birth-through-five early learning and development standards, and a cross-agency integrated data system.

During the 2016-2017 school year, Louisiana completed its first full year of the unified rating and improvement system for all publicly funded child care, Head Start and pre-K sites. The state shared information for all programs serving children birth to age 5 via a family-friendly website, [www.louisianaschools.com](http://www.louisianaschools.com), which provides comparable information about program quality.

Louisiana's overall support for state-funded preschool, including enrollment and funding for 8(g), LA 4, and NSECD is depicted in the first two pages of this state profile. The third page focuses solely on 8(g), the fourth page provides information on LA 4, and the fifth page on NSECD.

## SPENDING PER CHILD ENROLLED

# Maine

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Maine preschool enrolled 5,648 children in 2017-2018, an increase of 208 children from the prior year. State funding totaled \$19,316,515, down \$104,126 (1%), adjusted for inflation, since last year. State spending per child equaled \$3,420 in 2017-2018, down \$150 from 2016-2017, adjusted for inflation. Maine met 9 of 10 quality standards benchmarks.

## WHAT'S NEW

The Maine Department of Education (DOE) was awarded a Preschool Development Grant Birth through Five award in 2018 for over \$1 million to conduct a needs assessment of programs and services for children birth to age five and their families to determine overlaps and gaps. After the completion of the needs assessment, Maine DOE, Department of Health and Human Services, and multiple stakeholders will create a strategic plan to guide their work in early childhood systems at both the state and local level.

## BACKGROUND

Maine established its Two-Year Kindergarten initiative in 1983 by allocating resources to local districts through the school funding formula. Since 2007, state-funded programs for 4-year-olds have been separately defined as the Public Preschool Program (PPP), still funded through Maine's school funding formula, with distribution of funds to 146 of the 225 school administrative units (SAUs). PPP funds are available to any SAU choosing to offer the program.

PPP classrooms function as either stand-alone programs located in public schools or SAUs partner with community-based child care programs or Head Start agencies. Schools are required to provide a local match to draw down a per-pupil state subsidy. The required local match is part of the school funding formula based on property wealth.

Maine's Public Preschool Program Standards, promulgated as a regulation in December 2014, outlined programmatic changes including reduced child-staff ratio and group size, the use of evidence-based curricula, and child screening and assessments.

In 2014, Maine was awarded a federal Preschool Development Grant: Expansion Grant award. In 2017-2018, the grant supported 504 children through enhancing the quality of existing slots or creating new slots in PPP.

## SPENDING PER CHILD ENROLLED

# Maryland

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Maryland preschool enrolled 31,474 children in 2017-2018, an increase of 92 children from the prior year. State funding totaled \$124,726,542, up \$12,481,963 (11%), adjusted for inflation, since last year. State spending per child equaled \$3,963 in 2017-2018, up \$386 from 2016-2017, adjusted for inflation. Maryland met 7 of 10 quality standards benchmarks.

## WHAT'S NEW

In 2018, HB 1415, "Education - Commission on Innovation and Excellence in Education" was passed by the Maryland legislature and signed into law. This Bill provides state funding beginning in FY 2020 for prekindergarten at the FY 2019 funding level when the federal Preschool Development Grant (PDG) expires. The Maryland Commission on Innovation and Excellence in Education (Kirwan Commission) is also in the process of finalizing recommendations that will expand access to full-day pre-K at no cost for 3- and 4-year olds from families with incomes up to 300% FPL through a mixed-delivery system. Through this plan, full-day pre-K will also be available to 4-year-olds between 300-600% FPL on a sliding scale. The plan will be phased in over 10 years. Also in 2018, the Maryland State Department of Education was awarded \$10.6 million under the Preschool Development Grant Birth through Five.

## BACKGROUND

Maryland created the Extended Elementary Education Program (EEEP) in 1980 as a pilot preschool program in Baltimore City and Prince George's County. The Maryland Prekindergarten Program was started in 2002, giving local boards of education until 2007 to provide pre-kindergarten in public schools to all 4-year-olds from families with incomes at or below 185% FPL. The state provides funding through the school-funding formula.

Maryland enacted the Prekindergarten Expansion Act in 2014, adding \$4.3 million per year to increase access to full-day public pre-K for 4-year-olds from families with household incomes up to 300% FPL. That same year, Maryland was awarded a federal PDG of \$15 million per year to support pre-K for children in families with incomes at or below 200% FPL. That funding supported almost 4,300 children in new and enhanced quality state pre-K slots in 2017-2018.

The Division of Early Childhood (DEC) in the Maryland State Department of Education (MSDE) is responsible for early care and education. Funding for the Maryland Prekindergarten Program is based on the K-12 per pupil amount, prorated for the percent of children attending half- and full-day programs. DEC staff monitor pre-K programs annually using a self-developed checklist. State Pre-K programs are required to participate in Maryland EXCELS, the state's QRIS, and are able to access targeted technical assistance.

Maryland also has 54 "Judy Centers" located in Title 1 school districts that work collaboratively with elementary schools to offer comprehensive, year-round early learning services for children birth to age 6.

Through recommendations from the Kirwan Commission, prekindergarten supplemental grants were provided to local boards of education in which all additional prekindergarten students are provided full-day prekindergarten, for fiscal years 2018 through 2020. The supplemental prekindergarten grant for eligible local boards equals the State share of the per pupil foundation amount multiplied by the number of full-time equivalent eligible children enrolled in a public full-day pre-K program on September 30 of the previous school year. The grant program phases in between 2018 and 2020.

## SPENDING PER CHILD ENROLLED

# Massachusetts

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

Massachusetts preschool programs enrolled 37,788 children in 2017-2018, an increase of 25,131 children from the prior year due in part to the inclusion of the Chapter 70 program for the first time. State funding totaled \$82,931,298, up \$39,867,097 million (93%), adjusted for inflation, since last year. State spending per child equaled \$2,195 in 2017-2018, down \$1,208 from 2016-2017, adjusted for inflation. Massachusetts met an average of 6.2 of 10 quality standards benchmarks.

## WHAT'S NEW

The Massachusetts Chapter 70 preschool program is included in the *State of Preschool* report for the first time this year. The Massachusetts Executive Office of Education was awarded a Preschool Development Grant Birth through Five award in 2018 for \$1.8 million to conduct a comprehensive needs assessment and produce an action-oriented strategic plan improve parent choice and knowledge through an online parent portal, expand and coordinate staff training, and develop an integrated data system to analyze and track child data longitudinally.

## BACKGROUND

In 2005, Massachusetts established the Department of Early Education and Care (EEC) and launched its Universal Pre-Kindergarten (UPK) initiative, which serves children from age 2 years, 9 months, until they arrive at the locally determined kindergarten eligibility age. During the 2017-2018 program year, the state issued \$5.7 million in renewal grants, further supported by \$27.5 million in federal CCDF grants. Individual child eligibility for enrollment in a UPK classroom is not based on income level, although programs must be willing to serve children from families with income levels at or below 85% of the state's median income (SMI).

Public schools, private child care centers, Head Start programs, family child care, and faith-based centers are eligible for UPK grants if they offer full-day, full-year services. UPK is usually a competitive grant program, though renewal grants have been used in recent years.

For the 2017-2018 program year, UPK programs were required to be, at a minimum Granted Level 3 in EEC's Quality Rating and Improvement System (QRIS), to have an income-eligible contract and/or voucher agreement in place and be willing to accept EEC-subsidized or low-income children. UPK programs were also required to be accredited by one of several eligible agencies (including NAEYC), and to collect observational formative assessment data on all children in the UPK classroom(s). As part of the grant requirements, UPK programs must provide the state with: (1) child-level data using either a State Assigned Student Identification or program-specific child ID number and (2) staff information from EEC's Professional Qualifications (PQ) Registry.

Massachusetts also supports preschool enrollment through the Chapter 70 funding stream which is the state's funding formula for K-12 public schools. During 2017-2018, \$77.2 million supported preschool-age children, and a local match is also required. All children are served in public school settings. All children in the state are eligible but local districts can set their own eligibility priorities. The Chapter 70 funding stream previously only supported preschool-age children with an IEP/IFSP but in recent years was expanded to support general education preschool students too. Lead teachers are required to have at least a bachelor's degree and a Preschool through Grade 2 license.

During the 2017-2018 school year, the state used its federal preschool development grant to create 763 new preschool slots for low-income children.

Previously, Massachusetts also supported preschool through the Inclusive Preschool Learning Environments (IPLE) Grant, or the Grant 391 program, which was designed to support inclusive learning environments serving preschool-age children with and without disabilities in high-quality early education and care settings. However, funding for IPLE is being phased out through fiscal year 2020.

Massachusetts' overall support for state-funded preschool, including enrollment and funding for both Chapter 70 and UPK, is depicted in the first two pages of this state profile. The third page focuses solely on UPK and the fourth page provides information on Chapter 70.

### SPENDING PER CHILD ENROLLED

# Michigan

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Michigan preschool enrolled 37,325 children in 2017-2018, a decrease of 1,046 children from the prior year. State funding totaled \$243,900,000, down \$8,377,783 (3%), adjusted for inflation, since last year. State spending per child equaled \$6,534 in 2017-2018, down \$40 from 2016-2017, adjusted for inflation. Michigan met 10 of 10 quality standards benchmarks.

## WHAT'S NEW

The Michigan Department of Education was awarded a Preschool Development Grant Birth through Five award in 2018 for almost \$5.06 million to support communities in universal developmental and behavioral screening and no wrong door frameworks. Michigan will maximize parental knowledge and develop culturally and linguistically appropriate materials for DLLs and add EL supports to the system.

An updated funding formula, informed by a stakeholder group, was used in 2017-2018 to allocate Great Start Readiness Program (GSRP) funding. During 2018-2019, \$1 million was allocated to support programs wishing to change curricula, reducing the number of available slots. A supplemental funding bill in December of 2018 added an additional \$1 million available for supporting programs wishing to change the comprehensive curriculum in use. Additionally, during 2018-2019, the GSRP sought submissions from curricula publishers to be included on their approved curriculum list.

## BACKGROUND

Established in 1985, the GSRP, formerly known as Michigan School Readiness Program, provides preschool education for at-risk 4-year-olds, and is associated with the state's early childhood initiative. Starting in 2013-2014, 90% of families had to be at or below 250% FPL with some exceptions for up to 300% FPL. Any family over-income for the remaining 10% must pay a fee on a locally determined sliding scale unless they are homeless, in foster care, or have an IEP recommending placement in an inclusive preschool setting. GSRP serves the majority of children in school-day programs to better suit the needs of families.

Intermediate School Districts (ISDs) receive financial support directly, but they may distribute funds to local school districts and to providers in community-based settings to offer GSRP. GSRP providers must attain a three-star or higher rating in Michigan's Great Start to Quality tiered rating and improvement system.

Overall ISD funding is determined by the level of poverty in each ISD and a funding formula, with final grantee awards based on both a community needs assessment and a formula component. State funding includes a transportation fund, as well as funding specifically earmarked for recruiting families and increasing public awareness of GSRP, and \$300,000 allocated for ongoing statewide evaluation activities. Funding for GSRP has remained flat since 2015-2016.

## SPENDING PER CHILD ENROLLED

# Minnesota

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

Minnesota preschool programs enrolled 7,672 children in 2017-2018, an increase of 3,069 children from the prior year. State funding totaled \$48,282,734, up \$18,304,678 (61%), adjusted for inflation, since last year. State spending per child equaled \$6,293 in 2017-2018, down \$219 from 2016-2017, adjusted for inflation. Minnesota met an average of 5.5 of 10 quality standards benchmarks.

## WHAT'S NEW

The Minnesota Department of Education was awarded a Preschool Development Grant Birth through Five award in 2018 for \$4.7 million. The grant focuses on finding ways to better serve children facing racial, geographic, and economic inequities so they can be born healthy and thrive within their families and community through aligning and coordinating services and programs that families with young children use to make it easier to get the needed services.

## BACKGROUND

Minnesota financially supplements Head Start and Early Head Start programs in order to increase access to early childhood education for children birth to age five. All state-supported Head Start programs are required to follow the Early Childhood Indicators of Progress (ECIPs), Minnesota's early learning standards birth to kindergarten entrance as well as the federal Head Start Performance Standards.

A second state-funded preschool program, Voluntary Pre-Kindergarten (VPK), was established in 2016-2017 and funded through general education funds as a new grade level with children funded at 0.6 ADM. In 2017-2018, the state legislature created the School Readiness Plus (SRP) program, a variation of VPK. Districts could apply to be a VPK or SRP district; most chose to offer VPK. Funding for SRP will end after the 2019-2020 school year.

Across VPK and SRP, more than 6,000 seats were allocated to 111 school districts (including charter schools) at 191 public sites and 18 charter sites through an application and ranking process based on free and reduced-price lunch percentages of each elementary school in the state. The program operates a minimum of 350 hours per year and serves children who are 4-years-old by September 1.

Voluntary Pre-Kindergarten standards build on existing School Readiness standards by requiring the use of a defined list of curriculum and assessment tools aligned with the early learning standards and Kindergarten Entrance Assessment, paying knowledgeable teaching staff wages comparable to local K-12 teachers, observing teacher-child interactions to guide professional development using an approved instrument, involving parents in transition planning, and measuring the impact of the program through either a self- or state-designed tool.

Minnesota has other state-funded early childhood initiatives that do not meet this report's definitions of state preschool: The Early Learning Scholarships Programs provides scholarships to eligible families with children between the ages of 3 and 4 years old as of September 1 for early childhood programs earning a Three- or Four-Star Parent Aware Rating. The School Readiness Program, under local school district control, provides preschool education and home visits with a focus on health and development screening, parent engagement and community services.

Minnesota's overall support for state-funded preschool, including enrollment and funding for both Minnesota Head Start and VPK/SRP, is depicted in the first two pages of this state profile. The third page focuses solely on Minnesota Head Start and the fourth page provides information on VPK/SRP.

SPENDING PER CHILD ENROLLED

# Mississippi

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Mississippi preschool enrolled 1,840 4-year-olds in 2017-2018, an increase of 530 4-year-olds from the prior year. State funding totaled \$3,976,431, down \$160,966 (4%), adjusted for inflation, since last year. State spending per child equaled \$2,161 in 2017-2018, down \$997 from 2016-2017, adjusted for inflation. Mississippi met 9 of 10 quality standards benchmarks.

## WHAT'S NEW

In 2018, the legislature increased funding for Early Learning Collaboratives from \$4 million to \$6.5 million annually, which will allow the state to serve an additional 1,100 children. These additional funds have been made available via a competitive award process to new school districts interested in providing Early Learning Collaboratives within their community. Programs who receive awards under this funding will engage in planning during the 2018-2019 school year, with implementation beginning in the 2019-2020 school year. Additionally, The Mississippi Community College Board was awarded a Preschool Development Grant Birth through Five award in 2018 for over \$10.6 million to connect early care and learning programs and services across state agencies and private organizations; create a statewide network of early childhood care and education centers structured around two quality designations; provide child care centers with coaching and technical assistance; connect families to a network of human services, education, and workforce; and utilize web and mobile technology to improve delivery of services to families.

## BACKGROUND

The Early Learning Collaborative Act of 2013 established Mississippi's first state-funded, voluntary pre-K program. The Early Learning Collaborative Act provides funding to local communities to establish, expand, support, and facilitate the successful implementation of quality early childhood education and development services. Implementation began in January 2014, with capacity to serve 1,774 children.

Pre-K programs in Head Start centers, licensed child-care facilities, and public, parochial, or private schools formed and maintained stakeholder councils called Early Learning Collaboratives, involving at least two program auspices. Each Early Learning Collaborative designated a Lead Partner, either a public school or other nonprofit entity, with the instructional expertise and operational capacity to manage the Collaborative's Pre-Kindergarten program.

The program was initially funded at \$3 million per year and increased to \$4 million for the 2016-2017 school year. Additionally, in January 2017, four new collaboratives were funded and launched full services for the 2017-2018 school year. As long as the Early Learning Collaborative Act of 2013 is funded, current collaboratives that meet program requirements will continue to be funded.

The voluntary pre-K program intends to improve quality, increase access to high-quality pre-K programs for 4-year-olds and prepare more children to enter kindergarten ready to succeed in school. The state program also supports local programs to improve quality and provide families access to information about pre-K programs. Pre-K programs also implement an integrated, effective system of early childhood curriculum, instruction, assessment, and program evaluation, including curricula aligned with the Mississippi Department of Education's Early Learning Guidelines for Classrooms Serving Three- and Four-Year-Old Children.

## SPENDING PER CHILD ENROLLED

# Missouri

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Missouri preschool enrolled 2,378 children in 2017-2018, a decrease of 268 children from the prior year. State funding totaled \$10,832,676, up \$795,572 (8%), adjusted for inflation, since last year. State spending per child equaled \$4,555 in 2017-2018, up \$762 from 2016-2017, adjusted for inflation. Missouri met 8 of 10 quality standards benchmarks.

## WHAT'S NEW

Funding for the Missouri Preschool Program (MPP) was reduced in FY 2019, resulting in a reduction in programs' operating schedules as well as no new programs. The Missouri Department of Elementary and Secondary Education was awarded a Preschool Development Grant Birth through Five award in 2019 for \$6,500,000. This funding will be used to fund the Stronger Together Missouri project, which aims to implement a comprehensive, statewide, birth-to-kindergarten-entry needs assessment and to update the state's Early Childhood Strategic Plan to enhance long-term sustainability in early childhood services.

## BACKGROUND

MPP, launched in 1998, serves 3- and 4-year-olds in public schools, private child-care centers, and nonprofit agencies. Roughly 90 percent of children are served in programs operated by public schools. Programs are required to work with the local Parents as Teachers program to provide parent education, family visits, group connections, health and development screenings, and services referrals.

MPP is funded through the state's Tobacco Settlement Fund. In the 2017-2018 school year, MPP was offered in 15 percent of school districts statewide. A competitive grant process determines which programs receive MPP funds, with priority given to those serving children with special needs or from low-income families. MPP contracts are for a maximum of five years. Programs require payment on a sliding scale based on criteria including eligibility for free or reduced-priced school lunch.

Program quality is monitored through site visits and classroom assessments using ECERS-3 to support goal setting and professional development. On-site consultation hours are also provided, ranging from 14 to 20 annually, based on program needs. Children enrolled in MPP are assessed using the Desired Results Developmental Profile (DRDP).

## SPENDING PER CHILD ENROLLED

# Montana

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Montana preschool enrolled 306 children in 2017-2018 during the first year of the Montana’s STARS Preschool Pilot program. State funding totaled \$2,573,914 and state spending per child equaled \$8,411. Montana met 6 of 10 quality standards benchmarks.

## WHAT’S NEW

In April 2017, Governor Steve Bullock signed HB 639 authorizing Montana’s STARS Preschool Pilot program. The 2017-2018 program year was the first for implementation of the \$6 million STARS Preschool Pilot, which is Montana’s first state-funded preschool effort. In his proposed 2019-2020 budget, Governor Bullock included a request for \$30 million to build on the success of the Pilot program. The proposal would allow for preschool funding in the school funding formula as well as grants to Head Start and other qualified preschool providers. In addition to these proposals for increased access to state-funded preschool, the Montana Department of Public Health and Human Services was awarded \$4,208,250 under the Preschool Development Grant Birth through Five in December 2018.

## BACKGROUND

The STARS Preschool Pilot served more than 300 children across 11 counties in public schools, Head Start programs, family child care providers and private preschools providing a full-day program. Programs were encouraged to enroll a minimum of 25% high needs students including, but not limited to: children who are low income; children receiving services from IDEA Part B or Part C; children who are engaged in mental health services and supports; children who are enrolled Tribal Members; and children who are homeless or at risk of becoming homeless.

Teachers in both public and private settings are required to hold a bachelor’s degree, and assistant teachers must have at least two years of study in higher education, or an associate’s degree in a related field. In addition to on-going teacher coaching, all classrooms are observed at least annually to ensure program quality. The state also provides professional development in the implementation of Montana’s Early Learning Standards.

The Best Beginnings STARS to Quality Program is Montana’s voluntary quality rating improvement system (QRIS), aligning quality indicators with support and incentives for early childhood programs and early childhood professionals. Licensed preschool programs can participate in the QRIS and earn up to five stars, indicating the level of quality. All private providers participating in STARS Preschool must achieve a level of at least 3 on Montana’s QRIS.

Montana has taken advantage of recent federal grant opportunities to support preschool programs. In 2017-2018, 1,000 children were provided with new or enhanced preschool slots under the state’s federal Preschool Development Grant (PDG). Also, in 2017, Montana received another competitive federal grant through the Striving Readers Comprehensive Literacy Program to support literacy skills among disadvantaged children, and earmarked 15% of grant funding for preschool programs.

## SPENDING PER CHILD ENROLLED

# Nebraska

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Nebraska preschool enrolled 13,938 children in 2017-2018, an increase of 1,074 children from the prior year. State funding totaled \$24,796,908, down \$1,118,482 (4%), adjusted for inflation, since last year. State spending per child equaled \$1,779 in 2017-2018, down \$235 from 2016-2017, adjusted for inflation. Nebraska met 8 of 10 quality standards benchmarks.

## WHAT'S NEW

Funding for the Nebraska Early Childhood Education Program was reduced by two percent in 2017-2018 and four percent in 2018-2019. Legislation was introduced to waive teacher certification for lead teachers. This waiver is in process, but is not finalized yet. Finally, the Nebraska Department of Education was awarded a Preschool Development Grant Birth through Five award of over \$600,000 in 2018 to support a comprehensive needs assessment and strategic planning for the state's early childhood programs and services.

## BACKGROUND

The Nebraska Early Childhood Education Program began as a pilot program in 1992 and expanded in 2001, providing preschool education for children ages three to five. Direct financial support is available on a competitive basis for public schools and education service units that partner with child care centers, Head Start agencies and/or human services agencies. Grantees are required to match 100% of the funding with local and/or federal sources.

At least 70% of the children in the program must have at least one of the following risk factors: disability or developmental delay, living in a home in which English is not the primary language, eligibility for free- or reduced-price lunch (185% FPL), having teen parents or parents who have not completed high school, or having been born prematurely or with a low birth weight. The program seeks to serve children of diverse social and economic characteristics.

Most programs operate 3.5 to 4 hours per day, four or five days per week and must operate for a minimum of 12 hours per week during the school year. All teachers in the Nebraska Early Childhood Education Program are required to have at least a bachelor's degree and training in early childhood education. The program monitors child, program, and family outcomes annually.

While the Early Childhood Education Grant Program has expanded, many districts and education service units fund their early childhood programs without the use of grants, yet follow the same regulations as the grant program.

## SPENDING PER CHILD ENROLLED

# Nevada

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Nevada preschool enrolled 2,171 children in 2017-2018, an increase of 301 children from the prior year. State funding totaled \$8,738,875, up \$3,733,788 (75%), adjusted for inflation, since last year. State spending per child equaled \$4,025 in 2017-2018, up \$1,349 from 2016-2017, adjusted for inflation. Nevada met 6 of 10 quality standards benchmarks.

## WHAT'S NEW

The Nevada Department of Education was awarded a Preschool Development Grant Birth through Five award in 2018 for \$606,515. This funding will allow Nevada to conduct a comprehensive statewide birth through age five needs assessment, followed by in-depth strategic planning. These efforts will result in enhancing parental knowledge and choice of early childhood programs and create smoother transitions between early childhood programs and the school system.

## BACKGROUND

The Nevada State Pre-Kindergarten Program (formerly known as the Early Childhood Education Comprehensive Plan State PreK) began in 2001. Programs operate in both community-based organizations and school districts. During 2017-2018, nearly 98% of enrolled children were served in programs operated by their local school districts, with 59% of school districts providing State PreK-funded programs or classrooms. The Office of Early Learning and Development (ELD) within the Nevada Department of Education (NDE) is responsible for administering multiple early childhood state and federal funding sources including State PreK and the Preschool Development Grant (PDG).

Funding is awarded through competitive grant applications and is based on community need. Enrollment preference is given to 4- and 5-year-olds that are not eligible to attend kindergarten the following year. Children from low-income families, those who are homeless, English Language Learners, or children receiving special education services also are a priority for enrollment. There is no income requirement for program eligibility.

Nevada used its federal Preschool Development Grant to expand pre-K to a full-day for 1,996 of the 2,171 children enrolled in State PreK in 2017-2018. An additional 1,201 children were served with PDG funds, but not enrolled in State PreK. Programs that receive PDG funding are required to participate in the state's QRIS system.

## SPENDING PER CHILD ENROLLED

# New Hampshire

## NO PROGRAM

New Hampshire does not have a state-funded pre-K program, as defined in this report. However, the state provides support for early childhood education through other means. The Department of Health and Human Services (DHHS) licenses early childhood programs and administers preschool scholarships through its child-care assistance program for low-income families. The Department of Education (DOE) oversees early childhood special education programming and progress monitoring of IDEA Part B funded preschool programs. New Hampshire school districts also use Title I funds and local funds to implement voluntary preschool programs in public schools which provides pre-K to approximately 25% of 4-year-olds in New Hampshire.

DOE issues both early childhood education and early childhood special education teacher licensure endorsements for nursery through grade three. The New Hampshire Early Childhood and After School Professional Development System at the New Hampshire DHHS Child Development Bureau offers voluntary endorsements and credentials for professionals serving young children and their families.

The New Hampshire Early Learning Guidelines were introduced in 2005 and address development and learning for children birth through age 5. The guidelines cover multiple domains including approaches to learning, communication and literacy development, social and emotional development, physical development, creative expression and aesthetic development, and health and safety. The guidelines are aligned with New Hampshire's academic standards, as well as New Hampshire Kindergarten Readiness Indicators. The state's new Early Learning Standards, released in 2015, align with the New Hampshire College and Career Ready Standards, by expanding to include emergent literacy, early numeracy, and science and social studies.

The Child Development Bureau within the Department of Health and Human Services administers New Hampshire's Quality Rating and Improvement System. Categories of standards in a proposed revision to the QRIS include: Curriculum, Environment, and Assessment; Engaging Families and Communities as Partners; Early Childhood Administrator and Educator Qualifications; and Measured Standards of Environmental Quality and Teacher-Child Interactions using the Environmental Rating Scale (ERS) and Classroom Assessment Scoring System (CLASS), respectively.

Groups of stakeholders in the state, including DHHS, DOE, and the Spark New Hampshire Early Childhood Advisory Council, are working together to align birth through age 8 efforts including work to strengthen early childhood governance and align professional development for best practices. Together, along with the University of New Hampshire, these groups contributed time and resources to early childhood systems-building in the state and submitted New Hampshire's Preschool Development Birth through Five grant application, which was successfully awarded to the University of New Hampshire in the amount of \$3,843,557.

SPENDING PER CHILD ENROLLED

# New Jersey

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

New Jersey preschool programs enrolled 50,684 children in 2017-2018, a decrease of 2,686 children from the prior year. State funding totaled \$659,789,000, down \$15,986,421 (2%), adjusted for inflation, since last year. State spending per child equaled \$13,018 in 2017-2018, up \$356 from 2016-2017, adjusted for inflation. New Jersey met an average of 8 of 10 quality standards benchmarks.

## WHAT'S NEW

Following the New Jersey legislature's appropriation of an additional \$25 million for pre-K expansion in the 2017-2018 budget, Governor Murphy allocated an additional \$50 million for preschool expansion in the 2018-2019 school year. Thirty-three million dollars was also allocated to maintain the prior year expansion and provide a cost of living increase for all other existing preschool slots. The NJ Department of Education (DOE) is leading a competitive application process to award school districts with this additional funding to serve more children in high-quality, full-day preschool programs. Also in 2018, the New Jersey Department of Children and Families was awarded \$10,620,000 under the Preschool Development Grant Birth through Five.

## BACKGROUND

New Jersey funds three preschool programs. The largest and most intensive of the programs, formerly known as the Abbott Preschool Program, served 42,288 children in 35 of the state's poorest school districts during the 2017-2018 school year. The NJ DOE provides funding to eligible districts to provide the program to all 3- and 4-year-olds who live in those districts and choose to enroll. Private child-care centers or Head Start programs that meet state standards may contract with districts to deliver services.

The Non-Abbott Early Childhood Program Aid (ECPA) program operates in districts where 20% to 40% of children met the criteria for free or reduced-price lunch when the program was established in the late 1990's. In the 2017-2018 school year, 12 of 99 ECPA districts participated in the federal Preschool Development Grant (PDG), which enabled 1,489 children to be served in new or enhanced full-day programs.

The third program, formerly known as the Early Launch to Learning Initiative (ELLI), was established in 2004 as part of New Jersey's efforts to expand access to high-quality prekindergarten education to all 4-year-olds in low-income households across the state. During the 2017-2018 school year, 24 districts offered the ELLI program, though nine of these districts are also part of the ECPA program. One ELLI district participated in the federal PDG in 2017-2018, which enabled 114 children to be served in new or enhanced full-day programs.

Finally, three additional districts, outside of New Jersey's state-funded programs, participated in the federal PDG in the 2017-2018 school year, providing new preschool slots to 320 low-income four-year-old children.

New Jersey's overall support for state-funded preschool, including enrollment and funding for Abbott, ECPA, and ELLI, is depicted in the first two pages of this state profile. The third page focuses solely on Abbott, the fourth page provides information on ECPA, and the fifth on ELLI.

SPENDING PER CHILD ENROLLED

# New Mexico

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

New Mexico preschool enrolled 9,119 children in 2017-2018, a decrease of 1,260 children from the prior year. State funding totaled \$35,702,160 and \$17,600,000 in TANF funds were also used to support program, down \$804,649 (1%), adjusted for inflation, since last year. State spending per child equaled \$5,845 in 2017-2018, up \$632 from 2016-2017, adjusted for inflation. New Mexico met 9 of 10 quality standards benchmarks.

## WHAT'S NEW

The New Mexico Department of Children, Youth and Families (CYFD) was awarded a Preschool Development Grant Birth through Five award in 2018 for \$5.37 million to conduct a statewide needs assessment and strategic plan for early learning in New Mexico. Under the grant, a statewide early learning media campaign will be developed that will also include the ability for families to easily search for early care and education services in their community. Funding will also be used to invest in the early childhood workforce through a variety of professional development strategies to promote evidence-based teaching and intervention strategies with the state's young children and families.

The state has been shifting part-day slots to full-day slots, which has resulted in a decrease of enrollment for 2017-2018. However, for 2018-2019 the state appropriation for NM PreK increased. The New Mexico Public Education Department (PED) increased the number of school districts offering New Mexico PreK and CYFD served additional 3-year-olds and piloted mixed-age classes.

The New Mexico Early Learning Guidelines (NMELGs) were updated in 2018. The New Mexico Preschool Observation Assessment is based on the NMELGs. Both PED and CYFD changed their consultation system in 2017-2018, resulting in more frequent coaching visits and support for teachers, educational assistants, and administrators.

## BACKGROUND

New Mexico PreK (NM PreK) launched in the 2005-2006 school year with the enactment of the PreK Act of 2005. The program is jointly administered by the New Mexico PED and CYFD. PED is responsible for funding and monitoring NM PreK programs provided through school districts, and CYFD for programs operated by community-based organizations and other eligible providers. In the 2017-2018 school year, nearly 70% of school districts offered NM PreK.

NM PreK funding is awarded through a competitive grant process, with priority given to programs in communities with public elementary schools designated as Title I. Two-thirds of enrolled children at each program site must live in the attendance zone of a Title I elementary school, though eligibility is not determined by family income.

The number of hours and days per week vary by program, with a minimum of 450 hours per year. In 2014-2015, the legislature provided limited funding for an Extended-day PreK pilot to double the instructional hours to 900 per school year. In 2017-2018, nearly half of all children enrolled were in Extended-day PreK. Some private or nonprofit facilities use Child Care Subsidy dollars for wrap-around care to assist parents who qualify, or to offer reduced rates for private pay. PreK programs in public schools can extend the day using operational dollars or Title I funds.

### SPENDING PER CHILD ENROLLED

# New York

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

New York preschool enrolled 121,572 children in 2017-2018, a decrease of 1,299 children from the prior year. State funding totaled \$796,699,144, down \$22,195,309 (3%), adjusted for inflation, since last year. State spending per child equaled \$6,553 in 2017-2018, down \$111 from 2016-2017, adjusted for inflation. New York met 7 of 10 quality standards benchmarks.

## WHAT'S NEW

The New York Office of Children and Families was awarded a Preschool Development Grant Birth through Five award in 2018 for \$8.73 million to conduct a comprehensive needs assessment and strengthen the state's mixed-delivery system through activities including coordinated technical assistance, Kindergarten Transition Summits, parent information and engagement strategies, professional learning for early childhood educators, and better data integration, sharing, and tracking.

In 2017-2018, statutory budget language required all districts receiving state funds for pre-K to adopt approved quality indicators within two years, including, but not limited to, valid and reliable measures of environmental quality, the quality of teacher-student interactions, and child outcomes. To document districts' progress in implementing the approved quality indicators, the State Education Department (SED) implemented the NYS Pre-K Self-Assessment. Districts rate themselves as Implemented, In Process, or Not Implemented. For each area marked In Process or Not Implemented, districts develop Quality Improvement Action Plans to assess strengths and weakness in seven areas of program quality. SED staff review the plans and provide feedback to inform technical assistance and monitoring.

## BACKGROUND

In 1998, New York State began its Universal Prekindergarten Program (UPK) with the goal of making prekindergarten education available to all 4-year-olds in the state, regardless of family income or other risk factors. In 2007, the Targeted Prekindergarten Program merged with UPK.

In the 2013-2014 school year, the state continued targeting its pre-K funding, launching the New York State Priority Prekindergarten Program (NYSPPK) offering competitive grants creating new full- and half-day slots for high-need children in low-income school districts and enabling districts to convert half-day slots to full-day. In 2014-2015, the Statewide Universal Full-Day Prekindergarten Program (SUFDPK) competitive grant for full-day pre-K was launched. Most of this funding (\$300 million) went to New York City, resulting in a dramatic boost in access to full-day pre-K slots for 4-year-olds; \$40 million was used to expand full-day programs in the rest of the state. Funding could be used to create additional full-day placements or to convert existing half-day slots to full-day.

In 2015-2016, the Expanded Prekindergarten for 3- and 4-Year-Old Students grant began, creating new slots for both 3- and 4-year-olds. New York also was awarded a federal Preschool Development Grant (PDG) supporting enrollment of additional low-income 4-year-olds in five school districts. In 2017-2018, over 75% of children were served in school-day programs.

The New York Board of Regents adopted revised comprehensive, multi-domain early learning standards in 2011 which are aligned with state K-3 standards, state college and career ready standards, and the New York State Common Core Learning Standards. New statewide P-12 Learning Standards for the Arts will be fully implemented in the 2018-2019 school year. In 2012, the state implemented a voluntary quality rating and improvement system (QRIS) called QUALITYstarsNY.

## SPENDING PER CHILD ENROLLED

# North Carolina

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

North Carolina preschool enrolled 28,385 children in 2017-2018, an increase of 1,366 children from the prior year. State funding totaled \$148,072,222 and \$6,000,000 in TANF, up \$5,726,682 (4%), adjusted for inflation, since last year. State spending per child (including TANF) equaled \$5,428 in 2017-2018, down \$62 from 2016-2017, adjusted for inflation. North Carolina met 8 of 10 quality standards benchmarks.

## WHAT'S NEW

The North Carolina General Assembly has allocated additional funding for the North Carolina Pre-Kindergarten Program (NC Pre-K), including an additional \$9 million each year from 2017-2018 through 2020-2021. These additional funds will be used to increase the number of children served by NC Pre-K.

The North Carolina Department of Health and Human Services was awarded a Preschool Development Grant Birth through Five award in 2018 for nearly \$4.49 million to strengthen North Carolina's early childhood education system. The grant will fund a comprehensive statewide needs assessment and planning process for the state's early learning system, support family outreach and engagement efforts, and provide infant-toddler teachers with training and resources.

## BACKGROUND

North Carolina has provided state-funded pre-kindergarten education since 2001, originally via the More at Four Pre-Kindergarten Program. During the 2011-2012 school year, the program was renamed the North Carolina Pre-Kindergarten (NC Pre-K) Program and administrative control moved from the Department of Public Instruction to the Department of Health and Human Services. NC Pre-K enrolls at-risk 4-year-olds from low-income families who have not participated in other early childhood programs.

NC Pre-K programs are required to operate 6.5 hours per day for 36 weeks each year and serve as many eligible children as funding levels permit. To be eligible, children generally must be in a household with income at or below 75% of the state median income; but up to 20% of children may be in a household with a higher income if they have another designated risk factor. Risk factors include a developmental delay or identified disability, a chronic health condition, or limited English proficiency.

Funding for NC Pre-K includes state general appropriations and North Carolina Education Lottery receipts, federal funds, and a local contribution, with the majority of the funding coming from the state. NC Pre-K classrooms operate statewide in settings such as privately licensed Head Start programs, childcare centers, and public schools. All programs, whether in public or private settings, must earn high-quality ratings under the state child-care licensing system to participate in NC Pre-K and the state's subsidy system.

NC Pre-K sets a maximum class size of 18 4-year-olds and requires a staff-child ratio of 1:9. Lead teachers must have a bachelor's degree and a birth-through-kindergarten license. Classroom staff are required to use approved curricula and formative assessments aligned with the state's early learning standards. Staff conduct ongoing formative assessments to gather information about each child's growth and skill development, as well as to inform instruction.

## SPENDING PER CHILD ENROLLED

# North Dakota

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

North Dakota preschool enrolled 965 children in 2017-2018 during the first year of the Early Childhood Education Grant Program. State funding totaled \$750,000 and state spending per child equaled \$777. North Dakota met 2 of 10 quality standards benchmarks.

## WHAT'S NEW

North Dakota's legislature provided \$3 million in Early Childhood Education Program Grants beginning in the 2017-2018 school year through a biennial appropriation to the state Department of Commerce. North Dakota's 66th Legislative Assembly currently has a bill to move the administration of the Early Childhood Education Grant Program from the North Dakota Department of Commerce to the North Dakota Department of Public Instruction. Also in 2018, the North Dakota Department of Public Instruction was awarded \$2,275,771 under the Preschool Development Grant Birth through Five.

## BACKGROUND

2017-2018 was the second year of North Dakota's Early Childhood Education Program. Programs provide services in 44 districts for at least 400 hours over 32 weeks per year. All programs are also required to incorporate at least 10 hours of research-based parent involvement activities. Four-year-old children who are eligible for free- or reduced-price lunch are eligible for the program.

The North Dakota Department of Public Instruction has other early childhood education initiatives, including two grant opportunities for educators and school districts. Early Childhood Continuing Education Grants of up to \$3,000 every two years enable lead and assistant teachers in pre-kindergarten, Head Start, and child care to enhance their credentials at North Dakota state colleges and universities.

The North Dakota Pre-Kindergarten Content Standards, published in 2013, are voluntary and cover multiple domains including social-emotional development, language development, physical well-being and motor development, approaches toward learning, and cognitive and general knowledge. The standards were aligned with the state's kindergarten standards and the Head Start Child Outcomes Framework. The state sponsors professional development aligned with these standards for early childhood professionals. North Dakota adopted a revised set of standards, the North Dakota Birth – Kindergarten Standards, in 2018.

North Dakota shared a \$6.1 million Enhanced Assessment Grant from the U.S. Department of Education with a consortium of nine other states and three nationally recognized research partners. The consortium's goal is developing a state-of-the-art system for assessing young children's learning, and providing parents, students, teachers, policymakers, and other early childhood stakeholders a critical resource for generating clear information about children's development and learning goals.

## SPENDING PER CHILD ENROLLED

# Ohio

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Ohio preschool enrolled 17,913 children in 2017-2018, an increase of 1,971 children from the prior year. State funding totaled \$71,672,000, up \$5,713,617 (9%), adjusted for inflation, since last year. State spending per child equaled \$4,001 in 2017-2018, down \$136 from 2016-2017, adjusted for inflation. Ohio met 5 of 10 quality standards benchmarks.

## WHAT'S NEW

Ohio was awarded a Preschool Development Grant Birth through Five award in 2018 for nearly \$10.49 million to increase access to quality early childhood care and education; raise awareness about the Step Up to Quality program, the state's five-star tiered quality rating and improvement system (QRIS) for high-quality child care programs; and increase participation of children in quality settings.

## BACKGROUND

The Ohio Public Preschool Program (PSP), established in 1990 following a four-year pilot program, strives to ensure children have access to quality programs through public preschool and publicly funded child care. All types of programs have access to both public preschool and child care funds. This report focuses on the Ohio Department of Education's publicly funded Early Childhood Education (ECE) program, excluding publicly funded child care and Head Start programs. In 2016-2017, grantees focused on serving as many 4-year-old children as possible, with a new policy that allowed 3-year-old children eligibility only if spots could not be filled by 4-year-old children by October 1.

Ohio is operating its publicly funded programs under common program and child standards, so a significant number of preschool-aged children receive services through a combination of these preschool programs, which are required to be highly rated. All Ohio ECE programs are required to receive 3 or more stars on the state's QRIS.

Program sites are monitored annually for quality via desk audits, internal monitoring materials, proposal of plans and documentation, along with annual licensing visits, classroom observations, and child assessments. Ohio began using an expanded tiered QRIS in 2013-14 for all state programs, including public preschool and child care programs. Programs are required to submit annual documentation of desk audits and program plans, and receive on-site visits, including classroom observations every two to three years based on the rating level of the program.

## SPENDING PER CHILD ENROLLED

# Oklahoma

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Oklahoma preschool enrolled 39,807 four-year-olds in 2017-2018, an increase of 503 four-year-olds from the prior year. State funding totaled \$145,038,018, down \$4,395,047 (3%), adjusted for inflation, since last year. State spending per child equaled \$3,644 in 2017-2018, down \$158 from 2016-2017, adjusted for inflation. Oklahoma met 9 of 10 quality standards benchmarks.

## WHAT'S NEW

Oklahoma teachers have a new minimum salary scale beginning in the 2018-2019 school year. The Oklahoma Partnership for School Readiness Foundation, Inc. was awarded a Preschool Development Grant Birth through Five award in 2018 for \$3.12 million to complete the following: conduct a needs assessment, create a coordinated early childhood plan, and develop and expand knowledge of EC programs as well as communication for parents and the community (Ready to Learn). This award has also enabled Oklahoma to increase capacity of Early Childhood providers through the following: Program for Infant Toddler Care (PITC) training, Mental Health Consultation services for underserved areas, LENA (speech program) services and training with Tribal Collaboration (Creek), and classroom coaching and mentoring.

## BACKGROUND

Oklahoma launched its Early Childhood Four-Year-Old Program in 1980, intending to serve all 4-year-olds in the state. In 1990, the program received statewide funding for 4-year-olds eligible for the federal Head Start program, but local areas could choose to serve additional 4-year-olds through local funds or tuition. In 1998, Oklahoma became the second state in the nation to provide free preschool for all 4-year-olds, with 99% of school districts providing the program.

Public school districts receive funding for the Early Childhood Four-Year-Old Program through the state school finance formula. A per-pupil rate, calculated using the age of the child and the length of the program day, is used to repay districts. Most programs now are full-day, with some schools collaborating with other agencies and programs to provide extended-day services.

Districts can support community providers by placing public school teachers in child-care centers, Head Start settings, tribal early childhood centers, universities and community-based programs. Children in these sites receive the same services as children in public school locations and are considered public school enrollees.

In 2016, Oklahoma adopted the Oklahoma Academic Standards which are vertically aligned pre-K to 12th grade standards. The Oklahoma State Department of Education is providing continuous professional development and support to help teachers and administrators successfully implement these standards to strengthen pre-K programs and provide effective instruction and learning beyond the early years.

During the 2017-2018 school year, the Integrating Professional Learning Focus was piloted in all school districts in the state. As part of this new law, all teachers are required to have individualized professional development plans and to receive coaching.

## SPENDING PER CHILD ENROLLED

<sup>1</sup> An additional 1,917 3-year-olds were in Oklahoma Early Childhood Four-Year-Old classrooms but were not funded with state dollars.

# Oregon

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Oregon preschool enrolled 9,477 children in 2017-2018, an increase of 21 children from the prior year. State funding totaled \$91,524,958 down \$1,717,995 (2%), adjusted for inflation, since last year. State spending per child equaled \$9,658 in 2017-2018, down \$203 from 2016-2017, adjusted for inflation. Oregon met an average of 7.5 of 10 quality standards benchmarks.

## WHAT'S NEW

During the 2017-2018 program year, Oregon Preschool Promise was able to leverage the funding to maximize economy of scale in the second year of implementation. This enabled the state to serve an additional 100 children. Additionally, there is a possibility of expanding the program for the 2019-2020 program year. Finally, the Oregon Department of Education was awarded a Preschool Development Grant Birth through Five award in 2018 for nearly \$4.26 million to accelerate goals within the Governor's Children's Agenda and the Oregon Early Learning Council's recently adopted strategic plan, Raise Up Oregon: A Statewide Early Learning System Plan.

## BACKGROUND

Oregon has two state-funded preschool programs: the Oregon Head Start Prekindergarten (OHSP) program, established in 1987, and Preschool Promise launched in 2016. OHSP and Preschool Promise are both overseen by the Oregon Department of Education: Early Learning Division.

OHSP provides comprehensive child and family development services for 3- and 4-year-old children from low-income families through a state-federal partnership between the Oregon Department of Education and Region X Office of Head Start. OHSP is funded using the state general fund to serve additional Head Start-eligible children. Funding is awarded through a competitive process to a variety of organizations not receiving federal Head Start funding, such as public schools, private agencies, community action agencies, government agencies, and colleges and universities. OHSP programs must follow federal Head Start Performance Standards and the Head Start Early Learning Outcomes. Eligibility for OHSP also follows federal Head Start requirements.

Preschool Promise is a mixed-delivery program for children from families with incomes up to 200% of the federal poverty level. Funding for Preschool Promise goes directly to Early Learning Hubs which can subcontract with public schools, child care, Head Start, Relief Nurseries, Education Service Districts, and other community-based organizations. Programs participating in Preschool Promise are required to achieve at least a 4- or 5- star-rating in Spark, Oregon's quality rating and improvement system or request a limited time waiver while they build capacity.

Both OHSP and Preschool Promise employ two sets of early learning standards: The Head Start Early Learning Outcomes Framework, which is currently being aligned with Common Core State Standards for K-12, and the Oregon Early Learning and Kindergarten Guidelines.

## SPENDING PER CHILD ENROLLED

# Pennsylvania

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

Pennsylvania preschool enrolled 30,527 children in 2017-2018, an increase of 1,694 children from the prior year. State funding totaled \$240,085,217, up \$23,741,761 (11%), adjusted for inflation, since last year. State spending per child equaled \$7,865 in 2017-2018, up \$361 from 2016-2017, adjusted for inflation. Pennsylvania met an average of 7 of 10 quality standards benchmarks.

## WHAT'S NEW

The Commonwealth of Pennsylvania was awarded a Preschool Development Grant Birth through Five award in 2018 for \$10.55 million to support Pennsylvania's Office of Child Development and Early Learning (OCDEL) in building an infrastructure to move OCDEL's strategic plan forward. The priority populations for initiatives funded by the grant are infants and toddlers, vulnerable children, children transitioning to kindergarten, migrant families, children with special needs, and the Early Childhood Education workforce.

## BACKGROUND

The Pennsylvania Department of Education oversees and conducts fiscal monitoring for four pre-kindergarten programs.

The Ready to Learn (RTL) Block Grant (formerly known as the Education Accountability Block Grant Program) is the smallest program of Pennsylvania's four pre-K programs. Launched in 2004, this program is funded through the school aid formula with 75% of funds targeted to children who have not achieved proficiency on the PA System for School Assessment test. School districts can opt to offer this program or choose from a list of other services.

The Pennsylvania Head Start Supplemental Assistance Program (PAHSSAP), launched in 2004, is the second largest program, and provides extended-day services for children attending federally funded Head Start programs, as well as additional Head Start slots. Programs must meet federal Head Start Performance Standards and programs in child care centers must participate in the Pennsylvania Quality Rating and Improvement System (QRIS). PAHSSAP programs are required to use CLASS, ECERS, or another locally selected tool to annually conduct structured observations of classroom quality. The program is monitored and administered by the OCDEL, which is accountable to the Pennsylvania Departments of Education and Human Services.

The Pennsylvania Four-Year-Old Kindergarten (K4) and School-based Prekindergarten programs (SBPK), the longest-running of the state's pre-K programs, are financed through the state's general fund. K4 launched in the 1990s as "kindergarten for four-year-olds" and funding now is available to any districts wishing to offer the programs, but enrollment is low. Policy decisions are decentralized to the local school district level.

The Pennsylvania Pre-K Counts Program (PAPKC) enrolls the most children of the four state pre-K programs and is available in the most school districts statewide. The program, launched in 2007 specifically to expand access to high-quality pre-K, can enroll children up to two years before they are eligible for kindergarten. Children living in households with incomes up to 300% FPL are eligible for PAPKC, although school districts may set lower income thresholds. A variety of programs—Head Start, child care, private schools and public school districts—are eligible to apply for funding awarded through competitive grants every five years. In the 2015-2016 school year, PAPKC guidelines were updated to require a meal for part-day programs and comprehensive developmental and health screenings and referrals. Site monitoring is conducted annually by program specialists and PAPKC programs are required to have an ECERS assessment annually, which may include self-assessments.

Pennsylvania's overall support for state-funded preschool, including enrollment and funding for all four programs, is depicted in the first two pages of this state profile. The third page focuses solely on RTL, the fourth page provides information on PAHSSAP, the fifth on K4/SBPK, and the sixth on PAPKC.

## SPENDING PER CHILD ENROLLED

# Rhode Island

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Rhode Island preschool enrolled 1,080 children in 2017-2018, an increase of 72 children from the prior year. State funding totaled \$6,240,000, up \$913,563 (17%), adjusted for inflation, since last year. State spending per child equaled \$5,778 in 2017-2018, up \$494 from 2016-2017, adjusted for inflation. Rhode Island met 10 of 10 quality standards benchmarks.

## WHAT'S NEW

The Rhode Island Department of Human Services was awarded a Preschool Development Grant Birth through Five award in 2018 for \$4.19 million to support development, planning, and coordination of the State's B-5 Early Learning Childhood System.

## BACKGROUND

The Rhode Island State Pre-Kindergarten Program, launched in 2009, is provided in public schools, Head Start programs, and private child care. All children who turn 4 years old by September 1 and are living in participating communities are eligible for the program, but enrollment is determined by lottery.

The Rhode Island Department of Education oversees the pre-K program, which is funded through the Rhode Island school funding formula, approved in 2010. Using a phased-in approach, \$10 million is to be invested over 10 years to expand access to high-quality pre-K, beginning with communities with a high proportion of children eligible for free or reduced-price lunch.

In 2014, Rhode Island received a \$19 million federal Preschool Development Grant (PDG) to expand access to its high-quality pre-K program. PDG funding was used to expand access in high-need communities and to improve program monitoring, evaluation, and technical assistance. As a result of PDG support, enrollment nearly doubled between the 2015-2016 and 2016-2017 school years, and leveled off as planned in 2017-2018.

Teachers in the program must hold a bachelor's degree with an early childhood teaching certificate. The Rhode Island Department of Elementary and Secondary Education provides training and technical assistance through a vendor to all staff on an ongoing basis. The Rhode Island Pre-Kindergarten Program has been assessed for both process quality and program impact/child outcomes, including classroom quality and child outcomes in literacy, arithmetic, and social-emotional development. Additionally, a new evaluation of the program is underway, which will gauge child outcomes, overarching classroom quality and include an analysis of long-term costs.

## SPENDING PER CHILD ENROLLED

# South Carolina

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

South Carolina preschool enrolled 27,519 children in 2017-2018, an increase of 3,440 children from the prior year. State funding totaled \$77,572,655 up \$3,603,184 (5%), adjusted for inflation, since last year. State spending per child equaled \$2,819 in 2017-2018, down \$253 from 2016-2017, adjusted for inflation. South Carolina met 7 of 10 quality standards benchmarks.

## WHAT'S NEW

The South Carolina Department of Social Services was awarded a Preschool Development Grant Birth through Five award in 2018 for \$3.45 million to increase access to quality early childhood programs and better align existing services to support a comprehensive system for all children.

South Carolina's Early Learning Standards (SC-ELS) were revised in 2017. The SC-ELS create a cohesive framework for early learning throughout the state, including the identification of approved curricula which will be implemented in 2018.

## BACKGROUND

South Carolina funds two preschool programs: the Education Improvement Act Child Development Program (EIA 4K) and the public-private Child Early Reading Development and Education Program (CERDEP). Both programs are delivered in public school settings via the South Carolina Department of Education's Office of Early Learning and Literacy (OELL). CERDEP is co-administered in private preschool settings by South Carolina First Steps to School Readiness (First Steps), the state's school readiness initiative.

EIA 4K, initiated in 1984, is funded as part of a one-cent sales tax supporting public education projects. State law limits eligibility for EIA 4K to children qualifying for free- or reduced-price lunch or Medicaid, and allows for consideration of children with documented developmental delays. State funding is allocated to districts by OELL using a formula according to the number of kindergarten students who qualify for free or reduced-price lunch in each district. Participating school districts are required to offer, at minimum, a half-day pre-K program. Most school districts now provide full-day programs, with a few continuing to offer half-day programs.

CERDEP, originally called the Child Development Education Pilot Program (CDEPP), is the state's other early education initiative. Created as a pilot program in 2006 in response to Abbeville County School District, et. al. v. South Carolina, a school equity funding lawsuit brought by rural school districts, the program was codified in 2014 along with the state's Read to Succeed legislation (Act 284). Children qualifying for free- or reduced-price lunch, those receiving Medicaid, or those with a documented developmental delay are eligible to participate in CERDEP.

To monitor quality, OELL conducts visits including an evaluation based on the ELLCO checklist used to provide feedback and support to ensure all classrooms are language- and literacy-rich. Some programs receive an additional level of monitoring which includes a fidelity verification measuring curriculum implementation. Feedback is provided to the teacher, school administrator, and/or the CERDEP district liaison/reading coach to provide post-observation feedback and set future goals.

First Steps' Regional 4K Coordinators make announced and unannounced monitoring and technical assistance visits twice monthly to CERDEP classrooms in private settings. These visits include unannounced evaluative monitoring using the ECERS-3, as well as measures of curricular fidelity with reflecting, goal-setting and action plans for programs.

## SPENDING PER CHILD ENROLLED

# South Dakota

## NO PROGRAM

South Dakota currently does not have a state-funded preschool program, as defined by this report; but the state does support early childhood education in several ways. The Division of Child Care Services within the Department of Social Services oversees licensing early childhood programs and administers direct child-care assistance payments to low-income families. In 2011, the South Dakota Bright Start Home Visiting Nurses Initiative began providing services to Native American children. The program focuses on infant brain development as well as early childhood development. The Birth to Three office, within the Department of Education, oversees early childhood special education and the Head Start Collaboration office.

The South Dakota Early Learning Guidelines are used in all settings that serve children from birth to 5 years old and cover multiple domains including: health and physical development, creative arts, language and literacy, social studies, social-emotional development and approaches toward learning, mathematics, and science. The Guidelines are aligned with the South Dakota Content Standards for Kindergarten, which are part of the K-12 State Standards incorporating the Common Core State Standards for English Language Arts and Mathematics. The Guidelines were a collaboration between the University of South Dakota, the Department of Education Head Start State Collaboration office, Department of Social Services Child Care Services and multiple other stakeholders.

SPENDING PER CHILD ENROLLED

# Tennessee

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Tennessee preschool enrolled 18,354 children in 2017-2018, an decrease of 286 children from the prior year. State funding totaled \$85,062,422, down \$4,098,484 (5%), adjusted for inflation, since last year. State spending per child equaled \$4,635 in 2017-2018, down \$149 from 2016-2017, adjusted for inflation. Tennessee met 7 of 10 quality standards benchmarks.

## WHAT'S NEW

Starting in 2017-2018, in-service professional development for directors, teachers, and assistant teachers in Tennessee Voluntary Pre-K (VPK) increased from 18 to 24 clock hours per year. This requirement will further increase to 30 hours in 2018-2019, and six of the 30 hours must address developmentally appropriate literacy practices. Similar requirements for directors, teachers, and assistants are designed specifically to promote cooperative learning. Also, Tennessee's Early Learning and Development Standards were revised, approved, and went into effect in 2018.

## BACKGROUND

Tennessee Voluntary Pre-K (VPK) was launched in 2005, building on the 1998 Early Childhood Education Pilot Project. Now, VPK classrooms can be found in 138 of the state's 142 school districts. Children living in low-income households are prioritized for enrollment in VPK, as are children who are homeless, or in foster care.

The Tennessee State Department of Education, Division of Early Learning and Literacy, has administrative authority over VPK. Only local education agencies may apply for VPK grants, but districts may contract with private child care agencies, Head Start agencies, institutions of higher education, public housing authorities, and any community-based or private agency rated at least three stars on the state's quality rating and improvement system (QRIS). Programs contracted to provide VPK services must operate within the jurisdiction of the school district.

VPK relies on numerous funding sources, including general education revenue and, in the past, lottery revenue and federal TANF funds. State funds for the VPK program have been mostly level since the 2014 school year. Federal Head Start, IDEA, Title I, and other funds are used to provide the required 25% local match.

In 2014, Tennessee received a \$17.5 million federal Preschool Development Grant to expand pre-K enrollment in Nashville and Shelby County. PDG funds supported 120 children in new slots in VPK classrooms in 2017-2018 as well as 4,077 improved slots. In addition, PDG funds supported 120 children in new slots and 1,326 improved slots in the state (outside of VPK) in 2017-2018.

Peabody Research Institute (PRI) at Vanderbilt University was involved in the ongoing external evaluation on the effectiveness of the VPK program for children who attended VPK in 2009-2010. The study reported statistically significant cognitive and social-emotional gains for VPK participants during the pre-K year and a significant reduction in kindergarten retention for participants. However, the gains appeared to gradually dissipate and turned significantly negative in some subtests (favoring the control group) by third grade. The Pre-k Quality Act of 2016 was passed as a result of this study's findings, and includes revising the Tennessee Early Learning Development Standards, creating a shared definition of "quality" to guide quality improvements, establishing a vision for early learning at statewide trainings, supporting curriculum implementation, creating guidance for district leaders, reducing the number of approved curricula from 37 to 3, shifting to a competitive grant application based on program quality, piloting CLASS observations, training CLASS observers, and implementing pre-K Student Growth Portfolios statewide.

### SPENDING PER CHILD ENROLLED

# Texas

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Texas preschool enrolled 231,485 children in 2017-2018, an increase of 7,371 children from the prior year. State funding totaled \$823,908,971, down \$67,736,584 (8%), adjusted for inflation, since last year. State spending per child equaled \$3,559 in 2017-2018, down \$419 from 2016-2017, adjusted for inflation. Texas met 4 of 10 quality standards benchmarks.

## WHAT'S NEW

In January 2019, Governor Abbott appointed 20 new members to the Texas Early Learning Council, which was originally established as the state's early childhood advisory council in 2009. Also, at the end of 2018, the Texas Education Agency (TEA) was awarded \$1,789,455 under the Preschool Development Grant Birth through Five competition.

## BACKGROUND

In 1985, Texas began funding half-day prekindergarten for eligible 4-year-olds through the Texas Public School Prekindergarten program. Currently, districts with 15 or more eligible 4-year-olds are required to offer prekindergarten. Districts with 15 or more eligible 3-year-olds can also offer prekindergarten, but are not required to do so. The TEA Early Childhood Education Division oversees the free program in school districts and open-enrollment charter schools, and school districts are permitted to subcontract with nonpublic preschools to serve eligible children.

Students are eligible to participate in the Texas Public School Prekindergarten program if they meet at least one of the following conditions: qualify for free or reduced-price lunch (185% of FPL), are homeless, are in foster care, have a parent on active military duty or who was injured or killed on active duty, are unable to speak or comprehend English, and/or have a parent eligible for the Star of Texas Award. Funding for half-day pre-K is based on Average Daily Attendance (ADA) and provided through the Foundation School Program as part of the K-12 funding system.

In 2015, the Texas Legislature provided funding for quality improvements in Texas Public School Prekindergarten programs. Districts and open-enrollment charter schools applied for grants to implement a High-Quality Prekindergarten Grant Program. To be eligible for funding, a school district or charter school agreed to use a curriculum aligned with the Prekindergarten Guidelines, increase prekindergarten teacher training and/or qualifications, implement student progress monitoring, provide kindergarten readiness results, and develop quality family engagement plans. The agency awarded funding to 573 district and charter schools.

In 2017, the Texas Legislature cut \$15 million in supplemental pre-K funding from the state's biennial budget, and did not continue funding the High-Quality Prekindergarten Grant program. However, that same year, lawmakers required school districts and charter schools with eligible 4-year-olds to use at least 15% of their state Foundation School Program funds on high-quality preschool efforts, and established a new prekindergarten-to-third grade teacher certification.

The Children's Learning Institute at the University of Texas-Health Science Center, in partnership with the TEA and Texas Workforce Commission, has developed a comprehensive professional development platform for early childhood educators that is free to all public school teachers, Head Start programs, and licensed child care centers participating in the state's quality rating and improvement system (QRIS), the Texas Rising Star program.

## SPENDING PER CHILD ENROLLED

## NO PROGRAM

Utah currently does not provide a state-funded preschool program meeting the criteria for this report. However, the state does have several other early childhood initiatives.

In 2014, Utah House Bill 96 was passed, creating the High-Quality School Readiness Initiative. The initiative was amended in Utah House Bill 380 during the 2018 session. The purposes of the Utah School Readiness Initiative are to increase school readiness, improve academic performance, and reduce remediation costs associated with poor academic outcomes. Also in 2014, Utah approved future investment in early learning programming through a partnership between businesses and the state. The Utah High-Quality School Readiness Initiative was signed by Governor Herbert, allowing the newly created School Readiness Board to enter into results-based financing contracts with private entities to fund proven high-quality early childhood education programs to serve at-risk students. The bill also creates grant funding for existing public and private early education programs to increase quality, and funds independent evaluation. The bill details components of high-quality programs as well as home-based educational technology programs that may enter into a results-based contract with the Board. The initiative began serving children in the 2014-2015 school year. During the 2017-2018 school year, 438 students were served by LEAs and private providers.

Utah Senate Bill 101, High-Quality School Readiness Initiative Expansion (HQSR-E), passed in 2016. HQSR-E is intended to expand access to high-quality school readiness programs for eligible students to increase school readiness, improve academic performance, and reduce remediation costs associated with poor academic outcomes. The HQSR-E Grant program provides grant funds to LEAs with existing early education programs deemed high-quality, as determined by the Early Childhood Environment Rating Scale (ECERS-3 or ECERS-R) and some additional rubric criteria. Programs are eligible to apply for HQSR-E funding if they provide services to economically disadvantaged 4-year-old children, can illustrate how funds will be used to expand their current preschool programs, and are deemed high-quality school readiness programs based on the criteria noted above. During the 2017-2018 school year 4,948 students were served in HQSR-E classrooms. A total of 1,135 of those seats were created to enroll 4-year-old children from economically disadvantaged families using approximately \$5.7 million in TANF funding. The program is set to expire in June 2019.

Utah's UPSTART Program provides a home-based, technology-delivered kindergarten readiness program to children throughout the state. During the 2017-2018 school year, the UPSTART program served children in every Utah school district and reached more than 14,000 students. State funds allocated to the program total \$9.6 million, and an additional \$2 million in TANF funding was made available through an RFP process. UPSTART prioritizes low-income, ELL, and rural children. The program includes an annual independent evaluation contracted by the Utah State Board of Education.

On February 10, 2017, the Utah State Board of Education agreed to have the Early Childhood Core Standards revised. The standards were originally written and adopted in 2012. The Early Childhood Core Standards cover multiple domains including: physical well-being and motor development, social-emotional development, approaches toward learning, language development, and cognitive and general knowledge. Revised standards are expected to be published and distributed by January 2020.

SPENDING PER CHILD ENROLLED

# Vermont

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Vermont preschool enrolled 8,815 children in 2017-2018, a decrease of 128 children from the prior year. State funding totaled \$58,370,955, up \$1,601,891 (3%), adjusted for inflation, since last year. State spending per child equaled \$6,622 in 2017-2018, up \$274 from 2016-2017, adjusted for inflation. Vermont met 7 of 10 quality standards benchmarks.

## WHAT'S NEW

The Vermont Agency of Education (AOE) and Agency of Human Services (AHS) are in the process of designing a new joint-agency Pre-K Monitoring System. The new monitoring system builds upon existing monitoring systems and procedures to assess the quality of the state's approved private and public universal pre-K (UPK) programs. The system scales up the State's focus on components of a high-quality, effective, pre-K education program across the many types of settings in which it is offered.

In addition, continued development for the incorporation of birth through five data sources into the new Vermont Statewide Longitudinal Data System (SLDS) was recently completed. The SLDS enhances the ability of the State to efficiently and accurately manage, analyze, and use education data, allows for the analysis of data collected from birth through age 21, and the examination of longitudinal outcomes among children participating in UPK. Also, in 2018, the State of Vermont was awarded \$3,363,695 under the Preschool Development Grant Birth through Five.

## BACKGROUND

Vermont, in 1987, created the Vermont Early Education Initiative (EEI), an annual competitive grant program to finance early education opportunities for at-risk 3- to 5-year-olds. In 2007, legislation expanded publicly funded prekindergarten education for 4-year-old children in public schools and private programs and provided funding through the state's Education Fund, similar to K-12, pro-rated based on a model of 10 hours per week.

In 2014, new legislation, Act 166, required all public school districts to offer UPK for every 3-, 4-, and 5-year-old child not enrolled in kindergarten, for a minimum of 10 hours per week for 35 weeks annually. UPK was fully implemented beginning in the 2016-2017 school year, with pre-K provided through school district operated programs and in contractual partnerships with state-approved public and private programs. Funding for Act 166 is a mix of federal, state, and local dollars. Federal funding in 2017-2018 came from various sources, including Vermont's \$33 million, 4-year federal Preschool Expansion Grant.

Act 166 also requires an annual legislative evaluation of the state's pre-K efforts that includes the number of children and programs participating in UPK, child progress monitoring data, and quality rating and improvement system (QRIS) level information. All Vermont state pre-K programs are required to attain at least four of five stars in Vermont's QRIS, Step Ahead Recognition Systems (STARS), or hold NAEYC accreditation. STARS requires structured observations of classroom quality using the ECERS or CLASS. Licensed educators with an endorsement in early childhood education and/or early childhood special education are required to be lead teachers in all public school UPK classrooms. For private UPK programs, the licensed educator is required to oversee lead teachers in private UPK classrooms to ensure implementation of UPK education for each child.

## SPENDING PER CHILD ENROLLED

<sup>1</sup> A total of \$70,002,759 was used to support the program. Other than federal PDG, Vermont could not break this amount into state, local, and federal spending. NIEER estimated the breakdown based on K-12 spending.

# Virginia

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Virginia preschool enrolled 17,959 children in 2017-2018, a decrease of 64 children from the prior year. State funding totaled \$69,097,643, down \$2,579,233 (4%), adjusted for inflation, since last year. State spending per child equaled \$3,848 in 2017-2018, down \$129 from 2016-2017, adjusted for inflation. Virginia met 6 of 10 quality standards benchmarks.

## WHAT'S NEW

The Virginia Department of Education was awarded a Preschool Development Grant Birth through Five award in 2018 for \$9.9 million to help unify and strengthen the early childhood care and education system with communities leading the way. The Governor created the Chief School Readiness Officer position in 2018 to support early childhood education in the state, including a unified birth through five system.

## BACKGROUND

The Virginia Preschool Initiative (VPI) began in 1995 to serve at-risk 4-year-olds not enrolled in existing preschool programs. During the 2017-2018 school year, VPI programs operated in 92% of eligible school divisions. Programs are required to operate for a minimum of three hours per day, though 97% of children attend school-day programs throughout the school year. VPI is funded by state lottery revenues as well as a required local match. Funding for VPI is available to school divisions where there are at-risk 4-year-olds who are not served by Head Start and is based on the number of students eligible for free lunch.

Virginia's federal Preschool Development Grant (PDG) program, VPI+, expands services to 4-year-olds in high needs communities. The state serves an additional 1,441 students through this program. PDG funding was also used to enhance the quality of 2,009 VPI slots in 2017-2018. Virginia is currently working on a plan to sustain PDG funding after the federal grant ends.

VPI eligibility has always been based on risk factors including, but not limited to: family income at or below 200% FPL, family income at or below 350% FPL for students with special needs or disabilities, homelessness, or parent(s) with limited education. A total of 15% of slots can be filled using locally determined eligibility criteria.

In 2011, VPI was evaluated for both program quality and child outcomes by the Curry School of Education at the University of Virginia. Prior to that, monitoring by state education staff and consultants was conducted through site visits every two years to review program facilities, on-site safety procedures, and program record checks. Site visits were eliminated due to budget constraints in 2011-2012. Desk monitoring of local plans and results of child assessments continue as methods to conduct an annual review of program-level outcomes.

### SPENDING PER CHILD ENROLLED

# Washington

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Washington preschool enrolled 12,491 children in 2017-2018, an increase of 800 children from the prior year. State funding totaled \$110,594,841, up \$10,960,166 (11%), adjusted for inflation, since last year. State spending per child equaled \$8,854 in 2017-2018, up \$332 from 2016-2017, adjusted for inflation. Washington met 8 of 10 quality standards benchmarks.

## WHAT'S NEW

The Washington State Department of Children, Youth, and Families was awarded a federal Preschool Development Grant Birth through Five award in 2018 for \$5.27 million to conduct a comprehensive statewide needs assessment, in-depth strategic planning, and other key activities to advance the agency's work to support families and providers caring for Washington's youngest children.

In 2018, the Washington Department of Early Learning merged into the new Department of Children, Youth and Families which oversees early learning programs along with child protective services and foster care. On July 1, 2019, juvenile rehabilitation services will join the department. Washington continues to expand access to preschool toward the state's goal of enrolling all eligible children by 2022-2023, while also increasing the funded rate per slot. New performance standards were released in 2018 and additional releases aligned with child care licensing requirements and quality rating and improvement system (QRIS) standards will be released in 2019 and 2020.

Statewide implementation of EMPath's Mobility Mentoring® as a family engagement approach occurred in 2018-2019 after three years of piloting. This approach uses coaching methods rooted in brain science to improve focus, planning, and decision-making. Participants set and achieve future-oriented goals and increase family well-being and economic mobility despite the immediate challenges of poverty. Pilot data demonstrates statistically significant growth for families.

## BACKGROUND

The Washington Department of Children, Youth, and Families has a goal to ensure 90% of children in the state are ready for kindergarten by 2020 with race and income eliminated as predictors of their readiness. The state Early Childhood Education and Assistance Program (ECEAP), created in 1985 to prepare 3- and 4-year-olds from low-income families for success in school and in life, is a big part of the state's strategy to accomplish this goal. In recent years, both funding and enrollment for ECEAP have been growing. ECEAP funding comes from the state general fund, the Education Legacy Trust Account funded by estate taxes, and the "opportunity pathways account" financed by lottery proceeds. In 2010, the state Legislature established the ECEAP as a statutory entitlement for all eligible children, not funded by Head Start, by the 2018-2019 school year—a deadline recently extended to 2022-2023.

ECEAP focuses on the whole child and provides comprehensive nutrition, health, education and family support services to Washington's most at-risk young children. To be eligible for ECEAP, children must be 3- or 4-years-old and live in households with an income at or below 110% of FPL, or have an IEP (regardless of income). Up to 10% of ECEAP enrollment may include children whose families do not meet the poverty requirement but experience other risk factors that could jeopardize learning, development, or school success.

## SPENDING PER CHILD ENROLLED

# West Virginia

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

West Virginia preschool enrolled 15,101 children in 2017-2018, an increase of 79 children from the prior year. State funding totaled \$94,533,303 and \$3,745,497 in TANF funds were also used to support the program, down \$3,095,056 (3%), adjusted for inflation, since last year. State spending per child (including TANF funds) equaled \$6,508 in 2017-2018, down \$240 from 2016-2017, adjusted for inflation. West Virginia met 9 of 10 quality standards benchmarks.

## WHAT'S NEW

Legislation was passed in 2017 to change the 4-year-old eligibility cut-off date for West Virginia's Universal Pre-K program from September 1 to July 1, effective with the 2018-2019 school year. Additionally, West Virginia's Universal Access to a Quality Early Education System was updated to include requirements that prohibit or severely limit the use of suspension in pre-K due to a child's behavior. Requirements include temporary suspension only as a last resort in extraordinary circumstances and program provisions for developing a multidisciplinary team, including efforts to engage parents and appropriate community resources, and a written plan to support children with challenges.

## BACKGROUND

West Virginia introduced public preschool in 1983 for 3- and 4-year-olds through the Public School Early Childhood Education program, after the state allowed local school boards to serve children before kindergarten. In 2002, legislation passed that required pre-K to be available to all 4-year-olds by 2012.

Today, West Virginia's Universal Pre-K System provides prekindergarten programs in all 55 counties in the state, serving 4-year-olds, as well as some 3-year-olds with special needs, and some kindergarten-eligible children if it is determined that kindergarten placement is not in the child's best interest.

Public schools receive West Virginia Universal Pre-K funding directly, with half of all programs required to partner with child care centers, private prekindergarten, or Head Start agencies to meet demand. During the 2017-2018 school year, the collaboration rate was 82%. Programs are permitted to use additional funding from IDEA and federal Head Start.

The state has focused on improving program quality. As of July 2013, all new lead teachers in nonpublic settings are required to have at least a bachelor's degree in Early Childhood or a related field and, as of July 2014, all assistant teachers are required to apply for the Early Childhood Classroom Assistant Teacher Authorization, which requires a CDA or equivalent, as determined by the West Virginia Board of Education. West Virginia also increased instructional days per year and hours per week to at least 1,500 minutes of instruction per week and 48,000 minutes (800 hours) of instruction per year. Programs must operate no fewer than four days per week to meet annual and weekly operational requirements.

The West Virginia Universal Pre-K program is undergoing a multiyear study to assess the effects of program participation. Programs develop monitoring systems to offer ongoing continuous quality improvement, using monitoring tools recognized by a local collaborative team. Children are assessed three times per year using the Early Learning Scale, and this information is used to track child and program outcomes over time, guide teacher professional development and coaching, make adjustments to curricula, and measure kindergarten readiness.

### SPENDING PER CHILD ENROLLED

# Wisconsin

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2018 DOLLARS)

## OVERVIEW

Wisconsin preschool enrolled 48,787 children in 2017-2018, a decrease of 3,186 children from the prior year. State funding totaled \$191,269,229, down \$11,322,655 (6%), adjusted for inflation, since last year. State spending per child equaled \$3,920 in 2017-2018, up \$22 from 2016-2017, adjusted for inflation. Wisconsin met an average of 3.1 of 10 quality standards benchmarks.

## WHAT'S NEW

During the 2017-2018 school year, the Wisconsin Department of Public Instruction (DPI) introduced a new four-tier system for teacher licensing. The tiers range from a 1-Year License with Stipulations (Tier I) to a Master Educator License (Tier IV). Additionally, in their budget, submitted September 2018, DPI requested funding for full-day 4K and 3K for Wisconsin's largest school districts, both of which would be optional for districts.

## BACKGROUND

Since becoming a state in 1848, Wisconsin's Constitution has included a promise to provide free, voluntary education for 4-year-olds. School districts are not required to offer the Four-Year-Old Kindergarten program (4K), but if they do, it must be open to all age-eligible children. During the 2017-2018 school year, 404 of 411 school districts offered the program (over 98%).

Funding for 4K is part of the overall school funding formula, funded at 50% of the funding for other grade levels. Districts receive 60% of full-day funding if they offer an additional 87.5 hours of parent outreach. Funds for 4K are distributed to public schools, which may subcontract and collaborate with private child-care centers, community-based programs, faith-based centers, family child care providers, or Head Start agencies. The state funds a total of 437 hours per year and operating schedules are locally determined. Most programs operate part-day, four or five days per week; while some operate full-day, two or three days per week.

The Wisconsin Head Start State Supplement program is a separate program offering supplemental state funding to federal Head Start grantees to provide comprehensive early childhood education for 3- and 4-year-olds with disabilities or from low-income families. Participating programs follow the federal Head Start Performance Standards, and children meet Head Start enrollment eligibility guidelines. Efforts have been made to bring together Head Start technical assistance and training with other professional development efforts at both the state and local levels.

### SPENDING PER CHILD ENROLLED

# Wyoming

## NO PROGRAM

The state of Wyoming does not offer a state-funded preschool program according to definitions used in this report. However, the state does provide support for other early childhood education programs. Also, during the state's 2018 legislative session, a bill was proposed and later failed to establish a state office of early childhood within the Wyoming Department of Education (WDE). The proposed bill intended to move all early childhood education programs under WDE, including those administered by the Department of Family Services (DFS), the Department of Workforce Services (DWS), and the Department of Health (WDH).

Local school districts can use a portion of Title I funding for early childhood education. WDH administers a statewide developmental preschool system to provide IDEA services for 3- to 5-year-olds, and DFS uses TANF dollars to fund 26 schools in the state. DFS administers the TANF programs through a competitive grant process which funds high-quality preschool services for children whose families qualify for TANF. In 2018, WDE distributed \$1.5 million to eight preschools serving 320 low-income children. Another \$325,000 in federal TANF funding supports the Early Childhood Community Partnership Grant program, also administered by DFS, to develop, enhance, and sustain high-quality early childhood education programs. DFS also licenses several programs through the University of Wyoming, community colleges, school districts, and private preschool and child care facilities to provide academic instruction. Both licensed and non-licensed programs are able to and do pursue accreditation through the National Association for the Education of Young Children (NAEYC).

The Wyoming Early Childhood State Advisory Council was created in 2010 and is a collaboration of individuals across multiple disciplines. The council's mission is to serve Wyoming children and families by facilitating statewide collaboration, evaluating the early childhood system, and making recommendations to the governor, lawmakers, and state agencies. Wyoming also has an Early Intervention Council which focuses on children with special needs.

In 2013, the state adopted the comprehensive Wyoming Early Learning Foundations. The Foundations cover multiple domains including cognition and general knowledge, physical well-being/motor development, approaches toward learning, social/emotional development, and language development.

SPENDING PER CHILD ENROLLED

# American Samoa

## NO PROGRAM

American Samoa does not provide publicly funded preschool as defined in this report but does support early childhood education in several other ways. The Early Childhood Education/Head Start (ECE/HS) division is housed within the American Samoa Department of Education (ASDOE). The ASDOE and both elementary and secondary schools operate early childhood education centers.

The American Samoa Children's Cabinet serves as the territory's early childhood advisory council. The Cabinet operates under the Office of the Governor and includes representation from the ASDOE, the Department of Human and Social Services, and the Department of Health.

American Samoa's early learning guidelines, for children ages 3 to 5, address multiple domains including social and emotional development, mathematics, science, approaches to learning, logic and reasoning, social studies, physical development and health, language development, literacy, English language development, and creative arts expression. The early learning guidelines are aligned with the Head Start Child Development and Learning Framework.

In 2012-2013, American Samoa was in the process of developing a quality rating and improvement system (QRIS) which was in the later stages of development as of January 2017. One component of the system would be the use of quality program assessment tools for quality assurance and monitoring.

### SPENDING PER CHILD ENROLLED

# Guam

PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED  
(2018 DOLLARS)

## OVERVIEW

Guam preschool enrolled 71 children in 2017-2018, the same number as the prior year. State funding totaled \$362,973, down \$7,014 (2%), adjusted for inflation, since last year. State spending per child equaled \$5,112 in 2017-2018, down \$99 from 2016-2017, adjusted for inflation. Guam met 6 of 10 quality standards benchmarks.

## WHAT'S NEW

In October 2017, Guam's Legislature and Governor approved the expansion of an additional four pilot prekindergarten classrooms in the Budget Law. Due to budget constraints, Guam's Department of Education was not able to proceed with the expansion. However, 2017-2018 did mark the start of on-going classroom embedded support for Pilot Prekindergarten teachers through a coaching model.

## BACKGROUND

The Guam Department of Education's publicly funded Pilot Prekindergarten Program is available in all four regions of the territory's single school district. Each region has one Prekindergarten Program classroom located within a public school. All age-eligible children may enroll in the program, which has no income limit for eligibility. Guam's Prekindergarten Program operates six hours a day, five days a week, following the school year or academic calendar, and providing 978 hours of services per year. Both lunch and breakfast are served to children attending the program.

The program's maximum class size is 18 children, with a teacher-to-student ratio of 1 to 9. Lead teachers are required to have an associate degree with early childhood education specialization and either pre-K or pre-K to 2nd grade certification. Lead teachers also are required to participate in 30 clock hours of in-service professional development annually. Assistant teachers are required to hold a high school diploma, but are not required to participate in any professional development.

A formal evaluation of the program was conducted by the Guam Department of Education's Administrator for Research, Planning & Evaluation in 2018 and is currently under review by the Guam Education Board.

## SPENDING PER CHILD ENROLLED

# Northern Mariana Islands

## NO PROGRAM

Although the Commonwealth of the Northern Mariana Islands (CNMI) does not provide state-funded preschool as defined in this report, the territory does support early education in other ways. Since 1984, the CNMI Public School System has operated the Head Start program in 9 centers across multiple islands, providing two center-based program options: double session (half-day) and full-day. There are 192 enrollment slots allocated to the half-day variation that offers services four days per week, 152 days per year, in both the morning and the afternoon. The remaining 204 slots operate a standard full-day with 6.5 hours of planned class operations, 5 days a week, 160 days per year. The CNMI Head Start program served approximately 396 preschool-aged children in 2017-2018, and provided specialized services for young children with special needs.

Since February 2015, the CNMI continues to be the lone grantee in the Outer Pacific to be awarded the Early Head Start- Child Care Partnership Grant. The program operates for eight hours a day, five days a week for the full calendar year (222 instructional days). In 2017-2018, the program served a total of 64 infants and toddlers, ages six weeks to three years old. Forty-eight of the enrolled slots are in grantee-operated classrooms, and the remaining 16 slots are allocated as partnership slots. The Northern Marianas International School is the lone partnership site that has two classrooms serving Early Head Start enrolled children.

CNMI have early learning guidelines for children birth through age five which address multiple domains, including logic and reasoning, social studies, physical development and health, language development, literacy, mathematics, science, English language development, social and emotional development, approaches to learning, and creative arts expression. The guidelines are aligned with the Head Start Child Development and Learning Framework.

CNMI is currently piloting a quality rating and improvement system (QRIS), providing reviews, rates, coaching and technical assistant to eight local care providers. Program quality assessment tools are already used for quality assurance and monitoring, and are now incorporated as one component of the QRIS.

### SPENDING PER CHILD ENROLLED

## NO PROGRAM

The Republic of Palau does not have a state-funded preschool program meeting the criteria of this report, but the territory does support other early childhood education initiatives. The Palau Community Action Agency operated center-based Head Start for 350 3- to 5-year-olds throughout the Republic's 16 states in 2017-2018. In addition, three of the predominant religious denominations (Roman Catholic, Seventh Day Adventist, and Palau Evangelical Church) have established private early childhood programs in Koror State. Many young children live in small communities outside Koror State and continue to lack access to early education because their communities do not meet the requirement that at least 10 eligible children enroll in the Head Start program. In these communities, the cost of access to and enrollment in private early childhood program is beyond parental means. However, in 2017-2018, the Palau Ministry of Education piloted 2 early childhood education programs serving 3- to 5-year-olds in the outlying states of Palau, specifically in Angaur and Kayangel states. These are areas that can only be accessed by boat and have populations of less than 10 preschool-aged children.

The Palau Early Childhood Comprehensive System (PECCS) established a National Framework on Early Childhood Development for School Readiness which partners families, communities and agencies to ensure the health and success of children in Palau.

In their Education for All National Plan for 2002-2010, the Ministry of Education identified "expanding and improving comprehensive early childhood care and education, especially for the most vulnerable and disadvantaged children," as a chief goal. Ministry responsibilities include developing appropriate curricula for all public preschool, elementary school, and secondary school programs, and recommending minimum qualifications and requirements for preschool, elementary, and secondary school teachers.

### SPENDING PER CHILD ENROLLED

# Puerto Rico

## NO PROGRAM

Puerto Rico does not have a state-funded preschool program as defined in this report. However, the territory, which operates as one single school district, does support several early learning initiatives.

The Department of Education of Puerto Rico and the Puerto Rico Education Council oversee elementary and secondary public education, monitor academic standards, and issue licenses to educational institutions. Programs for preschool-aged children are administered by the Administration for Integral Child Care and Development (ACUDEN) and the Department of Education has authority over early childhood special education. There are seven levels of education in Puerto Rico. Level 1 is nursery school for children under age 4, which is optional and consists of Early Head Start, Head Start, and other prekindergarten programs. Level 2 is compulsory preschool, also known as kindergarten, which is mandatory for 5-year-olds.

Puerto Rico has a 16-member Early Childhood Advisory Board (ECAB) administered by ACUDEN with representation from agencies responsible for Head Start, child care, education, higher education, and other constituent groups. ECAB was responsible for developing Unidos por la Niñez Temprana (United for Early Childhood), Puerto Rico's plan for providing services to children from birth through 5 years. In collaboration with the Department of Education, the ECAB developed and promoted the use of the Early Learning Guidelines by all early learning programs. Teachers, directors, and supervisors across various early learning programs received training in implementing the guidelines.

Puerto Rico has a five level quality improvement and rating system (QRIS) to measure the quality of infant, toddler, and preschool centers. ACUDEN partnered with the University of Puerto Rico and other government agencies to create and validate Puerto Rico's QRIS whose identification symbol is the Pasito (meaning "baby step"), with five Pasitos identifying a high-quality center. It is a voluntary self-assessment used in both private and public sectors.

### SPENDING PER CHILD ENROLLED

# Virgin Islands

## NO PROGRAM

The Virgin Islands does not provide a preschool program as defined by this report. However, the Department of Human Services, which houses the Office of Child Care and Regulatory Services and the Head Start Program, oversees early childhood education and care across multiple settings. The Department of Human Services uses local funds to surpass the federally required Head Start local match.

The Virgin Islands Child Care Revised Rules and Regulations provide standards that all child care and early childhood education facilities, including private centers, Head Start, and Early Head Start, must follow. All early childhood education teachers and directors were required to earn a CDA credential by June 2015, and 24 hours of professional development training is required each year. These regulations also establish maximum class sizes of 18 for 3-year-olds (with a 1:9 staff to child ratio) and 20 for 4-year-olds (with a 1:10 staff to child ratio).

The Virgin Islands Early Learning Guidelines are designed to improve the quality of care and education, focus on school readiness, and provide a common set of preschool standards across all settings. The Guidelines provide milestones for what children should know, understand, and be able to do by the time they reach kindergarten in the domains of language and literacy; mathematical understanding; approaches to learning; social, emotional, and values development; creativity and the arts; science; social studies; and physical health and development. The Guidelines also provide strategies for teachers, caregivers, families, and community members to help children achieve these goals. Content of the Guidelines is aligned with the Head Start Framework and the Common Core State Standards, adopted by the Department of Education.

The Virgin Islands Infant & Toddler Developmental Guidelines were released in 2013 and reflect expectations of what children should know, understand, and be able to do by the time they reach age 3. They are aligned with the Early Learning Guidelines and cover the same domains.

Looking ahead, the U.S. Virgin Islands Department of Human Services was awarded \$725,112 under the Preschool Development Birth through Five grant in December 2018.

### SPENDING PER CHILD ENROLLED

## THE STATE OF PRESCHOOL SURVEY METHODOLOGY

### Respondent Universe

The respondent universe for this study is the state preschool administrators in the 50 states and the District of Columbia, plus the U.S. territories. Data are collected directly from these entities through a web-based survey form. More than one agency supports early childhood education programs in some states. As a result, some states have more than one respondent. Note that in some states, there are no state programs to support publicly provided early childhood education. As such, these states do not have state preschool administrators and they do not report data on the topic. Other administrators in these states, however, are contacted to update and confirm a state narrative on the status of other early childhood programs in the state each year.

### Statistical Methodology

This is a universe data collection, employing a survey form. All states with publicly supported early childhood education have responded to the collection effort. In addition, information was sought from territories; Guam is the first and only territory to operate its own preschool program comparable to state-funded programs. Because the data collection is based on a universe of sample members, weighting adjustments and adjustments to variances for statistical test purposes are not necessary. Some statistical adjustments are made to the resulting data, however, to help unduplicate enrollment counts that can arise when the same child is enrolled in more than one publicly funded program. More specifically, when states report that they have included children with disabilities in both the special education counts and the counts of preschool-aged children who are in regular preschool programs, the preschool special education in state preschool count is subtracted from the preschool special education enrollment counts. Similarly, when states reported that they have included Head Start children in counts of children in state preschool and Head Start, the Head Start in state preschool count is subtracted from the Head Start enrollment. Children with disabilities enrolled in Head Start are also subtracted from the preschool special education enrollment count to avoid duplication.

### Methods to Maximize Response Rate and Ensure Data Accuracy

Several steps have been taken to maximize the response to this data collection. First, the data are collected through a web-based, computer-assisted interview (CAI) program. This flexibility allows respondents to enter information as time and data availability permit. Further, respondents are offered opportunities to check previous years' entries at the beginning of data collection and to review the current year's entries before the data are published. The first data check acts both as a data quality control step, in terms of reminding respondents what kinds of data will be needed for the current year's collection, and as a reminder that the current year's data collection is about to begin. Allowing respondents to review current year's data entry before results are published acts as another data quality control check and also provides respondents with confidence that accurate data will be reported from their respective states, further garnering cooperation.

Once surveys are completed, data are checked by NIEER staff for entry errors, consistency with prior year's data, and consistency with information available from public documents (for example, with published state education agency regulations and guidance). Any apparent inconsistencies or errors are discussed with the respondents for resolution. When data have been compiled and summarized for publication in a public use data set and reports, the results are then sent back to the state administrators who provided the information for final verification.

### Tests of Procedures and Methods

Each year, staff at NIEER review changes to policies that support early childhood education at the state and federal levels. Modifications are then made to the questionnaire and the related web-based CAI instruments to reflect these policy changes. In addition to the policy review, respondents are sent data from the previous year's data collection, allowing them to correct errors or to update information for the formal release of the data. NIEER staff actively solicit opinions regarding the clarity, usefulness, and availability of data requested by the survey from the primary respondents. This facilitates NIEER staff learning about new or changing policies from the provider perspective.

The CAI instruments undergo extensive testing prior to the initiation of data collection. Tests are run to verify that logical skips through the instrument are functioning as expected so that respondents are not asked questions that are not meaningful based on responses to prior questions. Prior to publication, respondents are sent current year answers for one last verification for accuracy before the data are released.

All initiatives included in the current report meet the criteria outlined by NIEER, which defines state preschool education programs as initiatives that are funded and directed by the state to support group learning experiences for preschool-age children, usually ages 3 and 4. For more information about these criteria, please see, "What Qualifies as a State Preschool Program?" on page 37. This report covers the same initiatives as the 2017 report with a few exceptions: Indiana no longer meets NIEER's definition of a state-funded preschool program and is no longer included. North Dakota and Montana have

been added to the report for the first time. Montana began a state-funded preschool program in 2018-2019 and North Dakota did so in 2016-2017. The Massachusetts Inclusive Preschool Learning Environments (IPLE) Grant is being phased out and is no longer included in the report but the Massachusetts Chapter 70 preschool program is now included.

The survey included yes or no questions, questions that asked state administrators to select which of several choices best described their program, and open-ended questions. The survey included questions on access, operating schedule, child eligibility and reassessment, program standards, statewide early learning standards, curriculum, personnel, resources, structured observations of classroom quality, evaluations, and important changes to the program since the last survey.

### Collection of Non-Survey Data

Although most of the data in this report were collected through the surveys, there are a few exceptions. Total federal, state, and local expenditures on K–12 education in the 2017-2018 school year were calculated by NIEER based on data from the National Education Association's report, *Rankings of the States 2017* and *Estimates of School Statistics 2018*. Total K–12 spending for each state includes current operating expenditures plus annual capital outlays and interest on school debt. This provides a more complete picture of the full cost of K–12 education than including only current operating expenditures, which underestimate the full cost. Our estimate of K–12 expenditures is also more comparable to total preschool spending per child because this funding generally must cover all costs, including facilities. Expenditure per child was calculated for each state by dividing total expenditures by the fall 2017 enrollment. We estimated the breakdown of expenditure per child by source, based on the percentages of revenue receipts from federal, state, and local sources in each state. Salary information for K–12 teachers also comes from this report.

The Administration for Children and Families (ACF) and the Office of Head Start in the U.S. Department of Health and Human Services were the sources of data on federal Head Start spending and enrollment and Head Start enrollment supported by state match. In addition, some data were obtained from the Education Commission of the States, *Trends in Pre-K Education Funding in 2017-2018* and through the Head Start Program Information Reports (PIR) for the 2017-2018 program year. Where necessary, states were asked for clarification and/or additional information regarding state supplements to Head Start. ACF reports the total number of Head Start slots nationally and per state. The number of funded Head Start slots for 3- and 4-year-olds is estimated using the age-breakdown of the cumulative enrollment information from the PIR, applied to the number of slots reported by ACF. Enrollment in American Indian/Alaska Native (AI/AN) Head Start programs is calculated in a similar way and included in each state's total. Enrollment in Migrant Seasonal Head Start is based on information provided in the PIR and is also included in each state's total. Total funding for each state includes Head Start as well as AI/AN and MSHS. Spending per child is calculated for each state by dividing the total Head Start spending by the funded enrollment, both provided by ACF. For MSHS, only total national spending and enrollment were provided by ACF and includes children birth to 5. To get state-specific estimates, we estimated the percent of children and funding in each state using information from the PIR. All data in Appendix B include AI/AN and MSHS when applicable. Information included in the report is specific to Head Start and does not include Early Head Start. Head Start data are provided in Appendix B.

Populations of 3- and 4-year-olds in each state were obtained from the Census Bureau's datasets and are shown in Appendix C. As in the past, NIEER used estimates for the July immediately preceding the program year (e.g., July 2017 for the 2017-2018 program year) to calculate percentages of 3- and 4-year-olds enrolled in state preschool programs, federal Head Start, and special education.

The U.S. Office of Special Education Programs provided data on special education enrollment in the Individuals with Disabilities Education Act Preschool Grants program (IDEA Section 619 of Part B) in the 2017-2018 program year. These data are provided in Appendix D.

In the 2018 Yearbook, NIEER again attempts to provide a more accurate estimate of unduplicated enrollments, whether in state preschool, Head Start, special education, or other settings, through a series of calculations. Because many children who are counted in special education enrollments are also enrolled in state preschool or Head Start programs, it is important to ensure that those children are not counted twice. Forty-two states and the District of Columbia reported including children in special education in their state preschool enrollment figures, while two states and Guam do not include these children in their enrollment count. Thirty-one of the 40 states and the District of Columbia were able to provide the number of children in special education who were also counted in their enrollment; another four multi-program states provided breakdown for some, but not all, programs. Those children were subtracted from the special education enrollment figure for the state, but remain in the state preschool enrollment figure in the enrollment pie charts and when calculating total enrollment across both programs. The remaining seven states were unable to report special education enrollment numbers, and, therefore, estimates were used based on the average percent of special education students in state preschool and enrollment numbers for each program. Information from the PIR regarding special education students were used for two Head Start programs (See Table 4).

Three- and four-year-olds enrolled in Head Start with an IEP or IFSP, as reported in the 2016-2017 PIR, were also removed from the special enrollment total used in the enrollment pie charts. As the PIR does not report a breakdown of special education students by age, estimates were based on total special education enrollment and the percentage of all Head Start enrollees who were 3 or 4 years old. Three-year-olds enrolled in Early Head Start programs were not included in this estimate.

Beginning with the 2014-2015 Yearbook, 3- and 4-year-olds who were enrolled in both Head Start and state preschool were removed from the Head Start enrollment total used in the enrollment pie charts. In 2017-2018, 24 programs were able to report information on the number of children enrolled in state preschool who were also enrolled in Head Start. These children were subtracted from the total Head Start number but remain in the state preschool enrollment number for the enrollment pie charts and when calculating total enrollment across both programs. Thirteen programs reported that children were dually enrolled in Head Start and state preschool but could not report the number of children. In these states, the number of children in state preschool and Head Start may be an overestimate.

### **Determination of State Rankings**

States are given rankings in four areas: the percentage of 4-year-olds enrolled in state preschool (Access Ranking–4-Year-Olds), the percentage of 3-year-olds enrolled in state preschool (Access Ranking–3-Year-Olds), state spending per child enrolled (Resources Ranking–State Spending), and all reported spending per child enrolled (Resources Ranking–All Reported Spending). The measures of access for 3- and 4-year-olds were calculated, as described above, using state data on enrollment in the preschool programs and Census population data. When a state did not report separate enrollment numbers of 3-year-olds and 4-year-olds, the age breakdown was estimated by other means, such as using the average proportion of children enrolled in state preschool at each age in states that served both 3- and 4-year-olds, and provided data by age. State per-child spending was calculated by dividing state preschool spending (including TANF spending directed toward the state preschool initiative) by enrollment. All reported spending per child was calculated by dividing the sum of reported local, state (including TANF), and federal spending by enrollment. Beginning with the 2014-2015 report, we also provide an indicator of whether the state was able to report local and/or federal resources (see Table 6). Beginning in 2015-2016, federal Preschool Development Grant (PDG) spending used for state preschool is included in all reported spending.

All states (and D.C.) that provided data were ranked, starting with “1” for the state with the highest percentage of its children enrolled in the state preschool education program or the state program that spent the most per child. Guam is not included in the state rankings. States that did not serve children at age 3 receive notations of “None Served” on the ranking of access for 3-year-olds. Throughout this report, the District of Columbia is referred to by the term “state,” creating a list of 45 states for rankings. The six states that did not fund a preschool initiative during the 2017-2018 school year are omitted from all rankings and instead receive notations of “No Program” on their state profile pages.

# Appendices Table of Contents

## Appendix A: State Survey Data 2017-2018

### Access

- Administrative authority

- Program availability

- Program enrollment including age, PDG, special education, Head Start, home language, lunch status, ethnicity, race, program location, and operating schedule

OPERATING SCHEDULE

STATE	Is there a formal partnership at the state level with other agencies to extend the program day?
Alabama	No <sup>6</sup>
Alaska	No
Arizona	Yes, blended funding is allowed to support full-day or extended-day enrollment or additional children <sup>6</sup>
Arkansas	No <sup>8</sup>
California CSPP	No <sup>3</sup>
California TK	No <sup>5</sup>
Colorado	No <sup>5</sup>
Connecticut CDCC	No
Connecticut SR	No
Connecticut Smart Start	No
Delaware	No
District of Columbia	Yes, DCPS Title I-eligible Pre-K classrooms incorporate Head Start services through a blended classroom model <sup>6</sup>
Florida	No
Georgia	Yes, to extend beyond school-day to extended-day (wrap-around) <sup>3</sup>
Hawaii	No
Illinois	No <sup>4</sup>
Iowa Shared Visions	No <sup>7</sup>
Iowa SWVPP	No <sup>7</sup>
Kansas Preschool Pilot	No
Kansas State Pre-K	No
Kentucky	No <sup>5</sup>
Louisiana 8(g)	No
Louisiana LA 4	No
Louisiana NSECD	No
Maine	No
Maryland	Yes, to extend beyond school-day to extended-day (wrap-around); to extend part-day to school-day or extended-day <sup>7</sup>
Massachusetts UPK	Yes, with Head Start <sup>5</sup>
Massachusetts Ch 70	No
Michigan	Yes, to extend part-day to school-day or extended-day <sup>2</sup>
Minnesota HdSt	Yes, to extend part-day to school-day or extended-day <sup>4</sup>
Minnesota VPK/SRP	Yes, schools are encouraged to layer and braid funding sources including with Head Start and child care <sup>8</sup>
Mississippi	No
Missouri	No
Montana	No
Nebraska	No
Nevada	No <sup>8</sup>
New Jersey Abbott	Yes, to extend beyond school-day to extended-day (wrap-around) <sup>5</sup>
New Jersey ECPA	Yes, to extend beyond school-day to extended-day (wrap-around) <sup>4</sup>
New Jersey ELLI	Yes, to extend beyond school-day to extended-day (wrap-around) <sup>6</sup>
New Mexico	No
New York	No
North Carolina	No
North Dakota	No
Ohio	Yes, to extend part-day to school-day or extended-day <sup>4</sup>
Oklahoma	No
Oregon HdSt	Yes, through child care subsidy support <sup>1</sup>
Oregon Preschool Promise	No <sup>7</sup>
Pennsylvania RTL	No
Pennsylvania HSSAP	No <sup>1</sup>
Pennsylvania K4 & SBPK	No
Pennsylvania PKC	No
Rhode Island	No <sup>2</sup>
South Carolina	No
Tennessee	No <sup>5</sup>
Texas	No
Vermont	No <sup>6</sup>
Virginia	No
Washington	No
West Virginia	Child care partners offer extended day care through the collaborative model <sup>4</sup>
Wisconsin 4K	Yes, to extend beyond school-day to extended-day (wrap-around); to extend part-day to school-day or extended-day <sup>4</sup>
Wisconsin HdSt	Yes, to extend beyond school-day to extended-day (wrap-around); to extend part-day to school-day or extended-day <sup>5</sup>
Guam	No

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

OPERATING SCHEDULE

STATE	Hours per year funded to operate using state funds	State-funded annual operating schedule
Alabama	1,170	School year or academic year <sup>6</sup>
Alaska	Determined locally <sup>2</sup>	Determined locally <sup>2</sup>
Arizona	Part-day: 400 hours; Full-day: 1,120 <sup>6</sup>	Determined locally <sup>6</sup>
Arkansas	1,246	School year or academic year <sup>7</sup>
California CSPP	Full-day: minimum 246 days/year; Part-day: minimum 175 days/year	Determined locally
California TK	600	School year or academic year
Colorado	Part-day: 360; Full-day: 720 <sup>5</sup>	School year or academic year <sup>5</sup>
Connecticut CDCC	Determined locally <sup>6</sup>	Full calendar year <sup>6</sup>

AGE ELIGIBILITY

STATE	State policy on enrolling children in state-funded preschool when they are age-eligible for kindergarten
Alabama	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>7</sup>
Alaska	State policy does not regulate the enrollment of kindergarte age-eligible children in preschool <sup>3</sup>
Arizona	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Arkansas	Kindergarten-age eligible children may enroll in preschool contingent on the DCCECE review of child waiver, submitted documentation, and IEP <sup>9</sup>
California CSPP	Children may not enroll in CSPP if they are age eligible for K at the start of the year except for children who have their fifth birthday between September 2 and December 2 <sup>5</sup>
California TK	Kindergarten-age eligible children may enroll in TK at the local program's discretion <sup>6</sup>
Colorado	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>6</sup>
Connecticut CDCC	"Children enrolled in half-day kindergarten programs are allowed to enroll in state preschool for the remainder of the day
Connecticut SR	Up to 5% of students who are age-eligible for kindergarten may remain in preschool for an additional year as long as the parent/guardian, School Readiness provider, and local/regional school district agree to the child not entering kindergarten when age appropriate
Connecticut Smart Start	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Delaware	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>7</sup>
District of Columbia	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>8</sup>
Florida	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Georgia	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children may enroll in preschool at the request of parents; Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>4</sup>
Hawaii	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Illinois	Kindergarten-age eligible children with documented disabilities may enroll in preschool; Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>5</sup>
Iowa Shared Visions	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children may enroll and repeat 4-year-old preschool; Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>8</sup>
Iowa SWVPP	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children may enroll and repeat 4-year-old preschool; Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>9</sup>
Kansas Preschool Pilot	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Kansas State Pre-K	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Kentucky	Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>8</sup>
Louisiana 8(g)	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Louisiana LA 4	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Louisiana NSECD	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Maine	State policy does not regulate the enrollment of kindergarte age-eligible children in preschool <sup>6</sup>
Maryland	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Massachusetts UPK	Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>7</sup>
Massachusetts Ch 70	State policy does not regulate the enrollment of kindergarte age-eligible children in preschool
Michigan	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>5</sup>
Minnesota HdSt	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Minnesota VPK/SRP	Children enrolled in preschool if they are eligible for kindergarten are ineligible for state preschool funding
Mississippi	State policy does not regulate the enrollment of kindergarte age-eligible children in preschool
Missouri	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children with documented disabilities may enroll in preschool
Montana	Kindergarten-age eligible children may enroll and repeat 4-year-old preschool
Nebraska	Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>5</sup>
Nevada	Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>13</sup>
New Jersey Abbott	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>4</sup>
New Jersey ECPA	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>5</sup>
New Jersey ELLI	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>7</sup>
New Mexico	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
New York	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
North Carolina	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>5</sup>
North Dakota	State policy does not regulate the enrollment of kindergarte age-eligible children in preschool <sup>5</sup>
Ohio	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Oklahoma	Kindergarten-age eligible children may enroll in preschool at the local program's discretion

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

## AGE ELIGIBILITY

STATE	State policy on enrolling children in state-funded preschool when they are age-eligible for kindergarten
Oregon HdSt	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Oregon Preschool Promise	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Pennsylvania RTL	State policy does not regulate the enrollment of kindergarte age-eligible children in preschool
Pennsylvania HSSAP	Kindergarten-age eligible children with documented disabilities may enroll in preschool; Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>2</sup>
Pennsylvania K4 & SBPK	State policy does not regulate the enrollment of kindergarte age-eligible children in preschool
Pennsylvania PKC	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>4</sup>
Rhode Island	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
South Carolina	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children may enroll in preschool at the request of parents; Kindergarten-age eligible children may enroll and repeat 4-year-old preschool; Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>7</sup>
Tennessee	Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>7</sup>
Texas	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year
Vermont	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children with documented disabilities may enroll in preschool
Virginia	School divisions may assess a child born between October 1 and December 13 to determine his or her readiness for the kindergarten program; Kindergarten age-eligible children may enroll in preschool at the local program's discretion only, not solely at the request of parents
Washington	Children may not enroll in preschool if they are age eligible for kindergarten at the start of the year <sup>8</sup>
West Virginia	Kindergarten-age eligible children may enroll in preschool at the local program's discretion <sup>5</sup>
Wisconsin 4K	Kindergarten-age eligible children may enroll in preschool at the local program's discretion <sup>5</sup>
Wisconsin HdSt	Kindergarten-age eligible children may enroll in preschool at the local program's discretion; Kindergarten-age eligible children may enroll in preschool at the request of parents; Kindergarten-age eligible children may enroll and repeat 4-year-old preschool; Kindergarten-age eligible children with documented disabilities may enroll in preschool <sup>7</sup>
Guam	State policy does not regulate the enrollment of kindergarten age-eligible children in preschool

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

OTHER ELIGIBILITY POLICIES

STATE	Besides age, how is eligibility for state-funded preschool determined for individual children?
Alabama	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>7</sup>
Alaska	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Arizona	Eligibility is determined by individual child or family characteristics in addition to age <sup>7</sup>
Arkansas	Eligibility is determined by individual child or family characteristics in addition to age <sup>10</sup>
California CSPP	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
California TK	All age-eligible children in districts offering the program, or in the entire state, may enroll
Colorado	Eligibility is determined by individual child or family characteristics in addition to age
Connecticut CDCC	Eligibility is determined by individual child or family characteristics in addition to age
Connecticut SR	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>5</sup>
Connecticut Smart Start	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>5</sup>
Delaware	Eligibility is determined by individual child or family characteristics in addition to age <sup>8</sup>
District of Columbia	All age-eligible children in districts offering the program, or in the entire state, may enroll
Florida	All age-eligible children in districts offering the program, or in the entire state, may enroll
Georgia	All age-eligible children in districts offering the program, or in the entire state, may enroll
Hawaii	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
Illinois	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
Iowa Shared Visions	Eligibility is determined by individual child or family characteristics in addition to age <sup>9</sup>
Iowa SWVPP	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>10</sup>
Kansas Preschool Pilot	Eligibility is determined by individual child or family characteristics in addition to age <sup>5</sup>
Kansas State Pre-K	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Kentucky	Eligibility is determined by individual child or family characteristics in addition to age <sup>9</sup>
Louisiana 8(g)	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Louisiana LA 4	Eligibility is determined by individual child or family characteristics in addition to age
Louisiana NSECD	Eligibility is determined by individual child or family characteristics in addition to age
Maine	Eligibility is determined by individual child or family characteristics in addition to age <sup>7</sup>
Maryland	Eligibility is determined by individual child or family characteristics in addition to age <sup>10</sup>
Massachusetts UPK	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>8</sup>
Massachusetts Ch 70	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>9</sup>
Michigan	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
Minnesota HdSt	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
Minnesota VPK/SRP	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>11</sup>
Mississippi	Eligibility at some of the Collaborative partner sites is determined by individual child or family characteristics in addition to age <sup>7</sup>
Missouri	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>6</sup>
Montana	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>7</sup>
Nebraska	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
Nevada	Eligibility is determined by individual child or family characteristics in addition to age <sup>14</sup>
New Jersey Abbott	All age-eligible resident children in districts offering the program may enroll <sup>7</sup>
New Jersey ECPA	All age-eligible children in districts offering the program may enroll
New Jersey ELLI	Eligibility is determined by individual child or family characteristics in addition to age <sup>8</sup>
New Mexico	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>7</sup>
New York	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>5</sup>
North Carolina	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
North Dakota	Eligibility is determined by individual child or family characteristics in addition to age
Ohio	Eligibility is determined by individual child or family characteristics in addition to age <sup>6</sup>
Oklahoma	All age-eligible children in districts offering the program, or in the entire state, may enroll
Oregon HdSt	Eligibility is determined by individual child or family characteristics in addition to age <sup>3</sup>
Oregon Preschool Promise	Eligibility is determined by individual child or family characteristics in addition to age <sup>3</sup>
Pennsylvania RTL	Eligibility is determined by individual child or family characteristics in addition to age <sup>2</sup>
Pennsylvania HSSAP	Eligibility is determined by individual child or family characteristics in addition to age <sup>3</sup>
Pennsylvania K4 & SBPK	K4: All age-eligible children in districts offering the program, or in the entire state, may enroll; SBPK: Eligibility is determined by individual child or family characteristics in addition to age
Pennsylvania PKC	Eligibility is determined by individual child or family characteristics in addition to age <sup>5</sup>
Rhode Island	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>3</sup>
South Carolina	Eligibility is determined by individual child or family characteristics in addition to age <sup>8</sup>
Tennessee	Eligibility is determined by individual child or family characteristics in addition to age <sup>8</sup>
Texas	Eligibility is determined by individual child or family characteristics in addition to age
Vermont	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>8</sup>
Virginia	Eligibility is determined by individual child or family characteristics in addition to age <sup>4</sup>
Washington	Eligibility is determined by individual child or family characteristics in addition to age <sup>7</sup>
West Virginia	All age-eligible children in districts offering the program, or in the entire state, may enroll
Wisconsin 4K	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>6</sup>
Wisconsin HdSt	Eligibility is determined by individual child or family characteristics in addition to age <sup>8</sup>
Guam	All age-eligible children in districts offering the program, or in the entire state, may enroll <sup>2</sup>

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

OTHER ELIGIBILITY POLICIES

STATE	Income requirement
Alabama	None
Alaska	None
Arizona	200% of FPL
Arkansas	200% of FPL <sup>10</sup>
California CSPP	70% of SMI at initial enrollment; 85% of SMI when recertified for enrollment <sup>4</sup>
California TK	None
Colorado	Eligible for free or reduced-price lunch, or 185% of FPL
Connecticut CDCC	75% of SMI
Connecticut SR	60% of children enrolled in each municipality must meet the income guideline of at or below 75% SMI <sup>5</sup>
Connecticut Smart Start	None
Delaware	100% of FPL <sup>8</sup>
District of Columbia	None
Florida	None
Georgia	None
Hawaii	300% of FPL <sup>6</sup>
Illinois	None
Iowa Shared Visions	Eligible for free lunch, or 130% of FPL <sup>9</sup>
Iowa SWVPP	None
Kansas Preschool Pilot	Eligible for free or reduced-price lunch, or 185% of FPL <sup>5</sup>
Kansas State Pre-K	Eligible for free lunch, or 130% of FPL <sup>4</sup>
Kentucky	160% of FPL <sup>9</sup>
Louisiana 8(g)	Eligible for free or reduced-price lunch, or 185% of FPL <sup>4</sup>
Louisiana LA 4	Eligible for free or reduced-price lunch, or 185% of FPL
Louisiana NSECD	Eligible for free or reduced-price lunch, or 185% of FPL
Maine	None
Maryland	Eligible for free or reduced-price lunch, or 185% of FPL <sup>10</sup>
Massachusetts UPK	None
Massachusetts Ch 70	None
Michigan	250% of FPL, with some exception for up to 300% of FPL <sup>6</sup>
Minnesota HdSt	Per Federal Head Start requirements: 100% of FPL <sup>6</sup>
Minnesota VPK/SRP	None
Mississippi	None
Missouri	None
Montana	None
Nebraska	Eligible for free or reduced-price lunch, or 185% of FPL <sup>6</sup>
Nevada	None
New Jersey Abbott	None
New Jersey ECPA	None
New Jersey ELLI	Eligible for free or reduced-price lunch, or 185% of FPL <sup>8</sup>
New Mexico	None
New York	None
North Carolina	75% of SMI <sup>6</sup>
North Dakota	Eligible for free or reduced-price lunch, or 185% of FPL
Ohio	200% of FPL <sup>6</sup>
Oklahoma	None
Oregon HdSt	100% of FPL <sup>3</sup>
Oregon Preschool Promise	200% of FPL <sup>9</sup>
Pennsylvania RTL	None
Pennsylvania HSSAP	100% of FPL <sup>3</sup>
Pennsylvania K4 & SBPK	None
Pennsylvania PKC	300% of FPL
Rhode Island	None
South Carolina	Eligible for free or reduced-price lunch, or 185% of FPL <sup>8</sup>
Tennessee	Eligible for free or reduced-price lunch, or 185% of FPL
Texas	Eligible for free or reduced-price lunch, or 185% of FPL
Vermont	None
Virginia	200% of FPL; 350% of FPL for students with disabilities <sup>4</sup>
Washington	110% of FPL <sup>7</sup>
West Virginia	None
Wisconsin 4K	None
Wisconsin HdSt	Per Federal Head Start income criteria <sup>8</sup>
Guam	None

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

OTHER ELIGIBILITY POLICIES

STATE	How is the income requirement applied to determine eligibility?
Alabama	NA
Alaska	NA
Arizona	100% of children must meet the income requirement
Arkansas	90% or more of the children meet the income criteria; Other children may qualify with other characteristics and/or be on a sliding fee scale <sup>10</sup>
California CSPP	Part-day CSPP: once all eligible children are enrolled, contractors may enroll up to 10% of children whose families exceed the income eligibility threshold by no more than 15% <sup>6</sup>
California TK	NA
Colorado	Income is one of many eligibility criteria <sup>7</sup>
Connecticut CDCC	100% of children must meet the income requirement
Connecticut SR	60% of children in each municipality must meet the income criteria
Connecticut Smart Start	NA
Delaware	Per the Federal Head Start Program Performance Standards <sup>8</sup>
District of Columbia	NA
Florida	NA
Georgia	NA
Hawaii	Priority is given to families at or below 300% FPL <sup>6</sup>
Illinois	NA
Iowa Shared Visions	At least 80% of children must meet the income criteria <sup>9</sup>
Iowa SWVPP	NA
Kansas Preschool Pilot	At least 50% of the children enrolled must meet one of the risk factors which includes income <sup>5</sup>
Kansas State Pre-K	All children enrolled must meet one of the risk factors which includes income <sup>4</sup>
Kentucky	Once all at-risk 4-year-olds (160% FPL) and 3- & 4-year-olds with disabilities are served, other children may enroll if space is available <sup>9</sup>
Louisiana 8(g)	Priority is given to students who qualify for free or reduced price lunch <sup>4</sup>
Louisiana LA 4	100% of children must meet the income requirement
Louisiana NSECD	100% of children must meet the income requirement
Maine	NA
Maryland	All Maryland Prekindergarten Program children are at 185% FPL or below, except for PDG (200% FPL) and State PreK Expansion children (300% FPL) <sup>10</sup>
Massachusetts UPK	NA
Massachusetts Ch 70	NA
Michigan	90 percent of children must meet income eligibility of 250% FPL, with exceptions for up to 300% FPL if sufficient numbers of children cannot be recruited at 250% FPL <sup>6</sup>
Minnesota HdSt	Per the Federal Head Start Program Performance Standards <sup>6</sup>
Minnesota VPK/SRP	NA
Mississippi	NA
Missouri	NA
Montana	NA
Nebraska	70% of children must have one risk factor <sup>6</sup>
Nevada	NA <sup>15</sup>
New Jersey Abbott	NA
New Jersey ECPA	NA
New Jersey ELLI	100% of children must meet the income requirement <sup>8</sup>
New Mexico	NA
New York	NA
North Carolina	Twenty percent of a county's NC Pre-K slots allocation may be used to serve children above 75% of SMI, if they have another designated risk factor
North Dakota	100% of children must meet the income requirement
Ohio	100% of children must meet the income requirement <sup>6</sup>
Oklahoma	NA
Oregon HdSt	Per the Federal Head Start Program Performance Standards <sup>3</sup>
Oregon Preschool Promise	100% of children must meet the income requirement <sup>9</sup>
Pennsylvania RTL	NA
Pennsylvania HSSAP	Per the Federal Head Start Program Performance Standards: at least 90% of children
Pennsylvania K4 & SBPK	NA
Pennsylvania PKC	100% of children must meet the income requirement <sup>5</sup>
Rhode Island	NA
South Carolina	CERDEP: once all income-eligible children are served, students with other risk factors may enroll; EIA 4K: districts may prioritize other risk factors <sup>9</sup>
Tennessee	100% of children must meet the income requirement <sup>9</sup>
Texas	Eligibility for free and reduced price lunch is one of seven ways to qualify <sup>4</sup>
Vermont	NA
Virginia	85% of children must meet the income requirement <sup>4</sup>
Washington	90% of children must meet the income requirement <sup>9</sup>
West Virginia	NA
Wisconsin 4K	NA
Wisconsin HdSt	As per Head Start federal requirements, 10% of children may be over the low-income guidelines <sup>8</sup>
Guam	NA

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

Wisconsin HdSt	NA
Guam	No

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

PROGRAM STANDARDS

STATE	Does this state-funded preschool program have policies/practices in place regarding suspension and/or expulsion of children?
Alabama	Yes, suspension and expulsion policies
Alaska	No
Arizona	No
Arkansas	Yes, suspension and expulsion policies
California CSPP	Yes, suspension and expulsion policies <sup>14</sup>
California TK	Yes, suspension and expulsion policies <sup>13</sup>
Colorado	Yes, suspension and expulsion policies <sup>12</sup>
Connecticut CDCC	Yes, suspension and expulsion policies
Connecticut SR	Yes, suspension and expulsion policies
Connecticut Smart Start	Yes, suspension and expulsion policies
Delaware	No
District of Columbia	Yes, suspension and expulsion policies
Florida	No
Georgia	Yes, suspension and expulsion policies
Hawaii	Yes, suspension and expulsion policies
Illinois	Yes, suspension and expulsion policies <sup>11</sup>
Iowa Shared Visions	No
Iowa SWVPP	No
Kansas Preschool Pilot	No
Kansas State Pre-K	No
Kentucky	No
Louisiana 8(g)	No
Louisiana LA 4	No
Louisiana NSECD	No
Maine	Yes, suspension and expulsion policies
Maryland	Yes, suspension and expulsion policies
Massachusetts UPK	No
Massachusetts Ch 70	No
Michigan	Yes, suspension and expulsion policies <sup>11</sup>
Minnesota HdSt	Yes, suspension and expulsion policies <sup>15</sup>
Minnesota VPK/SRP	No, currently under discussion and review
Mississippi	No
Missouri	Yes, suspension and expulsion policies <sup>11</sup>
Montana	No
Nebraska	Suspension and expulsion policies are under development
Nevada	Yes, suspension and expulsion policies
New Jersey Abbott	Yes, suspension and expulsion policies
New Jersey ECPA	Yes, suspension and expulsion policies
New Jersey ELLI	Yes, suspension and expulsion policies
New Mexico	Yes, suspension and expulsion policies
New York	No
North Carolina	Yes, suspension and expulsion policies
North Dakota	No
Ohio	No <sup>10</sup>
Oklahoma	No
Oregon HdSt	Yes, suspension and expulsion policies
Oregon Preschool Promise	Yes, suspension and expulsion policies <sup>17</sup>
Pennsylvania RTL	Yes, suspension and expulsion policies
Pennsylvania HSSAP	Yes, suspension and expulsion policies
Pennsylvania K4 & SBPK	Yes, suspension and expulsion policies
Pennsylvania PKC	Yes, suspension and expulsion policies
Rhode Island	Yes, expulsion policies only <sup>9</sup>
South Carolina	Yes, suspension and expulsion policies
Tennessee	Yes, suspension and expulsion policies <sup>18</sup>
Texas	Yes, suspension policies only <sup>9</sup>
Vermont	Yes, suspension and expulsion policies <sup>14</sup>
Virginia	Yes, suspension and expulsion policies
Washington	Yes, suspension and expulsion policies <sup>14</sup>
West Virginia	No
Wisconsin 4K	Yes, suspension and expulsion recommended practices <sup>14</sup>
Wisconsin HdSt	Yes, suspension and expulsion policies <sup>14</sup>
Guam	Yes

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

PROGRAM STANDARDS

STATE POLICIES/PRACTICES REGARDING PRESCHOOL SUSPENSION AND EXPULSION

CURRICULUM

STATE	Is there a system to ensure curricula are being implemented with fidelity?
Alabama	Yes, ongoing monitoring, coaching, and training is provided by OSR <sup>20</sup>
Alaska	No
Arizona	No
Arkansas	Yes, the state requires programs to establish a system to ensure that curricula are being implemented with fidelity
California CSPP	No
California TK	Determined locally
Colorado	No
Connecticut CDCC	No <sup>15</sup>
Connecticut SR	No <sup>15</sup>
Connecticut Smart Start	No <sup>14</sup>
Delaware	Yes, the state has a system to ensure that curricula are being implemented with fidelity <sup>17</sup>
District of Columbia	Yes, the state requires programs to establish a system to ensure that curricula are being implemented with fidelity
Florida	Yes, the state requires programs to establish a system to ensure that curricula are being implemented with fidelity <sup>10</sup>
Georgia	Yes, the state has a system to ensure that curricula are being implemented with fidelity
Hawaii	No <sup>14</sup>
Illinois	Yes, the state has a system to ensure that curricula are being implemented with fidelity
Iowa Shared Visions	Yes, AEA's provide training and support for curriculum adoption, implementation, and guidance for fidelity <sup>20</sup>
Iowa SWVPP	Yes, AEA's provide training and support for curriculum adoption, implementation, and guidance for fidelity <sup>17</sup>
Kansas Preschool Pilot	No
Kansas State Pre-K	No
Kentucky	Yes, the state has a system to ensure that curricula are being implemented with fidelity <sup>20</sup>
Louisiana 8(g)	Yes, other <sup>12</sup>
Louisiana LA 4	Yes, other <sup>11</sup>
Louisiana NSECD	Yes, other <sup>10</sup>
Maine	Yes, the state requires programs to establish a system to ensure that curricula are being implemented with fidelity
Maryland	Determined locally
Massachusetts UPK	No
Massachusetts Ch 70	No, fidelity of curriculum implementation is monitored locally
Michigan	Yes, through monitoring and coaching <sup>15</sup>
Minnesota HdSt	Yes, the state has a system to ensure that curricula are being implemented with fidelity
Minnesota VPK/SRP	No <sup>22</sup>
Mississippi	Yes, the state has a system to ensure that curricula are being implemented with fidelity <sup>11</sup>
Missouri	No <sup>13</sup>
Montana	No
Nebraska	No
Nevada	No <sup>26</sup>
New Jersey Abbott	Yes, the state requires programs to establish a system to ensure that curricula are being implemented with fidelity
New Jersey ECPA	No
New Jersey ELLI	No
New Mexico	Yes, consultation, coaching, and monitoring system <sup>17</sup>
New York	Yes, curricula are reviewed and discussed through periodic monitoring of programs
North Carolina	Yes, through teacher training and monitoring <sup>16</sup>
North Dakota	No
Ohio	No
Oklahoma	No <sup>11</sup>
Oregon HdSt	No
Oregon Preschool Promise	No <sup>20</sup>
Pennsylvania RTL	No
Pennsylvania HSSAP	No
Pennsylvania K4 & SBPK	No
Pennsylvania PKC	No
Rhode Island	Yes, through written frameworks, observations, and interviews <sup>12</sup>
South Carolina	Yes, the state has a system to ensure that curricula are being implemented with fidelity <sup>16</sup>
Tennessee	No <sup>22</sup>
Texas	No
Vermont	Yes, the state has a system to ensure that curricula are being implemented with fidelity <sup>17</sup>
Virginia	No
Washington	Yes, the state has a system to ensure that curricula are being implemented with fidelity <sup>16</sup>
West Virginia	Yes, the state requires programs to establish a system to ensure that curricula are being implemented with fidelity
Wisconsin 4K	No
Wisconsin HdSt	No
Guam	No

PRESCHOOL CHILD ASSESSMENTS

STATE	Does state policy require state preschool programs to assess children's learning and development during the preschool year?	What is the frequency of these preschool child assessments?
Alabama	Yes	Multiple times during the year <sup>32</sup>
Alaska	Yes	Multiple times during the year <sup>21</sup>
Arizona	Yes	Multiple times during the year <sup>26</sup>
Arkansas	Yes	Multiple times during the year
California CSPP	Yes	Twice per year <sup>29</sup>
California TK	No	NA
Colorado	Yes	Three checkpoints per year
Connecticut CDCC	No	NA
Connecticut SR	Yes	Determined locally
Connecticut Smart Start	No	NA
Delaware	Yes	Multiple times during the year <sup>24</sup>
District of Columbia	Yes	Multiple times during the year
Florida	Yes <sup>21</sup>	Multiple times during the year <sup>21</sup>
Georgia	Yes	Multiple times during the year
Hawaii	Yes	Multiple times during the year
Illinois	Yes	Multiple times during the year
Iowa Shared Visions	Yes	Multiple times during the year <sup>31</sup>
Iowa SWVPP	Yes	Multiple times during the year <sup>29</sup>
Kansas Preschool Pilot	Yes <sup>18</sup>	Annually, or more if determined locally <sup>18</sup>
Kansas State Pre-K	Yes <sup>20</sup>	Annually, or more if determined locally <sup>20</sup>
Kentucky	Yes	Twice per year <sup>33</sup>
Louisiana 8(g)	Yes	At the beginning and end of the year
Louisiana LA 4	Yes	Multiple times during the year <sup>9</sup>
Louisiana NSECD	Yes	Multiple times during the year <sup>8</sup>
Maine	Yes	Multiple times during the year
Maryland	Yes <sup>22</sup>	Multiple times during the year <sup>22</sup>
Massachusetts UPK	Yes	Continually throughout the year
Massachusetts Ch 70	No	NA
Michigan	Yes	Multiple times during the year <sup>29</sup>
Minnesota HdSt	Yes <sup>11</sup>	Multiple times during the year <sup>11</sup>
Minnesota VPK/SRP	Yes	At the beginning and end of the year <sup>40</sup>
Mississippi	Yes	Multiple times during the year <sup>18</sup>
Missouri	Yes	Within the first 60 days of attendance and six months later
Montana	Yes	At the beginning and end of the year
Nebraska	Yes	Multiple times during the year <sup>24</sup>
Nevada	Yes	At the beginning and end of the year <sup>32</sup>
New Jersey Abbott	Yes	Multiple times during the year
New Jersey ECPA	Yes	Multiple times during the year
New Jersey ELLI	Yes	Multiple times during the year
New Mexico	Yes	Multiple times during the year <sup>26</sup>
New York	Yes	Three times per year
North Carolina	Yes <sup>32</sup>	Multiple times during the year <sup>32</sup>
North Dakota	No	NA
Ohio	Yes	Multiple times during the year
Oklahoma	No	NA
Oregon HdSt	Yes	Multiple times during the year
Oregon Preschool Promise	Yes	At least three times per year
Pennsylvania RTL	Yes	Unspecified
Pennsylvania HSSAP	Yes	Assessment is ongoing; Outcomes are reported twice per year
Pennsylvania K4 & SBPK	Yes	Unspecified
Pennsylvania PKC	Yes	For formative use: Determined by the assessment tool
Rhode Island	Yes	Multiple times during the year
South Carolina	Yes	At the beginning and end of the year <sup>37</sup>
Tennessee	Yes <sup>39</sup>	Multiple times during the year <sup>39</sup>
Texas	No	NA
Vermont	Yes	At the beginning and end of the year
Virginia	Yes	At the beginning and end of the year
Washington	Yes	Multiple times during the year <sup>30</sup>
West Virginia	Yes	Fall, winter, and spring (end-of-year) checkpoints
Wisconsin 4K	Yes	Determined locally <sup>30</sup>
Wisconsin HdSt	Yes	Per federal Head Start Performance Standards
Guam	Yes	At the beginning and end of the year

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

## KINDERGARTEN CHILD ASSESSMENTS

STATE	Does state policy require kindergarten programs to assess children's learning and development?
Alabama	Yes, during kindergarten
Alaska	Yes, at kindergarten entry
Arizona	No <sup>27</sup>
Arkansas	Yes, at kindergarten entry and during kindergarten <sup>35</sup>
California CSPP	Determined locally <sup>32</sup>
California TK	Determined locally <sup>26</sup>
Colorado	Yes, at kindergarten entry and ongoing assessments <sup>20</sup>
Connecticut CDCC	Yes, at kindergarten entry
Connecticut SR	Yes, at kindergarten entry
Connecticut Smart Start	Yes, at kindergarten entry
Delaware	Yes, at kindergarten entry <sup>26</sup>
District of Columbia	No
Florida	Yes, at kindergarten entry <sup>23</sup>
Georgia	Yes, at kindergarten entry and during kindergarten
Hawaii	No
Illinois	Yes, at kindergarten entry <sup>28</sup>
Iowa Shared Visions	Yes, at kindergarten entry and during kindergarten <sup>33</sup>
Iowa SWVPP	Yes, at kindergarten entry and during kindergarten <sup>32</sup>
Kansas Preschool Pilot	No <sup>20</sup>
Kansas State Pre-K	No <sup>22</sup>
Kentucky	Yes, at kindergarten entry and during kindergarten <sup>35</sup>
Louisiana 8(g)	Yes, at kindergarten entry
Louisiana LA 4	Yes, at kindergarten entry
Louisiana NSECD	Yes, at kindergarten entry
Maine	Determined locally
Maryland	Yes, at kindergarten entry <sup>25</sup>
Massachusetts UPK	No
Massachusetts Ch 70	No <sup>28</sup>
Michigan	Yes, during kindergarten
Minnesota HdSt	Determined locally <sup>30</sup>
Minnesota VPK/SRP	Determined locally <sup>43</sup>
Mississippi	Yes, at kindergarten entry and end of year <sup>21</sup>
Missouri	No
Montana	No
Nebraska	No
Nevada	Yes, at kindergarten entry <sup>34</sup>
New Jersey Abbott	No <sup>21</sup>
New Jersey ECPA	No <sup>19</sup>
New Jersey ELLI	No <sup>22</sup>
New Mexico	Yes, at kindergarten entry and during kindergarten <sup>29</sup>
New York	Yes, at kindergarten entry
North Carolina	Yes, at kindergarten entry
North Dakota	No
Ohio	Yes, at kindergarten entry <sup>15</sup>
Oklahoma	Yes, at kindergarten entry <sup>19</sup>
Oregon HdSt	Yes, at kindergarten entry
Oregon Preschool Promise	Yes, at kindergarten entry and during kindergarten
Pennsylvania RTL	No
Pennsylvania HSSAP	No
Pennsylvania K4 & SBPK	No
Pennsylvania PKC	No
Rhode Island	No <sup>24</sup>
South Carolina	Yes, at kindergarten entry and during kindergarten
Tennessee	Yes, in PDG classrooms <sup>40</sup>
Texas	Yes, during kindergarten <sup>17</sup>
Vermont	Yes, at kindergarten entry
Virginia	Yes, during kindergarten <sup>16</sup>
Washington	Yes, at kindergarten entry
West Virginia	Yes, during kindergarten <sup>28</sup>
Wisconsin 4K	Yes, literacy screening <sup>32</sup>
Wisconsin HdSt	Yes, literacy screening <sup>22</sup>
Guam	Yes, at kindergarten entry

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

KINDERGARTEN CHILD ASSESSMENTS

STATE	Required kindergarten assessments
Alabama	Any formative assessment <sup>34</sup>
Alaska	State developed assessment: Alaska Developmental Profile
Arizona	NA
Arkansas	Determined locally <sup>35</sup>

Texas	Determined locally <sup>17</sup>
Vermont	Teaching Strategies GOLD; Ready for Kindergarten! Survey
Virginia	Phonological Awareness Literacy Screening (PALS); Other assessments are determined locally <sup>16</sup>
Washington	Teaching Strategies GOLD <sup>34</sup>
West Virginia	State developed assessment: West Virginia Early Learning Reporting System: Kindergarten (ELRS:K) <sup>28</sup>
Wisconsin 4K	Determined locally <sup>32</sup>
Wisconsin HdSt	Determined locally <sup>22</sup>
Guam	BRIGANCE K

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

STRUCTURED OBSERVATIONS OF CLASSROOM QUALITY

STATE	Does state policy require structured observations of classroom quality?
Alabama	Yes, all classrooms are observed, at least annually <sup>25</sup>
Alaska	Yes, but which classrooms or how often is determined locally <sup>24</sup>
Arizona	Yes, all programs observed every 24 to 27 months per QRIS <sup>28</sup>
Arkansas	Yes, each agency is observed every other year & one-third of classrooms are randomly selected
California CSPP	Yes, all classrooms are observed, at least annually <sup>33</sup>
California TK	No
Colorado	Yes, all classrooms are observed, at least annually if above QRIS level 1
Connecticut CDCC	Yes, non-NAEYC accredited and non-Head Start programs <sup>25</sup>
Connecticut SR	Yes, non-NAEYC accredited and non-Head Start programs <sup>26</sup>
Connecticut Smart Start	Yes, non-NAEYC accredited and non-Head Start programs <sup>22</sup>
Delaware	Yes, all classrooms are observed, over the course of a 3-year cycle
District of Columbia	Yes, all classrooms are observed, at least annually
Florida	No
Georgia	Yes, classrooms are randomly selected to be observed each year <sup>34</sup>
Hawaii	Yes, all classrooms are observed, at least annually
Illinois	Yes, all classrooms are observed, over the course of a 3- to 4-year cycle
Iowa Shared Visions	Yes, all classrooms are observed, every 5 years and determined locally <sup>35</sup>
Iowa SWVPP	Yes, all classrooms are observed, at least annually
Kansas Preschool Pilot	No
Kansas State Pre-K	No
Kentucky	Yes, all classrooms are observed, over the course of a five-year cycle
Louisiana 8(g)	Yes, all classrooms are observed, at least annually
Louisiana LA 4	Yes, all classrooms are observed, at least annually
Louisiana NSECD	Yes, all classrooms are observed, at least annually
Maine	Yes, new classrooms are observed annually, all other classrooms are observed on a 2- to 3- year cycle
Maryland	Yes, all classrooms are observed, at least annually
Massachusetts UPK	Yes, classrooms are randomly selected to be observed each year per QRIS <sup>23</sup>
Massachusetts Ch 70	Yes, all classrooms are observed, at least annually
Michigan	Yes, all classrooms are observed, at least annually <sup>33</sup>
Minnesota HdSt	Yes, all classrooms are observed, over the course of a multi-year cycle per federal Head Start Performance Standards
Minnesota VPK/SRP	Yes, all classrooms are observed, at least annually
Mississippi	Yes, all classrooms are observed, at least annually
Missouri	Yes, all classrooms are observed, at least annually
Montana	Yes, all classrooms are observed, at least annually
Nebraska	Yes, new, low performing, and a percentage of other classrooms are observed annually <sup>27</sup>
Nevada	Yes, PDG-funded classrooms are observed annually <sup>35</sup>
New Jersey Abbott	Yes, all classrooms are observed, at least annually
New Jersey ECPA	Yes, all classrooms are observed, at least annually
New Jersey ELLI	Yes, all classrooms are observed, at least annually
New Mexico	Yes, all classrooms are observed, at least annually
New York	Two prekindergarten grant funding streams require annual visits; Other structured observations are determined locally <sup>19</sup>
North Carolina	Yes, all classrooms are observed, over the course of a multi-year cycle (at most, every 3 years) <sup>36</sup>
North Dakota	No
Ohio	Yes, all classrooms are observed, at least annually
Oklahoma	Yes, all classrooms are observed, at least annually
Oregon HdSt	Yes, but which classrooms or how often is determined locally
Oregon Preschool Promise	Yes, but which classrooms or how often is determined locally
Pennsylvania RTL	Yes, classrooms with Instructional I certified teachers are observed annually
Pennsylvania HSSAP	Yes, all classrooms are observed, over the course of a multi-year cycle
Pennsylvania K4 & SBPK	Yes, classrooms with Instructional I certified teachers are observed annually
Pennsylvania PKC	Yes, all classrooms are observed, at least annually
Rhode Island	Yes, all classrooms are observed, at least annually
South Carolina	Yes, all classrooms are observed, over the course of a 2- to 3-year cycle
Tennessee	Yes, first year teachers are observed and other classroom observations are determined locally
Texas	No
Vermont	Yes, all classrooms are observed, over the course of a three-year cycle
Virginia	No
Washington	Yes, all classrooms are observed, over the course of a three-year cycle <sup>35</sup>
West Virginia	Yes, all classrooms are observed, at least annually
Wisconsin 4K	Yes, but which classrooms or how often is determined locally
Wisconsin HdSt	Yes, some classroom are selected to be observed each year per federal Head Start Performance Standards
Guam	Yes, all classrooms are observed, at least annually

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

STRUCTURED OBSERVATIONS OF CLASSROOM QUALITY

STATE	Required classroom observation instruments
Alabama	CLASS, ERS/ECERS
Alaska	Determined locally <sup>25</sup>
Arizona	CLASS, ERS/ECERS <sup>29</sup>
Arkansas	ERS/ECERS
California CSPP	ERS/ECERS <sup>33</sup>
California TK	NA
Colorado	Colorado Quality Standards <sup>21</sup>
Connecticut CDCC	ERS/ECERS, NAEYC Accreditation
Connecticut SR	ERS/ECERS, NAEYC Accreditation
Connecticut Smart Start	ERS/ECERS, NAEYC Accreditation
Delaware	ERS/ECERS
District of Columbia	CLASS
Florida	NA
Georgia	CLASS, ERS/ECERS, TPOT <sup>34</sup>
Hawaii	CLASS, Danielson Framework
Illinois	ERS/ECERS
Iowa Shared Visions	Determined locally <sup>36</sup>
Iowa SWVPP	Other <sup>34</sup>
Kansas Preschool Pilot	NA
Kansas State Pre-K	NA
Kentucky	ERS/ECERS
Louisiana 8(g)	CLASS
Louisiana LA 4	CLASS
Louisiana NSECD	CLASS
Maine	CLASS
Maryland	CLASS, ERS/ECERS
Massachusetts UPK	ERS/ECERS, CLASS, Program Administration Scale (PAS), Strengthening Families Program Self-Assessment, Arnett-Caregiver Interaction Scale <sup>23</sup>
Massachusetts Ch 70	Danielson Framework
Michigan	Program Quality Assessment
Minnesota HdSt	CLASS <sup>32</sup>
Minnesota VPK/SRP	CLASS, Danielson Framework, Marzano, TPOT <sup>45</sup>
Mississippi	CLASS
Missouri	ERS/ECERS
Montana	ERS/ECERS, State-developed Health and Safety Checklist
Nebraska	ERS/ECERS, TPOT
Nevada	CLASS, ERS/ECERS
New Jersey Abbott	ERS/ECERS, TPOT, Danielson Framework or Marzano <sup>22</sup>
New Jersey ECPA	Danielson Framework or Marzano <sup>20</sup>
New Jersey ELLI	Danielson Framework or Marzano <sup>23</sup>
New Mexico	CLASS, ERS/ECERS, TPOT
New York	Determined locally
North Carolina	ERS/ECERS, NC Professional Teaching Standards <sup>37</sup>
North Dakota	NA
Ohio	The Ohio Classroom Observation Tool
Oklahoma	Marzano Focus Framework, Tulsa Teacher Leader Effectiveness
Oregon HdSt	CLASS
Oregon Preschool Promise	CLASS <sup>39</sup>
Pennsylvania RTL	Danielson Framework
Pennsylvania HSSAP	CLASS, ERS/ECERS <sup>13</sup>
Pennsylvania K4 & SBPK	Danielson Framework <sup>16</sup>
Pennsylvania PKC	CLASS, Danielson Framework, ERS/ECERS, TPOT <sup>21</sup>
Rhode Island	CLASS, ERS/ECERS
South Carolina	ELLCO, ERS/ECERS, Teaching Strategies Coaching to Fidelity, Preschool Edition
Tennessee	CLASS, ELLCO, ERS/ECERS
Texas	NA
Vermont	CLASS, ERS/ECERS
Virginia	NA
Washington	CLASS, ERS/ECERS
West Virginia	Determined locally <sup>29</sup>
Wisconsin 4K	Determined locally
Wisconsin HdSt	CLASS
Guam	CLASS

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

STRUCTURED OBSERVATIONS OF CLASSROOM QUALITY

STATE	How does the state support reliability and validity of the classroom quality observation data?
Alabama	Double coding and CLASS Calibration <sup>36</sup>
Alaska	The state supports CLASS Training
Arizona	The state requires all assessors must be reliable on the tools <sup>30</sup>
Arkansas	ERS/ECERS is conducted via an independent contractor with trained and reliable personnel
California CSPP	Master Anchors (certified to at least 90% reliability) train Regional Anchors (reliability is re-tested periodically)
California TK	NA
Colorado	The state asks for a summation of the report results in the program's annual report
Connecticut CDCC	Annual ESRI training; raters at least 85% reliable <sup>26</sup>
Connecticut SR	Annual ESRI training; raters at least 85% reliable <sup>27</sup>
Connecticut Smart Start	Annual ESRI training; raters at least 85% reliable <sup>23</sup>
Delaware	Programs participate in Delaware Stars; Stars evaluators are required to be reliable on all observation tools used
District of Columbia	All data collectors have a current CLASS Pre-K certification through Teachshone; Monthly calibration; Double coding of a random sample; Data collection protocol fidelity checks <sup>32</sup>
Florida	NA
Georgia	Observers must demonstrate annual reliability for all instruments for which they conduct observations <sup>35</sup>
Hawaii	Observers must pass a training course and maintain certification yearly by passing required reliability testing
Illinois	Ongoing reliability checks with the state anchor <sup>29</sup>
Iowa Shared Visions	Not reported
Iowa SWVPP	Staff are trained on the Iowa Quality Preschool Program Standards <sup>35</sup>
Kansas Preschool Pilot	NA
Kansas State Pre-K	NA
Kentucky	Staff who achieved anchor status with ESRI trained other staff; Cross-agency reliability between state-funded preschool, Head Start, and child care <sup>36</sup>
Louisiana 8(g)	Staff must demonstrate reliability on the CLASS and be reassessed annually for reliability; Qualified non-classroom staff conduct periodic observational assessments to verify reliability; Shadow scoring is required.
Louisiana LA 4	Staff must demonstrate reliability on the CLASS and be reassessed annually for reliability; Qualified non-classroom staff conduct periodic observational assessments to verify reliability; Shadow scoring is required.
Louisiana NSECD	Staff must demonstrate reliability on the CLASS and be reassessed annually for reliability; Qualified non-classroom staff conduct periodic observational assessments to verify reliability; Shadow scoring is required.
Maine	All CLASS observers must have an updated reliability certificate to perform the CLASS
Maryland	Classrooms participating in Maryland EXCELS, the State's QRIS system, are assessed by reliable observers who are monitored by the MD EXCELS Branch which conducts fidelity checks on all assessors
Massachusetts UPK	EEC Program Quality Specialists are trained on the ERS; MA subcontracts with a vendor who is trained to reliability on the ERS to conduct classroom observations for programs that have applied for the upper levels of QRIS (Levels 3 and 4)
Massachusetts Ch 70	Not reported
Michigan	All Early Childhood Specialists (classroom coaches) have been formally trained in the PQA and must renew status as a reliable assessor with a minimum test score of 80% biennially
Minnesota HdSt	Per Federal Head Start
Minnesota VPK/SRP	Professionals administering the tools should complete be trained on the use of the selected tool <sup>45</sup>
Mississippi	All classroom monitors are reliable to the PreK CLASS tool, and maintain reliability annually <sup>22</sup>
Missouri	Inter-rater reliability approximately every tenth assessment with state anchor; all assessors are trained and reliable with the authors of the instrument
Montana	Montana provided annual training to all teachers and on-site coaching to help ensure reliability; All ECERS assessors are reliable
Nebraska	Observers are required to maintain an 85% reliability rating with state anchors who have achieved reliability with the tool authors
Nevada	All QRIS coaches and assessors must be reliable to the anchor assessor in both tools

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

STRUCTURED OBSERVATIONS OF CLASSROOM QUALITY

STATE	How does the state support reliability and validity of the classroom quality observation data?
New Jersey Abbott	The state offers training in the ECERS-3 and reliability training for the TPOT
New Jersey ECPA	The state offers training in the ECERS-3 and reliability training for the TPOT
New Jersey ELLI	The state offers training in the ECERS-3 and reliability training for the TPOT
New Mexico	The state requires all persons administering the classroom observations to receive training
New York	Districts are required to use valid and reliable tools that include environmental quality and teacher/child interactions <sup>19</sup>
North Carolina	Staff must demonstrate reliability on any instruments used; Staff must be re-assessed periodically for reliability; Qualified non-classroom staff conduct periodic observational assessments to verify reliability
North Dakota	NA
Ohio	Staff must demonstrate reliability on any instruments used; Staff must be re-assessed periodically for reliability
Oklahoma	Observers must complete an initial five day training with a final exam; Recertification training must be completed every two years
Oregon HdSt	Certified CLASS observers must be used
Oregon Preschool Promise	2017-2018 was used for capacity building; in 2018-2019 some double coding will be used
Pennsylvania RTL	Not supported
Pennsylvania HSSAP	ERS and CLASS assessments are conducted by a team of assessors who complete inter-rater reliability
Pennsylvania K4 & SBPK	Not supported
Pennsylvania PKC	ERS and CLASS are supported with reliable assessors
Rhode Island	Rhode Island contracts with a third party vendor that hires reliable assessors
South Carolina	All public school monitors are required to receive ELLCO training; All First Steps 4K Regional Coordinators have been trained in the Coaching to Fidelity Tool and ECERS-3
Tennessee	ECERS and ELLCO assessors must be trained to reliability <sup>41</sup>
Texas	NA
Vermont	Vermont conducts state-wide and regional trainings for the ECERS and CLASS <sup>34</sup>
Virginia	NA
Washington	The state contracts with the University of Washington (UW) to conduct the ERS & CLASS, using observers who are certified reliable
West Virginia	Determined locally
Wisconsin 4K	The state provides guidance via the WI Educator Effectiveness System but these resources are not required to be used; For more information see: <a href="https://dpi.wi.gov/ee">https://dpi.wi.gov/ee</a>
Wisconsin HdSt	Individuals using the CLASS must be trained in using the CLASS
Guam	Classroom observations are completed by the School Administrator utilizing the district's Professional Teacher Evaluation Program (PTEP) tool

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

STRUCTURED OBSERVATIONS OF CLASSROOM QUALITY

STATE	Does state policy require programs, teachers, and/or classrooms to receive on-going feedback based on data collected from structured observations of classroom quality?	Does the state receive the results of structured observations of classroom quality?
Alabama	Yes <sup>37</sup>	Yes
Alaska	No	No
Arizona	Yes <sup>31</sup>	Yes
Arkansas	Yes	Yes
California CSPP	Yes <sup>34</sup>	Yes
California TK	NA	NA
Colorado	No	No
Connecticut CDCC	Yes <sup>27</sup>	Yes <sup>27</sup>
Connecticut SR	Yes <sup>28</sup>	Yes <sup>28</sup>

Wisconsin HdSt	Data is integrated across some early care and education programs/services <sup>23</sup>
Guam	The State has no plans to develop an ECIDS

Footnotes are grouped by state at the end of Appendix A. Unless noted, all data are for the '17-'18 school year.

## APPENDIX A: STATE SURVEY DATA 2017-2018

### ALABAMA - First Class Pre-K: Alabama's Voluntary Pre-Kindergarten (FCVPK)

- <sup>1</sup> The Office of School Readiness is within the Alabama Department of Early Childhood Education (ADECE) under the Governor's Office.
- <sup>2</sup> There has been a reduction since last year in the number of FTEs as part of the state's sustainability plan.
- <sup>3</sup> First Class Pre-K: Alabama's Voluntary Pre-Kindergarten Program (FCVPK) is a competitive grant program administered by the ADECE that provides funding for preschool education for 4-year-olds. FCVPK is available in all counties throughout the state and provides funding to start new classrooms, support quality improvements in existing classrooms, and provide extra support to classrooms serving low-income populations.
- <sup>4</sup> Funds for FCVPK are distributed by the Alabama Education Trust Fund (ETF) Budget on a competitive basis to programs running full-day, school-year programs. Grantees must locally match the award, and sliding-scale fees can be included in the matching funds. There are three levels of grants that can be awarded to pre-K programs: (1) Pre-K Excellence Grants of up to \$45,000 per grant. These are awarded to aid programs in meeting Alabama's quality standards, such as financing teacher salaries and teacher support programs. These grants are intended for use by programs that have other primary sources of funding, and are awarded on a three-year cycle. (2) Pre-K Tiered Grants of \$80,100 to \$92,700 per grant. These differ from the Excellence grants as they are intended to be primary sources of funding. These grants are awarded to classrooms serving a certain percentage of children receiving free and reduced-price lunch. These grants are also awarded on a three-year basis. (3) New Classroom or Plus Grants of \$120,000 to \$150,000 per grant. These are one-year grants awarded to new classrooms for the cost of materials, equipment, furnishings, and one full year of the general expenses of operation.
- <sup>5</sup> Alabama developed a plan of sustainability for each of the expansion classrooms. Each new group of expansion classrooms were funded the first year with federal grant funds. However, after the first year, the classrooms were funded with state appropriations. Alabama's governor and the state legislature have been committed to increased funding for voluntary High-Quality Pre-K Programs, and expansion was a priority over the four grant funded years so that funding was increased to sustain all programs created, as well as, award new state classes. First Class Pre-K has strong bi-partisan support in the state legislature.
- <sup>6</sup> The FCVPK program is designed to provide a full day (6.5 hours) of developmentally appropriate instruction and support for 4-year-old children, 5 days per week, for a recommended 180 days per year. Each program is funded for 187 days to include 7 days of professional development for staff. Extended-day services (beyond 6.5 hours per day) are locally determined and not required or provided by the Office of School Readiness (OSR). Extended-day services for pre-K children may be provided at the parent's expense. Income-eligible families may receive services through the Department of Human Resources, Childcare Management Agency office or the Department of Family and Children's Services subsidized childcare program.
- <sup>7</sup> Children must be 4 years of age on or before September 1 and a resident of the state of Alabama, based on acceptable documentation, such as birth certificates, passports, official medical documents, or official documents from other countries. Children who are 5 years of age and are eligible for kindergarten may not enroll in FCVPK. Other locally determined school system boundaries may be applicable.
- <sup>8</sup> Depending on the grant type, programs may charge fees. For those receiving Excellence Awards, programs may charge parents the normal cost of child care that is common in the local community. For Tiered and Plus Awards, fees may be charged, but must not exceed the amounts outlined below. For full PDG awards, fees may not be charged. Parent fees are not required in the FCVPK program. No child may be refused access to FCVPK based on inability to pay. If a child is designated as being served by Title I, Title III, migrant or homeless, they may not be charged fees. Fee scale is as follows: 0-200% FPL: parent fees not to exceed \$40/month; 201-300% FPL: parent fees not to exceed \$100/month; 301-400% FPL: parent fees not to exceed \$200/month; >400% FPL: parent fees not to exceed \$300/month.
- <sup>9</sup> With the exception of Head Start classrooms, all classrooms have a 1:9 staff-to-child ratio with a maximum enrollment of 18 students. In Head Start programs, classrooms are allowed to have a 1:10 staff-to-child ratio with maximum of 20 students.
- <sup>10</sup> Classrooms must provide at least one mealtime per day. Additional snacks and/or meals are optional, but suggested. School meals are healthy meals that are required to meet the Dietary Guidelines for Americans.
- <sup>11</sup> Screenings are to be provided by a medical professional on site at no cost. The Office of School Readiness has partnered with The Alabama Partnership for Children to offer 2-1-1 Help Me Grow referrals to parents, as needed. Physical screenings must be conducted by a medical professional such as a nurse, nurse practitioner or physician's assistant. They must include information regarding height, weight, body mass index and blood pressure.
- <sup>12</sup> All nonpublic school programs are encouraged to participate in the food subsidy program. Teachers make referrals to 2-1-1 Connects Alabama/Help Me Grow Alabama. The Help Me Grow Alabama care coordinator works to connect the family to local resources such as a home visiting program, behavioral counseling, special education evaluation services, etc.
- <sup>13</sup> OSR supports diversity in FCVPK classrooms. OSR funds, however, cannot be used to create special education pre-K classrooms that are serving above the state or national proportionality. It is strongly recommended that OSR classrooms carefully consider and plan for children with disabilities to ensure that resources are in place in the FCVPK classrooms. Programs are encouraged to consult with their local education agency (LEA) special education staff for resources available through the federal Office of Special Education Programs (OSEP).
- <sup>14</sup> There are several supports in place for DLLs. All FCVPK classrooms are required to complete a Home Language Survey. If the survey reveals the child is a DLL, additional objectives can be assigned in the state assessment tool, Teaching Strategies GOLD. ADECE has also partnered with the University of Alabama in Birmingham (UAB) to improve preschoolers' acquisition of language through coaching teachers and PD through Project IMPACT-PD, which offers DLL language and literacy support to teachers who choose to participate. Additionally, FCVPK staff members are required to do a book study on DLLs as part of their PD plan to better support teachers who have DLL children in their classrooms.
- <sup>15</sup> First Class Pre-K Programs are required to develop their own policies for chronic absenteeism. In addition, program monitors keep a check on attendance and discuss concerns with classroom teachers/program directors in efforts to support consistent attendance from students. For additional information, see: <http://children.alabama.gov/wp-content/uploads/sites/4/2018/07/NEW-2018-2019-First-Class-Pre-K-Program-Guidelines.pdf> (Page 23)
- <sup>16</sup> The Alabama Developmental Standards for Preschool Children are grouped around 9 areas of development. Goals and standards in the nine areas align with kindergarten standards found in the subject area Courses of Study developed by the State Department of Education and with the 2011 Head Start Child Development and Early Learning Framework.
- <sup>17</sup> Each classroom is assigned a coach who works directly with teachers on best practices and self-reflection, including incorporation of the developmental standards into daily planning and reviewing assessment practices. The standards are vertically aligned with Alabama's College and Career Readiness Standards as well as horizontally aligned with Teaching Strategies GOLD.
- <sup>18</sup> Teaching Strategies GOLD is the required state assessment tool.
- <sup>19</sup> FCVPK classrooms will implement the Alabama First Class Framework, which consists of the Alabama Developmental Standards for Preschool Children, First Class Program Guidelines, First Class Classroom Guidelines, the ASQ-3 Developmental Screener and the Teaching Strategies GOLD Assessment. Classroom guidance and support will be provided by First Class Coaches.
- <sup>20</sup> Monitors work with program administrators to ensure that FCVPK grants are properly administered, provide appropriate leadership to teaching staff in concert with coaches to improve instruction, and support the development of leadership skills necessary for effective program management and improvement.
- <sup>21</sup> The state does not endorse any one particular curriculum, but a curriculum must promote appropriate instructional practice and enhance learning and development while being consistent with the intent of the OSR First Class Pre-K Framework. It should also align with the state required assessment tool, TS GOLD. First Class teachers and administrators work closely with OSR coaches and/or program monitors to choose a curriculum that will help a teacher be successful. All curricula must promote appropriate instructional practice and supplement the OSR First Class Program Framework.
- <sup>22</sup> Pre-K teachers are required to have a Bachelor's degree in early childhood or child development, at minimum, regardless of the delivery system. All lead teachers must have 18 hours of coursework in early childhood or child development, at minimum. A new certificate was implemented during the 2016-2017 school year resulting in a Class B Pre-K Certificate (Birth to age 4). To qualify, the candidate must have a Bachelor's degree from a senior institution and pass the Praxis II 5531, Pre-K Education. In addition, the program must be accredited by NAEYC or submitted for review and approved by the Alabama State Department of Education (ALSDE). The certificate is valid for 5 years and is renewable.
- <sup>23</sup> Health and safety training is provided through public schools and is also mandatory for licensed child care sites. In addition, during the first coaching visit, coaches provide PD on health and safety.
- <sup>24</sup> Individual PD plans are required of lead and assistant teachers. FCVPK uses a tiered model of coaching so the teacher is continuously setting goals and self-reflecting

- throughout the year. The majority of teachers are visited at least once per month. This requirement is written into the ARC model, which is used for all pre-K teachers.
- 25 A full-time coach may have up to 20 classrooms. A part-time coach may have up to 12 classrooms. This number could vary depending on distances a coach travels or where the teachers fall on the tiered coaching model (emerging, progressing, refined, etc.).
  - 26 The FCVPK coaches do a book study, and all FCVPK teachers are required to complete a MyTeachingStrategies module pertaining to English Language Acquisition. It supports teachers with proven strategies for helping English and DLLs participate fully in classroom routines and experiences. Teachers are also required to complete a TS Gold Interrater Reliability Certificate for Pre-K, Special Needs and DLLs, and Strengthening Families Modules. Materials are now available in Spanish and some materials are available in different languages. In addition, ALSDE provides technical assistance regarding the education of English Learners to all stakeholders.
  - 27 Lead teachers were given an annual step raise beginning with year 2016-2017; this pay raise is annual to mirror public school step pay increases (including Master's Degree raises and COLA increases). Alabama requires starting salary parity with primary school teachers for pre-K teachers in both public and private providers. DECE remains committed to ensuring pre-K teacher pay parity with K-12 public school teachers, including salary and paid time for planning and professional development. Fringe benefits are part of Public school and Head Start policy, but not necessarily part of childcare policy and are determined locally. Alabama supports fringe benefits for nonpublic lead teachers but does not require. However, the department is working on an economy of scale study with lead childcare directors in the state. For additional information, see: <http://children.alabama.gov/wp-content/uploads/sites/4/2018/07/NEW-2018-2019-First-Class-Pre-K-Program-Guidelines.pdf>
  - 28 All lead and auxiliary teachers are funded for 187 days of service - 180 days of classroom instructional services provided to children and 7 days of pre/post planning and/or staff training. They are expected to work and be compensated based on 7.5 hours of work per day which includes 6.5 hours of instruction and 1 hour of planning.
  - 29 Alabama provides master's degree enhancement grants, scholarships, and mini-grants for specialized training.
  - 30 All auxiliary teachers received a 2.5% pay increase during the 2017-2018 school year. The state also has explicit requirements for fringe benefits for assistant teachers in public schools. Fringe benefits for assistant teachers in nonpublic schools are determined locally but encouraged. DECE is currently in planning status to create policy for step raises for assistant teachers to be implemented FY20. PD days are built into the Memorandum of Understanding with each grantee.
  - 31 The State Education Trust Fund (ETF) is the largest operating fund of the state. Ten tax sources are allocated to the ETF, the largest of which are the individual and corporate income tax, sales tax, and use tax.
  - 32 GOLD is on-going as well as formative with 3 checkpoints during the year; PPVT is pre-post; DECA was piloted pre-post and is currently used to support addressing challenging behaviors
  - 33 All lead and auxiliary teachers are required to complete 2 days of face-to-face TS GOLD training, complete specific online training modules, and pass interrater reliability certification.
  - 34 Programs are required to use any formative assessment. This is locally determined. Examples include Global Scholar, Star Early Literacy and DIBELS. Some kindergarten programs use Teaching Strategies GOLD.
  - 35 The data collected from CLASS observations is used for a variety of purposes, including PD, monitoring and evaluation, and research. In addition, during the first 30 days, the DECA-P Reflective Checklist is completed by a coach for each classroom. This is a Reflective Checklist, which refers to Daily Routines, Environment, Caring Connections, Activities, and Partnerships with Parents. This checklist is to ensure that universal strategies are in place to benefit all children.
  - 36 ADECE staff do this through double coding and CLASS Calibration. Double coding allows two observers to watch interactions in a classroom together, code individually and then review to ensure they are reliably scoring within one point of each other in each dimension observed, and to have in-depth conversations about the evidence that supports effective teacher-child interactions. CLASS Calibration allows all the ADECE staff to observe the same video, code and compare the data on our scoring tendencies to ensure everyone is continuously looking through the same lens of high quality classroom interactions.
  - 37 After the coach and teacher work together to identify goals for improvement of teacher and classroom practices, focused observations allow the coach to anchor their feedback and coaching support in the teacher's current level of practice. Sharing examples of what was observed in the classroom in a specific focus area, the teacher can make connections from what they are currently doing to where they would like to go in their teaching practices. Focused observations should be driven by the shared goals and action plan the coach and teacher previously developed.
  - 38 Currently, programs are participating in the QRIS on a voluntary basis.
  - 39 Programs are monitored on a tiered approach based on level of support needed. Programs receive a minimum of 1 or more visits depending on the level of need. Monitoring and data collection reports are completed every 2 months on all sites.
  - 40 Governor Ivey is working on completion of a longitudinal data system for spring 2019.

## ALASKA - Alaska Pre-Elementary

- 1 Districts can use funds to support teachers in Head Start classrooms or to support Head Start partnerships. Each district approaches this partnership in a unique way. Not all districts have partnerships with Head Start programs. Some programs have formed partnerships with Head Start. Those programs have multiple types of partnerships. Some districts support teachers in Head Start classrooms and some districts provide wrap-around support for Head Start. It depends on the unique needs of the district.
- 2 The state does not have a minimum hour per day requirement. Hours per day and operating schedule are locally designed to fit district needs. Not all areas of Alaska can support a minimum hour requirement. For example, some programs offer an opportunity for 4-year-olds to participate in kindergarten during specified times of the day. Programs may partner with child care or other services to provide wraparound care, but, by state definition, state-funded pre-K cannot operate for longer than five hours a day.
- 3 Exceptions to age requirements may be made for children with IEPs. If parents and members of the IEP team determine that pre-K is the least restrictive environment for the child, the child could receive services through pre-K even if he or she did not meet the age requirements.
- 4 Eligibility is based on local need and the needs assessments developed by districts.
- 5 Some district programs charge a sliding fee scale based on the program and district.
- 6 Preschool programs are not required to perform screenings. It is, however, a recommended practice.
- 7 Districts are subject to federal Child Find requirements. With parental consent, students are screened and if warranted, referred for special education eligibility determination. If qualified, students will be offered an Individualized Education Program that provides FAPE. Services received from an outside service provider do not negate the district responsibility to offer an IEP.
- 8 All programs follow state pre-elementary statute and regulations. School districts partnering with Head Start programs must follow federal Head Start requirements. Support services include parenting support or training, health services for children, and nutrition information.
- 9 The Alaska Department of Education works collaboratively to provide training on curriculum and assessment for district leaders. District leaders consult with the department when selecting curriculum for classrooms. The state incorporates Teaching Strategies into all preschool programs. This assessment has been aligned with the state ELDS.
- 10 The state has provided additional funding support for Head Start and pre-elementary grantees when looking for curriculum resources materials. The state also provides training to district leaders both in group and individual settings to support curriculum alignment.
- 11 All public school teachers are required to have a minimum of a BA. Teachers in Head Start classrooms follow Federal Head Start Regulations. There is currently no subcontracting to Community-based organizations, but it is allowed. If Community-based organizations (CBOs) started subcontracting, there would be no statewide minimum degree requirement for teachers.
- 12 A lead teacher in a public school can have Pre-Service specialized training in Early Childhood Education, Elementary Education, or Preschool Special Education. Teachers are encouraged to have training in Early Childhood Education, but it is not required. There is no license/certification/endorsement required for lead teachers in non-public schools.
- 13 Assistant Teachers must be working toward a CDA, 12 ECE credits, or an AA in ECE within 2 years of hire (per Head Start Performance Standards). Assistant Teachers working in Title 1 schools are required to have a CDA, 12 ECE credits of an AA in ECE.
- 14 Coaching and mentoring services are being piloted to some lead and assistant teachers on a voluntary basis. Alaska uses the My Teaching Partner Coaching System and is looking to expand using Early Ed U.

- <sup>15</sup> Teachers receive bi-weekly coaching or mentoring through My Teaching Partner.
- <sup>16</sup> Policies may vary based on the type of certification the teacher has. The state requires that there be a “Teacher of record” that is a certified teacher for their pre-K classroom. Some programs have a non-certified Lead Teacher as the person who provides the instruction while the certified teacher is the “Teacher of record” and any certified teacher needs to be paid as a certified teacher even though a non-certified lead teacher may not be. Certified Teachers in Alaska and non-certified teachers would have different union’s bargaining on their behalf.
- <sup>17</sup> This is required for certified teachers.
- <sup>18</sup> Although the state does not provide any of these types of supports, the QRIS will. Participation in the QRIS is voluntary. At the local level, some districts provide bonuses or coaching or scholarships defined by their local union contracts. Also, licensed child care providers can receive reimbursement for PD.
- <sup>19</sup> Alaska contributes \$6.8 million dollars of state funding to support Head Start programs and \$820,000 to support home visiting and literacy supports for young children.
- <sup>20</sup> The formal evaluation will be completed by 2021. Education Northwest is planning to conduct an assessment of the 3-year Development Grants.
- <sup>21</sup> Fall, Winter, and Spring checkpoints are encouraged. Summer checkpoints are optional.
- <sup>22</sup> All domains are available, but programs only need to report on 5 domains: Language, Literacy, Cognitive, Math, and Social-Emotional.
- <sup>23</sup> Interrater reliability is required by the fall checkpoint for existing programs and before the first checkpoint for new programs.
- <sup>24</sup> Teachers are observed through their districts and the local unions determine how frequently observations are done.
- <sup>25</sup> Some districts have locally designed instruments. Programs can choose which instrument(s) to use but the CLASS, ERS/ECERS, Danielson, and/or Marzano are encouraged.
- <sup>26</sup> Alaska is in the process of implementing a QRIS system called Learn & Grow. This system will be aligned between preschool, Head Start and Child Care.

## ARIZONA - Quality First Scholarships

- <sup>1</sup> First Things First was designed to meet the diverse needs of Arizona communities. Decisions about which early childhood strategies will be funded, such as Quality First Scholarships, are made by 28 regional partnership councils composed of community volunteers. More information about the Regional Partnership Councils can be found here: <https://www.firstthingsfirst.org/governance/ftf-regions/>
- <sup>2</sup> In addition, 2,539 infants and toddlers received Quality First Scholarships 2,392 in center-based settings and 147 in home-based setting. An additional 164 preschool-aged children were served in home-based settings, including 92 3-year-olds and 72 4-year-olds.
- <sup>3</sup> In addition to the number of children who received special education services in center-based settings, 1 additional child who had and IFSP/IEP received a Quality First Scholarship in a home based setting.
- <sup>4</sup> Head Start programs are able to participate in Quality First Scholarships only to extend a part-day to a full-day or increase slots in their program above and beyond the federally funded slots. It is also possible that children enrolled part-time in Head Start may also have a part-time Quality First scholarship at another program but this data are not currently collected.
- <sup>5</sup> If a child changes settings, he/she will be counted in multiple categories.
- <sup>6</sup> The state does not dictate the annual operating schedule, but programs must operate 400 instructional hours annually, 34 hours per month, and 8 days per month, which assumes a minimum of 2 days per week. Part time services for children are defined as enrollment that meets both of the following criteria: scheduled for 34 to 92 hours per month and a minimum of 8 days per month. Full time services for children are defined as enrollment that meets both of the following criteria: scheduled for a minimum of 93 hours per month and a minimum of 8 days.
- <sup>7</sup> Eligibility to participate in Quality First Scholarships includes age requirements and income requirements. Children must be birth through 5 years of age, not eligible for kindergarten, and must live in a family that earns 200% of FPL or below.
- <sup>8</sup> Some early care and education programs charge a co-payment to the family in addition to the funding that the state provides, but this is a decision made by the early care and education program the child attends.
- <sup>9</sup> Eligibility is re-determined each state fiscal year based on the child’s age and the family’s income. Children remain eligible for the entire state fiscal year. Children who are deemed ineligible at the start of a new state fiscal year are dis-enrolled from the program.
- <sup>10</sup> Group size and teacher-child ratio are based on the age of the youngest child in attendance. Ratios and group sizes are assessed every other year in the Quality First rating process.
- <sup>11</sup> In order to participate in Quality First Scholarships, programs are required to be regulated. State child care licensing regulations require the following: children enrolled two to four hours receive one or more snacks; children enrolled four to eight hours receive one or more snacks and a meal; children enrolled nine or more hours receive two snacks and a meal.
- <sup>12</sup> Programs participating in Quality First and Quality First Scholarships must have a written procedure for both screening and referring children for additional services as part of their Quality First rating. Programs may provide screening themselves or refer families to receive screening from other organizations.
- <sup>13</sup> As part of the Quality First Rating (required for participation in Quality First Scholarships), programs are assessed every 24 to 27 months on kindergarten transition activities, involvement of parents in ongoing progress monitoring, parent conferences and/or home visits, and their screening/referral policy.
- <sup>14</sup> In some of the regions, Inclusion of Children with Special Needs Coaching is available to support teachers in implementing inclusive practices. Additionally, all programs participating in Quality First Scholarships are assessed every 24 to 27 months on their lesson plans. Classrooms who have children enrolled with special needs are required to include modifications/individualization for children with special needs on their lesson plans.
- <sup>15</sup> A protocol exists for early care and education programs to address chronic absenteeism. Three letters with progressive language regarding a child’s absenteeism exist to support programs in addressing chronic absenteeism. A child may be disenrolled if they do not attend at least 85% of their scheduled time.
- <sup>16</sup> All programs participating in the state preschool program receive on-site coaching that can support the implementation of the ELDS. In addition, the Arizona Department of Education offers an introduction to the standards training as well as in depth training on each of the sections of the standards.
- <sup>17</sup> The state has identified TS GOLD as the state approved child assessment. To participate in Quality First Scholarships, an early care and education program is not required to use TS GOLD, but rather any assessment that is aligned to the ELDS and the Infant Toddler Developmental Guidelines.
- <sup>18</sup> The Arizona Department of Education provides on-line resources to support programs in selecting a curriculum (see: <http://www.azed.gov/ece/preschool/>). Early Care and Education programs participating in Quality First Scholarships are assessed every 24 to 27 months on the alignment of their curriculum with the Arizona Early Learning Standards and Infant Toddler Developmental Guidelines. The curriculum assessment also includes a requirement to include curriculum learning objectives for children, and any modifications to the curriculum made for individual children if there are children enrolled with special needs in the classroom. In addition, programs receive on-site technical assistance on a monthly basis that can include support in curriculum implementation.
- <sup>19</sup> The minimum requirement is that 25% of lead teachers and administrators have at least 12 college credit hours in early childhood or related fields or a Certificate of Completion in ECE or CD, or a CDA. However, all programs must have a minimum star rating to participate in the state-funded preschool.
- <sup>20</sup> Fifty percent of Quality First Scholarships assistant teachers must have a minimum of six months of experience working in an early care and education program. However, all programs must have a minimum star rating to participate in the state-funded preschool.
- <sup>21</sup> Quality First Scholarships requirements for ongoing PD are aligned with the State Licensing standards.
- <sup>22</sup> Monthly coaching is provided to all early care and education programs participating in Quality First Scholarships. The coaching can be used to support teachers, assistant teachers, and administrators, and includes the review of assessment reports. While the coaching is required, the audience receiving the coaching is not dictated by the state.
- <sup>23</sup> The education level for 1,525 (74%) of teachers is unknown; in addition, 2% (43) have certificate of completion in ECE; .3% (6) have AZ State Teaching Certificate; 5.8% (12) have AZ State Teaching Certificate with ECE Endorsement; and .2% (4) have AMS/AMI Montessori Credential.

- 24 The First Things First College Scholarships is available to any early childhood professional in the state. In addition, the PDG grant has supported teachers to obtain Bachelor's degrees. Also, REWARD\$, a wage enhancement and retention strategy, is available in some regions. This strategy provides annual wage enhancements to those working directly with young children and earn \$20.00 per hour or less.
- 25 In addition to the funding that supports children 3 - 5 years of age in center-based settings, \$656,921 was spent to support Quality First Scholarships in home based settings. This program also provide service to infants and toddlers at a total budget of \$16,053,273 for both center- and home-based Quality First Scholarships. A total of \$38,017,495 was expended in 2017-2018 program year.
- 26 Child assessments are completed ongoing throughout the child's enrollment in the early care and education program.
- 27 The state of Arizona has identified a Kindergarten Developmental Inventory and Formative Assessment to be implemented in SFY 2019. This is a voluntary system designed for kindergarten teachers to implement.
- 28 All programs participating in Quality First Scholarships must also participate in Quality First, Arizona's Quality Improvement and Rating System. Each program receives a program assessment every 24 to 27 months that includes assessments in one-third of the total number of classrooms at the site using the ERS (ITERS, ECERS, FCCERS), the CLASS (Toddler, Pre-K), and the Quality First Points Scale that includes reviewing curriculum, child assessment, ratios and group sizes, staff qualifications, staff turnover, policies for kindergarten transition, and screening/referral. The assessments are used to determine if the program is eligible to participate in the state-funded preschool program, Quality First Scholarships, and to support the program in improving or maintaining quality.
- 29 All programs are also assessed on Staff Qualifications, Administrative Practices (Ratios/Groups Sizes and Retention), and Curriculum/Child Assessment using the Quality First Points Scale, developed by First Things First.
- 30 The state contracts with an organization to conduct all the assessments in Quality First. The state requires that all assessors must meet the reliability as identified by the tool. In addition, every 10th assessment an assessor conducts must be conducted in tandem with an assessor supervisor or assessor trainer to ensure ongoing reliability in use of the tool.
- 31 Quality First provides a coach for each site who supports the understanding of the assessment results and support in identifying areas of focus and providing support on the areas identified.
- 32 Quality First Coaches visit the sites monthly.

### **ARKANSAS - Arkansas Better Chance (ABC)/Arkansas Better Chance for School Success (ABCSS)**

- 1 State funding is provided through the Arkansas Department of Education (ADE). The ADE has an agreement with the Division of Child Care and Early Childhood Education (DCCECE) to have the administrative oversight of the ABC Program to ensure compliance with the state law and regulations. The ADE Board of Education must be informed of and/or approve grant awards, program standards/regulations and the impact of these services as they relate to school readiness.
- 2 All 238 school districts have access to the Arkansas State funded preschool program - Arkansas Better Chance.
- 3 School districts classified as being in academic distress, appearing on the school improvement list, or where more than 75% of fourth graders score below proficient on benchmark exams, are required to work with the ADE and the local community to establish, promote, and assist in the development of an ABC/ABCSS pre-K program. Awarded funding goes to either the school district or a community provider in the identified locations.
- 4 All 36 five-year-olds are enrolled only through a waiver process, which may be due to a disability, a development delay, or because children are from Foster Care and need more time to prepare for Kindergarten. The enrollment total does not include children who received ABC home-visiting services only during the 2017-2018 program year. Children who are dually served in center-based care and home visiting are included in the enrollment total.
- 5 There are 1,363 new seats/PDG Expansion slots that are not a part of the ABC/ABCSS funding, but these children may be served in ABC/ABCSS classrooms and/or facilities alongside children funded by ABC-ABCSS. The high-quality requirements for the PDG children meet or exceed the ABC/ABCSS quality standards.
- 6 Some Head Start programs are ABC grantees.
- 7 All state-funded preschool services are expected to operate for a minimum of seven hours per day. All children receive a minimum of seven hours per day for a total of 178 days per year. This is considered the regular school day and not an extended day in Arkansas. The local ABC program operating schedule typically reflects the annual operating schedule of the local school district.
- 8 Programs may apply for Child Care Development Funds (CCDF) to assist with before- and after-school care, provided the children meet the eligibility requirements for CCDF. When available, CCDF may also fund ABC summer school to provide an extended year for those programs interested in providing these services.
- 9 The Child Waiver must be approved by DCCECE prior to enrolling in the ABC program.
- 10 The \$10 Million (Arkansas Better Chance) uses other individual child or family characteristics to determine eligibility and can serve children beginning at birth. Children eligible to participate in an ABC program shall have at least one of the following characteristics: family with gross income not exceeding 200 percent FPL; a parent without a high school diploma or GED; low birth weight (below 5 pounds, 9 ounces); parent who was under 18 years of age at birth of child; immediate family member with a history of substance abuse; a demonstrable developmental delay identified through screening; eligible for services under IDEA; income-eligible for Title I programs; limited English proficiency; a parent who has a history of abuse or neglect, or who is a victim of abuse or neglect; meets the state homeless criteria; is in foster care; or has an incarcerated parent. The \$101 Million (Arkansas Better Chance for School Success) uses income eligibility and targets children ages 3 and 4 years old or those children who are not eligible for kindergarten without an approved waiver. To be eligible to participate in the ABCSS program, the family must have a gross income not exceeding 200 percent FPL and the child must be age-eligible. A sliding fee scale applies to families with incomes between 200 and 250 percent FPL.
- 11 The maximum class size for each age group of ABC children cannot exceed the classroom's licensing capacity at any time.
- 12 The age appropriate health/well child screenings include the Early Periodic Screening, Diagnosis, and Treatment (EPSDT) screening and a hearing and vision test. The complete health/well child screenings should be completed every two years while the child is in the ABC program.
- 13 While in depth courses/training for preschool teachers serving children with special needs is not specifically required, the state requires the teachers and paraprofessionals to obtain 30 hours of PD including the topics of special needs, the process, Special Education rules and regulations, and IDEA. ABC programs also work collaboratively with the Early Childhood Special Education Specialists in the local school district and/or the Education Services Cooperatives.
- 14 The state does not have policies that regulate services for preschool DLLs. The state does support DLL students as seen in the provision of translated materials for parents, enrollment applications, learning standards, etc. Local programs make decisions about translation into languages according to the local population to accommodate families. Additionally, bilingual instruction is permitted in child's home language; dual language immersion programs are permitted; children are permitted to be pulled out for English language instruction; recruitment, enrollment, and outreach information is provided to families in their home languages; a home language survey is sent home at the beginning of the school year; information about enrolled children's program and performance must be presented to families in their home languages; PD and/or coaching is provided for teachers of DLLs/ELLs; and the State's ELDS include content related to serving DLLs/ELLs such as world languages, foreign language acquisition, and/or cultural awareness.
- 15 The current ELDS are in alignment with the State K-3 Standards and also link to the kindergarten entry assessment (KEA).
- 16 The state strongly supports the ELDS and has approved these standards via the Early Childhood Commission, which is an advisory group. Funding is provided to contractors to disseminate training statewide to EC providers.
- 17 ABC programs are required to only use the Work Sampling Assessment by Pearson for every child enrolled. The ABC teaching staff continuously assess children's progress by monitoring their skills, knowledge, behavior, and accomplishments. Teachers evaluate the child's progress in each of the WSS domains three times during the year - in the fall, winter, and spring. WSS is curriculum neutral and has been aligned with the Arkansas ELDS. Additionally, the state has an approved list of developmental screening instruments that programs use to conduct a routine annual developmental screening on each child to identify developmental delays and/or educational deficiencies.
- 18 Funding is provided to programs that may be used for TA to support curriculum implementation. The use of the TA funding is a decision made at the local level. Professional Development is available via state support that will offer enhancements to any curriculum.
- 19 There are specific standards that address the areas of mathematics and technology and programs are expected to implement learning opportunities for children in these areas. There is also specific PD geared to train teachers in providing math opportunities to children.
- 20 The lead teacher in a nonpublic school-based program must have a minimum of a BA in Early Childhood Education or Child Development. For all programs with multiple

classrooms at a single location, the teacher of the second classroom shall hold, at a minimum, an AA in Early Childhood Education or Early Childhood Development. State policy does allow programs to hire staff under an approved staff qualifications plan while completing coursework to obtain minimum credentialing.

- <sup>21</sup> In Fall 2015, the Arkansas Department of Education (ADE) replaced the Pre-K-4th grade (P-4) license with the Early Childhood/Special Education Integrated Birth – K (B-K) license. Any teacher who had already received a P-4 or was in the process of completing the license, could continue. Teachers holding an Elementary K-6 License, or a Special Education License can complete the requirements to obtain an Age 3-4 Endorsement from the ADE. Teacher credentials are evaluated on a case-by-case basis in an effort to include high quality teachers from varying educational backgrounds. The rule is that a teacher must have a completed coursework in early childhood education and/or child development, though in some cases the teacher is placed on a Staff Qualification Plan (SQP) to complete the required coursework. Each teacher and paraprofessional is required to have 30 clock hours per year of PD on topics pertinent to early childhood education, so all teachers have a strong foundation.
- <sup>22</sup> To serve as a paraprofessional/assistant teacher in the ABC program, teachers are required to either complete the CDA credential or have an associate degree in early childhood education or child development. The Birth to Pre K Credential and Technical Certificate in ECE/CD are also options for the state-funded preschool program. The Technical Certificate requires 24 Early Childhood Education coursework hours in ECE and/or CD. In the LEA setting, an Assistant Teacher is required to take and pass the Educational Testing Services (ETS) Parapro Assessment. Other options include Birth to Pre K Credential, AA Degree in ECE/CD, Technical Certificate in ECE/CD.
- <sup>23</sup> The PD requirements were changed in 2015 to require no less than six days of professional development per year. Since the 2015-2016 school year, educators are required to obtain a minimum of 30 hours per year of professional development for licensure renewal and contractual agreement.
- <sup>24</sup> Classroom-embedded support is not required by state policy but is encouraged at the local level. There is TA available for the environmental rating scale and for implementing the on-going state assessment system using anecdotal recording and observation. There are also professional development requirements that any teacher or paraprofessional must attend or complete to be in good standing and which are early childhood specific in all areas of the ELDS.
- <sup>25</sup> Other category includes those teachers who may have three years of college with a Certificate of Proficiency and working to obtain a four-year degree.
- <sup>26</sup> Local programs make decisions about specific qualification for staff who work with DLLs based on the needs of the community of learners.
- <sup>27</sup> Salary parity has been highly recommended and was initially expected but because the program has been flat funded with only a minimal increase, the salary schedule may vary. Many districts do pay pre-K teachers/ paraprofessionals/assistant teachers on a comparable pay scale as their K-3 counterparts depending on their educational level and credentials.
- <sup>28</sup> The local ABC programs are encouraged to contract with the ABC staff for 12 days beyond the 178 days of classroom instruction dedicated for professional development, parent-teacher conferences, etc.
- <sup>29</sup> The local ABC programs are encouraged to budget funding to support the classroom staff desiring to attain credentials and/or higher education courses to enhance their early childhood skills. These efforts strengthen the workforce and builds sustainability for the program.
- <sup>30</sup> PDG funds in the amount of \$3,758,389 provides opportunities for ABC/PDG Grantees to increase the level of services to include the PDG elements of higher staff qualifications, dental and mental health screenings, additional professional development, technical assistance and the support of Family Service Managers.
- <sup>31</sup> The state pays the approved ABC grantees a rate of \$4,860 per child in the center based setting and \$1,750 per child in the home visiting setting for a period of 10 months.
- <sup>32</sup> Several of the Education Service Cooperatives ABC grantees write the grant for state funds on behalf of the LEA in which they set up the services and oversee the operations also on behalf of the LEA. One of the higher education ABC grantees writes the ABC grant on behalf of the LEA, local community, and family care homes.
- <sup>33</sup> The local match may be in-kind and not necessarily currency.
- <sup>34</sup> Teachers are required to take PD trainings for WSS including: a two-day, 12-hour Introduction training; a 1.5-hour Refresher Webinar each year; and a one day, 6-hour Curriculum Connections course. Administrators are required to take the 1.5 hour WSS System Administrative Overview Webinars. The staff of the oversight agency or consultants which are employed by the state make site visits to observe, coach, and provide technical assistance after the local teaching staff have participated in the required trainings.
- <sup>35</sup> Arkansas law (Act 930 of 2017) requires the administration of a developmentally appropriate measurement or assessment for kindergarten through grade two in literacy and math. Beginning with the 2017-2018 school year, each school district was allowed to choose from a list of state approved assessments to use for the KEA. The three KEA assessments are: Istation-ISIP; NWEA-Map for Growth; and Renaissance-Star.
- <sup>36</sup> The ABC Unit monitors the programs in collaboration with the Licensing Unit using additional questions to ensure that the ABC programs are adhering to the teacher-child ratios and other visible areas of review for the ABC Program. Programs are provided technical assistance and support upon request and need. Classrooms are also observed when there are areas of noncompliance and program improvement does not occur, or program struggles with self-correction.

## CALIFORNIA - California State Preschool Program (CSPP)

- <sup>1</sup> The number of FTEs includes fiscal and program staff.
- <sup>2</sup> CDE provides part-day and full-day services. Part-day programs are funded to operate between three and less than four hours per day, and 175 to 185 days per year, unless the contract specifies a lower minimum of days of operation. Full-day programs are funded to operate for the number of hours needed to meet the needs of the community for a minimum of 246 days per year unless the contract specifies a lower minimum days of operation.
- <sup>3</sup> Many CSPP contractors partner with Head Start and other funding sources to provide extended day or enhanced services, and these partnerships are established locally.
- <sup>4</sup> CSPP age eligibility is defined as: three-year-old children who have had their third birthday on or before September 1 of the fiscal year they are enrolled; four-year-old children who have had their fourth birthday on or before September 1 of the fiscal year they are enrolled; and children whose fifth birthday is between September 2 and December 2 of the fiscal year are also eligible for transitional kindergarten.
- <sup>5</sup> Priority for CSPP is given to 4-year-olds who are not enrolled in TK.
- <sup>6</sup> Families must meet at least one of the following eligibility criteria to be enrolled in CSPP: 1) income eligible, 2) receiving cash aid, 3) homeless, or 4) have a child who is receiving child protective services or is at risk of abuse, neglect, or exploitation. A family is income eligible: 1) when income is at or below 70% of SMI at initial enrollment, or 2) 85% of SMI when recertified for enrollment. For part-day CSPP, families may exceed the income threshold by no more than 15% only after all eligible children are enrolled, however no more than 10% of children enrolled may be over the income eligibility threshold. Full-day services are provided based on family employment, vocational training, homelessness, and parental incapacitation. For full-day CSPP, families must also establish at least one of the following needs for care: employment/seeking employment, education or vocational training, homelessness, or parental incapacity.
- <sup>7</sup> There are no fees for part-day CSPP. CalWORKs cash-aided (TANF) families are excluded from paying the family fee. Children in Child Protective Services and those children at risk of being abused, neglected, or exploited may be excluded from family fee payment for up to 12 months.
- <sup>8</sup> Part-day CSPP services only require families to establish eligibility at time of enrollment. Once a family is determined to be eligible, they may receive part-day services for the program year. Families enrolled in full-day CSPP services remain eligible for not less than 12 months before they are re-certified.
- <sup>9</sup> Although there is no limit to class size, programs typically enroll 24 children in a class.
- <sup>10</sup> Contractors must provide meals and snacks that meet nutritional requirements specified by the federal CACFP or the National School Lunch Program. For the part-day program, one meal or snack is required. For the full-day program, one meal and two snacks or two meals and one snack are required, depending on hours of operation.
- <sup>11</sup> Full physical exam includes vision and hearing screenings; other health screenings are determined locally. If screenings are not provided by parents, local programs must address them.
- <sup>12</sup> DRDP (2015) was developed with the goal of ensuring that all children have the opportunity to demonstrate their knowledge and skills, it includes domains that meet the federal Office of Special Education Programs (OSEP) child outcome reporting requirements for children with IFSPs or IEPs. In addition, the CSPP Guidelines - 5 address the inclusion of children with disabilities or other special needs. The California Preschool Curriculum Framework, Volumes 1-3, provides guidance on ensuring that activities support the learning needs and abilities of all children. DRDP is aligned with the CA ELDS.
- <sup>13</sup> In 2007, the CDE released a resource guide titled Preschool English Learners: Principles and Practices to Promote Language, Literacy, and Learning and its companion DVD A World Full of Language Statewide training on this resource guide has been provided by the California Preschool Instructional Network (CPIN) regions. Santa Clara County Office of Education (SCCOE) has been contracted to develop extended training modules for DLL External link opens in new window or tab. This project provides

- Training of Trainers to CPIN leads who train teachers, aides, administrators, and family members in their regional areas.
- 14 Assembly Bill 752 established a process modeled after the United States Department of Health and Human Services guidelines to prevent children from being unnecessarily expelled or unenrolled in the CSPP and other child and developmental care services.
  - 15 The following CDE link (and management bulletin) further clarifies the CDE policies or practices regarding suspension and/or expulsion: <https://www.cde.ca.gov/sp/cd/ci/mb1806.asp>
  - 16 CDE's Preschool Learning Foundations and Preschool Curriculum Framework feature an English Language Learner foundations domain.
  - 17 Other supports for the ELDS include an online overview module: California Preschool Instructional Network (CPIN) Family Child Care at its Best.
  - 18 California does not recommend specific curricula or keep a list of recommended curricula. However, the three volumes of the California Preschool Curriculum Framework give guidance on best practices to implement the curriculum a program selects, including subject specific curricula in the areas of Social-Emotional Development, Language & Literacy, English Language Learners, Mathematics, Visual and Performing Arts, Physical Development, Health, History-Social Science, and Science.
  - 19 The California Child Development Associate Teacher Permit is the minimum requirement for a teacher in a CSPP classroom and exceeds the requirement of the CDA. The permit requires 12 units in ECE or CD and 50 days of work experience in an instructional capacity. It may be renewed one time for a five-year period. A teacher may also have the full Child Development Teacher Permit, which requires a minimum of 40 semester units of education including a minimum of 24 units in ECE or CD, and 175 days of work experience, or a Master Teacher permit. There is a minimum requirement of 12 units of ECE if the teacher has a Bachelor's degree in a field other than ECE/CD or related field.
  - 20 Assistant teachers in CSPP are required to have a high school diploma or equivalent. The optional Child Development Assistant Teacher Permit requires six credits in ECE or CD. The permit is issued for five years and is renewable for successive five-year periods upon completion of 105 hours of professional growth.
  - 21 Lead and assistant teachers are required to complete 105 hours of professional growth every five years. Professional growth hours must be completed under the guidance of a Professional Growth Advisor. Lead teachers are required to complete 15 additional units toward a Teacher Permit, and they must meet the Teacher requirements within 10 years.
  - 22 CSPP classrooms have contractors who develop and implement a staff development program that includes: identification of training needs; written job descriptions; an orientation plan for new employees; an annual written performance evaluation procedure unless a different frequency is specified in a collective bargaining unit agreement; staff development opportunities that include topics related to each employee's job; and an internal communication system that provides the information necessary to carry out assigned duties.
  - 23 While no state policy requires DLL certification or specialized training for state-funded early learning settings serving DLL children, CPIN provides consistent and high quality PD for preschool administrators and teachers working with DLL children and families.
  - 24 According to the Early Childhood Workforce Index 2016, early childcare workers in California receive paid sick days, paid family leave, and expanded Medicaid. A Minimum Wage Increase Task Force has been formed to move towards salary and/or benefit parity.
  - 25 The California Transitional Kindergarten Stipend (CTKS) funding is a reimbursement for educational expenses for ECE and/or CD coursework or training for TK and CSPP lead and assistant teachers. The legislative intent (Senate Bill 876) is to provide funds first to TK teachers, and second to CSPP teachers. Also, CSPP teachers and other CSPP teaching staff are able to access Assembly Bill 212 funding for general education coursework and/or units towards attainment of an Associate of Arts, Bachelor of Arts, and/or teaching credential. The Child Development Training Consortium (CDTC) provides financial and technical assistance to students to access college-level CD coursework to raise the quality of early care and education. The Early Childhood Mentor Program activities are provided at community colleges to support and encourage experienced teachers/directors to remain in early learning. Financial compensation and PD support are provided to those teachers/directors who have been selected as mentors.
  - 26 The CPIN provides statewide PD, technical assistance, and support to CSPP teachers to improve the quality of CSPP for all children, including children with disabilities and those who are learning English as a second language. The California Student Aid Commission's administers a program and provides assistance through grants for college course work leading to the attainment of a Child Development Permit at the teacher, master teacher, supervisor, or program director levels.
  - 27 Reported spending amount is different than what is reported by the state's Legislative Accounting Office.
  - 28 The California Preschool Study examined the adequacy and efficiency of preschool education in California. This fourth and final analysis integrates the results from the series of studies and makes recommendations for preschool policy in the state.
  - 29 The first DRDP assessment must be completed within 60 calendar days of the child's first day of enrollment in the program and every six months thereafter.
  - 30 The state does not have requirements for those using the DRDP to assess children's learning. However, state funded preschool teachers and administrators are expected to attend in-person and training on the DR system as well as the DRDP itself. Several free online DRDP modules and trainings are offered. In addition, a rater certification module for teachers and administrators to take at their own pace was created and made available. Reliability is reached at 80% accuracy and recertification is expected thereafter. Taking the modules or using any of the practice videos is 100% free of cost to the administrators or teachers. Although it is not mandated, the goal is to have all administrators and teachers successfully complete the rater certification, so that there is consistency when using the tool to assess children. Those who choose to pay the fee-for-service cost, can also go to a week-long Certified Training Institute, where they can become certified trainers for the DRDP, which also includes rater certification.
  - 31 Although the General CSPP funding is not determined by the DRDP results, those programs who are participating in the CSPP QRIS block grants may receive additional points when they are rated and this may lead to additional funding at the local level.
  - 32 The California Preschool Transfer Act of 2001 requires state-funded preschools to provide the parent/guardian(s) with developmental and any other information deemed beneficial to the child and public school teacher to support a child's transition to kindergarten. If parents/guardians authorize it, preschools may provide this information directly to the schools.
  - 33 Each CSPP contractor is required to develop and implement an annual plan for its program self-evaluation process. The ERS are used to measure the quality of the program environment (e.g., child-teacher interactions, children's interactions and activities, use of language, health and safety practices, space, and materials). The ERS are required instruments for yearly program self-evaluation and are used for the reviews conducted by CDE/EESD program staff.
  - 34 The information collected through the observations is included in the annual Program Self Evaluation to make continual program improvements.
  - 35 A total of \$50 million in state education funds is provided annually for CSPPs to participate in CA QRIS. Those with ratings of tier 4 or 5 receive a local block grant. Those programs who were not yet at tier 4 are provided with Quality Improvement supports (e.g. coaching).
  - 36 In addition to Contract Monitoring Reviews, CDE field consultants conduct complaint on-site inspections, environmental ratings of preschool classrooms providing TA & T program quality improvement. and corrective action follow-up. The CDE Fiscal Service Analyst conduct on-site reviews of contract fiscal reporting and earnings issues. The CDE Office of Audits and Investigations conduct on-site audits for the purposes of investigation and the auditing of contractor operations and contract administrative compliance.
  - 37 AB 2960 requires the CDE, on or before June 30, 2022, to develop an online portal for the state's comprehensive child care and development services, and to convene a workgroup to evaluate and provide recommendations on any necessary modifications or improvements to the online portal to ensure its improved effectiveness.

## CALIFORNIA - California Transitional Kindergarten (TK)

- 1 All local educational agencies must provide TK to age-eligible students, including charter schools, if they also provide kindergarten. TK is for children who turn five years of age on or between September 2 and December 2. Children who turn five years of age on or between July 1 and June 30 may be allowed to enroll; this is a local school district decision.
- 2 Home language is unknown for 1,711 children.
- 3 All children who are age-eligible for TK are housed in an LEA which is defined as a school district, county office of education, or charter school.
- 4 Effective June 27, 2017, an LEA may maintain kindergarten or TK classes for different lengths of time during the school day, either at the same or a different school site.
- 5 California regulations allow Head Start and the California State Preschool Program (CSPP) to layer funding. Partnerships with Head Start and CSPP are determined locally.
- 6 Pursuant to EC 48000 (c), it is locally determined whether students who turn 5-years-old on or between December 2 and June 30 may be admitted to TK at the beginning

- of the school year or at another point during the same school year.
- <sup>7</sup> In California, the TK program is for all age-eligible children and is included in the free and public kindergarten-twelfth grade system.
  - <sup>8</sup> LEAs are required to make available, free or at a reduced price, one nutritionally adequate meal every school day to each needy student who qualifies according to specified family size and income standards. California public LEAs are enrolled in the National School Lunch Program which assists schools and other agencies in providing nutritious lunches to children at reasonable prices.
  - <sup>9</sup> The CA Dept. of Health Care Services regulations allow for the health examination to be completed up to 18 months prior to entry into first grade or within 90 days thereafter. The screenings indicated are based on the first grade requirement, with the exception of the immunizations which are required before TK entry. The first grade screening also includes a nutritional assessment; blood, urine, and blood lead tests.
  - <sup>10</sup> Since 2010, the CDE has developed State content standards and curriculum frameworks for English language development, ELA, math, science, and history-social science. All teachers who provide instruction for English learners require an English learner authorization.
  - <sup>11</sup> The state definition of a chronic absentee does apply to TK. A "chronic absentee" has been defined in EC) Section 60901(c)(1) as "a pupil who is absent on 10 percent or more of the school days in the school year when the total number of days a pupil is absent is divided by the total number of days the pupil is enrolled and school was actually taught in the regular day schools of the district, exclusive of Saturdays and Sundays." However, a TK student may not be a truant because truant status is between the ages of 6 and 18 years. A chronic absentee may be any pupil, even a pupil who is not subject to compulsory attendance in California.
  - <sup>12</sup> Since TK is not mandated in California, it is a local decision whether a child's absence is recorded as an unexcused absence and is referred to the school attendance review board (SARB). A SARB meeting is recommended for any minor pupil, including a five-year-old, who is irregular in attendance at school pursuant to EC Section 48263. The purpose of the SARB is to reduce chronic absenteeism and any problems of irregular attendance, discuss the importance of regular school attendance, and link the parent to any needed community resources.
  - <sup>13</sup> California requires the governing board of each school district and each county superintendent of schools to appoint a supervisor of attendance with specific duties, including identifying and responding to grade level or pupil subgroup patterns of chronic absenteeism. (EC Section 48240)
  - <sup>14</sup> Each Preschool Learning Foundations (PLF) publication (volumes 1, 2, & 3) has a companion Preschool Curriculum Framework (PCF) publication (volumes 1, 2, & 3). LEAs use the California English Language Development Standards to provide language development instruction to TK English learners. The English Language Arts/English Language Development Framework provides guidance to LEAs for instruction of TK English learners. CDE's Preschool Learning Foundations and Preschool Curriculum Framework feature the domain of English Language Development.
  - <sup>15</sup> CDE provides many statewide, in-person trainings, certifications, online modules, and engaging professional web sites for early childhood professionals. CDE professional resources are aligned to CA ELDS.
  - <sup>16</sup> The state does not require a child assessment but encourages the use of the Desired Results Developmental Profile-Kindergarten (DRDP-K). The DRDP-K (2015) is based on the previous DRDP-SR (2012) instrument. It includes refinements made over the past several years and new elements that are essential to quality ECE. It aligns with the California Department of Education's Early Learning and Development Foundations and the California Content Standards for Kindergarten.
  - <sup>17</sup> CA provides the following resource and training: TK Implementation Guide: <http://www.cde.ca.gov/ci/gs/em/documents/tkguide.pdf#search=TK%20implementation%20guide&view=FiH&pagemode=none>
  - <sup>18</sup> Curricula are locally determined.
  - <sup>19</sup> A school district or charter school shall ensure that credentialed teachers who are first assigned to a TK classroom after July 1, 2015, have, by August 1, 2020, one of the following: (1) At least 24 units in ECE, or childhood development, or both; (2) As determined by the LEA employing the teacher, professional experience in a classroom setting with preschool-aged children that is comparable to the 24 units of education; or (3) A Child Development Teacher Permit issued by the Commission on Teacher Credentialing. Teachers hired prior to July 1, 2015 are required to have a teaching credential. Lead TK teachers must possess an English learner authorization or bilingual authorization to teach English learners. An English learner authorization authorizes teachers to provide instruction in English language development and Specially Designed Academic Instruction in English. A bilingual authorization authorizes teachers to provide instruction in the authorized language, in English, in English language development, and Specially Designed Academic Instruction in English.
  - <sup>20</sup> Title I paraprofessionals whose duties include instructional support must have: (1) High school diploma or the equivalent, and (2) Two years of college (48 units), or (3) AA degree (or higher), or (4) Pass a local assessment of knowledge and skills in assisting in instruction. Many districts use the California Basic Educational Skills Test for this purpose.
  - <sup>21</sup> The need for ongoing classroom-embedded support is locally determined. The General Education Induction Consortium is an approved induction program to assist TK-12 beginning teachers, experienced teachers, and school site administrators to ensure beginning teacher success and retention through at least one hour per week of support and/or mentoring.
  - <sup>22</sup> TK stipend funding is a reimbursement for educational expenses for ECE and/or CD coursework or training for TK teachers that are administered by local planning councils which determine allocations of funds.
  - <sup>23</sup> The State does not have a policy which requires salary and/or fringe benefit parity for assistant teachers in public schools in TK. It is a local school district decision.
  - <sup>24</sup> Reported spending amount is different than what is reported by the state's Legislative Accounting Office.
  - <sup>25</sup> TK is funded through the Local Control Funding Formula (LCFF) based on Average Daily Attendance (ADA) in the TK/K-3 grade span. The ADA in this grade span does not distinguish between ADA in grades TK/Kindergarten, 1, 2 or 3. Furthermore, the funds apportioned on the basis of ADA in the TK/K-3 grade span are not "dedicated" to serving TK students; they are general purpose funds apportioned to LEAs as part of their LCFF entitlement. LEAs can blend and braid federal sources to support TK.
  - <sup>26</sup> The California Preschool Transfer Act of 2001 requires state-funded preschools to provide the parent/guardian(s) with developmental and any other information deemed beneficial to the child and public school teacher to support a child's transition to kindergarten. If parents/guardians authorize it, preschools may provide this information directly to the schools.
  - <sup>27</sup> State policy does not require kindergarten programs to assess children's learning and development but the use of the DRDP is encouraged by the CDE.
  - <sup>28</sup> TK's participation in the state's QRIS is locally determined.
  - <sup>29</sup> The CDE Monitoring Tool (CMT) is a Web-based system, which allows LEAs to facilitate a response to state and federal requirements for program monitoring. Additional information can be found at the following CDE web page: <https://www.cde.ca.gov/ta/cr/cmt.asp>
  - <sup>30</sup> AB 2960 requires the CDE, on or before June 30, 2022, to develop an online portal for the state's comprehensive child care and development services, and to convene a workgroup to evaluate and provide recommendations on any necessary modifications or improvements to the online portal to ensure its improved effectiveness.

## COLORADO - Colorado Preschool Program (CPP)

- <sup>1</sup> School districts can contract with community preschool sites in their district, as well as provide services in district classrooms. Colorado has 178 traditional school districts and 1 Charter School Institute, making a total of 179 school districts in the state. The four districts not participating have very small numbers of preschool children and partner with neighboring districts to provide preschool.
- <sup>2</sup> Any school district may apply to the department for participation in CPP. Along with the application, the school district shall submit a proposal for the implementation of its district preschool program. The department shall evaluate any application and give priority to school districts that include exemplary plans for the coordination of the program and are not participating in the program currently.
- <sup>3</sup> Children who qualify for special education services may now enroll in CPP if they meet the CPP eligibility criteria. In 2017-2018, 619 children were funded by preschool special education as well as CPP, helping to foster inclusion practices. This change provides access to full-day preschool funded by both funding streams.
- <sup>4</sup> District advisory councils are encouraged to blend CPP funding with other sources, such as Head Start, so that children can participate in full-day programs.
- <sup>5</sup> The program is funded for five days per week, although the statute requires children to attend four days per week or the equivalent, with the fifth day being funded for home visits, teacher planning time, completion of child assessments, or staff training. Programs may extend the hours and days beyond the minimum requirement of ten hours per week. These opportunities are determined locally and based on the needs of children and families. Although district advisory councils are encouraged to blend

- CPP funding with other sources such as Head Start, child care subsidy, and parent tuition so that children can participate in full-day programs, enrollment by operating schedule is not collected. Half-day CPP funding requires 360 hours per year at a minimum and full-day CPP funding requires 720 hours per year at a minimum.
- <sup>6</sup> Under the early childhood councils, three school districts have waivers to serve children younger than age 3 in CPP. In 2017-2018, 409 children under age 3 participated in CPP. Under certain conditions, highly advanced, gifted children may be granted early entrance to kindergarten. There is no designated cut-off date for the maximum age a child could be served in preschool; this is locally determined. However, there is a state policy limiting children to two years of participation. A kindergarten-eligibility date is established by the local school board. Children must turn 5 by October 1 in order to be funded, so no school district establishes a cut-off date later than October 1. However, school districts may establish dates as early as June 1 for eligibility for kindergarten.
  - <sup>7</sup> Income eligibility may be the sole factor or may be one of several eligibility factors. In some areas of the state where the cost of living is extremely high, district advisory councils have increased the eligibility to 200-225% of FPL. Locally determined risk factors that have been selected by the district advisory councils include parent is incarcerated, a parent is on active military duty, and developmental delay that raises concerns for school readiness but does not require special education services. Four-year-olds can qualify with one risk factor. Three-year-olds must have three or more risk factors.
  - <sup>8</sup> Meals and nutritious snacks must be served at suitable intervals. Children who are in the program for more than four hours per day must be offered a meal that meets at least one-third of their daily nutritional needs.
  - <sup>9</sup> Although not required, of the 175 districts serving CPP, 169 have hearing and vision screenings completed.
  - <sup>10</sup> Colorado requires districts to provide family support services, but districts can decide which services are offered. Family support services include: education services or job training for parents; parenting support or training; parent involvement activities; information about nutrition; referral to social services; transition to kindergarten activities; parent conferences and/or home visits; and other locally determined support services.
  - <sup>11</sup> A student is absent if he or she is not physically on school grounds and is not participating in instruction or instruction-related activities at an approved off-grounds location for the school day. Chronically absent students include students who are absent for any reason (e.g., illness, suspension, the need to care for a family member), regardless of whether absences are excused or unexcused. This count would include students in grades K-12.
  - <sup>12</sup> All CPP programs must follow Colorado Childcare Licensing and Regulations. Therefore, 7.702.31(H) is considered the state's suspension and expulsion policy for preschool.
  - <sup>13</sup> The Professional Development Information System (PDIS) is the statewide web-based system supporting PD for Colorado's early childhood workforce. There is a training course on the Early Learning and Development Guidelines in PDIS.
  - <sup>14</sup> Lead teachers are required to be Early Childhood Teacher (ECT) qualified by Child Care Licensing under the Colorado Department of Human Services. It is recommended that lead teachers possess an Educator License endorsed in ECE.
  - <sup>15</sup> Staff aides must meet the Colorado Department of Human Services Licensing Requirements (at least 16 years of age with favorable background checks).
  - <sup>16</sup> CDE and CPP does not offer any of these supports. However, there are many opportunities through other programs in the state including the PDIS. Additionally, the Colorado Early Childhood Councils and school districts do a lot of work regarding coaching supports (at the local level).
  - <sup>17</sup> In the Colorado School Finance Formula, each preschool slot is funded at 0.5 FTE and provides for both a local and state share. Local school districts are required to contribute to their per-pupil revenue according to the school finance formula. This local share varies widely by school district.
  - <sup>18</sup> CPP funds flow from the state directly to school districts. Local district advisory councils then provide oversight, with final approval required by the school district superintendent. The early childhood setting may be located in school district settings, local child care centers, community preschools or Head Start programs including early childhood programs located on tribal lands. Any child who receives CPP funding is considered a school district student, even if they are served through a community provider.
  - <sup>19</sup> All teachers and other staff assigning checkpoint ratings (i.e., anyone responsible for finalizing assessment ratings for children) must also complete interrater reliability (IRR) certification. The online system orientation courses and IRR certification must be completed before staff begin completing ratings in their first checkpoint, unless there are fewer than six programming weeks remaining before the checkpoint deadline, in which case, the deadline is by the time staff begin completing ratings in the following checkpoint. Program-level administrators must employ strategies to support and monitor staff completion of required trainings. Administrator monitoring reports are typically available in the online assessment systems. CDE does not require paraprofessionals and administrators to complete interrater reliability certification. However, programs may choose to require it for all staff at their own discretion.
  - <sup>20</sup> One state law requires a school readiness assessment at kindergarten entry only. Another law requires ongoing assessment of literacy skills for children identified with a significant reading deficiency. State policy requires the use of an approved assessment tool to measure school readiness at kindergarten entry. Approved kindergarten school readiness assessments include: TS GOLD, HighScope COR for Kindergarten, and DRDP-K. In addition, state policy requires interim assessment for all kindergarteners in the area of literacy. Approved interim reading assessments include: Aimsweb; i-Ready; DIBELS Next; IDEL; FAST; ISIP ER Istation (English and Spanish); PALS (English and Spanish); and STAR. Approved diagnostic assessments include i-Ready, PALS Marketplace Phonological Awareness (English and Spanish), STAR Early Literacy Assessment, NWEA-CPAA, PPVT, TVIP, VRMT-III, DIBELS Deep, Amplify Burst Reading Assessments, and Woodcock-Munoz LS. Approved optional summative assessments include i-Ready, NWEA-MPG, and Terra Nova.
  - <sup>21</sup> District Advisory Councils visit all settings providing CPP enrollment and use Colorado Quality Standards and program walk-through checklist two times per year to identify strengths and areas for growth. Although not required, many districts serving CPP use ERS/ECERS and CLASS for classroom observations and participate in the state QRIS.
  - <sup>22</sup> In 2017-2018, 43% of early childhood care and education programs funded by CPP had achieved a high-quality rating (Levels 3-5). All licensed programs are automatically a Level 1 in the state QRIS; it is the local program's decision whether to fully engage to achieve a higher level.
  - <sup>23</sup> All children funded by CPP have been part of the education department's longitudinal data system since the 2003-2004 school year. More recently, preschool special education records have been integrated into the system. The Colorado Department of Education (CDE) has used this system for multiple longitudinal analyses. In 2018, Colorado completed work on its Early Childhood Participation Project which matched early childhood records from the CDE and Colorado Department of Human Services. The resulting report allowed for unduplicated counts of children who participated in Preschool Special Education (Part B/Section 619), Early Intervention (Part C), Colorado Child Care Assistance Program, and/or CPP. A concurrent pilot and feasibility study also matched these programs/services with Head Start records from several pilot Head Start grantees.

## CONNECTICUT - Connecticut Child Day Care Contracts (CDCC)

- <sup>1</sup> Child Day Care Contracts (CDCC) are with individual contractors which by statute may be municipalities, human resource development agencies, or nonprofit corporations. Contractors may serve multiple towns. No towns are required to offer these services and the funds are currently distributed through purchase of service contracts.
- <sup>2</sup> Funds are secured by purchase of service contracts. Sites are funded under two year contracts.
- <sup>3</sup> There are 3,817 children served through Child Day Care Contracts, which includes 2,178 preschool-aged children.
- <sup>4</sup> There are a total of 740 PDG spaces in Connecticut. This includes 439 expansion spaces, which are not included in enrollment totals for any of the three state-funded preschool programs in this report, and 301 enhanced spaces, with 256 included in the School Readiness enrollment total and 45 included in the CDCC enrollment total.
- <sup>5</sup> CDCC programs are required to be in operation for 10 hours per day; however, children do not necessarily attend for the full amount of time. For those enrolled in part-day and wrap-around services, the total hours per day provided through both programs must total 10 hours.
- <sup>6</sup> Programs generally operate for 52 weeks a year; however, they are allowed up to 22 days of closure per year. Funding for this program is a combination of state and federal (SSBG) funds, with differing income thresholds for the two funding sources. Therefore, it is not possible to break down how many hours per year were funded with state funds.
- <sup>7</sup> Children may enroll in preschool spaces funded by CDCC at any point of the year, however a preschooler must be at least 3 years old by January 1st as required by licensing to begin preschool in the fall.
- <sup>8</sup> Eligibility is re-assessed annually based on family income (75% SMI for state funds and 200% FPL for federal funds). If a child meets eligibility upon enrollment, they remain eligible until they age out of the program, but the family pays a higher fee if their income changes.

- <sup>9</sup> The legislative requirements regarding DLLs begin at kindergarten.
- <sup>10</sup> The state legislation regarding suspension/expulsion in preschool defines “preschool program provider” as a local or regional board of education, state or local charter school or inter-district magnet school that offers a preschool program. OEC state-funded preschool programs do not fall under this legislation if they are not operated by an LEA/charter school or magnet school. Yet the OEC believes in the principles and guiding values behind the intent of legislation regarding suspension/expulsion and we are currently trying to implement broad-based expulsion policies and supports throughout all state-funded early childhood programs not just those operated by LEAs.
- <sup>11</sup> Crosswalks were completed to document the alignment of the CT ELDS to the Next Generation Science Standards and CT’s new Social Studies Framework. A crosswalk to document alignment with the Head Start Early Learning Outcomes Framework has been completed and will be available in 2018.
- <sup>12</sup> CT has developed a series of videos and resources for families that are connected to the CT ELDS. In addition, crosswalks between the CT ELDS and several assessment tools have been completed. Series of documents also available: “Using the CT ELDS to Support All Children” available and embedded in PD available and embedded in PD Aligned framework for formative assessment tied to CT ELDS (CT Documentation and Observation for Teaching System-CT DOTS)
- <sup>13</sup> Child assessments are required to be aligned with the CT ELDS, but programs can choose the assessment.
- <sup>14</sup> Guidance documents available: “Supporting All Children Using the CT ELDS: Building Meaningful Curriculum” includes a curriculum self-assessment tool, which has been used in trainings for administrators. Guidance document on intersection of Standards, Curriculum, and Assessment provided at state funded program meetings. Curriculum work will be embedded in QRIS and will be based upon Curriculum Self-Assessment Tool.
- <sup>15</sup> Programs selecting the curriculum focus area for QRIS will have a measure of fidelity of curriculum implementation to achieve Star Level 5.
- <sup>16</sup> Until June 30, 2020 the current minimum requirements are a CDA credential plus 12 early childhood credits, or a qualifying degree as outlined in [https://www.ct.gov/oec/lib/oec/gp\\_a-01\\_legislative\\_requirements\\_for\\_staff\\_qualifications\\_in\\_state-funded\\_programs.pdf](https://www.ct.gov/oec/lib/oec/gp_a-01_legislative_requirements_for_staff_qualifications_in_state-funded_programs.pdf) Between July 1, 2020 and June 30, 2023 the minimum requirement shifts such that 50% or more of the lead teachers across the program must have a Bachelor’s degree or higher, specific to early childhood, with all remaining lead teachers holding at least an Associate’s degree specific to early childhood. On July 1, 2023 or after, 100% of lead teachers across the program must hold a Bachelor’s degree specific to early childhood. For specific details regarding variations, such as grandfathering and certification options please see the general policy website.
- <sup>17</sup> A second program staff person who works under supervision of the head teacher shall be at least 18 years old and have at least one of the following: (1) a high school diploma, (2) an equivalency certificate, or (3) at least 540 hours of documented experience in working with unrelated children of the same age(s) to be served in this child day care center or group day care home. Assistant teachers in public and nonpublic settings must meet either NAEYC or Head Start requirements within 3 years.
- <sup>18</sup> CDCC programs are required to be licensed, which requires PD for staff that totals 1% of the total annual hours worked. Content may include, but is not limited to, ECE and CD, licensing and regulations, health issues, nutrition, first aid, social services, child abuse laws, and programming for children with disabilities or special health care needs. Programs are required to develop, implement, and maintain a written PD plan and to document and maintain the PD plan for each program staff member and make it available for review. PD required under new CCDF rules may count toward the annual PD requirement.
- <sup>19</sup> Teachers who do not meet qualifications requirements for QSM must have a written PD plan. If teachers seek scholarship funds from the state, they must also have a formal plan of study from an institution of higher education. Teacher Assistants who do not meet qualifications requirements may have a PD plan if they intend to achieve QSM status. If they seek scholarship funds from the state, they must also have a formal plan of study from an institution of higher education.
- <sup>20</sup> For the “other” category: 16 teachers (5%) had one-year certification/30 ECE credits; 1 teacher had an advanced degree; and 58 classrooms (17.8%) did not identify a lead teacher.
- <sup>21</sup> CT has a workforce report viewed by the General Assembly outlining a plan for compensation but no action has been taken.
- <sup>22</sup> Coaching is a modality tied to CT’s technical assistance system by which providers can access the service to enhance instruction around the CT ELDS, the Core Competencies, the Pyramid Model, and individualized supports as both a fee for service or paid for by the state.
- <sup>23</sup> Funding amounts are allocations, not actual expenditures. Effective October 1, 2017, the Child Day Care program was no longer supported through CCDF and as a result, the program was only partially supported through Federal funds (3 months).
- <sup>24</sup> The Connecticut Kindergarten Entrance Inventory was developed by the state for kindergarten teachers to provide a global rating of children across four areas of development.
- <sup>25</sup> The structured observation is only required for programs that are not NAEYC accredited or Head Start approved. In addition, Local School Readiness Liaisons are required to observe programs/classrooms at least annually. School Readiness Liaisons provide feedback to programs. Only programs that are not NAEYC accredited or Head Start approved are required to have an ECERS-3 by a state approved, reliable ECERS-3 rater. State approved raters are trained by ERSI staff.
- <sup>26</sup> The state funds annual training from ERSI to ensure raters are at least 85% reliable. Raters engage in reliability checks at minimum ever 10 visits.
- <sup>27</sup> Raters provide a detailed report of the observation to the program, and to the state for the programs that are not yet NAEYC accredited or Head Start approved. Programs are expected to use the data to create an improvement plan which leads to NAEYC accreditation.
- <sup>28</sup> Compliance Monitoring ensures that state funds provided to programs are utilized according to their intended purpose and that services are delivered in compliance with requirements. Criteria: Priority for monitoring extends to programs that are: In their first year of funding; Experiencing licensing compliance challenges; Non-compliant with approval system requirements including reporting and required criteria; Chronically under enrolled; Non-compliant with OEC reporting requirements, General Policies, or legislation; Enrolling families in OEC funded spaces that do not meet income eligibility requirements; Experiencing significant issues as determined by OEC. Monitoring will be conducted by a team from the Division of Early Care and Education at OEC. The PDG Grant Manager will join the monitoring team as funding dictates.
- <sup>29</sup> The state has recently created P20 WIN (preschool through 20 and Workforce Information Network), which securely links education and workforce data to provide answers to help improve education programs and workforce alignment. Currently the following state agencies are a part of this network: OEC; State Department of Education; Board of Regents for Higher Education; University of Connecticut; Department of Labor; Connecticut Conference of Independent Colleges; Office of Policy and Management.

## CONNECTICUT - Connecticut School Readiness

- <sup>1</sup> Of the 67 communities, 21 are priority districts and 46 are competitive municipalities as defined by legislation. The 21 priority school districts are not required to participate in the School Readiness Program, but funds are available to all eligible districts.
- <sup>2</sup> There are a total of 740 PDG spaces in Connecticut. This includes 439 expansion spaces, which are not included in enrollment totals for any of the three state-funded preschool programs in this report, and 301 enhanced spaces, with 256 included in the School Readiness enrollment total and 45 included in the CDCC enrollment total.
- <sup>3</sup> Operating schedules are locally determined and hours vary by program. Extended-day programs operate 10 hours per day, 50 weeks per year, while school-day programs operate 6 hours per day, 180 days per year. Part-day programs operate 2.5 hours per day, 180 days per year. Funding from another source can be used to extend programs.
- <sup>4</sup> As defined by legislation, communities may allow a small number of kindergarten-eligible children to remain in the program (up to 5% of the total served) if the child has been enrolled in the School Readiness program for one year and if the parent or guardian, School Readiness provider, and the local or regional school district agree that the child will not enter kindergarten.
- <sup>5</sup> All families, regardless of income levels, can apply for School Readiness spaces in Competitive and Priority municipalities. However, 60% of the children enrolled in each municipality must meet the income requirement of being at or below 75% of SMI.
- <sup>6</sup> All children remain eligible for the program but the fee is reassessed annually and residency is verified (although a School Readiness Council does have the local option whether to accept non-residents). Parent fees can change depending on a change of income and/or family size. Programs work with families to keep children enrolled.
- <sup>7</sup> Programs are required to serve one snack to children who attend fewer than 5 hours per day and one snack plus one meal to children in school for 5 to 8 hours per day. Children attending more than 8 hours per day must be provided one snack and two meals or two snacks and one meal. Either the program or the parent may provide the food.
- <sup>8</sup> Programs are not required to conduct screenings, but they are required to refer children who may need to be screened. This includes: vision, hearing, height/weight/BMI, blood pressure, immunizations, psychosocial/behavioral, dental, developmental, full physical exam.
- <sup>9</sup> The legislative requirements regarding DLLs begin at kindergarten.

- <sup>10</sup> The state legislation regarding suspension/expulsion in preschool defines “preschool program provider” as a local or regional board of education, state or local charter school or inter-district magnet school that offers a preschool program. OEC state-funded preschool programs do not fall under this legislation if they are not operated by an LEA/charter school or magnet school. Yet the OEC believes in the principles and guiding values behind the intent of legislation regarding suspension/expulsion and we are currently trying to implement broad-based expulsion policies and supports throughout all state-funded early childhood programs not just those operated by LEAs.
- <sup>11</sup> Crosswalks were completed to document the alignment of the CT ELDS to the Next Generation Science Standards and CT’s new Social Studies Framework. A crosswalk to document alignment with the Head Start Early Learning Outcomes Framework has been completed and will be available in 2018.
- <sup>12</sup> CT has developed a series of videos and resources for families that are connected to the CT ELDS. In addition, crosswalks between the CT ELDS and several assessment tools have been completed. Series of documents also available: “Using the CT ELDS to Support All Children” available and embedded in PD available and embedded in PD Aligned framework for formative assessment tied to CT ELDS (CT Documentation and Observation for Teaching System-CT DOTS)
- <sup>13</sup> Child assessments are required to be aligned with the CT ELDS, but programs can choose the assessment.
- <sup>14</sup> Guidance documents available: “Supporting All Children Using the CT ELDS: Building Meaningful Curriculum” includes a curriculum self-assessment tool, which has been used in trainings for administrators. Guidance document on intersection of Standards, Curriculum, and Assessment provided at state funded program meetings. Curriculum work will be embedded in QRIS and will be based upon Curriculum Self-Assessment Tool.
- <sup>15</sup> Programs selecting the curriculum focus area for QRIS will have a measure of fidelity of curriculum implementation to achieve Star Level 5.
- <sup>16</sup> Until June 30, 2020 the current minimum requirements are a CDA credential plus 12 early childhood credits, or a qualifying degree as outlined in [https://www.ct.gov/oec/lib/oec/gp\\_a-01\\_legislative\\_requirements\\_for\\_staff\\_qualifications\\_in\\_state-funded\\_programs.pdf](https://www.ct.gov/oec/lib/oec/gp_a-01_legislative_requirements_for_staff_qualifications_in_state-funded_programs.pdf). Between July 1, 2020 and June 30, 2023 the minimum requirement shifts such that 50% or more of the lead teachers across the program must have a Bachelor’s degree or higher, specific to early childhood, with all remaining lead teachers holding at least an Associate’s degree specific to early childhood. On July 1, 2023 or after, 100% of lead teachers across the program must hold a Bachelor’s degree specific to early childhood. For specific details regarding variations, such as grandfathering and certification options please see the general policy website.
- <sup>17</sup> Programs must meet either NAEYC or Head Start requirements for assistant teachers within three years. For licensed programs (non-public schools) a second program staff person who works under supervision of the head teacher shall be at least 18 years old and have at least one of the following: (A) a high school diploma, or (B) an equivalency certificate, or (C) at least five hundred and forty (540) hours documented experience in working with unrelated children of the same age(s) to be served in this child day care center or group day care home.
- <sup>18</sup> If a non-public school teacher has not achieved QSM status, they are required to have a written PD plan. If they seek scholarship funds from the state, a formal plan of study is required from the institute of higher education.
- <sup>19</sup> For the “other” category: 14 teachers (1.77%) had one-year certification/30 ECE credits; 4 teachers had an advanced degree; and 55 classrooms (6.96%) did not identify a lead teacher.
- <sup>20</sup> CT has a workforce report viewed by the General Assembly outlining a plan for compensation but no action has been taken.
- <sup>21</sup> Coaching is a modality tied to CT’s technical assistance system by which providers can access the service to enhance instruction around the CT ELDS, the Core Competencies, the Pyramid Model, and individualized supports as both a fee for service or paid for by the state.
- <sup>22</sup> Federal sources are CCDF funds. Non-required local sources are state funds used to supplement PDG non-eligible children in PDG classrooms and parent fees collected directly by the programs using a sliding fee scale.
- <sup>23</sup> The funding level is based on previous year’s space capacity and local requests for proposals addressing ability to increase capacity.
- <sup>24</sup> Programs may use any curriculum and assessment that is aligned with the CT Early Learning and Development Standards. There is no policy regarding how the pre-K assessment data are used. Communities have been known to use this data to guide teacher training and PD, make decisions about kindergarten enrollment, to adjust curricula and track child and program outcomes over time.
- <sup>25</sup> The Connecticut Kindergarten Entrance Inventory was developed by the state for kindergarten teachers to provide a global rating of children across four areas of development.
- <sup>26</sup> The structured observation is only required for programs that are not NAEYC accredited or Head Start approved. In addition, Local School Readiness Liaisons are required to observe programs/classrooms at least annually. School Readiness Liaisons provide feedback to programs. Only programs that are not NAEYC accredited or Head Start approved are required to have an ECERS-3 by a state approved, reliable ECERS-3 rater. State approved raters are trained by ERSI staff.
- <sup>27</sup> The state funds annual training from ERSI to ensure raters are at least 85% reliable. Raters engage in reliability checks at minimum ever 10 visits.
- <sup>28</sup> Raters provide a detailed report of the observation to the program, and to the state for the programs that are not yet NAEYC accredited or Head Start approved. Programs are expected to use the data to create an improvement plan which leads to NAEYC accreditation.
- <sup>29</sup> Compliance Monitoring ensures that state funds provided to programs are utilized according to their intended purpose and that services are delivered in compliance with requirements. Criteria: Priority for monitoring extends to programs that are: In their first year of funding; Experiencing licensing compliance challenges; Non-compliant with approval system requirements including reporting and required criteria; Chronically under enrolled; Non-compliant with OEC reporting requirements, General Policies, or legislation; Enrolling families in OEC funded spaces that do not meet income eligibility requirements; Experiencing significant issues as determined by OEC. Monitoring will be conducted by a team from the Division of Early Care and Education at OEC. The PDG Grant Manager will join the monitoring team as funding dictates.
- <sup>30</sup> The state has recently created P20 WIN (preschool through 20 and Workforce Information Network), which securely links education and workforce data to provide answers to help improve education programs and workforce alignment. Currently the following state agencies are a part of this network: OEC; State Department of Education; Board of Regents for Higher Education; University of Connecticut; Department of Labor; Connecticut Conference of Independent Colleges; Office of Policy and Management.

## CONNECTICUT - Connecticut Smart Start

- <sup>1</sup> Only local or regional boards of education are eligible to apply for Smart Start program funds.
- <sup>2</sup> There are a total of 740 PDG spaces in Connecticut. This includes 439 expansion spaces, which are not included in enrollment totals for any of the three state-funded preschool programs in this report, and 301 enhanced spaces, with 256 included in the School Readiness enrollment total and 45 included in the CDCC enrollment total.
- <sup>3</sup> Smart Start programs must operate the same number of days as the rest of the school system, which is a minimum of 180 days per year.
- <sup>4</sup> Regarding the minimum age for preschool eligibility, children age 2 years and 9 months may attend, but it is locally determined if they can start prior to their 3rd birthday.
- <sup>5</sup> Districts may prioritize enrollment based on local need.
- <sup>6</sup> It is a local decision whether to charge tuition. However, if the district chooses to charge tuition, they must use the Office of Early Childhood (OEC) Sliding Fee Scale.
- <sup>7</sup> Smart Start does not require comprehensive services, but local School Districts provide a variety of services unique to their communities.
- <sup>8</sup> The legislative requirements regarding DLLs begin at kindergarten.
- <sup>9</sup> The state legislation regarding suspension/expulsion in preschool defines “preschool program provider” as a local or regional board of education, state or local charter school or inter-district magnet school that offers a preschool program. OEC state-funded preschool programs do not fall under this legislation if they are not operated by an LEA/charter school or magnet school. Yet the OEC believes in the principles and guiding values behind the intent of legislation regarding suspension/expulsion and we are currently trying to implement broad-based expulsion policies and supports throughout all state-funded early childhood programs not just those operated by LEAs.
- <sup>10</sup> Crosswalks were completed to document the alignment of the CT ELDS to the Next Generation Science Standards and CT’s new Social Studies Framework. A crosswalk to document alignment with the Head Start Early Learning Outcomes Framework has been completed and will be available in 2018.
- <sup>11</sup> CT has developed a series of videos and resources for families that are connected to the CT ELDS. In addition, crosswalks between the CT ELDS and several assessment tools have been completed. Series of documents also available: “Using the CT ELDS to Support All Children” available and embedded in PD available and embedded in PD Aligned framework for formative assessment tied to CT ELDS (CT Documentation and Observation for Teaching System-CT DOTS).
- <sup>12</sup> Child assessments are required to be aligned with the CT ELDS, but programs can choose the assessment

- <sup>13</sup> Guidance documents available: “Supporting All Children Using the CT ELDS: Building Meaningful Curriculum” includes a curriculum self-assessment tool, which has been used in trainings for administrators. Guidance document on intersection of Standards, Curriculum, and Assessment provided at state funded program meetings. Curriculum work will be embedded in QRIS and will be based upon Curriculum Self-Assessment Tool.
- <sup>14</sup> Programs selecting this focus area for QRIS will have a measure of fidelity of curriculum implementation to achieve Star Level 5.
- <sup>15</sup> The State Department of Education certification, which must include pre-K or early childhood specialization, is required for all Smart Start teachers.
- <sup>16</sup> PD is locally determined. Lead Teachers are certified by the State Department of Education (SDE) and must meet SDE professional learning requirements and professional learning plans.
- <sup>17</sup> CT has a workforce report viewed by the General Assembly outlining a plan for compensation but no action has been taken.
- <sup>18</sup> Coaching is a modality tied to CT’s technical assistance system by which providers can access the service to enhance instruction around the CT ELDS, the Core Competencies, the Pyramid Model, and individualized supports as both a fee for service or paid for by the state.
- <sup>19</sup> Federal sources are CCDF. Non-required local sources are parent fees.
- <sup>20</sup> It has been at the discretion of grantees as to whether they elect to charge tuition or parent fees. CCDF funds can only be collected if fees are charged for the program.
- <sup>21</sup> The Connecticut Kindergarten Entrance Inventory was developed by the state for kindergarten teachers to provide a global rating of children across four areas of development.
- <sup>22</sup> The structured observation is only required for programs that are not NAEYC accredited or Head Start approved. In addition, Local School Readiness Liaisons are required to observe programs/classrooms at least annually. School Readiness Liaisons provide feedback to programs. Only programs that are not NAEYC accredited or Head Start approved are required to have an ECERS-3 by a state approved, reliable ECERS-3 rater. State approved raters are trained by ERSI staff.
- <sup>23</sup> The state funds annual training from ERSI to ensure raters are at least 85% reliable. Raters engage in reliability checks at minimum ever 10 visits.
- <sup>24</sup> Raters provide a detailed report of the observation to the program, and to the state for the programs that are not yet NAEYC accredited or Head Start approved. Programs are expected to use the data to create an improvement plan which leads to NAEYC accreditation.
- <sup>25</sup> Compliance Monitoring ensures that state funds provided to programs are utilized according to their intended purpose and that services are delivered in compliance with requirements. Criteria: Priority for monitoring extends to programs that are: In their first year of funding; Experiencing licensing compliance challenges; Non-compliant with approval system requirements including reporting and required criteria; Chronically under enrolled; Non-compliant with OEC reporting requirements, General Policies, or legislation; Enrolling families in OEC funded spaces that do not meet income eligibility requirements; Experiencing significant issues as determined by OEC. Monitoring will be conducted by a team from the Division of Early Care and Education at OEC. The PDG Grant Manager will join the monitoring team as funding dictates.
- <sup>26</sup> The state has recently created P20 WIN (preschool through 20 and Workforce Information Network), which securely links education and workforce data to provide answers to help improve education programs and workforce alignment. Currently the following state agencies are a part of this network: OEC; State Department of Education; Board of Regents for Higher Education; University of Connecticut; Department of Labor; Connecticut Conference of Independent Colleges; Office of Policy and Management.

#### **DELAWARE - Delaware Early Childhood Assistance Program (ECAP)**

- <sup>1</sup> The total number of children is the number of seats funded by the DDOE OEL. Enrollment numbers by age reflect children who were enrolled and left the program; seats are filled within 30 days as per Head Start Program Performance Standards.
- <sup>2</sup> Head Start programs in Delaware also have ECAP-funded children enrolled, but the State does not track the braiding or blending of funding.
- <sup>3</sup> The income requirement is determined per the Head Start Program Performance Standards, at 100% of FPL.
- <sup>4</sup> Programs are required to provide a minimum of 3.5 hours of direct service per day. Schedule requirements are indicated by the Head Start Program Performance Standards (HSPPS) and Delaware’s QRIS requirements. Programs that operate longer than 3.5 hours per day have funding from multiple sources to support the additional service hours. Some ECAPs align with school district schedules. Some programs use state subsidy (Purchase of Care) dollars to extend the program day for children. Programs operate for at least 9 months but do not necessarily follow school district calendars. The program year for state-funded ECAPs is based on the state fiscal year and extends from July 1st through June 30th of the following year; programs determine operating schedules within this program year.
- <sup>5</sup> Programs provide high-quality educational and comprehensive services to children for at least one hundred and sixty (160) days per year, five (5) days per week, and three and a half (3.5) hours per day with ECAP funding.
- <sup>6</sup> ECAP funding supports enrollment of eligible preschool-aged children, defined as at least three-years-old after August 31st to kindergarten eligibility age, at most five-years-old on or before August 31st of the respective program year.
- <sup>7</sup> There is no state policy on exceptions to the age requirement for kindergarten entry; this is a local school district decision.
- <sup>8</sup> ECAP-funded children must meet the federal Head Start Program Performance Standards (HSPPS) eligibility guidelines. Ten percent of available slots must be provided for children with disabilities; programs can apply for waivers to this requirement. Effective as of the Head Start Act of 2007, 35% of enrollment may be children whose family incomes are between 100% and 130% FPL after priority is given to children at or below 100% FPL.
- <sup>9</sup> As per the federal Head Start Program Performance Standards, each program establishes selection criteria annually based on community needs identified in its community needs assessment; this may result in identification of additional risk factors.
- <sup>10</sup> Delaware follows the Head Start Program Performance Standards.
- <sup>11</sup> At least one meal is required; which meal is offered depends on the duration of the day and the start and end time.
- <sup>12</sup> ECAPs follow the requirements for screenings per the federal Head Start Program Performance Standards. Depending on the screening, these are conducted within the first 45 or 90 calendar days of the program year. Screening procedures are locally determined.
- <sup>13</sup> ECAPs follows Head Start Program Performance Standards which require comprehensive services.
- <sup>14</sup> DDOE has created materials to guide processes. Additionally, Delaware has an “Expanding Inclusive Opportunities” committee that has created publications regarding best practices in inclusion classrooms and will be completing the ECTA self-assessment on inclusionary practices.
- <sup>15</sup> DE ESSA Final Plan: [https://www.doe.k12.de.us/cms/lib/DE01922744/Centricity/Domain/208/DE\\_consolidatedstateplan.FINAL%2011.5.18.pdf](https://www.doe.k12.de.us/cms/lib/DE01922744/Centricity/Domain/208/DE_consolidatedstateplan.FINAL%2011.5.18.pdf); T
- <sup>16</sup> Curriculum decision-making and implementation is guided by Delaware Stars for Early Success, Delaware’s Quality Rating and Improvement System. All ECAPs are a Star 4 or 5, and thus follow curricula guidelines and receive technical assistance as a Stars Level 4 or 5 center.
- <sup>17</sup> All ECAP programs participate in the state QRIS. The state QRIS has technical assistants who work with programs to ensure curriculum is implemented with fidelity.
- <sup>18</sup> Delaware Stars approved curricula lists can be found here: <http://www.delawarestars.udel.edu/curriculum-and-assessment/>
- <sup>19</sup> Federal Head Start Program Performance Standards require at least an associate degree in early childhood education or a related field in addition to coursework equivalent to a major relating to early childhood education and experience teaching preschool-age children. Lead teachers in both public and private settings must meet these requirements. All other certifications and specializations are either not required or required by a particular school district (state and federal requirements are dictated by the funding source).
- <sup>20</sup> Federal Head Start Program Performance Standards require that assistant teachers must have at least a CDA, be enrolled in a program leading to an associate or baccalaureate degree, or be enrolled in a CDA program to be completed within 2 years. Assistant teachers in public schools are most likely paraprofessionals, which requires an associate degree, high school diploma or equivalent, or a qualifying score on the Para Pro assessment.
- <sup>21</sup> New teachers employed by public schools are a part of a statewide mentoring program. Nonpublic school teachers were not subject to the 2016 Head Start Program Performance Standards revisions that require coaching in the 2017-2018 program year.
- <sup>22</sup> As per the Head Start Program Performance Standards, for dual language learners, a program must recognize bilingualism and biliteracy as strengths and implement

research-based teaching practices that support their development.

- <sup>23</sup> ECAPs can braid and blend other funding to support their entire program. ECAP funding supports “seats” for children within existing programs.
- <sup>24</sup> TS GOLD is a continuous, formative, observational assessment with three checkpoint periods throughout the year.
- <sup>25</sup> All programs use MyTeachingStrategies (formally TS GOLD) because the State funds child portfolios for all Star 4 and 5 programs.
- <sup>26</sup> Delaware uses a reduced number of TS GOLD objectives within the domains of social-emotional, physical, cognition, math, language and literacy for its KEA. This is called the Delaware Early Learner Survey. Teachers have 30 days from the start of the school year to observe all of their students and an additional 15 days for data input online.

## DISTRICT OF COLUMBIA - D.C. Public Pre-K

- <sup>1</sup> The District uses a mixed-delivery system operating across three sectors for pre-K services, including traditional public schools (DCPS), public charter schools (PCS), and publicly-funded community-based organizations (CBOs). The District of Columbia Public Schools (DCPS) provides publicly-funded pre-K that is open to all DC residents. DCPS receives funding at the Uniform Per Student Formula Funding (UPSFF) level for students participating in pre-K classrooms. Additionally, DCPS receives Head Start funding, which enables schools to provide comprehensive child and family support services to all students enrolled in Title I schools through implementation of the Head Start School-Wide Model. Public charter schools (PCS) provide publicly-funded pre-K that is open to all DC residents. While PCS receive funding at the UPSFF level from the District government, they operate independently from the traditional public school system. Each PCS is authorized and monitored by the DC Public Charter School Board (PCSB). Through a partnership with the United Planning Organization, select PCS sites also receive Head Start funding to support pre-K programming. Community-based organizations (CBOs) that achieve and maintain a high-quality designation under the Pre-K Enhancement and Expansion Act, provide publicly-funded pre-K that is open to all DC residents. These CBOs receive an allocation of funding to supplement funds received through the District’s subsidized child care program and the federal Head Start program up to the UPSFF level for each student served.
- <sup>2</sup> Across the District’s eight Wards, pre-K is offered in 38 out of 67 Local Education Agencies. An additional 23 pre-K programs are offered in community-based organizations (CBOs).
- <sup>3</sup> Most elementary schools in DCPS and DC PCSs offer pre-K for age-eligible students. Additionally, the pre-K grant is available to high quality community-based organizations (CBOs). PCS sites that are approved to provide pre-k (by way of the school’s charter) may offer pre-k to any student that meets the District residency and age eligibility requirements.
- <sup>4</sup> The enrollment breakdowns were updated after the Yearbook was published, so the numbers reported in Appendix A may be slightly different from initial publication.
- <sup>5</sup> In DC, Head Start programs are offered in Title I public schools and private child development centers. These schools and centers serve children who are funded by Head Start, as well as children not funded by Head Start. To provide unduplicated counts, Head Start is excluded.
- <sup>6</sup> DCPS Title I-eligible pre-K classrooms incorporate Head Start services through a blended classroom model, in which federal Head Start and local pre-K funding are combined to offer a more comprehensive set of education services for at-risk children. Additionally, DC partners with community-based Head Start programs to extend the day by layering local and federal funds. This layered funding model supports before and after care to ensure eligible children receive a full day of care.
- <sup>7</sup> A small number of LEAs may use later cutoff dates.
- <sup>8</sup> Although the District has a stated age eligibility policy, there are some exceptions such that families may request that their children be allowed to enroll in pre-K programs in LEAs. In the 2017-2018 school year, 100 children who were age-eligible for kindergarten were enrolled in either DCPS and/or PCS pre-K programs.
- <sup>9</sup> Ratios and group size requirements are indicated for the sector (e.g. applicable to DCPS and CBOs). Ratios and group size requirements are based on the age of the youngest child in the classroom. PCSs have independent authority to develop their own set of guidelines/program standards for classes within each school.
- <sup>10</sup> Only DCPS Title I schools are required to have these screenings. All students enrolled in DCPS, PCS and CBOs must have a completed DC Universal Health Certificate, completed and signed by the health provider, and must verify screenings for vision, hearing, health, dental, language/speech, developmental/behavioral, height/weight/BMI, and completion of immunizations. The required components of the physical exam as set by DC’s EPSDT can be found at <https://www.dchealthcheck.net/trainings/exam/exam.html>. In PCS, schools with nurses give vision and hearing screenings as part of services. DC provides funding to DC health (Dept. of Health) to provide nurses in schools with an approved nurse’s suite. They do not provide funds directly to schools for nurses. DC Health contracts with Children’s School Services (a division of Children’s National Medical Center) to provide nursing services to DC schools.
- <sup>11</sup> All students identified with a potential delay are required to be referred to DC’s Early Stages program.
- <sup>12</sup> In DCPS, 59 of 78 pre-K programs are Title I and therefore meet this requirement through our Head Start School-Wide Model based in Title 1 elementary schools. PCS are not required to offer these services though they report that they are offered.
- <sup>13</sup> DCPS requires PD for preschool teachers who serve children with special needs and requires coaching for preschool teachers about children with special needs. Regarding the limit of the number/proportion of children with IEPs, there is no policy that limits the number of children enrolled with IEPs in a classroom. If an enrolled child is identified as requiring an IEP and the child can be served in an inclusive setting, the child will remain enrolled in their current classroom rather than be transferred to a different one.
- <sup>14</sup> The District provides policy guidance for identification and placement services (for DLLs) to all state-funded LEAs (public schools and public charter schools preschool programs). If the OSSE Home Language Survey indicates that a language other than English is spoken in the home, the student is screened using the Preschool IDEA Oral Language Proficiency Test (Pre-IPT Oral). If the child is not fluent, then they will be designated as EL and receive EL services. Additionally, DCPS early childhood education division created two new coaching positions focused on supporting DLLs and building capacity among coaches assigned to schools with higher proportions of DLL students.
- <sup>15</sup> The Pre-K Student Discipline Act of 2015 prohibits publicly funded pre-K programs from suspending or expelling pre-K students. If a DCPS coach or family service team member is made aware of an inappropriate suspension/expulsion of an early childhood education student, he/she reports the incident and works with the principal to implement supports for the children that allows the student to remain in the school.
- <sup>16</sup> DC’s Common Core Early Learning Standards include content for children from birth through kindergarten.
- <sup>17</sup> PCSs are not required to and do not maintain an approved list of curricula. A charter school must submit their comprehensive curricula (which includes standards, resources/instructional materials, methods of instruction, and formative assessments) as part of the charter application. When a school is approved to operate, DC PCSB is also approving the proposed curricula.
- <sup>18</sup> D.C. provides pre-K programming through three sectors: DCPS, PCSs, and in CBOs. Each sector has different teacher requirements. DCPS: Lead teachers must have a Bachelor’s degree; pass a core Praxis test in reading, writing and math; and pass a Principles of Learning & Teaching - Early Childhood test that verifies their content knowledge. PCS: The state gives Public charter schools the authority to establish their own requirements for teacher education and credentials. CBOs: Lead teachers must have a Bachelor’s degree in child development, early childhood education, or child and family studies. Alternately, a lead teacher is qualified to teach if they hold a Bachelor’s degree in a field other than child development, early childhood education, or child and family studies and have 18 credits in early childhood education.
- <sup>19</sup> In DCPS, assistant teachers must have a CDA. The state gives PCSs the authority to establish their own requirements for teacher education and credentials. In CBOs, assistant teachers must hold at least an Associate’s degree (AA) in child development, early childhood education, or child and family studies. Alternately, they must hold an AA in a field other than child development, early childhood education, or child and family studies and have 9 credits in early childhood education.
- <sup>20</sup> DCPS requires teachers to receive ongoing classroom-embedded support such as coaching and mentoring. Ongoing classroom-embedded support is not required for assistant teachers in DCPS; however, many schools require teaching teams to be coached together. PCSs determine the type of training teachers receive.
- <sup>21</sup> All DCPS and CBO Lead Teachers are required to have a BA (at a minimum) to teach in pre-K.
- <sup>22</sup> DCPS requires salary and fringe benefit parity for lead Teachers, including same starting salary, retirement benefits, and health care as K-3 for all years of service. Additionally, the DCPS salary schedule is prorated for differences in length of work day or year. For PCS, salary and/or fringe benefit parity for lead teachers is under the exclusive control of charter schools. CBOs that are designated high-quality through the Pre-K Enhancement and Expansion Program are required to pay Lead Teachers and Assistant Teachers the same as that indicated on the DCPS pay scale.
- <sup>23</sup> For PCS, requirements and/or supports are under the exclusive control of charter schools.

- <sup>24</sup> DCPS preschool teachers receive professional development at their schools on an ongoing basis and are compensated the same as their colleagues in K-3 grades. For PCS, requirements regarding paid time for professional responsibilities and/or PD days are under the exclusive control of charter schools.
- <sup>25</sup> DCPS preschool teachers, like all other DCPS teachers, are members of the Washington Teachers Union and covered by the Union's collective bargaining agreement with the District. For PCS, charter schools have exclusive control for collective bargaining agreement matters for Lead Teachers working in the District's state-funded preschool program.
- <sup>26</sup> In DCPS, educational aides can work 60-, 70- or 80-hour tours of duty (per two-week period) and can be either 10 or 12 month employees. As a result, their compensation is calculated on an hourly basis rather than annually. All DCPS aides are on the EG/DS-04 grade, with steps determined by seniority. The majority of the aides are 10 month employees on 35-hour work weeks. This figure assumes an employee in such position on step 4.
- <sup>27</sup> Educational Aides in DCPS are covered by the LEAs agreement with the American Federation of State, County and Municipal Employees (AFCSME). For PCS, charter schools have exclusive control for collective bargaining agreement matters for assistant teachers working in the District's state-funded preschool program.
- <sup>28</sup> The dedicated revenue sources are: Agency Program Activity CSG; GD0 Office of the State Superintendent of Education (OSSE); E800 - Division of Early Learning; E806 - Pre-K Enhancement and Expansion Program; 50-Subsidies.
- <sup>29</sup> DC's Uniform Per-Student Spending Formula (UPSFF) links program funding to student enrollment. Each year, the District sets a "foundation level" of funding for each student. Various adjusted amounts (called "weightings") are added to the foundation for students at certain grade levels, or with certain characteristics.
- <sup>30</sup> DCPS classrooms are required to use TS GOLD. PCSs have the authority to select their own child assessment. In pre-K CBOs, child assessment tools are required to be aligned with the curriculum selected by pre-K programs. The curriculum must also be aligned with the Common Core Early Learning Standards.
- <sup>31</sup> DCPS and CBO teachers are required to complete Inter-Rater Reliability training annually to ensure reliability.
- <sup>32</sup> Each data collector holds a current CLASS Pre-K certification through Teachstone. Data collectors participate in monthly calibration activities to ensure on-going reliability with the CLASS measure. A random sample of the classrooms are "double-coded" to ensure sufficient inter-rater reliability. Each data collector is screened for fidelity to data collection protocols during actual observation visits. Data collectors must pass the fidelity check in order to continue collecting data for the vendor.
- <sup>33</sup> CBOs, PCSs and DCPS receive program level reports identifying areas of strength and areas needing improvements. Additionally, DC convenes program administrators and education leaders for data engagement meetings annually to review and use/apply their CLASS data to inform decisions such as PD training, classroom instructions, and other program improvements.
- <sup>34</sup> CBOs participating in subsidized child care or providing public pre-K are required to be part of the QRIS system. DCPS and PCSs are required to be part of an accountability system that is aligned with the state's QRIS.

## FLORIDA - Florida Voluntary Prekindergarten Program (VPK)

- <sup>1</sup> All school districts are required to offer the 300-hour VPK program during the summer.
- <sup>2</sup> Enrollment by setting does not add up to the total enrollment because they come from different data sources.
- <sup>3</sup> Minimum operating hours are 540 hours for the school-year program (most programs operate 3 hours per day, 5 days per week) and 300 hours for the summer program (most programs operate 8 hours per day, 5 days per week). Providers are allowed to determine their individual calendars in order to meet those requirements. Specialized Instructional Services programs offer reimbursement for services to children with disabilities for whom a traditional VPK program may not be appropriate. The funding for these specialized services for children with disabilities is equal to that for children in traditional school-year or summer VPK programs and is used in lieu of attending a traditional VPK program. The school-year program cannot start earlier than two weeks before Labor Day, or before the first day of school according to the local school district calendar, and must end by June 30. The summer program may run between May 1 and the beginning of the next public school year. Most school-year programs operate on a 180-day calendar. Most summer programs operate on a two-month calendar.
- <sup>4</sup> Children must be 4 years old on or before September 1 to attend VPK. As of July 2016, parents of young 4-year-olds (those born between February 2 and September 1) could opt to enroll their child in VPK a year later when the child is 5 years old.
- <sup>5</sup> Child care providers are required to have a plan of scheduled daily activities, which includes meals and snacks as appropriate for the age and the times children are in care. Meals and snacks are required for extended-day programs.
- <sup>6</sup> All children participating in programs in licensed child care facilities or public schools must have evidence of vision, hearing, and immunization/general physical health screenings. Referrals for follow-up are recommended by the health professional. For public school programs, referrals for further follow-up are required.
- <sup>7</sup> Services for children with disabilities must be delivered according to professionally accepted standards. VPK Specialized Instructional Services allows parents of VPK-age children to choose additional therapies in line with the child's IEP in lieu of attending a traditional VPK classroom.
- <sup>8</sup> The standards are aligned with the Kindergarten Florida Standards.
- <sup>9</sup> Each VPK provider's curriculum must be developmentally appropriate, designed to prepare a student for early literacy, enhance age-appropriate student progress in attaining state-adopted performance standards, and prepare students to be ready for kindergarten based on the statewide kindergarten screening. VPK providers may select or design the curriculum for their classrooms, unless they are on probation as a result of their kindergarten readiness rates falling below the minimum rate. The legislation implementing the VPK Education Program requires the Office of Early Learning (OEL) to approve curricula for use by private prekindergarten providers and public schools placed on probation as a result of their kindergarten readiness rates falling below the minimum rate adopted by the State Board of Education (SBE). OEL maintains a list of such approved curricula at <http://www.floridaearlylearning.com/vpk/vpk-providers/vpk-curriculum>. OEL has developed curriculum specifications that align with the new Florida Early Learning and Developmental Standards: 4 Years Old to Kindergarten (2017) and is currently conducting a new curriculum review process. OEL developed An Educator's Guide to Understanding the Florida Early Learning and Developmental Standards: 4 Years Old to Kindergarten. The Educator's Guide provides standards, examples as well as environmental considerations, information on how to use the standards with diverse learners and much more: <http://flbt5.floridaearlylearning.com/>.
- <sup>10</sup> Florida early learning coalitions and school districts monitor providers on probation (private and school district sites) to implement an improvement plan per Florida Administrative Code including the use of an approved curriculum and training.
- <sup>11</sup> Lead teachers in the summer program must have a Bachelor's degree or higher in: Early Childhood Education, prekindergarten or primary education, preschool education, family and consumer science, or teacher certification in any area. Lead teachers in the school-year program are required to have a CDA or equivalent, plus specified training about performance standards and emergent literacy training. VPK requires lead teachers, whether working in public or nonpublic school settings, to maintain a valid CDA or the Florida Child Care Professional Credential (FCCPC) equivalent as a minimum credential for the school-year program. A CDA or FCCPC must be renewed every five years. Training in specified performance standards and emergent literacy is also required for school year teachers. Lead teachers in the summer program must have a Bachelor's degree in a specified major and/or teacher certification. All child care personnel in licensed facilities must complete a minimum of 10 clock hours of in-service training.
- <sup>12</sup> Assistant teachers do not have to meet any degree requirements, but must complete a 40-hour training course if employed at a licensed child care facility. This training course is offered by DCF. VPK providers on probation who must complete the Staff Development Plan as a part of their improvement plan, are required to have directors, VPK instructors, and VPK assistants complete several additional trainings.
- <sup>13</sup> All child care personnel in licensed facilities must complete a minimum of 10 clock hours of in-service training.
- <sup>14</sup> VPK teachers in public school VPK programs that are on probation are required to have individualized PD plans. For nonpublic schools, providers on probation must either implement the approved staff development plan including lead and assistant teachers or select a new, approved VPK curriculum. Providers selecting a new curriculum must require lead and assistant teachers to complete the required professional development to implement the curriculum.
- <sup>15</sup> Salary schedules and benefits are a district-based decision for public school VPK teachers and an individual business-based decision for private child care center VPK teachers.
- <sup>16</sup> Paid time for professional responsibilities and/or PD days is a local decision.
- <sup>17</sup> VPK Regional Facilitators are available for coaching public and nonpublic VPK teachers. T.E.A.C.H. scholarships are also available.
- <sup>18</sup> Funding is appropriated using estimated population counts and the base student allocations.

- <sup>19</sup> Subcontracts are permitted with other community programs to help implement the parent outreach component of VPK and also with approved licensed or certified professionals to provide specialized instructional services for children with disabilities.
- <sup>20</sup> The State of Florida implemented a new kindergarten readiness screener in the fall of 2017. This assessment was used to evaluate the 2016-2017 VPK program.
- <sup>21</sup> VPK programs are required to administer the Florida VPK Assessment. The pre- and post-assessments are required. There is a mid-year assessment but it is not required by law to be administered.
- <sup>22</sup> Training is provided online or through a CD that is provided with assessment materials.
- <sup>23</sup> The State of Florida used the Star Early Literacy Assessment tool for the first time in the fall of 2017 as the sole instrument of the Florida Kindergarten Readiness Screener.
- <sup>24</sup> The OEL VPK Outreach/Awareness and Monitoring Initiative Grant Agreement awarded to all early learning coalitions (ELCs) requires that a sample of VPK providers in the ELC service delivery area be monitored annually.

## GEORGIA - Georgia's Pre-K Program

- <sup>1</sup> Georgia has a separate state agency governing services for children birth to age five and their families. Bright from the Start: Georgia Department of Early Care and Learning (DECAL) administers Georgia's Pre-K Program.
- <sup>2</sup> Children must be 4-years-old by September 1st of the school year they are attending Georgia's Pre-K program. Five-year-olds can participate in the program if they did not previously attend Georgia's Pre-K program or if specific approval is given. The exact number of 5-year-olds is unknown; however, eligible 5-year-olds served are included total.
- <sup>3</sup> DECAL partners with child care centers, elementary schools and Head Start programs to offer before- and after-care services. State lottery funds supplement Georgia's federally funded child care subsidy program to provide extended-day services to children whose families meet the eligibility requirements. Pre-K students are an identified priority group for CAPS funding.
- <sup>4</sup> Children who are age eligible for kindergarten and attended Pre-K may repeat if the program submits a Retention Request, with supporting documentation, which has been reviewed and approved by DECAL.
- <sup>5</sup> The maximum class size and teacher-to-student ratio were changed as of the 2011-2012 school year, as a result of budget constraints, and will continue at least until the 2018-2019 school year. However, roster data reports that the average class size is 20 students with a 1:10 ratio.
- <sup>6</sup> All programs are required to serve lunch, but if a program participates in the Child and Adult Care Food Program (CACFP), the program is also required to serve a snack during the pre-K day.
- <sup>7</sup> All children must receive a nutrition (BMI) assessment. Children in blended Pre-K Program/Head Start classrooms are required to have developmental screenings. All Pre-K programs are required to ask parents if a child has received a developmental health screening and provide a referral and appropriate follow-up to children who have not. Children eligible for Medicaid or PeachCare are required to have a 4-year-old full physical exam.
- <sup>8</sup> Additional comprehensive services are offered in the Summer Transition Program (STP). Each STP site is funded to have a Transition Coach to work with families.
- <sup>9</sup> During the 2017-2018 school year, there were 169 fully inclusive classrooms with an approved model and full day special education teacher. In addition, there were a total of 2,998 children with an IEP served in Georgia's Pre-K.
- <sup>10</sup> DECAL offers a Rising Pre-K (RPK) Summer Transition Program which is targeted to low-income families whose children must be age eligible for Georgia's Pre-K program in the upcoming school year. The RPK program is focused on children whose home language is Spanish. Instruction in these classrooms is in both English and Spanish. Classrooms are staffed with bilingual teachers. During the 2017-2018 summer, DECAL served 868 children in 62 classrooms. The staff-to-child ratio for the RPK is 1:7.
- <sup>11</sup> WIDA developed Early English Language Development (E-ELD) Standards that describe the social and academic language DLLs need to process and produce across standards-based curricula in early care and education programs. The E-ELD Standards are aligned with the WIDA K-12 English Language Development Standards and have been cross-walked with Georgia Early Learning and Development Standards (GELDS). The WIDA E-ELD Standards are designed to be used in conjunction with the GELDS to help practitioners concretely connect the linguistic variations and needs of DLLs across all content areas of standards-based curricula and assessments.
- <sup>12</sup> DECAL provides a website ([www.gelds.dec.al.ga.gov](http://www.gelds.dec.al.ga.gov)) which includes resources for families, teachers, and providers on the ELDS. All Pre-K teachers are provided with a GELDS manual and toolbox. PEACH is a newly developed interactive website ([www.peach.dec.al.ga.gov](http://www.peach.dec.al.ga.gov)) that provides ELDS-aligned activities for teachers to use in instructional planning. This website allows teachers to develop, save online, and print lesson plans.
- <sup>13</sup> All Georgia's Pre-K classrooms are required to use Work Sampling Online (WSO). A correlation between the ELDS and WSO has been developed. All teachers receive professional development and onsite technical assistance on curriculum, lesson planning, and child assessment.
- <sup>14</sup> DECAL completes a full curriculum review approximately every 5 years to identify curriculum models that best support Georgia's Pre-K Program. DECAL's approved curriculum list also includes: Alpha Skills Pre-K, Beyond Centers and Circle Time, Big Day for Pre-K, CORE Knowledge, DIG, Frog Street, Galileo, Investigator Club, We Can, and Wings. This curricula list is provided on the DECAL website with guidance regarding selection of a curricula.
- <sup>15</sup> Individual programs can request approval to implement a subject-specific curriculum. Last year, programs were eligible to apply for funding to implement the social emotional curricula, Second Step.
- <sup>16</sup> Lead teachers must have a minimum of a Bachelor's degree in Early Childhood Education or a related specified field (i.e., Child Development). Twenty-six percent of lead teachers have an advanced ECE degree beyond a BA (1,054 lead teachers have a Master's degree, 127 have a Specialist degree, and 4 teachers have a Doctorate). In addition, 73% of lead teachers hold a Georgia teacher certification issued by the Georgia Professional Standards Commission, which also licenses all K-12 teachers in the state.
- <sup>17</sup> A CDA is the minimum requirement for assistant teachers in Georgia's Pre-K Program. However, the majority of assistant teachers (1,604) hold a state paraprofessional license issued by the Georgia Professional Standards Commission. Additionally, many assistant teachers have a higher ECE credential: 235 have a Technical College Diploma, 365 have a Technical College Certificate, 370 have an Associate's degree, 122 have a BA, and 37 have an advanced degree.
- <sup>18</sup> DECAL provides a minimum of 12 clock hours of training each year to all Georgia's Pre-K lead and assistant teachers. Training is customized for the participants based on their lead or assistant teacher role. This training is offered free of charge to the staff. Programs are required to document the additional 3 hours of appropriate training.
- <sup>19</sup> Pre-K providers are required to develop a written Professional Development Plan for lead and assistant teachers. A Professional Development Plan is used as a tool to help plan a career, guide development, and assess progress toward career goals. The Professional Development Plan for Pre-K staff should include: identified areas for improvement and growth, specific professional learning activities to address these areas (including Pre-K trainings attended), timelines for completion, hours accrued, and reviews of progress toward goals.
- <sup>20</sup> All Pre-K programs have an assigned Education Specialist, with an ECE credential and appropriate experience, who provides classroom-embedded technical assistance and coaching in all classrooms and onsite monitoring for programs. In addition, individual teachers are selected to participate in an intensive professional development project focused on improving teacher-child interactions. These teachers are provided on-going in-class coaching, regular observations, and attend monthly professional learning community sessions.
- <sup>21</sup> The amount of support or number of coaching visits is differentiated based on teacher and program needs. New teachers receive additional visits, while veteran teachers may only be visited 2 or 3 times a year. Teachers participating in Making the Most of Classroom Interactions (MMCI) PD receive monthly coaching sessions. Teachers in programs that are in the Quality Support Program (Funding Probation) receive, at a minimum, quarterly classroom observations, goal setting, and targeted technical assistance. In addition, teachers who are identified as struggling with classroom management or dealing with challenging behaviors receive Intensive Professional Development from a regional Inclusion Specialist. A total of 34 child care centers that are funded for Pre-K received resources and training to support full implementation of the Pyramid Model for Supporting Social Emotional Competence in Infants and Young Children, which includes classroom embedded coaching.
- <sup>22</sup> The number of teachers assigned to a coach depends on the type of service and teacher need. For MMCI, each Specialist supports 10 classrooms. On average, each Pre-K specialist is assigned 100 classrooms; however, the support is differentiated based on need. There are also nine regional Inclusion Specialists. Programs are required to have both system and site level personnel to support Pre-K classrooms, and DECAL provides training and resources to those personnel.
- <sup>23</sup> Training is required for both lead and assistant teachers who work in our Rising Pre-K classes in our STP program that is for DLLs.
- <sup>24</sup> Georgia's Pre-K Program Guidelines outline policies and requirements for salary and benefits for Pre-K Lead teachers. These are updated annually to reflect any changes.

In addition, any salary or benefit increases for K-12 teachers in the state budget are also allocated in the Pre-K budget annually. This allows for the Pre-K Program to maintain parity with the K-12 system.

- <sup>25</sup> Salary requirements are the same for both Public and Private Pre-K teachers (<http://www.decal.ga.gov/PreK/GuidelinesandAppendix.aspx>). Funding for benefits for Pre-K assistant teachers are allocated in Pre-K grants at the same rate as K-12 teachers. Pre-K teachers employed by local school systems are offered the same benefit package as K-12 teachers. However, private Pre-K programs are allowed to determine benefits at the local level. This allows programs to align Pre-K benefit packages with other employees in the program.
- <sup>26</sup> The requirements are the same for Pre-K teachers in both public and private programs. Teachers are required to be paid for professional learning days, overtime for training or PD, and professional expenses including travel. For additional information see: <http://www.decal.ga.gov/PreK/GuidelinesandAppendix.aspx>
- <sup>27</sup> Pre-K lead and assistant teachers are eligible for both the DECAL Scholars program and the Georgia Lottery for Education HOPE program.
- <sup>28</sup> Georgia does not have teacher unions.
- <sup>29</sup> The Georgia Pre-K Program Guidelines outline policies and requirements for salary and benefits for Pre-K assistant teachers. These are updated annually to reflect any changes. In addition, any salary or benefit increases for K-12 teachers in the state budget are also allocated in the Pre-K budget annually. This allows for the Pre-K Program to maintain parity with the K-12 system. The starting salary for all Georgia's Pre-K assistant teachers is actually higher than the starting salary for K-12 assistant teachers. Funding for benefits for Pre-K assistant teachers are allocated in Pre-K grants at the same rate as K-12 teachers. However, private Pre-K programs are allowed to determine benefits at the local level. This allows programs to align Pre-K benefit packages with other employees in the program. DECAL is working with the Governor's Office of Planning and Budget on possible increases to the benefit rates for all Pre-K teachers.
- <sup>30</sup> An additional \$5,359,380 in CCDF funding was used to support the Summer Transition Program (STP). STP is a six-week program during the summer which serves children who are in need of additional academic support prior to starting school.
- <sup>31</sup> In 2016, DECAL commissioned researchers from Child Trends to conduct an analysis examining the relationship between Pre-K participation and Georgia's Third Grade Assessments (Milestones). This analysis utilized Georgia's Academic and Workforce Analysis and Research Data System (GAAWARDS, <https://gosa.georgia.gov/statewide-longitudinal-data-system-ga%E2%80%A2awards>). The study found small, but significant associations with Georgia's Pre-K participation and assessment scores. Results and study materials can be found here: <http://www.decal.ga.gov/BfTS/ThirdGradeAchievement.aspx>
- <sup>32</sup> Observers must demonstrate annual reliability for all instruments for which they conduct observations. Additionally, all observation data is collected and reviewed by internal research staff to ensure observations are conducted in a manner supporting the reliability and validity measures established for each tool. Annual professional development is provided for observers, and an internal protocol has been established for each observation tool to ensure consistency. Also staff complete joint visits with experts to complete double coding visits to ensure reliability.
- <sup>33</sup> The Georgia Kindergarten Inventory of Developing Skills (GKIDS) was developed by Georgia and is administered in all Kindergarten classrooms in the state. GKIDS also includes a kindergarten readiness assessment called the Kindergarten Readiness Check which is administered in the first 6 weeks of school.
- <sup>34</sup> Georgia conducts yearly CLASS observations to gather a state baseline. Classrooms are selected to provide a representative snapshot of the program statewide. CLASS observations are provided to programs for program improvement and to support the development of Professional Development Plans. In addition, teachers receive CLASS observations as part of participation in MMCI PD. These observations are used in coaching sessions. For programs participating in the state TQRIS, Quality Rated, classrooms receive ECERS observations. The Teaching Practices Observation Tool (TPOT) is utilized in Intensive Professional Development provided by Inclusion Specialists.
- <sup>35</sup> Additionally, all observation data is collected and reviewed by internal research staff to ensure observations are conducted in a manner supporting the reliability and validity measures established for each tool. Annual professional development is provided for observers, and an internal protocol has been established for each observation tool to ensure consistency.
- <sup>36</sup> Georgia's Cross Agency Child Data System (CACDS) aligns data from programs and services for children zero to five and their families. Data include state Pre-K Programs, Head Start, Child and Parent Services (childcare subsidy), IDEA Part C and B, Home Visiting, and foster care.

## HAWAII - Hawaii's Executive Office on Early Learning Public Pre-Kindergarten Program

- <sup>1</sup> Although the Hawaii Department of Education (DOE) does not have authority over the Executive Office on Early Learning (EOEL), EOEL is administratively attached to the DOE.
- <sup>2</sup> The Hawaii State Public Charter School Commission will be requesting funds from the legislature in 2019 for 18 Pre-Kindergarten classrooms in order to sustain the program.
- <sup>3</sup> The data do not distinguish English-only households from multilingual households where English is spoken. Rather, they reflect the primary language spoken at home. Language spoken by the 30 students whose home language is not English include Samoan/Chuukese/Marshallese/Tongan, Ilokano/Tagalog, and other languages. Data are missing for 7 children.
- <sup>4</sup> State funded preschool can only be implemented in the DOE due to Article X of the Hawaii State Constitution which prohibits the use of public funds to support private educational institutions.
- <sup>5</sup> Although there is no minimum requirement specifically stated in statute, the understanding is that the publicly funded pre-K program will run on the same calendar and schedule as the DOE public elementary school in which the classrooms are housed. This is the equivalent of 30.5 hours per week.
- <sup>6</sup> Priority is given to families who fall into the following at-risk categories: at or below 300% FPL; child disability or developmental delay; history of abuse, neglect, or family violence; homelessness or unstable housing; home language other than English; Parental substance abuse; teen parent; and child history of foster care. However, if a school offering an EOEL Pre-Kindergarten Program is unable to fill all spaces, the income requirement may be waived and the spaces can be offered to families who do not fall into the at-risk categories.
- <sup>7</sup> Breakfast is offered before the start of the school day for a fee (unless the student qualifies for free or reduced-price meals).
- <sup>8</sup> In order for a child to register and enroll in the EOEL Pre-Kindergarten Program, which is offered on DOE public school campuses, he/she must have completed a physical exam which includes vision, hearing, height/weight, blood pressure, required immunizations, and a TB test.
- <sup>9</sup> Parent conferences are offered to all families who have children in DOE schools, which includes pre-K. While transition to kindergarten activities are not a requirement, most DOE schools offer support (determined by individual schools) to students entering kindergarten across the state. Home visits are not required and are done on a voluntary basis by teachers who choose to implement this practice.
- <sup>10</sup> Schools must provide ELL services to all students on their campuses.
- <sup>11</sup> The state has no policy regarding chronic absenteeism. Attendance is not mandatory for pre-K.
- <sup>12</sup> EOEL provides professional learning support to program staff and school leadership as well as partners with the University of Hawaii System on teacher preparation to manage challenging behaviors, recognize trauma, and promote social-emotional development that would prevent suspensions and expulsions. We are planning to introduce legislation to prohibit suspension and expulsion in SY2019-2020.
- <sup>13</sup> Hawaii's ELDS are aligned with the Common Core State Standards, which include college- and career-readiness standards.
- <sup>14</sup> There is on-going training and feedback provided to teachers with respect to curriculum and instruction.
- <sup>15</sup> EOEL has worked with the Hawaii Teacher Standards Board to change licensure requirements relating to early childhood education. Starting January 1, 2020, any individual adding the fields of Early Childhood Education (ECE) PK-3 and ECE PK-K to an existing Hawaii teaching license must complete 30-36 credit hours from a state-approved teacher preparation program in ECE.
- <sup>16</sup> Educational assistants can also have a high school diploma and 48 semester credits of baccalaureate level courses from an accredited institution of higher education recognized by the DOE. The 48 semester credits can be from various program or academic areas but 3 must be for math and 3 for English courses. Hawaii is in the process of working on the implementation of a requirement for all assistant teachers in the EOEL Pre-Kindergarten Program to have at least 9 credits of coursework (comparable to a CDA) in Early Childhood or Child Development.
- <sup>17</sup> Although there is no state requirement, the union contract requires 21 hours of teacher in-service professional development. All teachers are required to be in the union.

The union contract is negotiated with the state. For EOEL Pre-kindergarten teachers, at least 60 hours of professional development in ECE are offered to teachers per year in addition to the required 21 hours.

- <sup>18</sup> Coaching and mentoring support is provided to teachers and assistant teachers. The frequency of coaching and mentoring is dependent upon the knowledge base and skills of the individual teacher and assistant teacher based on self-reporting, ongoing observations by early learning resource teachers and school administrators, as well as the CLASS assessment. Experienced teachers may receive coaching and/or mentoring 1-2 times a month while those needing more support may receive coaching/mentoring 1-2 times per week.
- <sup>19</sup> All teachers in the Public Pre-Kindergarten Program are members of the Hawaii State Teachers Association (public school teachers' union) and have contracts which determine their salaries and benefits and ensure parity across all grade levels pre-k through 12.
- <sup>20</sup> All public school teachers are paid for 2 days per year of planning and collaboration, 21 hours per year (the equivalent of 3 days) of PD, and 535 minutes per week for preparation, meetings, and other professional responsibilities. EOEL Pre-Kindergarten teaching staff receive an additional 10 paid days for the required PD offered by EOEL.
- <sup>21</sup> The PDG has provided stipends for program staff, which includes lead and assistant teachers.
- <sup>22</sup> All assistant teachers in the EOEL Pre-Kindergarten Program are members of the Hawaii Government Employees Association and have contracts which determine their salaries and benefits and ensure parity across all grade levels pre-K through 12.
- <sup>23</sup> All state funding comes from the general fund and is specific to the EOEL Pre-Kindergarten Program.
- <sup>24</sup> Educators who implement assessments must be trained to use the tool and pass an interrater reliability test.
- <sup>25</sup> Feedback is provided through regular coaching and mentoring.
- <sup>26</sup> Hawaii does not have a QRIS system in place at this time.
- <sup>27</sup> Site visits are conducted through routine coaching and mentoring where support is provided to program staff.

## **ILLINOIS - Illinois Preschool for All (PFA)**

- <sup>1</sup> Children from all counties participate. However, funding does not allow for services to be provided to all children whose parents want them to attend.
- <sup>2</sup> In order to honor the state's commitment to sustainability through the federal grant, money will be set aside from the FY19 and FY20 state budgets to fund the federal grantees at the same level they receive through the federal funding.
- <sup>3</sup> Home languages include Spanish, Mandarin, Tagalog, Vietnamese, French, German, Arabic, Polish, Urdu and others.
- <sup>4</sup> There is not a formal partnership, but child care centers are eligible recipients of Preschool for All (PFA) funding and provide wraparound services for the PFA children in their centers.
- <sup>5</sup> Children must be 3 years old to enroll in preschool, but children who turn 3 after September 1 may enroll in PFA after turning 3 if there is space in the class. School districts may enroll children in kindergarten before they are age 5 based on local policy.
- <sup>6</sup> Low income is one of the risk factors taken into account in determining program eligibility. Programs use an eligibility form that consists of weighted criteria based on risk factors. Programs serve those children most in need in the community as determined by those exhibiting the most at-risk factors.
- <sup>7</sup> Vision and hearing screenings must be conducted annually for preschool-age children by technicians or nurses trained and certified by the Illinois Department of Public Health. Evidence of completing the physical exam and immunizations must be provided by October 15. Programs work with parents to ensure children receive dental examinations, but there is no state requirement to report on dental examinations until kindergarten. The physical examination involves all components given on the State of Illinois Certificate of Child Health Examination, including a complete immunization record, medical history, diabetes screening and lead assessments. Students transferring from another Illinois school must present copies of their current Illinois school health records.
- <sup>8</sup> Additional information about inclusion policies can be found here: <https://www.isbe.net/Documents/Inclusion%20Models%20Color.pdf>
- <sup>9</sup> Resources for supporting English Learners can be found here: [https://www.isbe.net/Documents/preschool\\_faq.pdf](https://www.isbe.net/Documents/preschool_faq.pdf) and <https://www.isbe.net/Pages/Preschool-English-Language-Learners.aspx>
- <sup>10</sup> The State will collect chronic absenteeism data in the Student Information System and is currently in the process of developing the rules and guidance to programs to address chronic absenteeism in preschool programs.
- <sup>11</sup> Illinois is also a pyramid model state for social and emotional development.
- <sup>12</sup> ExceleRate Illinois, the Quality Recognition and Improvement System, provides additional information about child assessment and a list of assessments that are aligned with the Illinois Early Learning and Development Standards (IELDS). Additional information can be found at: <http://www.excelerateillinoisproviders.com/resources/resources-by-standard?id=51>. The Illinois Early Learning Project provides resources, tip sheets, benchmark videos, etc.: (<http://www.illinoisearlylearning.org/>).
- <sup>13</sup> The State does not officially approve curricula; however, programs must choose from among a list of curricula the state has confirmed are aligned to the IELDS. Administrative Rules state programs must use a researched-based curriculum. Curricula that are aligned with our IELDS can be found at [excelerateillinois.com](http://www.excelerateillinois.com).
- <sup>14</sup> The teacher assistant in the classroom must hold an Educator License. To be eligible, an individual must be at least 20 years of age and hold a high school diploma or its recognized equivalent (GED) and meet one of the following requirements: (1) Holds an Associate's Degree (or higher) from a regionally accredited institution of higher education, (2) Completed at least 60 semester hours of credit from a regionally accredited institution of higher education, (3) Presents an official score report from Educational Testing Service (ETS) showing a score of 460 or higher on the ParaPro test, or (4) Presents evidence of earning the following scores on the Work Keys test: Reading for Information (4), Writing or Business Writing (3), and Applied Mathematics (4).
- <sup>15</sup> Assistant teachers must work under the direct supervision of a licensed teacher.
- <sup>16</sup> Each program must have staff development assessment procedures and ongoing PD activities that demonstrate how the results of the assessment were used to inform the program's staff development. Assistant teachers are not required by ISBE licensure to have PD hours, however, the PFA grant requires assistant teachers to have PD plans.
- <sup>17</sup> Coaching is provided to teachers in PFA classrooms based on the monitoring report for that PFA program. However, coaching is not required by state policy.
- <sup>18</sup> Results from the PFA monitoring visit may result in programs being invited to participate in the PFA Coaching Project. The project is funded by ISBE through the Illinois Resource Center at no cost to programs. Programs receive support, on-site visits, and resources from the PFA Coaching Project to assist in the process of continuous program improvement. PFA coaches are experts in the field of ECE and have extensive experience with PFA. On average, coaches visit their teachers once a month. Coaches also meet with the administrators, often together with the teacher. Length and timing of visits vary based on the experience of the teacher and whether a monitoring visit is scheduled, but 32 hours/year are allowed per teacher and 4 hours/year per administrator. The coach is responsible for using these hours as needed.
- <sup>19</sup> The location of the programs and the number of teachers/sites requiring a coach will determine the number of teachers assigned. Often there are more programs located in one or two specific areas of Illinois which would require more programs assigned to coaches. On average there are eight teachers per coach. The number of programs/teachers assigned to each coach does not differ with new teachers.
- <sup>20</sup> For additional information, see: <https://www.isbe.net/Pages/Preschool-English-Language-Learners.aspx>
- <sup>21</sup> Public School District salaries and fringes are set by union bargaining agreements at a local level. For our state PFA programs we do not have salary parity for nonpublic school employees, however, parity is required in PFA sites participating in the federal PDG. In those sites, salary must be comparable to the local K-12 school salary schedule.
- <sup>22</sup> Program compliance states that teaching staff receive relevant and appropriate PD to drive instructional quality. It is encouraged that the teacher and assistant get planning time and PD time together. Although there is no required number of paid PD days, it is recommended as best practice: <https://www.isbe.net/Documents/PFA-Compliance-Checklist.pdf>
- <sup>23</sup> The State provides funding to the Gateways to Opportunity Scholarship program. The program pays a portion of tuition for eligible professionals working in early care and education or school-age programs who want to earn college credit, credentials, or degrees. Courses taken must be in ECE or CD. See [www.ilgateways.org](http://www.ilgateways.org) for more

information.

- <sup>24</sup> The Early Childhood Block Grant line item appropriation in the State's FY18 budget was \$443,738,100 for children ages birth to five.
- <sup>25</sup> PFA and PFA Expansion (PFAE) programs are required to use a research based assessment tool that is aligned to the IELDS and that assesses ELL domains, if applicable.
- <sup>26</sup> PFA programs can choose any research based assessment tool, but 65% of PFA programs use TS GOLD and 25% use WSS. The state does not require a specific assessment tool. Each program must use a research-based, authentic assessment system that aligns with the curriculum and documents child progress over time. <https://www.isbe.net/documents/235ARK.pdf>
- <sup>27</sup> The teacher must be trained by a certified trainer to use the assessment.
- <sup>28</sup> Kindergarten Individual Development Survey (KIDS) was adapted from the DRDP-SR. It has been piloted, field-tested, and calibrated. Fourteen measures have been identified for state reports. For the 2017-2018 school year, all schools must evaluate each kindergarten student based on the 14 measures and report this information to the state. FY18 was the first year of statewide data collection.
- <sup>29</sup> The assessors conduct visits along with either the state anchor, who is 90% or above reliable with the authors, or a lead assessor, who has been 90% reliable with the anchor. These reliability visits take place on every sixth or eighth assessment visit, depending on the experience of the assessor (every six for newer assessors and eight for senior assessors). National Louis University maintains a reliability spreadsheet on everyone monitored by their supervisor.
- <sup>30</sup> Teacher and program administrators are given ECERS-3 continuous quality improvement reports with reflective questions about their monitoring visits. These questions are used to generate a program's continuous quality improvement plan. These plans are reflected on yearly and updated by the program, and then submitted to the ISBE.
- <sup>31</sup> PFA programs located in child care centers do not receive their Excelerate rating from ISBE. They receive a rating as part of the larger center in which they are housed through the child care Excelerate path.
- <sup>32</sup> ISBE consultant site visits are conducted on an as needed basis.

## IOWA - Iowa Shared Visions

- <sup>1</sup> Shared Visions Preschool is in 22 out of 333 school districts in the state; there are 32 grants held within these 22 school districts. Additionally, there are 16 other organizations (including Head Start programs and licensed non-profit child care centers) which provide services through an additional 35 grants.
- <sup>2</sup> Children may attend both Shared Visions and Statewide Voluntary Preschool Program (SWVPP) for different portions of the day or different days of the week, allowing for a full- or extended-day. Participation in a program may not be funded by both sources at the same time as supplanting of funds is not allowed.
- <sup>3</sup> Special education enrollment is the cumulative number of children served over the course of the grant year. Of the 83 3-year-olds who received special education services, 38 were enrolled with an IEP while 45 were identified for services after enrollment; 42 of the 4-year-olds were enrolled with an IEP and 38 were identified for services after enrollment; one 5-year-old was enrolled with an IEP and four identified after enrollment.
- <sup>4</sup> There were 483 children enrolled in a Shared Visions program in which the awarded grantee reported collaboration with a Head Start program/use of Head Start funds. It is unknown how many additional children were enrolled in a Shared Visions program with an extended day provided by a Head Start program if it was not coordinated or due to a partnership with the Shared Visions grantee. Program designs include dual enrollment with braided funds, part-day for each program, and state preschool with Head Start providing wrap-around services.
- <sup>5</sup> Community Action Agencies were included in the Head Start category.
- <sup>6</sup> All program operating schedules are determined locally and are based on community need in the application process. There are no minimum number of hours per day or days per week required for the Shared Visions Program.
- <sup>7</sup> Although there is not a formal partnership at the state level, the grant application requests information related to collaboration. In the 2017-2018 school year, some Shared Visions Programs blended with the SWVPP and/or Head Start programs to increase hours in order to meet the needs of children and families. SWVPP funds may be used to provide school- or extended-day services to children if the program meets NAEYC Standards and adds at least 10 hours of instruction per week by an early childhood endorsed teacher. The daily and annual operating schedules are described as part of the competitive grant application process and address identified needs within the community.
- <sup>8</sup> Kindergarten-age eligible children may enroll in Shared Visions if they meet eligibility criteria for income and/or other risk factors.
- <sup>9</sup> A minimum of 80% of funded slots must be filled by children whose families are at or below 130% FPL. No more than 20% of funded slots may be filled by children who are over income but meet certain other risk factors. There must be at least one risk factor present for eligibility. Children who are not eligible based on income may enroll provided they are served on a sliding-fee schedule determined at the local level and are eligible according to one or more of the other eligibility criteria. Income eligible children (at or below 130% FPL may not be charged any fees for participation. Additional locally determined risk factors include: parent is incarcerated, parent is illiterate, parent is chronically mentally ill, and other special circumstances which may be interpreted by the local program. Teen parent is defined as under the age of 18. Programs may enroll children who do not meet income or secondary risk factors, but grant funds cannot pay for their participation and they must be at full pay or covered by another funding source.
- <sup>10</sup> In accordance with NAEYC Early Learning Program Accreditation Standards and Assessment Items, mixed-age classrooms with 3- and 4-year-olds must not exceed a maximum group size of 20.
- <sup>11</sup> The specific meals offered depend on the hours of operation, but programs are required to follow NAEYC criteria. The program must serve meals and snacks at regularly established times; meals and snacks must be at least two hours apart but not more than three hours apart. Depending on whether children attend for a full-day or part-day, as well as if the hours attended are in the morning or afternoon, will determine if breakfast, lunch and/or snack(s) are offered.
- <sup>12</sup> Shared Visions Programs must implement NAEYC Program Standards, which require following the American Academy of Pediatrics (AAP) schedule for routine screening. Dental screenings are locally determined, but required as part of the full physical exam for 3-year-old children, per AAP. Screenings are typically conducted prior to enrollment, but children may enroll if not yet screened as long as proof of appointment can be provided.
- <sup>13</sup> In general education classrooms, teachers must have an appropriate endorsement that includes early childhood special education. Alternatively, a properly licensed and endorsed teacher must be identified as responsible for special education services in that classroom, and collaborate with the general education teacher.
- <sup>14</sup> A home language survey is sent home at the beginning of the school year and is required. Information about enrolled children's program and performance must be presented to families in their home languages. Programs are required to screen and assess all children in their home language.
- <sup>15</sup> Children who miss 10% or more of the days they should be in school "for any reason" are considered chronically absent.
- <sup>16</sup> The Iowa Early Learning Standards (IELS) were recently revised and are now available, but were not available during the 2017-2018 school year: <https://educateiowa.gov/documents/early-childhood-standards/2018/07/iowa-early-learning-standards-3rd-edition>
- <sup>17</sup> The state has developed a facilitation guide and supporting materials for reflecting on universal instruction. The materials align with the IELS and require programs to ensure curriculum, instruction and assessment are aligned to the IELS. These are available to any interested school district or preschool program.
- <sup>18</sup> The Child Development Coordinating Council (state advisory board) Policy and Iowa Code 279.60 require grantees to administer TS GOLD.
- <sup>19</sup> Beginning in 2016-2017 and continuing through 2017-2018, materials were made available, including at the preschool grade-level, to support instruction at the universal tier level. Training for curricula adopted by grantees is determined locally, but may occur by the local program, intermediary agencies (e.g., Area Education Agencies (AEAs)), and/or vendors. Existing funds may be used to support PD of Shared Visions staff in the area of curriculum; additional funding is not provided specifically for this purpose.
- <sup>20</sup> Curriculum is locally determined but must be research or evidence-based and must align with the IELS. Programs may use grant funds to support curriculum implementation or training. The state offers guidance on criteria for selecting evidence-based curriculum models and materials are available to programs to support instruction at the universal tier level, including the preschool level, regardless of the curricula selected.
- <sup>21</sup> Teachers must have training/education/higher education degree in one of four areas (ECE, CD, Elementary Education, or Preschool Special Education). All teachers employed by nonpublic schools must have a minimum of an AA or equivalent, and at least 75% of teachers must also have a minimum of a BA in ECE, CD, Elementary Education, or ECE Special Education, and this training must include the development and learning of children birth through kindergarten. Those without a BA must have an AA in ECE, CD, Elementary Education, or Early Childhood Special Education. Lead teachers in Shared Visions classrooms that are blended with SWVPP are required to

have an early childhood endorsement as part of their teaching license and meet the SWVPP requirements which requires a license in Pre-K, Pre-K - K, Pre-K - 3rd Grade, Birth - K, or Birth - 3rd Grade. The equivalency of an AA degree in ECE (acceptable for 25% of lead teachers in a non-public school) includes at least 60 college/university credits with at least 30 college credits in ECE, CD, elementary education, or ECE Special Education. The equivalency of a BA degree or higher in ECE includes a BA in any discipline and at least 36 college credits in ECE or related fields.

- <sup>22</sup> At least 50% of assistant teachers must have a CDA or equivalent and 100% of those without the CDA or equivalent must have a high school diploma and be working toward the CDA or equivalent. An equivalent to the CDA is defined as a minimum of 12 college credits (semester hours) in ECE, CD, Elementary Education, or Early Childhood Special Education that encompass the following: child development and learning of children birth through kindergarten; family and community relationships; observing, documenting, and assessing young children; teaching and learning; and professional practices and development. A paraprofessional certificate would meet the requirements needed for an assistant teacher.
- <sup>23</sup> Per program standards, initial orientation and training of staff members must include health, safety and emergency procedures. All program staff must receive PD in curriculum, assessment, working with diverse families, CD, and working with children with special needs. Staff members with a teaching license must renew their license every five years, including six credit hours of PD. Program standards also require each staff member to have an individualized annual staff development plan but the number of hours is not specified in these requirements. Nonpublic settings must be licensed by the Department of Human Services and require 6 clock hours of PD annually.
- <sup>24</sup> Coaching is required for all teachers. For lead teachers in public schools it is required per Iowa Code 284.6. For lead teachers in nonpublic schools and all assistant teachers, it is required by program standards, and locally determined how it will be implemented.
- <sup>25</sup> Program standards state that mentoring, coaching, and PD must be included in a program's PD plan, but it is locally developed.
- <sup>26</sup> There are explicit salary requirements for state funded pre-K teachers in public schools, but benefits are determined locally. There is a minimum starting salary of \$33,500 for lead teachers in public settings. School districts determine the salary schedule for percent increases based on experience. There are no salary requirements for Shared Visions teachers in Head Start or other non-district settings. Link to code: <https://www.legis.iowa.gov/docs/code/284.15.pdf>
- <sup>27</sup> Iowa Code Section 284.6 requires that the school district have a PD plan that includes all teachers, including lead preschool teachers housed in public schools. The district PD plan should include not less than 36 hours of collaboration time, held outside of the minimum school day. For additional information regarding policies for district lead teachers: <https://www.legis.iowa.gov/DOCS/ACO/IC/LINC/Section.284.6.pdf>
- <sup>28</sup> Federal sources are unknown; however, they may be included in the in-kind support reported by grantees and therefore part of the reported local sources.
- <sup>29</sup> The line item in the state budget is titled Child Development and is part of the General Fund. It is an annual state appropriation that is contingent on the state legislature. Funds are allocated to the Child Development Coordinating Council for Iowa's Shared Visions Programs. The CDCC awards funding through a competitive grant process.
- <sup>30</sup> An evaluation study in 2017 collected baseline data on participating teachers, sites, and students. Evaluators from the University of Iowa's Center for Evaluation and Assessment collaborated with early childhood staff from the Department to conduct a program evaluation to identify the PD needs of the Shared Visions Preschool teachers, to evaluate the extent to which teachers are using TS GOLD according to the grant requirements, and to document how assessment data are used.
- <sup>31</sup> There are three checkpoints identified for TS GOLD: in the fall, winter and spring. However, the assessment is administered on an ongoing basis throughout the course of the year to be used for formative assessment and guide instruction.
- <sup>32</sup> State procedures for TS GOLD highly recommend that teaching staff complete the Interrater Reliability Certification (IRC) to support reliable use of TS GOLD. The state defines ways to utilize the assessment information and it is a local decision to determine other uses.
- <sup>33</sup> Kindergarten assessment requirements in Iowa are related to Early Literacy Implementation law (Iowa Code 279.68) and Iowa Code 279.60. State law requires all kindergarten through third grade students to be assessed at the beginning of the school year and intermittently throughout the year using a Department-approved, universal screening assessment. This is so districts may address additional supports needed to help children be proficient in literacy by the end of third grade. Most districts use FAST; however, districts may use any screener that is state approved for this grade level. Additionally, districts must provide periodic assessments of students who are persistently at risk in reading, and students who are at risk in reading, for the purpose of progress monitoring using a Department-approved progress monitoring assessment.
- <sup>34</sup> State law requires an approved literacy screening assessment for kindergartners so districts may address additional supports needed to help children be proficient in literacy by the end of 3rd grade. The state supports, and offers without cost, the use of FAST. Therefore, most districts use FAST; however, districts may use any screener that is Department-approved for this grade level.
- <sup>35</sup> All state-funded programs must meet NAEYC Accreditation Criteria and maintain accreditation status as required by Iowa law. This process requires a site visit and formal evaluation every five years, as well as ongoing observation, reflection, and feedback from administrators/supervisors. The state also coordinates support for classrooms to be received from the AEA's (regional supports) which includes classroom observations as often as determined necessary at the local level.
- <sup>36</sup> The state does not develop or require a specific classroom observation tool. Tools used will vary depending on the AEA and identified need/request of the local program. Many programs report use of ECERS and CLASS.
- <sup>37</sup> State policy requires the implementation of NAEYC program standards, which require teaching staff to receive ongoing reflection and feedback from their supervisors. Additionally, the AEA's must support Shared Visions Programs with program implementation and conduct classroom observations and offer support as determined necessary. The state coordinates communication, meetings, training for the AEA's in order to support consistent levels of support across programs.
- <sup>38</sup> Participation in QRIS is a local decision.
- <sup>39</sup> The Iowa DOE is working in collaboration with several state agencies and early childhood stakeholders, through a state-university partnership, to establish a governance structure to guide the design, development, and implementation of a statewide integrated administrative data system to enable policy-relevant analysis and evaluation to be conducted in support of Early Childhood Iowa (Iowa's Early Childhood Advisory Council or ECAC) to support a more coordinated, comprehensive system of early care and education.

## **IOWA - Iowa Statewide Voluntary Preschool Program (SWVPP)**

- <sup>1</sup> School districts may partner with Head Start and/or community-based preschools. The school district remains responsible for program and fiscal monitoring. Funds flow from the school district to community partners.
- <sup>2</sup> The total enrollment is an unduplicated count for the children enrolled in the Statewide Voluntary Preschool Program (SWVPP). These counts include all children served by the SWVPP, including students with IEPs. Not all of these children receive the .5 funding for SWVPP as some children are supported with special education funds or other sources of funding. Children may attend both Shared Visions and SWVPP for different portions of the day or different days of the week, allowing for a full-or extended day. Participation in a program may not be funded by both sources at the same time as supplanting of funds is not allowed. The total number of children who were served by SWVPP but not funded by SWVPP was 1510.
- <sup>3</sup> These counts include children with instructional IEPs and support only IEPs (OT, PT, and/or Speech-language therapy). A total of 339 children were on support-only IEPs (nine 3-year-olds; 325 4-year-olds; and five 5-year-olds) and 1,050 children were on instructional IEPs.
- <sup>4</sup> Funds may be braided using a full infusion model, where the participation of children in the same classroom is funded by different funding sources, including Head Start and SWVPP funding, or a flip-the-switch model, where full-day participation of children is funded part of the day by SWVPP funding and part of the day by Head Start or other funding (based on eligibility).
- <sup>5</sup> Children in the SWVPP may participate in both state-funded preschool and Head Start (dually enrolled); however, information about the ages and numbers of children dually enrolled is not collected systematically. Data collected should be considered an estimate based on interview with Head Start directors of Iowa grantees. Data are only available for 4-year-olds.
- <sup>6</sup> The number of children enrolled by location is based on data from Fall 2017 and should be considered an estimate. This information is not collected by the Department of Education, but by the school districts who report to the state. In order to provide an unduplicated count, the number underrepresents (in particular) children who participated in Head Start settings. Head Start classrooms are also located in public schools and private settings, but these children were not double counted.
- <sup>7</sup> Programs operate a minimum of 10 hours per week, and the average is about 15 hours per week. Although there is not a formal state partnership to provide extended-day services, partnerships with Head Start or otherwise may exist at the local level to provide school-day programming.

- <sup>8</sup> State funding is not provided based on a minimum number of hours annually. State funding is provided based on meeting SWVPP assurances, which include providing a minimum of 10 instructional hours weekly. An estimate is provided for minimum number of hours per year that may be offered based on a 180-day calendar year, accounting for five days to complete required home visits. Many programs offer more than the minimum required weekly hours.
- <sup>9</sup> During 2017-2018, children older and younger than 4 years of age could participate if space was available based on group size maximum requirements and SWVPP funds could be used to support their participation based on local school board decision to use its funds for this purpose. Alternatively, kindergarten age-eligible students could generate the full 1.0 funding if they were provided additional hours comparable with part-time kindergarten and are working on the Iowa Core in the pre-K classrooms.
- <sup>10</sup> All age-eligible Iowa children may enroll in any participating district. Enrollment is not dependent on the district of residence.
- <sup>11</sup> Many programs are only required to offer a snack based on the length of the program day, although it is recommended that they serve a meal. If the program operates more than 15 hours per week, a meal is usually served. The majority of programs provide lunch or breakfast to children who qualify for FRPL.
- <sup>12</sup> Record of physical exam within six weeks of enrollment is required based on program standards and criteria. The Iowa Department of Public Health Administrative Code requires that immunizations be current prior to enrollment. While program standards and criteria do not require dental screenings, the majority of programs either require this locally or engage in dental screening practices during the year. The required components of the physical exam would be specified by the program standards being implemented in each classroom (the Iowa Quality Preschool Program Standards, Head Start Program Standards, or accreditation by NAEYC). Program standards and criteria provide guidance for appropriate referral practices in the event that a child has a positive screen.
- <sup>13</sup> In general education classrooms, teachers must have an appropriate endorsement that includes early childhood special education. Alternatively, a properly licensed and endorsed teacher must be identified as responsible for special education services in that classroom, and collaborate with the general education teacher.
- <sup>14</sup> There were no changes for the 2017-2018 school year regarding policies to support DLLs. A required home language survey is sent home at the beginning of the school year. Information about enrolled children's program and performance must be presented to families in their home languages. Programs are required to screen and assess all children in their home language.
- <sup>15</sup> The Iowa Early Learning Standards (IELS) were recently revised and are now available, but were not available during the 2017-2018 school year: <https://educateiowa.gov/documents/early-childhood-standards/2018/07/iowa-early-learning-standards-3rd-edition>
- <sup>16</sup> Iowa Code 279.60 requires district-sponsored programs to administer TS GOLD.
- <sup>17</sup> The state offers guidance on criteria for selecting evidence-based curriculum models. Curriculum is locally determined but must be research or evidence-based and must align with the IELS. Programs may use grant funds to support curriculum implementation or training. Training for curricula adopted by programs is determined locally, and may be provided by the local program, intermediate agencies (e.g., Area Education Agencies (AEAs)), and/or vendors. Existing funds may be used to support PD of SWVPP staff in the area of curriculum. Additional funds are not provided specifically for this purpose.
- <sup>18</sup> All teachers in the SWVPP have a BA, an Iowa teaching license, and an early childhood endorsement. Appropriate endorsements in Iowa include Pre-K - 3rd Grade, including special education; Pre-K - K; and Pre-K - 3rd Grade. All lead teachers must hold one of these endorsements (and may have additional endorsements). A teacher who holds only an early childhood special education license is not appropriately licensed/endorsed. Required training varies based on the training required for the specific endorsements.
- <sup>19</sup> Assistant teacher requirements vary depending upon the overseeing agency. Some classrooms follow Iowa program standards, others NAEYC, and others Head Start. For Iowa standards, teacher assistants may choose the Iowa paraeducator certificate with early childhood or CDA. If they choose the Iowa paraeducator certificate they must enroll in the classes and complete them within a year. A paraeducator certificate is required in Title I schools. If the program operates under NAEYC, annual reports and onsite monitoring require evidence that 50% of assistant teachers have a CDA and the rest are working toward a CDA. NAEYC defines an equivalent to the CDA as 12 college credits in ECE fields.
- <sup>20</sup> State policy requires PD but does not specify hours. Guidance recommends that SWVPP teachers have 15 clock hours of PD each year. State policy and guidance does not specify a number of hours of PD annually required for teacher assistants, but does require that teacher assistants receive appropriate PD in ECE. Each staff member should have an individualized PD plan that is used to inform continuous PD.
- <sup>21</sup> Districts make PD available to non-district SWVPP teachers in the same manner it is offered to district personnel. Career development for school district preschool teachers shall be addressed in the school district's career development plan and implemented in accordance with Iowa Code section 284.6. The school district shall ensure that program staff members are provided appropriate staff development in ECE.
- <sup>22</sup> All teachers in the SWVPP have at minimum a BA, an Iowa teaching license, and an early childhood endorsement.
- <sup>23</sup> There are explicit salary requirements for state funded pre-K teachers in public schools, but benefits are determined locally. There is a minimum starting salary of \$33,500 for lead teachers in public settings. School districts determine the salary schedule for percent increases based on experience. There are no salary requirements for SWVPP teachers in Head Start or other community based settings. Link to code: <https://www.legis.iowa.gov/docs/code/284.15.pdf>
- <sup>24</sup> Iowa Code Section 284.6 requires that the school district have a PD plan that includes all teachers, including lead preschool teachers. The district PD plan should include not less than 36 hours of collaboration time, held outside of the minimum school day. Link: <https://www.legis.iowa.gov/DOCS/ACO/IC/LINC/Section.284.6.pdf>
- <sup>25</sup> Assistant teachers may have access to Iowa T.E.A.C.H grants (scholarships), but the state does not require this.
- <sup>26</sup> The preschool budget enrollment is equal to 50% of the actual enrollment of eligible students participating in the program. Preschool foundation aid is calculated by multiplying the district cost per pupil for the base year times the district's preschool budget enrollment. The revenue provided from the state comes from two primary sources: state foundation aid and property tax and is paid from the State's General Fund. There is a statewide Uniform Levy of \$5.40 per \$1,000 taxable valuation. State aid is added in an amount necessary to generate the state-supported foundation level of 87.5% of the state cost per pupil. The remaining 12.5% is generated through local property taxes ("additional levy"). References: Iowa Code section 256C.4, section 256C.5, and chapter 257.
- <sup>27</sup> Funding flows directly to public schools. Public schools may subcontract 95% of the per-child allocation to Head Start, private preschool/child care centers and/or accredited nonpublic schools. The state does not support religious instruction during the 10 hours per week.
- <sup>28</sup> The primary purpose will be to track the progress of students served by the preschool program and the students' performance in elementary and secondary education (including students with IEPs) based on state code requirements for this preschool program. It is anticipated that the evaluation will be conducted during the 2018-2019 school year, an MOU is in process with an institute of higher education in Iowa.
- <sup>29</sup> The frequency of TS GOLD in the SWVPP would be based on Iowa Code 279.60 and based on state procedures for administration: <https://educateiowa.gov/documents/shared-visions-parent-support-and-preschool-programs/2018/07/iowa-gold-online-procedures>
- <sup>30</sup> TS GOLD is required and myIGDIs are optional. Documentation for science and technology, social studies, and the arts objectives in TS GOLD is not required.
- <sup>31</sup> State procedures for TS GOLD is highly recommend that teaching staff complete the Interrater Reliability Certification (IRC) to support reliable use of TS GOLD.
- <sup>32</sup> Kindergarten assessment requirements in Iowa are related to Early Literacy Implementation law (Iowa Code 279.68) and Iowa Code 279.60.
- <sup>33</sup> State law requires an approved literacy screening assessment by October 1 for kindergartners so districts may address additional supports needed to help children be proficient in literacy by the end of third grade. Most districts use FAST (Formative Assessment System for Teachers); however, districts may use any screener that is Department-approved for this grade level.
- <sup>34</sup> All SWVPP classrooms are required to implement a set of program standards approved by the Iowa Department of Education: the Iowa Quality Preschool Program Standards, NAEYC Accreditation Standards and Criteria, or Head Start Program Performance Standards. Review of classroom quality and safety requirements are included in onsite monitoring and visits based on the selected program standards (and tools for supporting review for implementation of the selected program standards). Facilities that are DHS licensed are also monitored by DHS licensing consultants. QRIS participation in Iowa is voluntary, but those that participate in QRIS would use QRIS processes and associated tools for monitoring.
- <sup>35</sup> All AEA and state staff who conduct classroom observations are trained on the Iowa Quality Preschool Program Standards. Local monitoring for classrooms following Head Start Program Performance Standards would be performed based on staff trained to monitor implementation of HSPPS and based on Head Start requirements for other measures of classroom quality. Those accredited by NAEYC are monitored based on NAEYC accreditation processes, based on individuals trained on the current NAEYC accreditation process. Programs that also participate in the QRIS would have ratings based on individuals trained to monitor based on this state's QRIS system and processes.
- <sup>36</sup> QRIS levels are currently reviewed every 2 years.

- <sup>37</sup> Classrooms in districts (and their community partners) that are newly implementing the SWVPP are visited in their second year of implementation by the Iowa Department of Education. In addition, districts that are newly implementing the Iowa Quality Preschool Program Standards receive onsite visits in their second year of implementation. Programs also receive visits at least each year by AEA staff. Programs that are NAEYC accredited or following Head Start Program Performance Standards have onsite visits based on the visit schedules of NAEYC and based on local and federal Head Start monitoring. Programs may elect to be NAEYC accredited, follow Head Start Program Performance Standards, or the Iowa Quality Preschool Program Standards, but must follow one of these three program standards.
- <sup>38</sup> The Iowa DOE is working in collaboration with several state agencies and early childhood stakeholders to establish a governance structure to guide the design, development, and implementation of a statewide integrated administrative data system to enable policy-relevant analysis and evaluation to be conducted in support of Early Childhood Iowa (Iowa's Early Childhood Advisory Council or ECAC) to support a more coordinated, comprehensive system of early care and education.

## **KANSAS - Kansas Preschool Pilot**

- <sup>1</sup> In 2017-2018, this program was funded by TANF; the Kansas Department for Children and Families (KDCCF) is the lead agency for TANF in Kansas.
- <sup>3</sup> Funding for the Kansas Preschool Pilot (KPP) is limited. Twelve KPP sites have received funding since the program's establishment. In the 2017-2018 school year, the Kansas Department of Education (KSDE) sought to significantly restructure the program to align with the State Pre-K 4-Year-Old At-Risk Program. In addition to funding the 12 KPP sites, KSDE used TANF KPP funds to supplement the Kansas State Pre-K 4-Year-Old At-Risk Program and fund additional slots.
- <sup>3</sup> The KPP funds programs, not slots. Data reported is estimated based on program reports of children completing the KELI-4 assessment.
- <sup>4</sup> The KPP grant cycle is based on the academic year, but schools determine the actual operating schedule.
- <sup>5</sup> At least 50% of the children enrolled must meet one of the following risk factors: (1) Qualifies for Free or Reduced lunch program, or family income is below 185% of the FPL; (2) Single parent families; (3) KDCCF referral; (4) Teen parent(s); (5) Either parent is lacking a high school diploma or GED at the time of enrollment; (6) Limited English Proficiency; (7) Lower than expected developmental progress in at least one of the following areas: cognitive development; physical development; communication/literacy; social-emotional/behavior; adaptive behavior/self-help skills; (8) Child qualifying for migrant status.
- <sup>6</sup> School districts are audited annually according to the student count reported September 20th. Audit determines whether students do in fact meet at-risk criteria.
- <sup>7</sup> For classes with 21 to 25 students, a third teacher must be added. This additional teacher can be an assistant teacher.
- <sup>8</sup> Limited English Proficiency may qualify a child as "at-risk" and eligible for the program. English for Speakers of Other Languages (ESOL) services must be provided by qualified teachers. Guidance may be found at: <https://www.ksde.org/Portals/0/Title/ESOL/ESOLProgramGuidance.pdf>
- <sup>9</sup> KSDE publishes the results on our Public Report Card for the state, district, and school. KSDE provides technical assistance to any building and/or district that has 30% or more of their student population as chronically absent. Any school or district between 15%-29% receives a phone call to give support and have a conversation around their data.
- <sup>10</sup> Kansas has a toolkit to accompany its Early Learning Standards (KELS), available at [kskits.org/kels-toolkit](http://kskits.org/kels-toolkit)
- <sup>11</sup> The state-level approval occurs during the RFP application review and approval process. Preschool programs are required to implement an evidence-based preschool curriculum that includes literacy, math, and social-emotional components. These curricula must be approved by KSDE and align to the KELS. Assurances require programs to implement an evidence-based curriculum aligned with the KELS.
- <sup>12</sup> All school districts can access the Kansas Technical Assistance Support Network (TASN, see <https://www.ksdetasn.org/>) to support school districts' systematic implementation of evidence-based practices. Select school districts choose to participate in the Kansas Multi-Tier System of Supports, which includes state trainers who specialize in early childhood.
- <sup>13</sup> Preschool teaching staff must have a current teacher license and must have, at minimum, a current Elementary Education license. A Kansas license in ECE is recommended. KSDE encourages school districts to hire teachers who have one of the following: Early Childhood Unified, Birth to Grade 3 license (ECU); Childhood Unified, Birth to Kindergarten license (ECU); ECE license (EC); Early Childhood Handicapped (ECH) license; or Early Childhood endorsement with a license in Elementary Education. Other accepted qualifications for teachers include Elementary Education, K-6 or K-9.
- <sup>14</sup> A CDA is encouraged.
- <sup>15</sup> Teachers and assistant teachers/paraprofessionals/teacher aides must participate in at least 15 hours of in-service training annually. PD should address the curriculum model in use as well as other developmentally appropriate topics of early childhood learning. Examples include training through TASN, Kansas Child Care Training Opportunities (KCCTO).
- <sup>16</sup> Beginning in 2018-2019, KPP was funded by both TANF and the Children's Initiatives Fund (state tobacco settlement dollars).
- <sup>17</sup> KSA 72-67, 115 authorizes the board of education of any school district to enter into cooperative or interlocal agreements with one or more other boards for the establishment, operation, and maintenance of a preschool program, and authorizes any board to contract with private, nonprofit corporations or associations or with any public or private agency or institution, whether located within or outside the state, for the establishment, operation, and maintenance of a preschool program.
- <sup>18</sup> Assurances require programs to ensure each child receives a developmental screening at least once during the program year. The RFP application and review process requires programs to describe progress monitoring and assessment tools that will be used to determine the need for tiered interventions, as well as tools to assess the classroom environment (e.g. Inclusive Classroom Profile (ICP), Parenting Interactions with Children: Checklist of Observations Linked to Outcomes (PICCOLO), Teaching Pyramid Observation Tool (TPOT), Preschool-Wide Evaluation Tool (PreSET), CLASS, Prevent, Teach, Reinforce, myIGDIs. KSDE staff review these answers and work with programs to ensure appropriate monitoring and assessment tools are in place.
- <sup>19</sup> Programs are required to implement valid, reliable and appropriate assessment(s) aligned with the program's standards; this is included in signed assurances. Preschool grantees are required to implement an evidence-based preschool curriculum that includes literacy, math, and social-emotional components. These curricula must be approved by KSDE and align to the KELS.
- <sup>20</sup> Beginning in 2018-2019, all Kansas kindergarten programs are required to administer the ASQ-3 and ASQ-SE2 at the beginning of a child's kindergarten year.
- <sup>21</sup> KDCCF is piloting Links to Quality, a state QRIS system, in 2018. This system currently serves licensed child care, but not public preschools.
- <sup>22</sup> State agencies are engaged in active discussions regarding an ECIDS and plans to further this work in 2019 as a part of the PDG. There are no plans to create an ECIDS at this time.

## **KANSAS - Kansas State Pre-K 4-Year-Old At-Risk Program**

- <sup>1</sup> Any district may choose to apply for funding, though limited number of slots are available statewide.
- <sup>2</sup> The request for demographic data reported 2,452 children as Hispanic at 456 as other races. Those are combined in the other races category here. Data provided matches totals reported in the state longitudinal data system, which are slightly higher than the total actual program enrollment of 7,264.
- <sup>3</sup> Programs are required to operate for at least 465 hours during the school year. All children, regardless of morning or afternoon session, must have access to equal instructional time. Grantees are asked to describe the proposed schedule such as the number of hours per day and any plans to expand the hours, but this information is not systematically gathered.
- <sup>4</sup> Children must meet one of the following risk factors: (1) Qualifies for Free lunch program, or family income is below 130% of the FPL; (2) Single parent families; (3) Kansas Department for Children and Families (KDCCF) referral; (4) Teen parent(s); (5) Either parent is lacking a high school diploma or GED at the time of enrollment; (6) Limited English Proficiency; (7) Lower than expected developmental progress in at least one of the following areas: cognitive development; physical development; communication/literacy; social-emotional/behavior; adaptive behavior/self-help skills; (8) Child qualifying for migrant status.
- <sup>5</sup> School districts are audited annually according to the student counts reported September 20th. Audit determines whether students do in fact meet at-risk criteria.
- <sup>6</sup> For classes with 21 to 25 students, a third teacher must be added. This additional teacher can be an assistant teacher.
- <sup>7</sup> Grantees are asked to describe locally developed plans specifically for the transition process, and for linking families to community resources. Mandated reporting is required by law.

- <sup>8</sup> Preschool grantees must provide an inclusive environment. Special Education teams are required by IDEA to consider the Least Restrictive Environment (LRE) when making placement decisions for children with disabilities with an Individual Education Program (IEP). Children who are DLL and English Learners, from migrant worker families, and from families who are currently homeless should also be included in the Preschool Grant classroom.
- <sup>9</sup> Limited English Proficiency may qualify a child as “at-risk” and eligible for the program. English for Speakers of Other Languages (ESOL) services must be provided by qualified teachers. Guidance may be found at: <https://www.ksde.org/Portals/0/Title/ESOL/ESOLProgramGuidance.pdf>
- <sup>10</sup> KSDE publishes the results on our Public Report Card for the state, district, and school. KSDE provides technical assistance to any building and/or district that has 30% or more of their student population as chronically absent. Any school or district between 15%-29% receives a phone call to give support and have a conversation around their data.
- <sup>11</sup> Kansas has a toolkit to accompany its Early Learning Standards (KELS), available at [kskits.org/kels-toolkit](http://kskits.org/kels-toolkit)
- <sup>12</sup> The state-level approval occurs during the RFP application review and approval process. Preschool programs are required to implement an evidence-based preschool curriculum that includes literacy, math, and social-emotional components. These curricula must be approved by KSDE and align to the KELS. Assurances require programs to implement an evidence-based curriculum aligned with the KELS.
- <sup>13</sup> All school districts can access the Kansas Technical Assistance Support Network (TASN, see <https://www.ksdetasn.org/>) to support school districts’ systematic implementation of evidence-based practices. Select school districts choose to participate in the Kansas Multi-Tier System of Supports, which includes state trainers who specialize in early childhood.
- <sup>14</sup> Preschool teaching staff for must have a current teacher license and must have, at minimum, a current Elementary Education license. A Kansas license in ECE is recommended. KSDE encourages school districts to hire teachers who have one of the following: Early Childhood Unified, Birth to Grade 3 license (ECU); Childhood Unified, Birth to Kindergarten license (ECU); Early Childhood Education license (EC); Early Childhood Handicapped (ECH) license; or Early Childhood endorsement with a license in Elementary Education. Other accepted qualifications for teachers include Elementary Education, K-6 or K-9.
- <sup>15</sup> A CDA is encouraged.
- <sup>16</sup> Teachers and assistant teachers/paraprofessionals/teacher aides must participate in at least 15 hours of in-service training annually. PD should address the curriculum model in use as well as other developmentally appropriate topics of early childhood learning. Examples include training through TASN, Kansas Child Care Training Opportunities (KCCTO).
- <sup>17</sup> Programs are encouraged to utilize other federal funding sources, including CACFP, IDEA, McKinney-Vento, and Head Start, as they build their overall program. The state Four-Year-Old At-Risk funding is one funding stream that supports that work. These decisions are made at the local level, and are not tied to the overall state Four-Year-Old At-Risk program.
- <sup>18</sup> Kansas has a set amount of preschool slots available for each school year. Each Four-Year-Old At-Risk slot is worth 0.5 Full-Time Enrollment (FTE) of the base aid per pupil, and then can trigger additional weightings (for example: weighted enrollments for declining enrollment, high-density at-risk students, bilingual, low enrollment, high enrollment, transportation).
- <sup>19</sup> KSA 72-67, 115 authorizes the board of education of any school district to enter into cooperative or interlocal agreements with one or more other boards for the establishment, operation, and maintenance of a preschool program, and authorizes any board to contract with private, nonprofit corporations or associations or with any public or private agency or institution, whether located within or outside the state, for the establishment, operation, and maintenance of a preschool program.
- <sup>20</sup> Assurances require programs to ensure each child receives a developmental screening at least once during the program year. The RFP application and review process requires programs to describe progress monitoring and assessment tools that will be used to determine the need for tiered interventions, as well as tools to assess the classroom environment (e.g. Inclusive Classroom Profile (ICP), Parenting Interactions with Children: Checklist of Observations Linked to Outcomes (PICCOLO), Teaching Pyramid Observation Tool (TPOT), Preschool-Wide Evaluation Tool (PreSET), CLASS, Prevent, Teach, Reinforce, myIGDIs. KSDE staff review these answers and work with programs to ensure appropriate monitoring and assessment tools are in place.
- <sup>21</sup> Programs are required to implement valid, reliable and appropriate assessment(s) aligned with the program’s standards; this is included in signed assurances. Programs are required to implement an evidence-based preschool curriculum that includes literacy, math, and social-emotional components. These curricula must be approved by KSDE and align to the KELS.
- <sup>22</sup> Beginning in 2018-2019, all Kansas kindergarten programs are required to administer the ASQ-3 and ASQ-SE2 at the beginning of a child’s kindergarten year.
- <sup>23</sup> KDCf is piloting Links to Quality, a state QRIS system, in 2018. This system currently serves licensed child care, but not public preschools.
- <sup>24</sup> State agencies are engaged in active discussions regarding an ECIDS and plans to further this work in 2019 as a part of the PDG. There are no plans to create an ECIDS at this time.

## **KENTUCKY - Kentucky Preschool Program (KPP)**

- <sup>1</sup> Beginning in 2017-2018, KDE included preschool students enrolled at the Kentucky School for the Deaf in total enrollments.
- <sup>2</sup> Children dually enrolled in preschool and Head Start are served using funds from both programs and are identified as Head Start Enhanced. Each year school districts and Head Start programs enter into full utilization agreements to coordinate services to eligible children and to avoid duplication of preschool services and supplanting of federal funds and to maximize the use of Head Start funds to serve as many 4-year-old children as possible. Only four-year-old students identified for enhanced Head Start services may be dually enrolled in state-funded preschool and Head Start.
- <sup>3</sup> Differences between the enrollment breakdowns by race and ethnicity and the total enrollment reported previously are due to differences in reporting mechanisms and collecting data at different points in time.
- <sup>4</sup> The Kentucky Preschool Program (KPP) is required to serve children for at least 2.5 hours per day plus a meal which usually totals at least three hours. In 2017-2018, there were 661 full-day programs, 497 half-day programs, and 3 programs delegating services to Head Start. Statewide, through these programs, there were 497 half-day sessions and 661 full-day sessions offered.
- <sup>5</sup> Kentucky has an initiative to incentivize public-private partnerships to provide full-day, high-quality early childhood services to child care assistance program (CCAP) eligible preschool children.
- <sup>6</sup> The standard program operation is four to five days per week. Other schedules must be approved by the Kentucky Board of Education. Districts may use one of the weekdays for home visits, parent education, special education evaluations, and other work related to providing comprehensive preschool services.
- <sup>7</sup> The preschool program is required to follow the school year. However, because of the comprehensive nature of the program, school districts are permitted to begin preschool classroom instruction later in the school year and end instruction earlier in the school year to ensure full implementation, including screenings, special education meetings, home visits and family education services.
- <sup>8</sup> Kindergarten children with disabilities may attend the preschool program under limited circumstances. The Admissions and Release Committee (ARC) decides the best placement for children with special needs. If the best placement option for a five-year-old child with disabilities is the preschool program, and space is available in the program, the child is placed in preschool but identified as a first-year primary student (kindergarten). No preschool funds may be used to support this child. In addition, non-age-eligible children may enroll if space is available.
- <sup>9</sup> Four-year-old children whose family income is up to 160% FPL are eligible to attend the preschool program. Three-year-old children with disabilities requiring specially designed instruction enroll on their third birthday, when transitioning from Part C to Part B services, or when they are determined eligible for special education services. Eligibility based on homelessness and foster care applies to 4-year-olds. Homeless children are categorically eligible as free-lunch eligible.
- <sup>10</sup> If space is available, districts may charge tuition to non-eligible children. Some districts offer a sliding scale payment which is based on annual gross income and family size. Tuition children are not counted in enrollment figures as they are ineligible for KPP funding.
- <sup>11</sup> The school districts are required to serve breakfast or lunch for a half-day program. Full-day programs serve both breakfast and lunch.
- <sup>12</sup> A vision exam is required by January 1 of the year of enrollment by a qualified specialist. Districts are required to contact parents/legal guardians if any screening results indicate a need for further assessment by a specialist, follow-up, or referral for special education and related services or other appropriate resources. Information about preventative health exams is available on KDE’s website: <https://education.ky.gov/districts/SHS/Pages/Health-Forms.aspx>

- <sup>13</sup> Two home visits are required each year. Also, the preschool program has access to Family Resource Centers (FRCs) for support services and referrals. For districts that blend with Head Start, additional services may be available to state-funded students.
- <sup>14</sup> KDE has taken steps to increase support for school districts serving DLLs. In 2017, KDE partnered with WIDA Early Learning in Wisconsin to provide school districts with a pre-conference session during the 2017 Early Childhood Institute. The session focused on language development and language-focused family engagement. In the fall of 2018, KDE formed a preschool English Learner work group to evaluate needs and develop preschool resources for school districts.
- <sup>15</sup> The process to calculate chronic absenteeism data is available here: [https://education.ky.gov/districts/tech/sis/Documents/IC\\_CustomRpt\\_Chronic\\_Absenteeism.pdf](https://education.ky.gov/districts/tech/sis/Documents/IC_CustomRpt_Chronic_Absenteeism.pdf)
- <sup>16</sup> Beginning in 2018-19, KDE will require all districts to report preschool attendance through Infinite Campus.
- <sup>17</sup> The Governor's Office of Early Childhood may revise the standards in the future, including realignment to the Head Start Early Learning Outcomes Framework.
- <sup>18</sup> Kentucky uses RTT-ELC grant funding to support implementation of early childhood standards. The Early Learning Leadership Networks (ELLNs) provided leadership, service and support to school districts with implementation of assessments and standards, focusing on math, English Language Arts, and science standards.
- <sup>19</sup> Based on a list of recommendations in the Kentucky Continuous Assessment Guide for classroom/instructional assessments, KDE has approved five assessments for preschool programs: (1) AEPS; (2) Carolina Curriculum for (Infants/Toddlers/Preschoolers) with Special Needs; (3) TS GOLD; (4) COR Advantage; and, (5) WSS. Most programs have selected and implemented TS GOLD.
- <sup>20</sup> KDE and regional training centers (RTCs) provide leadership, service and support to school districts to ensure curricula and assessment are implemented with fidelity.
- <sup>21</sup> Decisions about curricula are made locally by school districts. However, curricula must be developmentally appropriate, relevant to and reflective of students needs, and integrate a variety of skills into activities that are targeted toward the interests of children. Support for making decisions about curriculum is provided to districts by KDE and RTCs.
- <sup>22</sup> The Interdisciplinary Early Childhood Education (IECE) certification, birth to primary (kindergarten), is the unified special and general education certification for Kentucky early childhood teachers. When state-funded preschool and Head Start classrooms are blended, the higher standard applies, thus the lead teacher must have IECE certification even if the teacher is employed by Head Start.
- <sup>23</sup> In Title I schools, assistant teachers must complete two years of higher education, hold an Associate's degree or achieve an acceptable score on the Kentucky Paraeducator Assessment (KPA). Kentucky is still reviewing the possibility of recognizing the CDA as equivalent to the KPA for Title I qualification. All preschool assistant teachers are required to have 18 clock hours of training each year.
- <sup>24</sup> Classroom embedded support is determined locally for assistant teachers and non-certified lead teachers. Kentucky follows the Danielson Framework in promoting teacher professional growth and development, for more information about Kentucky's Professional Growth and Effectiveness System (PGES) see: <http://education.ky.gov/TEACHERS/PGES/Pages/PGES.aspx>; and the Preschool PGES guidance: <http://education.ky.gov/teachers/PGES/TPGES/Documents/TPGES%20Guidance%20for%20Preschool.pdf>
- <sup>25</sup> Out of a total of 1,147 lead teachers, 906 (79%) had the IECE certification, 82 (7%) were emergency/other and/or probationary IECE certified teachers, 88 (8%) lead teachers had letters of exemption, and 71 (6%) were preschool associate teachers.
- <sup>26</sup> In state-funded preschool, there is parity between preschool teacher and K-3 teacher salaries. KDE supports but does not require salary parity for lead preschool teachers who do not teach in public schools. More information about district salaries is available here: <https://education.ky.gov/districts/FinRept/Pages/School%20District%20Personnel%20Information.aspx>
- <sup>27</sup> Kentucky's RTCs may provide mentoring and coaching opportunities to teachers and assistant teachers as needed. Scholarships are available through Kentucky Higher Education Assistance Authority (KHEAA): <https://www.kheaa.com/website/kheaa/ecds?main=1>
- <sup>28</sup> In 2017-2018, the state allocation for state-funded preschool was \$90,113,200. However, school districts have the ability to move other state funds into preschool, therefore the overall expenditure may exceed the basic allocation any given year. From this amount, \$7.5 million was used to develop a grant program to incentivize public private partnerships between school districts and child care providers. The line item appeared in the 2016 budget bill (House Bill 303 can be searched for here: <https://legislature.ky.gov/Pages/index.aspx>).
- <sup>29</sup> During the 2016-2017 school year, Kentucky reported Federal funding from IDEA, USDA CACFP, Title I, Head Start, Race to the Top Early Learning Challenge Grant, Title II and IV.
- <sup>30</sup> State funds are appropriated to school districts through a non-competitive allotment system approved by the Kentucky Board of Education. This typically represents the highest portion of funding districts spend on preschool. However, most districts use local funds to support the program. The state-funded preschool formula is based on the average number of eligible children served on December 1 and March 1 of the prior academic year. The final award amount is achieved by multiplying the per-child rates for each eligibility category (e.g., at-risk, speech, developmental delay, severe) by the average number of students per category.
- <sup>31</sup> With funding in House Bill 303, KDE partnered with early childhood shareholders to develop a new grant program to incentivize cooperative public/private partnerships between public school districts and child care providers to develop full-day, high-quality programs for at-risk children. The grant is intended to increase the number of Child Care Assistance Program (CCAP) eligible preschool children served in high-quality, full-day settings. High-quality means participation in Kentucky All STARS. Full-day means at least 6 hours of operation 4 or 5 days per week.
- <sup>32</sup> In November 2016, the Education Assessment and Accountability Review Subcommittee approved OEA to study the state's preschool and kindergarten programs. The study was intended to analyze funding, enrollment, characteristics and outcomes of preschool and kindergarten programs at the state and district levels, including the number of districts that are implementing full-day kindergarten. The study offered 15 recommendations for improvement, including further study to better meet the needs of Limited English Proficiency students and steps to comprehensively evaluate the preschool program once every five years beginning in 2020. Also, the study stated that FRPL students and students with an IEP who enroll in preschool are more likely to test ready for kindergarten than their FRPL and IEP peers who do not enroll in preschool.
- <sup>33</sup> Assessments are required once in the fall (August 1 to October 1) and once in the spring (March 1 to May 1). A winter assessment is limited to students enrolling mid-term or whose assessment data were not available.
- <sup>34</sup> Districts may choose one of five approved assessment tools for preschool: the AEPS, Carolina Curriculum, TS GOLD, COR Advantage (High/Scope), and WSS. Kentucky's choice of preschool assessments was developed with input from early childhood experts, and results are used in reporting children's progress towards meeting the Kentucky Early Childhood Standards and the Office of Special Education Program (OSEP) Child Outcomes. More about Kentucky's preschool assessments is available here: <https://www.kedsonline.org/preschoolhome.aspx>
- <sup>35</sup> Schools must administer the Brigance K Screen to all students upon kindergarten entry and assess K-3 students in reading and math each year. K-3 formative assessment choices are locally determined.
- <sup>36</sup> In the spring of 2018, staff in two RTCs achieved anchor status with the Environment Rating Scales Institute (ERSI). These staff trained other staff in all five regions, ensuring Kentucky has a core of reliable assessors to evaluate preschool classroom quality. In addition, Kentucky established cross-agency reliability between state-funded preschool, Head Start and child care.
- <sup>37</sup> Teachers receive feedback the year in which they receive an ECERS-3 evaluation.
- <sup>38</sup> More about Kentucky All STARS is available here: <https://kentuckyallstars.ky.gov/Pages/index.aspx>
- <sup>39</sup> Beginning in 2018-2019, Kentucky will replace the Preschool Program Review (P2R) with the Kentucky Preschool Evaluation System (KPES), meaning classrooms and programs will be evaluated once every three years during a six-year cycle.
- <sup>40</sup> Kentucky has developed an early childhood profile for every county and the state, using data from most early childhood providers. The data are available through the Kentucky Center for Statistics.

## LOUISIANA - Louisiana 8(g) Student Enhancement Block Grant Program

- <sup>1</sup> Districts receive an allocation based on the October 1 count from the previous year and they determine whether to use the funds for the High Quality Early Childhood/Pre-K focus area. In FY 2017-2018, 5 districts did not use their allocation for the High Quality Early Childhood/Pre-K focus area.
- <sup>2</sup> Effective August 20, 2018, eligibility for this program was increased to 200% FPL. Prior to August 20, 2018, eligibility was based on 185% FPL, but free and reduced-

- priced lunch (FRPL) eligibility was not used as an automatic qualifier as income still had to be verified.
- 3 Many schools offer before- and after-school programs, but the state does not track or subsidize this activity.
  - 4 Priority is given to students who qualify for FRPL. However, if all income-eligible children are otherwise served, additional students may also be served if they are screened and deemed "developmentally unprepared." After this, a decision could be made locally to serve a student with one of the aforementioned risk factors.
  - 3 Some districts may charge tuition for any child who does not meet eligibility requirements (at or below 185% FPL). Tuition will be no more than the average amount expended per pupil on those children from whom no tuition may be required, excluding any amount attributable to the provision of classroom space and utility costs.
  - 6 All meals and snacks must meet USDA/CACFP guidelines.
  - 7 This program strongly encourages vision and hearing screenings. Other screenings are determined locally.
  - 8 Since most districts and other early childhood programs require these services, 8(g) students benefit from them. However, 8(g) doesn't formally require that these services must be offered but they are strongly encouraged.
  - 9 Collaborative sessions are conducted several times a year to support programs in implementation of assessment, observations, and utilizing the ELDS.
  - 10 Providers are required to assess children using TS GOLD or they may submit a request to use an alternative assessment, which must be approved by the state.
  - 11 In Louisiana, all districts can purchase instructional materials that are best for their local communities. The Louisiana Department of Education (LDE) led an online review of instructional materials to determine the degree of alignment with state content standards to support districts with these decisions. Effective the 2017-2018 school year, state funded pre-K programs are required to use a Tier I curriculum in their publicly funded classrooms.
  - 12 Detailed guidance and materials developed by the state are made available to providers. Direct training or technical assistance is conducted by state and regional staff. A system of regular coaching is implemented locally as well as funding provided for local agencies or providers to conduct training and offer/identify other PD opportunities.
  - 13 Effective June 1, 2002, Louisiana issued a Pre-K-3 license, instead of standalone Nursery School and Kindergarten licenses. A teacher with an elementary certification may be employed while working toward an approved early childhood certification within a maximum of three years.
  - 14 All paraprofessionals/teacher assistants must meet LEA specific requirements for employment and one of the following requirements: (1) meet the definition of "highly qualified," which may include passing of the ParaPro test or achievement of a CDA or AA credential, (2) possess a high school diploma or equivalent, (3) have extended experiences of assuming responsibility and care for a group of preschool-age children (children younger than five years of age), or (4) possess proficient oral and written communication skills.
  - 15 While most districts provide ongoing classroom-embedded support, there is no state policy that requires it.
  - 16 All teachers have a BA or higher.
  - 17 The Board of Elementary and Secondary Education allocated \$9,580,003 to local education agencies for the FY 2017-2018 8(g) Student Enhancement Block Grant Program. A total of \$9,092,619 was allocated for high-quality early childhood programs. Districts received a base amount of \$55,000 and \$8.80 per pupil amount. In addition, funds (\$275,000) were allocated to the LDE to administer the 8(g) Statewide Early Childhood Care and Education Network Expansion Program.
  - 18 This is managed locally.
  - 19 Each LEA requires that every child entering kindergarten for the first time be given a nationally recognized readiness screening. The results of this screening are used in placement and for planning instruction. The pupil progression plan for each LEA includes criterion for placement.
  - 20 The state may not require site visits but a regular monitoring cycle of site visits for 20 programs per year has been in effect since the 2013-2014 year. These evaluations and site visits are conducted by independent program evaluators employed by the oversight agency. In the interim years, programs will be visited by BESE staff to monitor progress.

#### **LOUISIANA - Louisiana Cecil J. Picard LA 4 Early Childhood Program (LA 4)**

- 1 A total of 64 out of 70 geographic school districts, 38 charter schools, and one tribal school received allocations for the LA 4 program during the 2017-2018 school year. Any LA 4 provider not under the school district's jurisdiction operates as its own independent district. This results in a total of 103 LA 4 participating districts.
- 2 Districts are not required to offer the program and, due to limited funds, programs must apply for funding. Priority is given to programs with previous history in the program.
- 3 Effective August 20, 2018, eligibility for this program was increased to 200% FPL. Prior to August 20, 2018, eligibility was based on 185% FPL, but free and reduced-priced lunch (FRPL) eligibility was not used as an automatic qualifier as income still had to be verified.
- 4 Many schools offer before- and after-school programs, but the state does not track or subsidize this activity.
- 5 Tuition may be charged for any child who does not meet eligibility requirements (at or below 185% FPL). The sliding tuition will be no more than the average amount expended per pupil on those children from whom no tuition may be required, excluding any amount attributable to the provision of classroom space and utility costs.
- 6 Schools are required to report twice a year who conducts screenings and when they are conducted. Screenings that are not required are strongly encouraged and determined at the local level.
- 7 LA 4-funded children are required to be present for 74% of the scheduled school days each month, though this is not state policy or statute, only a program requirement.
- 8 Collaborative sessions are conducted several times a year to support programs in implementation of assessment, observations, and utilizing the ELDS.
- 9 Providers are required to assess children using TS GOLD in October, February, and May. They may submit a request to use an alternative assessment, which must be approved by the state.
- 10 In Louisiana, all districts can purchase instructional materials that are best for their local communities. The Louisiana Department of Education (LDE) led an online review of instructional materials to determine the degree of alignment with state content standards to support districts with these decisions. Effective the 2017-2018 school year, state funded pre-K programs are required to use a Tier I curriculum in their publicly funded classrooms.
- 11 Detailed guidance and materials developed by the state are made available to providers. Direct training or technical assistance is conducted by state and regional staff. A system of regular coaching is implemented locally as well as funding provided for local agencies or providers to conduct training and offer/identify other PD opportunities.
- 12 For mixed-delivery LA 4 programs housed in child care centers, teachers must meet the same qualifications as those in public school settings. A teacher with an elementary certification may be employed while working toward an approved early childhood certification within a maximum of three years. Effective June 2002, Louisiana issued a Pre-K-3 license instead of stand-alone Nursery School and Kindergarten licenses.
- 13 All paraprofessionals/teacher assistants must meet LEA specific requirements for employment and one of the following requirements: (1) meet the definition of "highly qualified," which may include passing of the ParaPro test or achievement of a CDA or AA credential, (2) possess a high school diploma or equivalent, (3) have extended experiences of assuming responsibility and care for a group of preschool-age children (children younger than five years of age), or (4) possess proficient oral and written communication skills.
- 14 While most districts provide ongoing classroom-embedded support, there is no state policy that requires it.
- 15 100% of teachers have a BA or higher.
- 16 Coaching and mentoring are available through certification requirements, but not through LA 4.
- 17 LDE determines the per-pupil allocation annually based on number of available slots. Allocations are based on a per-pupil formula. Non-required local contributions are not determined or allocated by the state; instead, they are funds that may vary annually to support local community programs. Districts must agree to maintain, in each year of participation in LA 4, the same total level of funding from any source for programs or classes of early childhood education or child care provided in the year prior to participation in LA 4, therefore the local amount is an average as it varies from district to district.
- 18 This is managed locally.

<sup>19</sup> K-3 Literacy Screening Assessments are also used. These are district selected and LDOE approved.

### **LOUISIANA - Louisiana Nonpublic Schools Early Childhood Development Program (NSECD)**

- <sup>1</sup> Seats are awarded to programs through the Early Childhood Community Network Coordinated Funding Request. Inclusion in this request for the NSECD Program is open to all state-approved nonpublic schools and quality-rated child care centers statewide. Due to funding limitations, the Department prioritizes slot allocation to schools and centers located in parishes found to be in greatest need based upon the Early Childhood Risk and Reach Report. Not all parishes have representation in the application process.
- <sup>2</sup> Effective August 20, 2018, eligibility for this program was increased to 200% FPL. Prior to August 20, 2018, eligibility was based on 185% FPL, but free and reduced-qualified lunch (FRPL) eligibility was not used as an automatic qualifier as income still had to be verified.
- <sup>3</sup> Many schools offer before- and after-school programs, but the state does not track or subsidize this activity.
- <sup>4</sup> Nonpublic schools determine their own tuition rates for children who do not meet the program's eligibility requirements.
- <sup>5</sup> Other than those indicated, screenings are not required, but are strongly encouraged and determined at the local level.
- <sup>6</sup> NSECD-funded children are required to be present for 74% of the scheduled school days each month, though this is not state policy or statute, only a program requirement.
- <sup>7</sup> Collaborative sessions are conducted several times a year to support programs in implementation of assessment, observations, and utilizing the ELDS.
- <sup>8</sup> Providers are required to assess children using TS GOLD in October, February, and May. They may submit a request to use an alternative assessment, which must be approved by the state.
- <sup>9</sup> In Louisiana, all districts can purchase instructional materials that are best for their local communities. The Louisiana Department of Education (LDE) led an online review of instructional materials to determine the degree of alignment with state content standards to support districts with these decisions. Effective the 2017-2018 school year, state funded Pre-K programs are required to use a Tier I curriculum in their publicly funded classrooms.
- <sup>10</sup> Detailed guidance and materials developed by the state are made available to providers. Direct training or technical assistance is conducted by state and regional staff. A system of regular coaching is implemented locally as well as funding provided for local agencies or providers to conduct training and offer/identify other PD opportunities.
- <sup>11</sup> Incumbent and new NSECD teachers must be certified in early childhood or working toward certification; those not already certified must have passed the Praxis I and taken all prerequisites to enroll in a Pre-K-3 or Early Interventionist alternate certification program. They must continually be enrolled and complete certification within three years of their hire date. Teachers with a kindergarten or Elementary Education Certificate must become an Early Childhood certified teacher by either taking the Praxis II or completing 12 hours of coursework within 18 months of their hire dates.
- <sup>12</sup> New NSECD teacher assistants must be certified with at least a CDA or AA or higher in Early Childhood, Education, or Family Studies. Incumbent NSECD teacher assistants who are not state-certified must be enrolled in a CDA program or Early Childhood associate degree program, be continually enrolled, and complete the certification within three years of hire dates.
- <sup>13</sup> While most districts provide ongoing classroom-embedded support, there is no state policy that requires it.
- <sup>14</sup> This is managed locally.
- <sup>15</sup> K-3 Literacy Screening Assessments are also used. These are district selected and LDOE approved.

### **MAINE - Maine Public Preschool Program**

- <sup>1</sup> School administrative units (SAUs) have the following governance structures: cities or towns with individual supervision, regional school units, regional school units doing business as school administrative districts and school administrative districts, community school districts, alternative organizational structures, unions of towns, Maine Indian education, Technology Center, Technology Region, and Education in the Unorganized Territory. The total number of SAUs changes regularly, due to new partnerships being formed or dissolved. Although there are 225 school administrative units in Maine, only 186 have kindergarten.
- <sup>2</sup> Maine Public Preschool is funded through the Essential Programs and Services Funding Formula (EPS). The amount of subsidy to each district will not decrease for the 2018-2019 school year.
- <sup>3</sup> SAUs and Head Start programs blend funds, but the way funds are blended varies across the state. Thirty-five percent of public preschool programs are in partnership with Head Start.
- <sup>4</sup> The number of hours and days per week a program operates is a local decision, however programs must operate a minimum of 10 hours per week to receive a per-pupil subsidy through the school funding formula.
- <sup>5</sup> It is a locally determined decision, but most preschool programs follow the kindergarten calendar.
- <sup>6</sup> Children must be 4-years-old by October 15 to enroll in preschool. It is a local district's decision as to whether SAUs will continue to serve children who are not age-eligible in a public preschool program. If a child attended kindergarten in another state with a different age-eligibility requirement, this will be honored. Allowances are made for children with IEPs who turn 5 between July 15 and October 15. The district receives the same level of subsidy for children pre-K through 2nd grade.
- <sup>7</sup> All eligibility, beyond age, is locally determined with the exception of the requirements of McKinney-Vento. Some SAUs without universal capacity select children on a first come, first served basis; use a lottery; or create a targeted program. In addition, districts in partnership with Head Start programs may have eligibility requirements for a certain ratio of enrolled children.
- <sup>8</sup> If a child has been screened and evaluated and the IEP team determines the public four-year-old program is not the least restrictive environment, another placement may be found.
- <sup>9</sup> Each classroom must have two adults: an early childhood certified teacher and an Ed Tech II (60 college credits).
- <sup>10</sup> If a program operates fewer than three hours per day, only a snack is required.
- <sup>11</sup> The developmental screenings used must be research-based.
- <sup>12</sup> The Maine DOE partners with Maine Roads to Quality (Maine's Professional Development Network) to create and deliver training on the ELDS.
- <sup>13</sup> A teacher who is certified K-3 or K-8 may apply for "conditional" endorsement and may teach in a public preschool setting. If a public preschool program is in partnership with a Head Start or private preschool the teacher must meet the same requirements as a public school employee.
- <sup>14</sup> All assistant teachers must have an Educational Technician II (Maine DOE Certificate) that requires a minimum of 60 college credit hours, including at least 9 credits in ECE or a related field.
- <sup>15</sup> The PEG grant required parity for Head Start teachers who are not employees of the public school. Maine DOE is encouraging the continuation of this funding.
- <sup>16</sup> Public preschool in Maine is funded through the school funding formula (EPS). Once a school has gone through an approval process for a public preschool program, student counts are factored in to compute the Essential Programs and Services SAU allocation in the following year. Children who are 4-years-old by October 15 and in a program a minimum of 10 hours a week receive a full per-pupil subsidy based on EPS.
- <sup>17</sup> Schools are required to provide a local match to draw down the per-pupil state subsidy. The required local match is part of the school funding formula based on property wealth (state valuation) multiplied by a statewide mill rate.
- <sup>18</sup> Preschool assessments must be research-based and aligned with Maine's ELDS.
- <sup>19</sup> If there are "Findings" in the Public Pre-K Monitoring Report, schools must provide the state with feedback within 30 days of receiving the report. They are also required to update the state in the Annual Program Report.
- <sup>20</sup> The state only uses aggregate CLASS data for reporting. There is no requirement for a district to use the data but it is used to help guide PD planning.

## MARYLAND - Maryland Prekindergarten Program

- <sup>1</sup> Four out of 24 districts offer universal full-day pre-K to all 4-year olds.
- <sup>2</sup> The Bridge to Excellence in Public Schools Act of 2002 (Senate Bill 856) required that each school system offer pre-K programs to all at-risk students by fiscal year 2008. (The Act defines at-risk students as students who are eligible for free or reduced-price meals.) The Prekindergarten Expansion Act of 2014 (Senate Bill 332) was a statewide initiative to expand access to half-day and full-day public pre-K for 4-year-olds from families with household incomes at or below 185% of the Federal Poverty Guidelines.
- <sup>3</sup> The State's Commission on Innovation and Excellence in Education (Kirwan Commission) is making recommendations for universal pre-K programming and funding to sustain, as well as expand, pre-K in the State of Maryland.
- <sup>4</sup> The number of 5-year-olds provided includes both preschoolers and kindergarten children.
- <sup>5</sup> Enrollment by ethnicity and race does not include the 1,046 4-year old children enrolled in community-based programs through the PDG grant. Also, enrollment by race is for the non-Hispanic population only.
- <sup>6</sup> PDG grant classrooms are funded for a full-day.
- <sup>7</sup> Partnerships with Head Start provided some extended-day services. The state provided extended-day, extended-year services to 7,461 children ages 3 to 5 enrolled in Head Start.
- <sup>8</sup> Both full-day and part-day programs operate five days per week. Through House Bill 668, Education - State Grants for Education Aid, the state provides additional funds for four districts that offer full-day pre-K. In 2017-2018, the state budget includes \$28.2 million for the bill's purposes.
- <sup>9</sup> Policy requires local school systems to have an early admissions policy to allow for enrollment of 3-year-olds who are otherwise eligible (economically disadvantaged or homeless) and who demonstrate educational needs warranting early admission into pre-K. Local school systems may create pre-K programs for 3-year-olds who are economically disadvantaged, homeless, or who lack school readiness. Early entrance to kindergarten is offered to children who demonstrate the need for grade acceleration to appropriately address their academic needs. Assessment for early entrance into kindergarten is locally determined in each school district.
- <sup>10</sup> All children must first meet the income (185% of Federal Poverty Guidelines), homelessness, or foster care requirement to qualify for enrollment. Remaining vacancies may be filled by enrolling 4-year-old applicants who are not from low-income families, but who exhibit a lack of readiness for school. Eligibility can be determined by other risk factors or criteria chosen by the local school system.
- <sup>11</sup> State policy stipulates an average of 20 students per classroom. Exceptions may occur where individual classrooms exceed this number, provided an overall program average of 20 is maintained. State child care regulations require a maximum class size of 20 and a staff to child ratio of 1:10 for 3- and 4-year-olds. In rare cases, if a classroom goes over 20, additional staff are added.
- <sup>12</sup> Developmental and dental screenings are locally determined. Vision and health screenings and referrals are the responsibility of the school health services program, in conjunction with the Health Department under Title I, which applies to all children enrolled.
- <sup>13</sup> Services for DLLs are locally determined.
- <sup>14</sup> The Ready for Kindergarten (R4K) Assessment system is aligned to ELDS, including the Early Learning Assessment (ELA) and Kindergarten Readiness Assessment (KRA).
- <sup>15</sup> Maryland has developed a comprehensive 4-year old, pre-K curriculum in partnership with the University of Maryland with plans to develop a 3-year-old curriculum. The curriculum "Children Study their World" is currently being piloted in some 4-year-old pre-K classrooms.
- <sup>16</sup> Paraprofessionals in Title I schools must also have completed two years of college, hold an Associate's Degree, or have a qualifying score of 455 on the Para Pro assessment administered by the Educational Testing Service (ETS).
- <sup>17</sup> One hundred percent of teachers have a minimum of a Bachelor's Degree; however, there are teachers who also hold a Master's Degree.
- <sup>18</sup> All local school systems are pre-K-12 systems. Salaries and benefits apply to all pre-K teachers and are locally determined. The PDG grant requires parity in salary.
- <sup>19</sup> Paid time for professional responsibilities and PD are provided but locally determined.
- <sup>20</sup> Assistant teachers attend required PD days annually (paid).
- <sup>21</sup> Maryland does not have a dedicated source of state funding for its pre-K program. Rather, pre-K funding is assumed to be adequately supported in K-12 funding distributed to the Locals via the Maryland school funding formula. Therefore, actual state spending on pre-K outside of the expansion grant was estimated based on the state per child amount from the K-12 average per-pupil revenue multiplied by the number of full-time equivalent (FTE) children enrolled in the program, not through the expansion grant. In addition, the Prekindergarten Expansion Act of 2014 provided \$4.3 million to expand access to public pre-K for 4-year-olds from families with household incomes at or below 300% of FPL. Pre-K spending from federal sources is determined through federal funds that are dedicated to pre-K. Maryland has a PDG and actual spending is reported.
- <sup>22</sup> State policy does not require all programs in this state-funded preschool program to assess children's learning and development during the preschool year(s). PDG classrooms (only) are required to assess children. The Public Schools aren't required to assess pre-K children; however, they are required to use kindergarten data. The ELA is voluntary and provided by the state at no charge. All children with disabilities are assessed using the ELA.
- <sup>23</sup> Assessments are required at Level 4 and higher in QRIS. Child assessments could include those that align with the State-recommended curriculum or the State-developed ELA.
- <sup>24</sup> The assessors are trained on the assessments used and must pass a simulator for reliability.
- <sup>25</sup> State law allows LEAs to choose whether or not to administer the KRA via random sample or census administration. In 2017-2018, 12 out of 24 school systems conducted a census administration of the KRA.
- <sup>26</sup> All PDG-funded programs (in both public and nonpublic settings) are required to participate in Maryland's QRIS.
- <sup>27</sup> PDG classrooms are visited multiple times per year to provide technical assistance. Additionally, one monitoring visit per year is conducted for all grantees.

## MASSACHUSETTS - Massachusetts Universal Pre-Kindergarten (UPK)

- <sup>1</sup> There was a reduction in the number of UPK programs due to (1) program closures; (2) programs' inability to maintain the grant eligibility requirement (Level 3 in QRIS); or (3) programs not reapplying for the grant.
- <sup>2</sup> The state currently has \$5,000,000 in the FY19 state budget for preschool expansion. If this funding is continued in FY20, the state will use the funds, in part, to sustain the current PDG programs.
- <sup>3</sup> Other private settings include 47 center-based programs and 27 family child care programs.
- <sup>4</sup> The hours per day and operating schedule vary by type of program and setting. Programs can operate either a school-year or full-year schedule. UPK programs are required to offer or provide access to full-day, full-year services. On average, programs are in operation 9 hours per day (range 3 to 12 hours per day), 5 days per week (range 4 to 6 days per week), and 2,271 hours per year (range 432 to 3,432 hours per year).
- <sup>5</sup> Formal, state-level partnerships exist between federal Head Start Grantees and the Commonwealth's Head Start State Supplemental Grantees. A total of 58 UPK Grantees receive the Head Start State Supplemental Grant.
- <sup>6</sup> The UPK Grant funds 100% of the grant award amounts to those programs that provide full-day, full-year services, which is defined as operating for at least 231 days and 2,079 hours per year. Additionally, the UPK Grant prorates the grant award amounts for programs providing less than full-day, full-year services.
- <sup>7</sup> Most public school programs use September 1st as the cut-off date for age-eligibility for kindergarten. Per State Special Education Regulations, the IEP team may allow a child to remain in a program designed for 3- and 4-year-old children for the duration of the school year in which the child turns 5 years old (including the summer following the date of the child's fifth birthday).
- <sup>8</sup> Any child may enroll in any program, but programs are selected to receive UPK funding based on program characteristics and on the characteristics of the children in the

program. An 85% of SMI income requirement applies to all children in UPK receiving subsidy money, but does not apply to tuition-paying families. For families to enter the subsidy system, they can have incomes up to 50% of SMI and can continue receiving assistance up to 85% of SMI. For families with special needs, they can enter with incomes up to 85% of SMI and remain until 100% of SMI.

- <sup>9</sup> The sliding scale is determined by the UPK program if a child is part of the financial assistance system, and the sliding fee scale for parent co-pay is determined by income. Any programs receiving subsidy funds may use the Massachusetts sliding fee scale. If the program does not receive subsidy funds, they may use their own sliding fee scale.
- <sup>10</sup> Programs operating fewer than four hours per day must schedule snacks. Programs operating between four and nine hours must schedule a regularly scheduled meal in addition to a snack, while those operating more than nine hours must schedule two meals and two snacks. Parents or programs/providers may provide snack.
- <sup>11</sup> Types of health screenings offered are not specified. UPK does not specifically include a requirement for health screenings. Health screening requirements are regulated by the State agency(ies) with administrative authority. For public schools, all LEAs are required to offer screenings and referrals under Child Find. These developmental screenings are available to children in non-LEA programs through services provided in the public schools. The types of health screenings offered are not specified for public schools. Head Start Programs are required to meet the screening requirements for the federal Head Start Program (developmental, health, vision, and hearing). All EEC-licensed programs are required to obtain documentation of immunizations, proof of physical exam (completed within 12 months of program admissions); and documentation of screening for lead poisoning.
- <sup>12</sup> Early Education and Care (EEC) Licensing Regulations include requirements for child records, curriculum, and family engagement based on language needs. Licensing regulations also require that 10% of educators' annual professional development time is focused on children who have special needs, including linguistic. The Massachusetts Quality Rating and Improvement System (QRIS) includes quality standards related to having classroom materials that reflect the language and culture of the children in the classroom, their communities, and represent the diversity of society.
- <sup>13</sup> EEC's Interim Financial Assistance Policy Guide 2018 defines an absence as "Any day that a child is authorized to attend an early education and care program, but is not in attendance." The Policy Guide describes unexplained excessive absence: "Excessive absence is defined as more than 3 consecutive unexplained non-attended days. An unexplained non-attended day is when the child does not attend care and the child's parent does not contact the provider."
- <sup>14</sup> Additional supports include: Detailed guidance and materials developed by the state and made available to local providers; Direct training or technical assistance by state or regional staff; Direct training or technical assistance provided by vendors paid by the state; A system of regular coaching for teachers; State grants (\$3.95 million) to local agencies or providers for training and other professional development. UPK programs can use TS Gold, Work Sampling System, HighScope, or Creative Curriculum which are all aligned with the ELDS.
- <sup>15</sup> The Educator and Provider Support (EPS) Grantees provide statewide professional development and coaching on how to implement curriculum in the classroom. A priority of this state-funded grant program is to provide professional development opportunities that align with EEC's Core Competencies, QRIS, and the early learning standards and guidelines.
- <sup>16</sup> Lead teachers in public schools are required to: (1) have a bachelor's degree, (2) pass the Communication and Literacy Skills test, (3) pass the subject matter knowledge test(s) appropriate to the license sought, and (4) meet additional requirements for early childhood licensure, including seminars or courses that address teaching this population. Lead teachers in nonpublic schools are required to have certification which requires three credits in Child Development plus nine credits in three different categories of study within Early Childhood Education. Teachers are also required to have prior experience, the amount of which varies based on their other qualifications. All UPK programs are required to be, at a minimum, Level 3 in QRIS. For Level 3 programs, 75% of classrooms must have an educator with a BA. For Level 4 programs, 100% of classrooms must have an educator with a BA.
- <sup>17</sup> Instructional paraprofessionals in public schools are not required to be licensed in MA. Paraprofessionals must work under the direct supervision of a licensed teacher. The minimum requirements to be employed in this role are a HSD or equivalent and one of the following: AA degree; completion of 48 credit hours at an Institution of Higher Education; or passing completion of paraprofessional exam. Assistant teachers in nonpublic schools must have a HSD or equivalent and must work at all times under the direct supervision of at least a qualified teaching staff person.
- <sup>18</sup> All public school educators who hold a teacher license must renew their professional license every five calendar years in order to keep it active. The number of in-service professional development hours required is based on the type of license held and the type being sought or renewed. For teachers in public schools, the Educator License Renewal states that each standard educator certificate shall be valid for five years and continued every five years thereafter upon the successful completion of an individual professional development plan that meets the subject matter knowledge and teaching skill requirements set by the MA Department of Elementary and Secondary Education (DESE) board. Individual professional development that meets the subject matter and teaching skill requirements are designed to increase the ability of the teacher to improve student learning. A Professional Development Point (PDP) is equal to one clock hour of professional development. EEC regulations require that all licensees, certified assistants, and any educator who may be alone with children must maintain current certification of training in basic first aid and CPR. Training in first aid and CPR may not be counted toward professional development hours.
- <sup>19</sup> According to EEC Regulations, all licensees, certified assistants, and any educator who may be alone with children must maintain current certification of training in basic first aid and CPR, in accordance with EEC policy. Training in first aid and CPR may not be counted toward Professional Development hours.
- <sup>20</sup> All UPK programs are required to be at Level 3 in the QRIS, which requires individualized PDPs, including formal PD in the components of the assessment process, including screening, observation, use of assessment tools, and IDEA processes.
- <sup>21</sup> The Educator and Provider Support (EPS) Grant provides statewide professional development and coaching to programs that request such services. The frequency of coaching or mentoring depends on the individual needs of the program or teachers.
- <sup>22</sup> Child assessments are used at the program level. At the state level, evidence of completion is used to determine whether the UPK program requirements are met. Programs are expected to use the child-level data to make improvements for programming but also to tailor the curriculum to the unique needs of each child.
- <sup>23</sup> The UPK Grant does not require structured observations of classroom quality. MA reviews self-reported observation results for programs participating in QRIS at Levels 2 and 3. A site visit is required as part of the QRIS verification process at Level 3 and the ECERS-R is used as the observation tool. Programs are required to be at Level 3 or higher. When a program has multiple preschool classrooms, the classrooms observed are randomly selected. QRIS requires all programs, regardless of QRIS level, to observe their classrooms using the required measurement tools (ERS, CLASS, Strengthening Families, BAS, and/or PAS) each year to develop/update their Continuous Quality Improvement Plans (CQIPs).
- <sup>24</sup> The Program Quality Specialists perform technical assistance visits for those programs that are in the process of applying for Levels 3 and 4 in QRIS. Additionally, the state's contracted vendor conducts site visits for programs that have completed a Level 3 or Level 4 QRIS application.

## MASSACHUSETTS - Massachusetts Chapter 70

- <sup>1</sup> While Chapter 70 comes to DESE through the state budget, the monies flow to districts and administration of the funds vary from community to community.
- <sup>2</sup> Chapter 70 funds are available to all school districts based on enrollment, PK-12. There are 268 districts in Massachusetts that have a preschool enrollment. The other districts that do not have preschool enrollment include districts that regionalize at the middle/high school level and vocational technical high schools.
- <sup>3</sup> These data include both children with and without disabilities and reflect the October 1 count for the 2017-2018 school year.
- <sup>4</sup> The state currently has \$5,000,000 in the FY19 state budget for preschool expansion. If this funding is continued in FY20, the state will use the funds, in part, to sustain the current PDG programs.
- <sup>5</sup> The DESE defines Economically Disadvantaged as children who are eligible for free/reduced lunch, receive TANF, or are eligible for food stamps.
- <sup>6</sup> While the majority of children are enrolled in public school preschool settings, there may be some children with disabilities who receive their services at home, in a child care or head start setting and/or a separate school.
- <sup>7</sup> Public preschool generally runs 2 to 5 days per week for varying hours.
- <sup>8</sup> Students must be 3 years of age to enroll in preschool. However, the cut-off date of when they need to be 3 years olds is determined by the local school district. The exception is for students who turn 3 years old in the middle of the year and are determined eligible for special education services. The cut-off date for kindergarten is also set by each local school district.
- <sup>9</sup> Enrollment policies are determined locally. If more children seek the program than there are slots, districts will often use a lottery process for children without disabilities.

- <sup>10</sup> The class size and ratios are based on special education regulations. If the class does not include children with IEPs, there is no state requirement for class size/ratios. These are locally determined.
- <sup>11</sup> Public schools are required to screen children as part of Special Education - Child Find activities for all children in the community who seek a screening. Additionally, school districts are required to screen for vision and hearing within a year of entry into a public school (<https://www.mass.gov/files/documents/2017/09/11/105cmr200.pdf>). Other screening requirements are determined locally.
- <sup>12</sup> If students fail a hearing or vision screening, the school district must notify the family or legal guardian of the results.
- <sup>13</sup> The Look Act provides information on requirements for English language learners: [www.doe.mass.edu/ell/look-act.html](http://www.doe.mass.edu/ell/look-act.html)
- <sup>14</sup> The definition of chronic absenteeism is the percent of students missing 10 percent or more of the days they were enrolled at a given school during a school year. While the definition includes Preschool and Kindergarten, for accountability purposes, the Department does not report on Preschool or Kindergarten.
- <sup>15</sup> In Massachusetts, public preschool teachers seek the Preschool through Grade 2 license.
- <sup>16</sup> Professional development activities shall be identified by the educator and supervisor during the development of, and review of, the Individual Professional Development Plan (IPDP) in order to better support student achievement. IPDPs must include at least 150 Professional Development Points (PDPs) that break down as follows: (1) At least 15 PDPs in content (subject matter knowledge); (2) At least 15 PDPs in pedagogy (professional skills and knowledge); (3) At least 15 PDPs related to Sheltered English Immersion (SEI) or English as a Second Language (ESL); (4) At least 15 PDPs related to training in strategies for effective schooling for students with disabilities and the instruction of students with diverse learning styles; and (5) The remaining required 90 PDPs may be earned through either "elective" activities that address other educational issues and topics that improve student learning, or additional content, and/or pedagogy. For more information, you can visit: <http://www.doe.mass.edu/licensure/advance-extend-renew-license.html#renewing>
- <sup>17</sup> For more information on Individual Professional Development Plans as outlined in Massachusetts Educator Evaluation System, see: <http://www.doe.mass.edu/pd/01guideline/devel.html>
- <sup>18</sup> Coaching and classroom embedded support can be provided but is not required.
- <sup>19</sup> All licensed public school teachers have Bachelor's degrees and then have 5 years to receive their Master's degrees.
- <sup>20</sup> For more information about the Sheltered English Immersion endorsement, please visit: [www.doe.mass.edu/licensure/endorsements/sei.html](http://www.doe.mass.edu/licensure/endorsements/sei.html)
- <sup>21</sup> Salaries, benefits, and paid time are negotiated locally through union contract negotiations. Preschool is usually, but not always, covered by the union.
- <sup>22</sup> Wage or salary incentives for public school preschool teachers are negotiated locally.
- <sup>23</sup> This amount is the total allocation for preschool Chapter 70. The total allocation for Chapter 70 was \$4,863,410,689. The state budget line item for Chapter 70 is 7061-0008. For more about the line item and its funding history, you can visit: [http://www.massbudget.org/browser/line\\_item.php?id=7061000800&inflation=cpi](http://www.massbudget.org/browser/line_item.php?id=7061000800&inflation=cpi)
- <sup>24</sup> The preschool funding is included in the larger Chapter 70 line-item (7061-0008).
- <sup>25</sup> For information on Chapter 70, please visit: [www.doe.mass.edu/finance/chapter70/](http://www.doe.mass.edu/finance/chapter70/)
- <sup>26</sup> Public schools may have relationships with community-based programs but if there is a contractual relationship between the public school district and the community-based programs, the children served in those programs are not included in the count that determines Chapter 70 funding. The exception is children who are enrolled in a public preschool and/or receive special education programs and who are also enrolled in a community-based program as a wrap-around to meet family and/or child need.
- <sup>27</sup> For additional information, please see: [http://www.massbudget.org/report\\_window.php?loc=Facts\\_10\\_22\\_10.html](http://www.massbudget.org/report_window.php?loc=Facts_10_22_10.html)
- <sup>28</sup> Although kindergarten screening is required, the state does not have any requirements related to kindergarten assessments.
- <sup>29</sup> Observations of teachers and feedback are part of the educator evaluation system. For more information, please visit: <http://www.doe.mass.edu/edeval/>

## **MICHIGAN - Michigan Great Start Readiness Program (GSRP)**

- <sup>1</sup> The Intermediate School Districts (ISD), which cover the state, serve as grantees for GSRP, the state Pre-K program. GSRP sites are operated in all but one very rural county. A total of 326 out of 545 districts (60%) operated GSRP in 2017-2018. Classroom programs are still operated in the areas of those districts that no longer operate the program directly. In some cases, the ISDs are now providing the program directly and in some, CBOs have taken over.
- <sup>2</sup> Legislation allows for a GSRP/Head Start Blend option, which receives \$3,625 in state funding to blend with federal Head Start funding per child to create a school-day length program. This option requires adherence to all federal Head Start and GSRP policies and regulations, with the more stringent standard from either program prevailing.
- <sup>3</sup> School-day classroom programs are reimbursed at two slots per child (\$7,250); all others are reimbursed at one slot per child (\$3,625). The minimum operating schedule is three hours per day for four days per week for 30 weeks per year. It is allowable for new grantees or newly licensed sites to operate only for 20 weeks during the first year. Subsequent years must be 30 weeks per year. Legislation allows for a GSRP/Head Start Blend option, and requires a tuition-based sliding scale for children who are over-income. GSRP/Head Start Blend is also included in the extended-day count. Data has been entered according to the NIEER definition. In Michigan, 6.5 hours per day is considered a school-day and extended day (wrap-around) would constitute a minimum of 10 hours.
- <sup>4</sup> Operating schedule may vary depending on program option. The requirement for a part-day program is three hours per day, for a minimum of four days per week for 30 weeks. For school-day and GSRP/Head Start Blend, the formal partnership requires 6.5 hours per day, four days per week for 30 weeks. In Michigan, 6.5 hours per day is considered a school-day and extended-day (wrap-around) would constitute a minimum of 10 hours.
- <sup>5</sup> GSRP is aligned to kindergarten age eligibility law and that allows for exceptions to the September 1 cutoff by parent request. Parents may request early entry into kindergarten for children with birthdates between September 2 and December 1. Therefore, there is early entry into GSRP as well for those dates. Although this exemption was not included in the original legislation for 2017-2018, a supplemental bill signed in November 2017 reinstated it.
- <sup>6</sup> At least 90 percent of the children enrolled in each grantee must meet the income requirement of 250 percent FPL or below, with exceptions for up to 300 percent if sufficient numbers of children cannot be recruited at 250 percent FPL. There are seven factors that determine eligibility: low family income (below 250 percent FPL), diagnosed disability or identified developmental delay, severe and challenging behavior, primary home language other than English, parent(s) with low educational attainment, abuse/neglect of child or parent, and environmental risk. All families above 250 percent FPL, except for children who qualify as homeless, in foster care, or with an IEP, must pay tuition based on a sliding scale. Families that are over income as part of the 10 percent allowed must have at least two other risk factors and pay tuition based on a sliding scale. Sliding scales are determined locally, and may be included for review during monitoring.
- <sup>7</sup> For classrooms that enroll 17 or 18 children, a third adult who meets licensing requirements for a caregiver is required at all times.
- <sup>8</sup> Minimally, part-day programs provide a snack, though many provide breakfast and lunch for morning classes and some also provide lunch and snack for afternoon classes. School-day programs typically provide breakfast, lunch, and snack. The minimum number of meals/snacks required is set by licensing, dependent on the length of the day.
- <sup>9</sup> The full physical exam includes: health history, birth history, meds taken, current/past diagnosis, measurements, essential findings, immunization record, and recommendations.
- <sup>10</sup> Chronic Absenteeism is addressed in the state ESSA plan beginning at Kindergarten. The GSRP Implementation Manual requires each site/classroom to take daily attendance and each subrecipient to have an attendance policy in the Parent Handbook.
- <sup>11</sup> Exclusion policy must be written to describe short term injury or contagious illness that endangers the health and/or safety of children or others. Children must not be excluded or expelled from classroom programming or transportation services.
- <sup>12</sup> GSRP is currently going through a process to evaluate new comprehensive curricula for inclusion on the list of curricula able to be used in GSRP classrooms. Part of scoring is based on providing an alignment between the curriculum and the Early Childhood Standards of Quality for Pre-K (ECSQ-PK).
- <sup>13</sup> State policy provides an approved list of child assessments aligned with the ELDS.
- <sup>14</sup> GSRP requires providers be trained directly by a certified trainer of the chosen curriculum.

- <sup>15</sup> SEA monitors ISDs that, in turn, are required to provide oversight and monitoring of subrecipient practices, such as the implementation of local policies/procedures related to fidelity of implementation of the program model. Each classroom also has an Early Childhood Specialist (Master's degree prepared classroom coach) to provide observation, feedback and support directly to the teaching teams.
- <sup>16</sup> All lead teachers must have Elementary teaching certification with an Early Childhood endorsement or a BA in Early Childhood Education or Child Development with specialization in preschool teaching. If training is incomplete, they may be considered out of compliance, but must be enrolled in a degree or endorsement program and in compliance within two years.
- <sup>17</sup> An assistant teacher may have a CDA or an Associate's degree in Early Childhood Education or Child Development. If a suitable person cannot be hired, someone can start while out of compliance, but must have completed at least one credit-bearing course in child development and complete the requirements within two years.
- <sup>18</sup> Lead teachers who are certified in public school settings must also complete six credit hours or an equivalent of continuing education units every five years to keep their teaching certification current. Newly certified lead teachers must complete even more training to renew the certificate for the first time.
- <sup>19</sup> All classrooms are assigned an Early Childhood Specialist (ECS, i.e., master's level coach) who visits each classroom at least monthly during the program year for the purposes of supporting the teaching team. The requirement is that each ECS is in regular contact with the teaching teams and does regular visits for support based on differentiated needs of teachers. ECSs are typically in the classroom anywhere from weekly to monthly depending on the needs of each teaching team. Classrooms with new lead teachers receive more frequent visits. Classrooms with lower Program Quality Assessment (PQA) scores or other concerns also receive more attention. Visits should include time to coach teaching teams, e.g., modeling strategies with children, observing and providing immediate feedback on techniques or interactions, attending home visits/conferences, having informal conversations with teaching teams on self-assessment of their progress and areas where they desire additional support. See <http://www.michigan.gov/grsp> for Implementation Manual and Early Childhood Specialist section for details.
- <sup>20</sup> A total of 118 (5%) Lead Teachers were on compliance plans during the 2017-2018 program year. They were either completing the last few classes towards Bachelor's degrees in Elementary Education with the Early Childhood Endorsement or in Early Childhood Education or Child Development with a specialization in preschool teaching.
- <sup>21</sup> Per the GSRP Implementation Manual, Classroom Requirements section, The ISD and program administrators must ensure sufficient time for all staff to participate in planning, professional development, and parent involvement activities.
- <sup>22</sup> Teachers have been supported, through Race to the Top: Early Childhood Challenge Funds, to use T.E.A.C.H. to attain credentials by completing an early childhood endorsement or completing a Bachelor's degree in ECE or Child Development while working with a compliance plan. Approximately 4% of Lead Teachers in Public Schools and 6% in Non-Public Schools are working to attain credentials.
- <sup>23</sup> Any wage or salary incentives would exist through T.E.A.C.H. or be generated locally.
- <sup>24</sup> Assistant Teachers have been supported, through Race to the Top: Early Childhood Challenge Funds, to use T.E.A.C.H. to attain credentials by completing an Associate's degree in Early Childhood Education/Child Development or Child Development Associate's Credential (CDA) while working with a compliance plan.
- <sup>25</sup> Michigan spent \$243,600,000 on the program and \$300,000 on evaluation.
- <sup>26</sup> GSRP Funds came from the General Fund and were appropriated through the State School Aid Act, P.A. 108 of 2017 Sec, 32d. (1).
- <sup>27</sup> GSRP has both a community needs assessment and a formula component that contributes to the final grantee allocation. GSRP cannot operate solely on the state funding, but the state does not collect information on local, federal, or in-kind contributions. Grantees often include in-kind space for GSRP, utilities, administrative time, etc. All funding flows through the State School Aid Fund to ISDs. Additional federal sources, such as CCDF subsidies, CACFP, and Title I, are used to provide the GSRP program. Included in the total spending is \$300,000 allocated from state resources for ongoing statewide evaluation activities.
- <sup>28</sup> The GSRP evaluation plan being executed by Michigan State University from 2017-2022 consists of four research studies focused on accessibility, quality and preschool outcomes study, academic impact, and economic impact. The accessibility study will use mapping statistics to show if there's any gap with the service, where is the gap and whether the various needs are being met. The quality and preschool outcomes study will help discern which aspects of the GSRP model (e.g., part-day/school-day, district or CBO setting, QRIS rating, PQA/CLASS rating, teacher credentials/pay) are most relevant to preschool outcomes and child growth. The academic impact study will establish a comparison group and follow a cohort of children from GSRP through 3rd grade and then examine their 3rd grade standardized M-STEP scores on ELA/Math, as well as their experiences along the way with retention, special education, absenteeism, and suspension/expulsion. Finally, the economic impact study aims to discern closer to the true costs of implementing GSRP as well as doing a cost-benefit analysis of the public investment in GSRP.
- <sup>29</sup> Documentation of children's learning and/or outcomes is ongoing and locally collected for program use. Multiple checkpoints take place during the year. Use of data includes individualizing for children, reporting to parents, creating program improvement and professional development plans.
- <sup>30</sup> Assessors must have formal training from the publisher of the tool or a person certified by the publisher to train.
- <sup>31</sup> Local programs use results from daily ongoing child assessment to individualize for children, and to report to and plan with parents for their individual children. Results are also presented to local parent advisory groups for shared decision making on topics such as the future choice of tools, or determining if there is a need for a professional development emphasis for the coming year.
- <sup>32</sup> For the Kindergarten benchmark assessment, all districts must choose from a list of approvable instruments and use that tool three times per year. Results are not required to be submitted to the state.
- <sup>33</sup> Every teaching team is assigned an Early Childhood Specialist (ECS, i.e., a Master's level coach). Teams with new Lead Teachers have a baseline Program Quality Assessment (PQA) in the fall and all teams have an End-of-Year PQA. Together the teaching team and ECS set goals for growth from PQA results. Each ECS is required to be in regular contact with the teaching teams and do regular visits to provide support based on the differentiated needs of teachers. ECSs are typically in the classroom anywhere from weekly to monthly depending on the needs of the teaching team. Classrooms with new lead teachers receive more frequent visits. Classrooms with lower PQA scores or other concerns also receive more attention. Visits should include time to coach teaching teams, e.g., modeling strategies with children, observing and providing immediate feedback on techniques or interactions, attending home visits/conferences, having informal conversations with teaching teams on self-assessment of their progress toward team goals and areas where they desire additional support. See <http://www.michigan.gov/grsp> for the GSRP Implementation Manual and Early Childhood Specialist section for details.
- <sup>34</sup> All GSRP classrooms are required to take part in Great Start to Quality, Michigan's QRIS with a minimum rating of 3 stars at entry. Intermediate School Districts, as GSRP grantees, have local policies on working to increase the star level of any program that enters at 3 stars with Early Childhood Specialist (master's level classroom coaches) support. Most GSRP sites have ratings of 4 or 5 stars.
- <sup>35</sup> SEA monitors Intermediate School Districts (ISDs) as GSRP grantees that are required to provide oversight and monitoring of subrecipient practices, such as local policies and procedures related to all aspects of fidelity of implementation of the program model. Each classroom also has an Early Childhood Specialist (ECS), a Master's level coach to provide observation and feedback directly to teachers.

## MINNESOTA - Minnesota Head Start

- <sup>1</sup> By statute, state Head Start funding is non-competitively allocated to all federally designated Head Start grantees in Minnesota. This includes one school district, eight tribal governments, and 24 private, nonprofit agencies, each serving one or more counties. Head Start services are available to eligible residents in all parts of the state.
- <sup>2</sup> All Head Start enrolled children are income eligible for Free and/or Reduced Price Lunch per federal performance standards.
- <sup>3</sup> All children were enrolled in Head Start. Head Start partners with a variety of partners at the local level which may vary by community, including local school districts and family or center-based child care.
- <sup>4</sup> Programs comply with the federal Head Start requirement of at least 3.5 hours per day, four days per week, for 32 weeks per year, which is the most common schedule. A formal process that approves the use of Child Care Assistance funding for Head Start Integrated full-day programming has been established. Extended-day services are also provided through collaborations with the Early Learning Scholarships program.
- <sup>5</sup> Children who turn 3 after September 1 may enroll if slots are available. Enrollment and eligibility are determined at the local level per Head Start performance standards.
- <sup>6</sup> State pre-K children, as defined by NIEER, must meet the federal Head Start income guidelines. Effective as of 2007, 35 percent of enrollment may be children whose family incomes are between 100 and 130 percent FPL after priority is given to children at or below 100 percent FPL. Other criteria for eligibility include homeless families and foster children. Families may also be income-eligible if they qualify for child-care services as a participant in the Minnesota TANF program. Reported risk factors

- may be considered in prioritizing applicants for enrollment in a limited number of enrollment slots. Agencies must work with their parent council to establish additional priorities.
- <sup>7</sup> Eligibility is reassessed between Early Head Start and Head Start, and before a third year of Head Start. Income and other family circumstances are reassessed and support is provided for finding other options if children are found to be no longer eligible.
  - <sup>8</sup> Class sizes and staff-child ratio are defined in the Head Start performance standards. In mixed-age classrooms, if the majority of children are 3, then the maximum class size is 15.
  - <sup>9</sup> Federal Head Start Performance Standards require part-day programs to provide children with at least one-third of their daily nutritional needs (breakfast or lunch), and full-day programs to provide one-half to two-thirds of daily nutritional needs (breakfast, lunch, and a snack). A program must use funds from USDA Food, Nutrition, and Consumer Services child nutrition programs as the primary source of payment for meal services.
  - <sup>10</sup> Per Federal Head Start Requirements, a program must complete or obtain a current developmental screening to identify concerns regarding a child's developmental, behavioral, motor, language, social, cognitive, and emotional skills within 45 calendar days of when the child first attends the program or, for the home-based program option, receives a home visit. A program that operates for 90 days or less must complete or obtain a current developmental screening within 30 calendar days of when the child first attends the program.
  - <sup>11</sup> Per federal Head Start requirements.
  - <sup>12</sup> The programs work very closely with Part B and C staff. Often there is co-teaching, but it is not a requirement.
  - <sup>13</sup> Per Federal Requirements and state LEAP legislation.
  - <sup>14</sup> Per federal Head Start recommendations/performance standards: <https://eclkc.ohs.acf.hhs.gov/publication/ersea-encouraging-supporting-regular-attendance>
  - <sup>15</sup> Per Federal Head Start Requirements. This is monitored at the federal level.
  - <sup>16</sup> Practice Briefs have been developed and are available to support early childhood professionals expand their usage of the early learning standards to increase support for children and their families.
  - <sup>17</sup> Minnesota's Early Learning Standards will soon be aligned to Head Start Early Learning Child Outcomes Framework: Ages Birth to Five
  - <sup>18</sup> Programs that participate in the QRIS "Parent Aware" are required to use a curriculum and assessment that are aligned with the Early Childhood Indicators of Process. All programs are required to participate in Parent Aware. The exception is for tribal grantees and 6 out of 8 do participate.
  - <sup>19</sup> Minnesota Head Start programs may utilize an automatic rating pathway for the state Quality Rating and Improvement System (Parent Aware). Participation in Parent Aware requires the use of aligned curriculum and approved assessments that are aligned with the Early Childhood Indicators of Progress.
  - <sup>20</sup> Complete List of Aligned Curriculum approved for use in the state's QRIS: Stand-alone preschool curricula: 1-2-3 Learn Curriculum; Bank Street Developmental Interaction Approach; Carol's Affordable Curriculum including: Jumping Kangaroos, Son Shine, Tiny Tots, and Little Disciples; Core Knowledge; Creative Curriculum for Family Child Care; Creative Curriculum for Preschool; Curiosity Corner; DLM Early Childhood Express; Early Learning Success; Essentials of Active Learning in Preschool: Getting to Know the High Scope Curriculum; Everyday Mathematics; Family Child Care Programs: Building a High Scope Program; Fireflies, by Funshine Express; FunShine Online Preschool Curriculum (3-5 years); Gee Whiz Education; High Reach Curriculum package for Family Child Care; High Reach Curriculum for Pre-K; The High Scope Preschool Curriculum; Houghton Mifflin Pre-K; Investigator Club; Learn Every Day: The Preschool Curriculum; Montessori; Mother Goose Time; Opening the World of Learning (OWL); Project Early Kindergarten (PEK) bundle of curricula for centers (includes PEK manual, Everyday Mathematics and Doors to Discovery); Project Early Kindergarten (PEK) curriculum for family child care; Scholastic Big Day for PreK; Scholastic Early Childhood Program; Seeds of Learning: Seeds to Sprouts!; Splash in to PreK; Starfall PreK; The Redleaf Family Child Care Curriculum: Teaching Through Quality Care, Second Edition; Totes of Fun
  - <sup>21</sup> Under the Head Start Reauthorization Act of 2007, all lead teachers were required to have at least an AA in Early Childhood Development by October 2011; by September 30, 2013, 50 percent must have at least a BA in ECE or a related field. By September 30, 2013, all assistant teachers must have at least a CDA or be enrolled in a program to receive a CDA, AA, or BA within two years. In a public school, teacher union rules require that teachers have at least a BA. Programs are scrutinized annually by the federal Office of Head Start to assess continuing progress toward meeting these goals.
  - <sup>22</sup> Assistant teachers must meet Department of Human Services (DHS) licensed child care center regulations, which includes a CDA.
  - <sup>23</sup> The requirement for in-service professional development is 2% of total work hours. As of December 2007, however, the Head Start reauthorization required 15 clock hours of professional development per year for teachers and assistant teachers. By federal law, Head Start staff must follow the highest standard. For those working full-time, that will be the 2% standard.
  - <sup>24</sup> Per Head Start performance standards, programs are required to implement a research-based, coordinated coaching strategy for education staff.
  - <sup>25</sup> Policies for professional development and planning time are set by federal Head Start regulations and local Head Start agencies.
  - <sup>26</sup> Head Start staff are eligible to apply for TEACH and RETAIN grants and CDA scholarships implemented by Child Care Aware of Minnesota.
  - <sup>27</sup> Minnesota supplements federal Head Start and Early Head Starting funding with an additional \$25.1 million annually. \$11.8 million is used for programs that serve state-funded Head Start 3- to 5-year-olds. The remaining funds are used for state-funded Early Head Start.
  - <sup>28</sup> The state funding formula is based on federal resources and unmet need. The funding formula is calculated based on elements used federally to determine funding for the entire Head Start agency. It is then locally determined what proportion of funding goes to birth-to-3 and 3- to 5-year-olds.
  - <sup>29</sup> Required assessments of preschool children are determined locally and must comply with federal Head Start requirements. Programs are not required to submit data to the state.
  - <sup>30</sup> Kindergarten assessments are locally determined. Districts are invited to be part of the statewide Kindergarten Entry Profile study, but can decline. Districts also assess children throughout the kindergarten year as part of a high level option to receive additional funding.
  - <sup>31</sup> The approved Kindergarten Entry Profile assessment tools include: Desired Results Developmental Profile (DRDP), DevMilestones, Teaching Strategies GOLD, and Work Sampling System. Kindergarten staff can use any assessment throughout the year.
  - <sup>32</sup> Many programs utilize CLASS to support teacher professional development and Practice Based Coaching. This information is not collected by or reported to the state. As part of the federal Head Start monitoring system, ACF conducts observations of multiple classes operated by the grantee based on a random sample of all classes and rates the conduct of the classes observed using the CLASS: Pre-K instrument.
  - <sup>33</sup> Per Head Start performance standards; American Indian and Alaska Native programs are exempt.
  - <sup>34</sup> All center-based Head Start and Early Head Start programs are eligible to apply for an Automatic 4-Star Parent Aware rating through their state funding annual program plan. A 4-star rating is the highest quality rating and Head Start programs are not eligible for any other rating.
  - <sup>35</sup> Per federal Head Start monitoring protocol and in addition, programs that are licensed through the Department of Human Services or non-licensed and receiving CCAP are subject to annual review by the DHS Licensing Division.

## **MINNESOTA - Voluntary Pre-Kindergarten (VPK) and School Readiness Plus (SRP)**

- <sup>1</sup> The allocation of VPK funding is done through a process outlined in state statute to assure equitable distribution of funds throughout the state. The state is divided into four classifications: metro-St. Paul and Minneapolis (10%), metro suburban (40%), non-metro (47%), and charter schools (7%). The funding is dispersed as noted to these regions based on the percentage of state total kindergarten enrollment. VPK is available in 93 school districts and 18 charter schools. VPK was in 101 districts/charter schools and School Readiness Plus (SRP) was in 10.
- <sup>2</sup> This is a voluntary program. All districts and charter schools are encouraged to apply for funding through a yearly application process that allocates the legislatively determined number of seats. Prior to the application process, all elementary and charter school sites are ranked according to free and reduced (FRL) lunch student population. Schools with funding must renew to continue receiving funding and may ask for expansion funding. All schools may request new program funding. Additional points are awarded for sites working with a mixed delivery partner and who do not have 3- or 4- star rated child care sites within a 10- or 20- mile radius. Funds are prioritized and allocated to sites with the highest FRL-eligible children.
- <sup>3</sup> The enrollment total includes 6,026 children in VPK and 261 children in SRP.

- 4 Programs may enroll children in part-day state-funded preschool and part-day Head Start. Children may attend state-funded preschool and use Head Start for wrap-around services. Children may be enrolled in both programs when they are co-located programs that are sharing resources in a mixed-delivery model. The Head Start enrollment count is separate from the VPK count.
- 5 VPK district and charter school awards were made using a ranking system that was based on the FRL percentage of each elementary/charter school site in Minnesota. This assured that each site funded had a demonstrated need for available VPK funding. Enrollment by eligibility for FRL reported here may be an underestimate because not all schools serve meals to children enrolled in VPK.
- 6 Most children were served in public schools (including charter schools) but some children were served through mixed-delivery in Head Start partnership sites and child care center partnership sites.
- 7 Schools have the opportunity to design the schedule including the number of days and instructional hours for the year. This leads to a variety of schedules including full- and part-day options. All programs must offer a minimum of 350 instructional hours.
- 8 Schools are encouraged to layer and braid funding sources to meet the early learning and care needs of children and their families. This includes using school readiness, early learning scholarships, and Head Start and/or child care partnerships to extend the length of day and/or number of days that a child has the opportunity to participate in high quality early learning and care experiences.
- 9 Schools can receive a maximum of .6 pupil unit for funding per student. By statute, the minimum number of instructional hours required was 350. The .6 cap provided funding for up to 510 hours. Many programs elected to offer more hours and paid for those with other available funds.
- 10 Because VPK is funded as a grade level, the days of operation per year follow the same guidelines as elementary schools in Minnesota.
- 11 Since the number of available seats for VPK are limited, schools may determine local eligibility requirements to help identify children with the greatest need. Many use the state school readiness criteria that exist such as eligibility for free lunch, homelessness, foster care, English Language Learners (ELLs), and developmental need as identified through health and screening processes.
- 12 If a child is assessed and referred for and receives special education services, the child no longer qualifies for VPK and is funded through special education funding. Guidance from the state encourages that the child remains in the VPK classroom. When this happens, a new child can be enrolled in the vacated seat as long as the total classroom enrollment does not exceed 20 students.
- 13 Maximum class size is capped at 20. At least one of adults in the classroom must be a teacher knowledgeable in early childhood curriculum content, assessment, native and English language development programs and instruction.
- 14 All VPK students qualify for free breakfast. Schools serving breakfast are reimbursed through designated state funds for enrolled children who do not qualify for FPL. VPK schools are not required to serve breakfast, however, state guidance encourages a focus on nutrition and most programs do provide at least one meal.
- 15 State statute allows a board to decide that additional components such as nutritional, physical, and dental assessments, review of family circumstances that might affect development, blood pressure, laboratory tests, and health history are offered.
- 16 Individual and summary data must be reported to the district by the health provider who performs the screening services, for the purposes of developing appropriate educational programs to meet the individual needs of children and designing appropriate health education programs for the district. No data on an individual shall be disclosed to the district without the consent of that individual's parent or guardian.
- 17 On June 16, 2017, the Minnesota Board of Teaching (which is now PELSB) passed a resolution which allows teachers who are licensed K-12 in the areas of English as a Second Language (ESL), Vocal and Instrumental Music, Physical Education and Visual Art and are assigned to teach in K-6 grade settings, to be permitted to also provide subject specific instruction to students in pre-kindergarten assignments.
- 18 A set of ECIPs Practice Briefs have been developed. They are short, targeted information briefs designed to help early childhood professionals expand usage of the early learning standards to increase support for children and their families.
- 19 Minnesota's Early Learning Standards will soon be aligned to Head Start standards.
- 20 According to VPK and SRP statute, each program must measure each child's cognitive and social skills using a formative measure aligned with the state's early learning standards when the child enters and again before the child leaves the program, using screening and progress monitoring measures from the state-approved menu of kindergarten entry profile measures. The voluntary pre-kindergarten program requires the use of a KEP-approved tool, the SRP statute does not require the use of a specific tool.
- 21 The state requires that VPK provide comprehensive program content including the implementation of curriculum that is aligned with the state early learning standards. If the district is also rated under the state Parent Aware program, they must use a curriculum from the approved list or complete the curriculum approval process if using a self-designed curriculum.
- 22 A program review process was developed and implemented in 2018-2019 that reviewed 2017-2018 practices. This included curriculum use and implementation practices.
- 23 Programs are required to provide comprehensive program content including the implementation of curriculum, assessment, and instructional strategies aligned with the ECIPs, and kindergarten through grade 3 academic standards.
- 24 If schools choose to use subject specific curricula, they must be bundled with other subject specific curricula so that there is a comprehensive instructional approach in the preschool classroom.
- 25 VPK Statute requires that teachers are knowledgeable in early childhood curriculum content, assessment, native and English language development programs, and instruction. Statute also requires that VPK instructional staff receive salaries comparable to the salaries of local kindergarten through grade 12 instructional staff. These requirements apply to VPK public, charter, Head Start, or community mixed-delivery site partners. The preferred licensure is Early Childhood Education (Birth-Grade 3) or a Pre-Primary endorsement (Age 3-Pre-K) or the older Pre-kindergarten (Pre-K) license. Implementation guidelines suggest that someone who is appropriately licensed be hired. Programs determine if a candidate with an elementary teaching licensure has the background and experience appropriate for preschool. If a program has advertised but cannot find a licensed teacher meeting the requirements, they may request a variance for another fully licensed teacher to teach outside of their licensure area.
- 26 Assistant teacher requirements are determined by the district/charter school hiring and personnel practices. In the case of a mixed-delivery Head Start or community-based partner, the assistant teacher would follow the regulatory agency requirements for that position.
- 27 By statute, VPK sites are required to provide high-quality coordinated professional development, training, and coaching for both school district and community-based early learning providers that is informed by a measure of adult-child interactions and enables teachers to be highly knowledgeable in early childhood curriculum content, assessment, native and English language development programs, and instruction. Four measures of adult-child interactions have been recommended: CLASS, Danielson, Marzano, and TPOT.
- 28 Professional development plans are informed by an observational measure of adult-child interactions and enable teachers to be highly knowledgeable in early childhood curriculum content, assessment, native and English language development programs, and instruction. Districts/charter schools must also implement strategies that support the alignment of professional development, instruction, assessments, and pre-kindergarten through grade three curricula. Districts/charters schools locally form practices that meet these requirements.
- 29 This varies by district/charter school established practices and meets local and state licensing and continuing education requirements. For child care centers this information is recorded in state DEVELOP system.
- 30 VPK/SRP is funded through general education funds and is considered a grade level. VPK statute requires staff salaries that are comparable to local K-12 instructional staff. School districts/charter schools contracting with other entities for a VPK program need to ensure the salaries paid to the teachers for the hours deemed as VPK are comparable to district K-12 instructional staff.
- 31 The statute language for professional development does not call out paid time other than "comparably compensated to K-12 teachers." It does state that VPK must: provide high-quality coordinated professional development, training, and coaching for both school district and community-based early learning providers that is informed by a measure of adult-child interactions and enables teachers to be highly knowledgeable in early childhood curriculum content, assessment, native and English language development programs, and instruction; and implement strategies that support the alignment of professional development, instruction, assessments, and prekindergarten through grade 3 curricula.
- 32 Teachers do have access to TEACH scholarships in Minnesota. The mentoring of staff for professional development is a result of the requirement that all teachers be

- observed using an appropriate teacher-child interaction tool (CLASS, TPOT, Danielson, or Marzano). Other opportunities provided by the state include assessment tool training workshops, Parent Engagement symposiums, and Pre-K Leadership series which districts participate in with teams that include pre-K teachers.
- 33 The LEAD teacher incentive is through the statute language that requires comparable pay. Districts must show MDE how they are accomplishing that. At this time the results have not been analyzed formally, but it appears that there has been an increase in pre-K teachers being placed on master contract agreements.
  - 34 Minnesota has been working on issues of Early Childhood Workforce Compensation as part of the National Governor's Association work group. This is a topic of interest and ongoing work in Minnesota.
  - 35 Assistant teacher requirements are determined by the district/charter school hiring and personnel practices. In the case of a mixed-delivery Head Start or community-based partner, the assistant teacher would follow the regulatory agency requirements for that position.
  - 36 Programs exist in Minnesota like TEACH that can support educational gain, but decisions are made locally.
  - 37 The funding is appropriated from the general fund to the Department of Education for the fiscal year. In 2017-2018 the allocation was \$21,429,000 of new money for an additional 3,000 seats.
  - 38 Funding for the VPK grade level is based on head counts and Average Daily Membership (ADM). Students enrolled in the pre-kindergarten grade level and designated in MARSS (the state student data system) to generate funding will generate all pupil-driven formulas including compensatory and sparsity. Elementary sites are approved for a capped number of students. Schools can only receive funding up to the approved number of students and ADM for each approved site. By law, VPK at participating sites can generate up to 0.6 pupil unit. The actual pupil units per student is based on the program's calendar and could be less than 0.6 per student, but not less than .41 to meet the required 350 hours of instruction. Funding flows like other K-12 general education revenue streams.
  - 39 Districts and charter schools are encouraged to partner with Head Start and other community-based child care programs. In the case of a partnership, the public school must have on file a Memorandum of Understanding (MOU) and a contract that specifies duties, responsibilities and financial agreements between partners.
  - 40 Districts and charter schools are encouraged to use the selected assessment tool according to publisher recommendations; however, they are only required to report the data to MDE when the child enters and again before the child leaves the program for the voluntary pre-kindergarten program. School Readiness Plus sites may choose to be part of the reporting process if they choose to use one of the KEP approved assessment tools that are required of VPK sites.
  - 41 For additional information, see: <https://education.mn.gov/MDE/dse/early/curr/>
  - 42 Children are assessed at entry and exit using a KEP approved assessment tool. The data is shared with the state agency as part of the district's annual Impact Measure Report.
  - 43 The Kindergarten Entry Profile (KEP) Initiative supports districts, school administrators, and teachers by providing districts/charter schools with a menu of high quality, comprehensive assessment tools to help them obtain a comprehensive profile of children entering kindergarten in order to inform their practice and programming. Participation in the KEP is voluntary. All tools on the KEP list provide real-time data to schools in order to help guide instructional planning and teaching practices based on the learning needs of kindergarten students. Kindergarten staff may use other locally chosen assessment tools throughout the year.
  - 44 The approved Kindergarten Entry Profile assessment tools include: Desired Results Developmental Profile (DRDP), DevMilestones, Teaching Strategies GOLD, and Work Sampling System. Kindergarten staff can use any assessment throughout the year.
  - 45 VPK programs are expected to use a measure of adult-child interaction as a tool to provide formative feedback. MDE encourages programs to use the CLASS, Danielson Framework, Marzano, or TPOT. Some tools are more general to teaching at all grade levels and content areas. When using these tools, it is imperative that the person conducting the observation, use an age level version of the tool when available and discuss what has been seen, with an understanding of the unique aspects of the way young children learn and best/promising practices in early childhood to enhance learning. Professionals administering the tools should complete be trained on the use of the selected tool.
  - 46 MDE guidance for VPK and SRP states that regardless of the tool used, the evaluation is intended to provide opportunities for discussion and as a guide in developing an individualized professional development plan.
  - 47 A high percentage of schools participating in VPK voluntarily participate in the state Parent Aware QRIS, over 85%.

### MISSISSIPPI - Mississippi Early Learning Collaborative (ELCs)

- 1 The majority of the Early Learning Collaboratives (ELCs) are led by school districts, but some are led by nonprofit organizations. A few ELCs include multiple school districts. ELCs operate in 14 out of 82 counties in the state.
- 2 An additional 176 5-year-olds and 123 3-year-olds were served but state funding supports only 4-year-olds.
- 3 The children that are enrolled at those Head Start partner sites are considered to be dually enrolled. The total number of children who are dually enrolled in the ELC and Head Start, including 3- and 5-year-olds, is 1,029.
- 4 Enrollment by program location includes 3- and 5-year-olds not supported by state funding. Enrollment for "Private Settings" includes 15 children enrolled at private schools and 94 children enrolled in child care programs.
- 5 Enrollment by program operating schedule includes 3- and 5-year-olds not supported by state funding.
- 6 Programs included in the ELCs do have the option to operate for more than 6 hours per day; however, funding does not increase should they elect to do so. Programs included in the ELCs do have the option to operate for fewer than 6 hours per day, however, funding is decreased by 1/2 should they elect to do so.
- 7 Eligibility at some of the Collaborative partner sites is determined by individual child or family characteristics in addition to age. Some of the ELC partners are Head Start sites, which have an income requirement for eligibility. Eligibility is coordinated with Head Start agencies in local areas and shall not cause a reduction in the number of children served by Head Start.
- 8 The Developmental screener used for the 2017-2018 school year was the Brigance III. This assessment was used at least twice on each enrolled child during the school year. Scores from use of the Brigance III showed growth across all sites. Children are required to be referred to services when needs are identified.
- 9 All programs are provided with developmental checklists, which are aligned with the Early Learning Standards for use with individual children and inclusion in kindergarten transition folders.
- 10 ELCs can use state pre-K funding to pay for PD to be provided by curriculum developers to support curriculum implementation.
- 11 Curriculum implementation fidelity is required of all programs and is monitored annually through onsite visits, including classroom observations.
- 12 Cohort I could continue to use a curriculum previously approved by the Mississippi Department of Education (MDE) until they purchase/update their existing curriculum. These curricula include: Opening the World of Learning (OWL), Creative Curriculum, Big Day for PreK, Galileo, and Frog Street. Cohort II was required to use only OWL starting on January 1, 2017. On July 1, 2019, all Cohorts will utilize OWL exclusively.
- 13 In order to serve as a lead teacher in a Pre-K classroom, educators must possess a Pre-K/K teaching license; or a K-3/K-4 teaching license with either 12 hours of ECE college credit, or Praxis 5024, or completion of an approved educational program; or a K-6 teaching license with either an N-1 supplemental endorsement, or Praxis 5024, or completion of an approved educational program; or any teaching license and a degree required to obtain a Pre-K/K, K-3, K-4, K-6 teaching license with either 12 hours of ECD college credit, Praxis 5024, or completion of an approved educational program; or an ECE degree with no teaching license but with Praxis Core AND Praxis II and Praxis 5024. Currently approved educational programs include either a CDA, National Board Pre-K Certification, National Director's Credential, Montessori Credential, or the MDE Boot Camp course. ELC teachers at sites that are not accredited by the MDE are not required to obtain a license, but must have a bachelor's degree in early childhood, complete at least 12 hours of early childhood college credit, or complete an approved early childhood program.
- 14 Assistant teachers are required to have an Associate's degree in Early Childhood Education, Child Development, or an equivalent field; or an associate degree in any field and a Child Development Associate credential, a Montessori certification, or an equivalent certification.
- 15 If classrooms/sites are placed on probation as a result of annual monitoring visits, teachers in such classrooms are required to have PD plans to address findings included in monitoring deficiencies.
- 16 The state funds support four-year-old children. Programs can serve three- and five-year-old children that can benefit from the program but are not paid for through the state funds. The amount listed from non-required local sources is the total amount of tax credit donations received for the 2017 tax year.

- <sup>17</sup> The state provides \$2,150 per full-time 4-year-old child enrolled. The ELC provides a 1:1 dollar for dollar or in-kind match to make the total investment for each child \$4,300.
- <sup>18</sup> The Mississippi State Kindergarten Readiness Assessment (KRA) is administered twice a year. For preschool, the ELC also uses selected assessments, used at various times throughout the year, and are aligned with the standards.
- <sup>19</sup> The Mississippi State KRA is required along with Brigance Screen III. Some collaboratives use the Star Early Learning Assessment as their progress monitoring tool.
- <sup>20</sup> Assessment proctors are not required to be reliable to the Mississippi KRA tool because the tool is taken online by students. The Brigance III is administered twice a year by classroom teachers. As this tool is designed to be administered by classroom teachers, no additional reliability protocol is required.
- <sup>21</sup> The Mississippi State KRA is administered twice a year, entry and end of year.
- <sup>22</sup> Data from observations is entered into the MyTeachstone system for the purposes of scoring individual observations and reporting on data collected across programs.

### **MISSOURI - Missouri Preschool Program (MPP)**

- <sup>1</sup> All early childhood personnel have multiple roles and therefore the state cannot quantify the number of FTEs.
- <sup>2</sup> Missouri Preschool Program (MPP) contracts are awarded through a competitive bid process, with the grants limited to five years. Therefore, the number of programs and children served changes every year.
- <sup>3</sup> Programs must provide 6.5 hours of educational activities appropriate to the developmental level of the child per day between the hours of 7:30 AM and 5:00 PM. Only governmental entities or public school districts (awarded funding prior to FY16) can provide a part-day program (minimum of 3 hours) to better serve those children participating in other district programs, such as Title 1 and/or early childhood special education.
- <sup>4</sup> Preschool programs are required to operate five days per week. However, public schools that implement a four-day school week for their K-12 grade levels can also implement a four-day schedule for the preschool program. The length of the preschool day is expected to mirror the length of the K-12 day.
- <sup>5</sup> Preschool programs must provide educational activities appropriate to the developmental level of the child 12 months a year. Only governmental entities or public school districts may provide preschool services for the school year, but no less.
- <sup>6</sup> Eligibility is determined by age, with all other eligibility requirements determined locally.
- <sup>7</sup> If a preschool program charges a fee for preschool, they must implement a sliding scale fee.
- <sup>8</sup> Part-day programs are required to provide one meal or one snack. School-day programs are required to provide one meal and two snacks or two meals and one snack.
- <sup>9</sup> All preschool programs are required to partner with their local Parents as Teachers (PAT) program which provides parent education and health and developmental screenings. In addition, PAT also provides referrals to services that may be beneficial to the family based on need/request.
- <sup>10</sup> This is determined at the local level.
- <sup>11</sup> Missouri Department of Elementary and Secondary Education does not have a specific policy on expulsion and suspension, however, there are policies for expulsion and suspension in licensing and accreditation standards. All of Missouri's state funded programs must be licensed and must meet accreditation by the end of the third year of funding.
- <sup>12</sup> Missouri Early Learning Goals cover children from infants through kindergarten entry. New K-12 standards were approved in April 2016.
- <sup>13</sup> Support for implementation of curriculum is provided by onsite consultation.
- <sup>14</sup> Lead teachers must have Early Childhood Teacher Certification, Early Childhood Special Education Teacher Certification, or a four-year college degree in CD.
- <sup>15</sup> Assistant teachers must have a CDA, two-year Associate Degree in Child Care/Education or 60 college hours with a minimum of three college credit hours in early childhood, CD, or child/family related courses and experiences working in a program with young children and their families.
- <sup>16</sup> Certificated teachers have state certification requirements for individualized PD plans.
- <sup>17</sup> Each state funded classroom has a consultant assigned who will review the information receive from the ECERS and provide guidance for improvement.
- <sup>18</sup> Missouri is piloting the Quality Assurance Report.
- <sup>19</sup> Consultant visits are required: first year programs (site visit); second year programs (10% are monitored); third year programs (100% are reviewed through the accreditation process); fourth/fifth year programs (monitoring based on ECERS-3 and consultant reports).

### **MONTANA - Montana STARS Preschool Pilot Program**

- <sup>1</sup> Numbers reflect total enrollment as of January 2018. The STARS Preschool Pilot program funded classrooms located in family, group, center, Head Start and public school settings.
- <sup>2</sup> The 2019 Legislature is considering funding for preschool.
- <sup>3</sup> 2017-2018 was the first year of Montana's state funded STARS Preschool Pilot program. One Head Start grantee was selected to participate. Montana funded two classrooms entirely with state funds and the classrooms were located in Head Start grantees' buildings in two cities within one county.
- <sup>4</sup> Enrollment by race is self-reported by parents, and not all parents completed the survey. Therefore, enrollment by race does not equal the total enrollment.
- <sup>5</sup> Programs are required to operate a minimum of 5.5 hours per day or 28 hours per week and operate in coordination with the local school calendar.
- <sup>6</sup> School districts may enroll children younger than 5 years old in kindergarten programs by special permission of the school board.
- <sup>7</sup> STARS Preschool Pilot programs were encouraged to enroll a minimum of 25% high needs students including, but not limited to: children who are low income; children receiving services from IDEA Part B or Part C; children who are engaged in mental health services and supports; children who are enrolled Tribal Members; and children who are homeless or at risk of becoming homeless.
- <sup>8</sup> The STARS Preschool Pilot program has a mixed-delivery model for 4-year-olds and 5-year-olds repeating their 4-year-old year. We have family, group and center childcare providers as well as Head Starts and LEA's. All private providers have additional limitations based on the number of children they are licensed to serve. Programs may request a waiver to serve up to 20 students in one classroom.
- <sup>9</sup> The STARS Preschool Pilot program doesn't address meal requirements, but all programs report providing both snack and lunch.
- <sup>10</sup> Programs must offer screenings or, at a minimum, connect parents and children through referral for screenings and support. A program may offer screenings, or refer children to be screened elsewhere. There is not currently a requirement for programs to act upon the results of the screening through referral.
- <sup>11</sup> There are no rules specific to the STARS Preschool Pilot program, but districts must comply with state special education rules.
- <sup>12</sup> Programs are required to select an evidence-based curriculum and, while a list was not provided, programs did receive guidance on what was acceptable. All programs were offered on-site support for curriculum implementation through coaching.
- <sup>13</sup> Teachers employed by public schools are required to have a Bachelor's Degree, plus P-3 endorsement. Teachers employed by nonpublic schools are required to have a Bachelor's Degree, plus 20 credits in ECE.
- <sup>14</sup> Assistant teachers must have two years of study in higher education, or an Associate's Degree, in a related field. Programs with teacher assistants who have specific ECE knowledge and experience are prioritized when programs are being evaluated for funding.
- <sup>15</sup> Other refers to lead teachers without a Bachelor's Degree, however, highest level of education is unknown. Lead teachers that do not meet required qualifications are required to mentored by a qualified teacher and continue working to meet the standards.
- <sup>16</sup> For private programs in the QRIS, incentive pay is given at each star level, and a percentage of that funding must go to support staff salaries.
- <sup>17</sup> STARS preschool partnered with many federal programs but did not use any funding from these sources to support preschool.

- <sup>18</sup> There are no restrictions about subcontracting.
- <sup>19</sup> Programs were required to have a 10% match, either in-kind or cash.
- <sup>20</sup> The results of the observation tools help direct on-site coaching support. As a condition of the grant, coaching support is required and on-going.
- <sup>21</sup> All private providers are required to participate in the QRIS.
- <sup>22</sup> The state included activities to support a shared data system in its PDG B-5 application.

**NEBRASKA - Nebraska Early Childhood Education Program**

- <sup>1</sup> Early childhood programs are spread throughout the state in urban and rural areas. The school districts without preschool classrooms have very few students and cover a large geographic area.
- <sup>2</sup> Some school districts begin a program, or add capacity, with the help of competitive grants. Other school districts may start a program without grant funding and may receive state aid funding for their 4-year-olds after three years of program approval.
- <sup>3</sup> The total number includes Early Head Start and Head Start, including 5 year-olds.
- <sup>4</sup> Most programs operate 3.5 to 4 hours per day, 4 or 5 days per week. Programs not receiving grant funds or not qualified to receive State Aid must operate a minimum of 12 hours per week during the school year. Schools are encouraged to partner with Head Start and community providers, but there is no formal agreement at the state level. Programs must operate at least 12 hours per week. Additionally, if districts receive State Aid (TEEOSA) or an early childhood grant, the program must operate at least 450 hours per year.
- <sup>5</sup> Students who are age eligible for kindergarten should not be enrolled in the state funded preschool program unless the IEP team determines that accommodations cannot be met in kindergarten. Students who turn 6 by January 1 of the school year must be enrolled in kindergarten, based on the mandatory attendance law.
- <sup>6</sup> Eligibility may be determined by low income, disability or developmental delay, low parent education, non-English speaking family, teen parent, or low birth weight. Although all prekindergarten age-eligible children may be served in a school district early childhood program, funds are targeted to children with at least one risk factor. Some districts enroll all age-eligible children, while others may use locally determined risk factors in addition to those specified by the state.
- <sup>7</sup> If charging fees, districts must utilize a sliding fee scale, but may set the scale at whatever level they choose to fit with their community. Children who are receiving services through Head Start or IDEA pay nothing.
- <sup>8</sup> A meal and/or snack meeting USDA requirements must be served each session.
- <sup>9</sup> A teacher with special education certification must be available and active.
- <sup>10</sup> Programs are required to provide a staff person who can serve as a language resource for classes where a majority of the children speak a common language other than English. In classrooms where children who do not speak English are served, but the majority of them do not speak the same language, the program must be able to provide a person to serve as a language resource when needed, but that person does not have to be staffed in the classroom.
- <sup>11</sup> The state's definition of chronic absenteeism and related policies are still under development.
- <sup>12</sup> All school districts and ESUs are required to use a common child assessment to document child development and attainment of skills.
- <sup>13</sup> If teachers have endorsements other than those listed, they must take college coursework and make annual progress until they obtain an early childhood endorsement. Regardless of where the classroom is housed, it is considered a public school program.
- <sup>14</sup> Assistant teachers are required to have 6 college credit hours in early childhood or an approved equivalency by the end of the first year of employment and 12 college credit hours in early childhood or an approved equivalency by the end of the second year of employment. A CDA is considered an equivalency for the entire 12 college credit hours.
- <sup>15</sup> At least one staff member per class who has received pediatric first aid and CPR training is required to be on duty at all times.
- <sup>16</sup> Classroom embedded support is not required but is available for school district classrooms that participate in the state QRIS. Teachers in schools that are implementing the Pyramid Model program-wide must receive coaching.
- <sup>17</sup> Coaches may be contracted for part-time or full-time. Case load data is not available.
- <sup>18</sup> School District personnel contracts are subject to collective bargaining agreements that cover both K-12 and pre-K teachers. All collective bargaining agreements are locally determined. Early Childhood programs are operated by school districts but may be collaboratively operated with a community based provider or Head Start program. Every classroom must be staffed by a certificated teacher regardless of the entity in the collaboration that actually employs the teacher. NDE has no authority to require parity in private organization salary scales.
- <sup>19</sup> Professional development time and paid time for professional development for assistant teachers is governed by local collective bargaining agreements. The state does not have an overarching policy regarding payment of non-instructional hours.
- <sup>20</sup> Some of these supports are available through statewide programs but they are not required.
- <sup>21</sup> State Aid: \$21,014,623; 3-5 Grant: \$3,478,997; Below Age Five Flex Spending: \$303,288
- <sup>22</sup> School districts that have met requirements to have an approved early childhood program for the required number of years are qualified to be part of the State aid calculations which are based on the number of 4-year-olds multiplied by the number of hours in session multiplied by 0.6. The district's overall need calculation is matched to their ability to fund the need. If the district's need outweighs the district's ability to fund the need, then the district is eligible to receive the state aid.
- <sup>23</sup> Local sources include local district funds, parent fees, community agencies and resources, and other sources. Funding for the program includes an allocation for the grant program, as well as funding in the state aid formula. In the third year of approval by the NDE, the count of 4-year-olds is put into the formula along with other data. Equalization aid is then calculated for the next year.
- <sup>24</sup> Observations of child progress are made continually throughout the year; however, data is finalized at standard checkpoints.
- <sup>25</sup> If districts utilize Title 1 or Head Start funding in the pre-K program, they must also assess the following domains: Science and Technology, Social Studies and the Arts.
- <sup>26</sup> Assessors must complete interrater reliability once every three years for all ages groups that the assessor assesses.
- <sup>27</sup> In addition to low performing classrooms and new classrooms/teachers, any district that receives grant funding for their 3-5 prekindergarten program or a grant for the Pyramid project, a percentage of other classrooms also received an observation each year. All classroom observations that did not meet the designated quality score received a second observation to continue to work towards improvement with the goal to meet the designated quality score. Observations continue biannually until the score is met.
- <sup>28</sup> Participation is voluntary, but highly encouraged.
- <sup>29</sup> All districts submit an annual program report. Visits are scheduled based on the responses. Districts that receive grant funding to support their prekindergarten program receive on-site visits at least annually.
- <sup>30</sup> The development of ECIDS has been an ongoing project spanning many years. Currently, enrollment data for any child served by a school district program for infants, toddlers, or preschool - including Pre-K and K-12. This includes children served by IDEA Parts C and B-619.

**NEVADA - Nevada State Pre-Kindergarten Program**

- <sup>1</sup> State Pre-K grantees include 10 school districts and 1 community-based organization. Eleven districts/community organizations received State Pre-K funding this biennium that meet state pre-K guidelines; additional districts offer other pre-K programs funded through Title I, Zoom DLL, Victory, and/or PDG funding.
- <sup>2</sup> The total enrollment is different from the enrollment by age because there were 8 children reported as "unknown" or not reported.
- <sup>3</sup> A total of 1,996 of the total 2,171 state Pre-K children served were enhanced to full-day through additional PDG funds. The remaining 175 state pre-K slots were half-day. In addition, 1,201 new slots were created with PDG only funding.

- 4 The new Governor's budget currently includes all funding necessary to maintain all current State Pre-K and PDG slots. This Budget is pending on legislators' approval and the election of a new Governor this fall.
- 5 Income data were not available for four children. In addition, the total number of children is less than the total enrollment in pre-K because the income is by family, and several families have multiple children in pre-K.
- 6 Nine children did not have reported data for ethnicity and three children did not have reported data for race. Asian and Pacific Islander categories are reported together.
- 7 All State Pre-K programs are in school districts except one which is located at Great Basin College (21 children).
- 8 Half-day programs must operate a minimum of 10 hours per week; and full-day programs must operate a minimum of 25 hours per week which is either 5 days per week (5 hours per day) or 4 days per week (6.25 hours per day). A total of 1,996 slots have been expanded to full-day through braiding funds with PDG; and 175 slots remained half-day.
- 9 There is no formal partnership, but all districts/programs receiving PDG funds must be extended to school-day or extended-day and provide comprehensive services.
- 10 The majority of programs are 5 days per week; but some rural programs follow a 4 day per week schedule for their whole district.
- 11 Most programs follow the school year.
- 12 Districts/programs only receive PDG funding for 4-year-olds, so if they serve 3-year-olds they must braid funds with other sources.
- 13 Children who are eligible for kindergarten are not eligible for State Pre-K unless a local determination is made based on the child's IEP.
- 14 Districts or programs determine eligibility based on highest need (i.e., low income, DLLs, homeless, etc.). Children must be from families at or below 200% FPL to receive PDG funding.
- 15 State Pre-K funds are awarded through competitive grants with those districts or programs serving the highest number of children in families at or below 200% of FPL receiving priority. Programs receive additional PDG funds for every child that meets the 200% FPL guideline.
- 16 Re-determination is not included in state policy, but is permitted at the discretion of districts if claims of irregular attendance are verified or if claims that a family moves outside of the district are substantiated and it is determined appropriate to fill the space with another child on the waiting list.
- 17 Programs are required to follow NAEYC guidelines.
- 18 Full-day programs, as supported by the PDG grant, must provide meals (i.e. all provide lunch and some provide breakfast as well). The remaining half-day programs are only required to provide snacks.
- 19 Screenings are encouraged, and are locally determined. All programs are required to conduct the Brigance Screen III.
- 20 Districts/Programs are required to follow protocol for Child Find.
- 21 Through PDG, districts/programs are required to at least offer comprehensive services.
- 22 Programs are required to serve a minimum of 2 children with an IEP and a maximum of 9 in a class of 20 (less than 50%). It is encouraged that programs serve between 5-7 children with IEPs if possible.
- 23 Senate Bill 390 allocates over \$50M for DLLs Pre-K-Grade 4.
- 24 The state is in the process of creating birth-3rd grade standards as a more comprehensive document. The state also recently adopted SEL standards for K-12.
- 25 As a requirement of PDG, all programs were required to select at least one comprehensive assessment to work towards implementation. The majority of the districts chose either TS GOLD or Brigance IED.
- 26 Implementation of curricula is reviewed during the competitive application process and site visits.
- 27 District employees follow same guidelines as for their K-3 teachers.
- 28 Teachers are eligible for T.E.A.C.H. scholarships and/or may enroll in an Alternative Route to License (ARL) program.
- 29 Districts determine the pay schedule of assistants. Private child care programs are encouraged to follow a similar pay scale.
- 30 The State offers T.E.A.C.H. scholarships for assistants, but does not require them.
- 31 Title I funds were also used to support some state Pre-K programs, but the total amount used is not available. Zoom (DLL) funding used for Pre-K separate from State Pre-K was \$8.5 million used to serve an additional 1,736 children in half-day programs. PDG federal total for expanding existing state Pre-K: \$10.6M; PDG state total for expanding existing state Pre-K: \$5.4M; State Pre-K existing: \$3,338,875
- 32 State Pre-K programs are required to complete pre and post Brigance Screens. They are also in the process of implementing a comprehensive assessment of their choosing.
- 33 Additional assessment grants were awarded to 11 school districts/programs to implement a comprehensive assessment of their choosing: 5 selected Brigance IED; 5 used TS GOLD; and one selected Curiosity Corner.
- 34 All kindergartens are required to use the Brigance Screener.
- 35 All State Pre-K classrooms that receive PDG funds are required to participate in QRIS. Currently, there are not enough funds to fully support QRIS participation for all pre-K programs, thus limiting coaching support, especially in rural districts. Classrooms are randomly selected by school site that may be observed in a given year. This includes all classrooms at that site regardless of funding stream.
- 36 Both the state and QRIS representatives are required to visit programs multiple time each year.
- 37 Nevada is working to include all early childhood programs 0-5 in the state system (Infinite Campus), but it is not fully operational to date.

### **NEW JERSEY - New Jersey Former Abbott Preschool Program**

- 1 Primary oversight for the preschool education program is through the state Department of Education's (DOE) Division of Early Childhood Education and Family Engagement. The Department of Children and Families oversees licensing of private preschool providers. The Department of Human Services (DHS) has oversight of the wraparound program. The State Head Start Collaboration office serves as a liaison between Head Start agencies and all of the other listed Departments.
- 2 Thirty-one districts are required to offer the program due to a state Supreme Court decision. The remaining four districts are required to offer the program after applying to expand their existing program, beginning in the 2008-2009 school year. The state allowed eight charter schools in former Abbott districts to house preschool programs as well.
- 3 Data about eligibility for free or reduced price lunch is district-reported.
- 4 Enrollment in private settings includes both Head Start and other private child care centers.
- 5 The DOE funds the program for the school calendar year and day. All programs must operate for at least six hours per day. Some programs offer extended-day programs with an additional four hours of wraparound care for income-eligible children. The wraparound program is funded through DHS. Some districts have also used surplus or Title 1 funds to provide summer programs.
- 6 Kindergarten age-eligible children with an IEP that requires enrollment in a preschool program may enroll in the program, but are funded through special education.
- 7 The program is offered in the urban, low-income districts initially identified by the New Jersey Supreme Court in 1990 as having at least 40% of children who qualify for free or reduced-price lunch, as well as in four additional districts that applied under a provision in 2008. All 3- and 4-year-old children within those districts are eligible to participate.
- 8 Only district residents are eligible for the program. Children who move outside of the district would no longer be eligible to attend the program. Districts continually monitor to ensure children are still district residents and are therefore still eligible for the program.
- 9 All programs are required to employ a Community Parent Involvement Specialist to connect families with social services such as mental health services and insurance. In

addition, contracted private providers are required to employ family workers for this same purpose.

- <sup>10</sup> Districts must follow state guidance in the recording of attendance for all preschool students enrolled in New Jersey public schools. Preschool students are not included in the calculation of school and district accountability scores for chronic absenteeism, but preschool chronic absenteeism rates are displayed in school-level performance reports.
- <sup>11</sup> The state has four recommended curricula, but they are not required.
- <sup>12</sup> Teachers with a Standard Elementary School Endorsement (preschool through grade eight) may teach preschool if they have an equivalent of two academic years of full-time experience teaching 3- and 4-year-olds or demonstrate content knowledge in line with district-established documentation requirements. Additionally, teachers with the following certifications may apply for preschool licensure, take the Praxis exam, and begin the process of obtaining a P-3 certificate: K-5 certificate, out-of-state certificate that includes preschool, Teacher of the Blind or Partially Sighted, Teacher of the Deaf or Hard of Hearing, Teacher of the Handicapped certificate, or Teacher of Students with Disabilities certificate. Nursery school (P-K) is no longer granted, but is still recognized for current holders.
- <sup>13</sup> In districts or schools supported by Title I funding, assistant teachers are required to meet the education/degree requirements specified for Title 1.
- <sup>14</sup> Requiring individualized PD plans for assistant teachers is a district decision. Some districts have begun contracting with external entities for the assistant teacher position and may not require the outside entity to provide a PD plan.
- <sup>15</sup> Master teachers/coaches are provided at a ratio of one coach for 20 classrooms.
- <sup>16</sup> Districts with large percentages of DLL children are required to have bilingual specialist master teachers available to provide support to teachers and fellow master teachers in the education of DLL preschoolers.
- <sup>17</sup> All starting salaries are determined by the local district.
- <sup>18</sup> Districts receive a per pupil amount for each projected child depending on where the child is being served (district, Head Start, or private provider setting). However, if this amount provides less for the district than it received in the 2008-2009 school year, the district's aid reverts back to what it was in the 2008-2009 school year.
- <sup>19</sup> School districts are permitted to subcontract with faith-based programs without religious content during the school day.
- <sup>20</sup> To identify areas in need of support.
- <sup>21</sup> KEA participation is voluntary.
- <sup>22</sup> Districts can choose between Danielson and Marzano for their teacher evaluations.
- <sup>23</sup> The Self-Assessment and Validation System (SAVS) is administered locally and submitted to the state. Annually, a subset of district assessments is directly validated by the state. District assessments are validated at least once every three years. The results of the SAVS are used as the basis for program planning and incorporated into the district's annual Preschool Program Plan.

### **NEW JERSEY - New Jersey Former Non-Abbott Early Childhood Program Aid (ECPA)**

- <sup>1</sup> Primary oversight for the preschool education program is through the state Department of Education's (DOE) Division of Early Childhood Education and Family Engagement. The Department of Children and Families oversees licensing of private preschool providers. The Department of Human Services (DHS) has oversight of the wraparound program. The State Head Start Collaboration office serves as a liaison between Head Start agencies and all of the other listed Departments.
- <sup>2</sup> Required for specific districts where, in the late 1990's, between 20% and 40% of children were eligible for free or reduced-price lunch.
- <sup>3</sup> Enrollment in private settings includes both Head Start and other private child care centers.
- <sup>4</sup> Districts may operate either a part-day (2.5 hours per day) or school-day (6 hours per day) program. DHS funding may be used to extend beyond a full-day for income-eligible children. Some school-day children may receive extended-day services, but the number of students is unknown. The DOE funds the program for the school year. If the district or provider runs a wrap-around program through DHS, the program would then extend services for the full calendar year.
- <sup>5</sup> Kindergarten age-eligible children with an IEP that requires enrollment in a preschool program may enroll in the program, but are funded through special education.
- <sup>6</sup> Only district residents are eligible for the program. Children who move outside of the district would no longer be eligible to attend the program. Districts continually monitor to ensure children are still district residents and are therefore still eligible for the program.
- <sup>7</sup> Breakfast, lunch, and snack are required for at-risk students in school- and extended-day programs. For children in half-day programs, a "meal" (which can be breakfast, lunch or snack) is required for every 2.5 hours the children are present. Although not specified in the Early Childhood Administrative Code, meals provided in school programs must meet USDA guidelines.
- <sup>8</sup> Districts must follow state guidance in the recording of attendance for all preschool students enrolled in New Jersey public schools. Preschool students are not included in the calculation of school and district accountability scores for chronic absenteeism, but preschool chronic absenteeism rates are displayed in school-level performance reports.
- <sup>9</sup> The state has four recommended curricula, but they are not required.
- <sup>10</sup> Teachers with a Standard Elementary School Endorsement (preschool through grade eight) may teach preschool if they have an equivalent of two academic years of full-time experience teaching 3- and 4-year-olds or demonstrate content knowledge in line with district-established documentation requirements. Additionally, teachers with the following certifications may apply for preschool licensure, take the Praxis exam, and begin the process of obtaining a P-3 certificate: K-5 certificate, out-of-state certificate that includes preschool, Teacher of the Blind or Partially Sighted, Teacher of the Deaf or Hard of Hearing, Teacher of the Handicapped certificate, or Teacher of Students with Disabilities certificate. Nursery school (P-K) is no longer granted, but is still recognized for current holders.
- <sup>11</sup> In districts or schools supported by Title I funding, assistant teachers are required to meet the education/degree requirements specified for Title 1.
- <sup>12</sup> Requiring individualized PD plans for assistant teachers is a district decision. Some districts have begun contracting with external entities for the assistant teacher position and may not require the outside entity to provide a PD plan.
- <sup>13</sup> Data not available for Early Childhood Program Aid (ECPA) districts, but all lead teachers are required to have at least a Bachelor's Degree.
- <sup>14</sup> Districts with large percentages of DLL children are required to have bilingual specialist master teachers available to provide support to teachers and fellow master teachers in the education of DLL preschoolers.
- <sup>15</sup> All starting salaries are determined by the local district.
- <sup>16</sup> All state funding is technically run from the state aid formula. However, for the 2017-2018 school year, the former ECPA districts were funded in a manner similar to prior years, which was not according to the funding formula. Districts may, but are not required to, contribute local funding to the operation of the program.
- <sup>17</sup> School districts are permitted to contract with Head Start, private agencies, and faith-based centers (without religious content), but very few do so.
- <sup>18</sup> To identify areas in need of support.
- <sup>19</sup> KEA participation is voluntary.
- <sup>20</sup> Districts can choose between Danielson and Marzano for their teacher evaluations. TPOT and ECERS are recommended but not required in ECPA districts.
- <sup>21</sup> PEG-supported programs and Preschool Education Expansion Aid (PEEA) districts are required to participate in the state's QRIS.

### **NEW JERSEY - New Jersey Former Early Launch to Learning Initiative (ELLI)**

- <sup>1</sup> Primary oversight for the preschool education program is through the state Department of Education's (DOE) Division of Early Childhood Education and Family Engagement. The Department of Children and Families oversees licensing of private preschool providers. The Department of Human Services (DHS) has oversight of the wraparound program. The State Head Start Collaboration office serves as a liaison between Head Start agencies and all of the other listed Departments.
- <sup>2</sup> Nine of the Early Launch to Learning Initiative (ELLI) districts are also included in the count of Early Childhood Program Aid (ECPA) districts.

- <sup>3</sup> The enrollment count does not include 441 children who are already captured in enrollment figures for the ECPA program.
- <sup>4</sup> ELLI districts are allowed to contract with Head Start and private providers for services, but only three did for this school year.
- <sup>5</sup> Enrollment in private settings includes both Head Start and other private child care centers.
- <sup>6</sup> Some programs are part-day (at least 2.5 hours/day), some programs are school-day (at least six hours/day), and some programs offer a combination of both. Some programs participate in DHS wraparound for before- and after-care. The DOE funds the program for the school year. If the district or provider runs a wraparound program through DHS, the program would then extend services for the full calendar year.
- <sup>7</sup> Kindergarten age-eligible children with an IEP that requires enrollment in a preschool program may enroll in the program, but are funded through special education.
- <sup>8</sup> Children are required to qualify for free and reduced-price lunch (185% FPL) and be a resident of the district. However, districts may allow for other students in unusual circumstances to be eligible for the program. A district may make a case for establishing eligibility based on extenuating circumstances when submitting its annual preschool program plan.
- <sup>9</sup> Only district residents are eligible for the program. Children who move outside of the district would no longer be eligible to attend the program. Districts continually monitor to ensure children are still district residents and are therefore still eligible for the program.
- <sup>10</sup> For half-day programs, only snack is provided. For a full-day program, breakfast and lunch may be provided.
- <sup>11</sup> Districts must follow state guidance in the recording of attendance for all preschool students enrolled in New Jersey public schools. Preschool students are not included in the calculation of school and district accountability scores for chronic absenteeism, but preschool chronic absenteeism rates are displayed in school-level performance reports.
- <sup>12</sup> The state has four recommended curricula, but they are not required.
- <sup>13</sup> Teachers with a Standard Elementary School Endorsement (preschool through grade eight) may teach preschool if they have an equivalent of two academic years of full-time experience teaching 3- and 4-year-olds or demonstrate content knowledge in line with district-established documentation requirements. Additionally, teachers with the following certifications may apply for preschool licensure, take the Praxis exam, and begin the process of obtaining a P-3 certificate: K-5 certificate, out-of-state certificate that includes preschool, Teacher of the Blind or Partially Sighted, Teacher of the Deaf or Hard of Hearing, Teacher of the Handicapped certificate, or Teacher of Students with Disabilities certificate. Nursery school (P-K) is no longer granted, but is still recognized for current holders.
- <sup>14</sup> In districts or schools supported by Title I funding, assistant teachers are required to meet the education/degree requirements specified for Title 1.
- <sup>15</sup> Requiring individualized PD plans for assistant teachers is a district decision. Some districts have begun contracting with external entities for the assistant teacher position and may not require the outside entity to provide a PD plan.
- <sup>16</sup> Data not available for ELLI districts, but all lead teachers are required to have at least a Bachelor's Degree.
- <sup>17</sup> Districts with large percentages of DLL children are required to have bilingual specialist master teachers available to provide support to teachers and fellow master teachers in the education of DLL preschoolers.
- <sup>18</sup> All starting salaries are determined by the local district.
- <sup>19</sup> Some districts may use local funding to supplement state funding, but amounts are unknown. All state funding is technically run from the state aid formula. However, for the 2017-2018 school year, the former ELLI districts were funded in a manner similar to prior years, which was not according to the funding formula. Districts must use local funds or charge tuition to serve regular income/general education students and must also use special education funding to serve children with IEPs.
- <sup>20</sup> School districts are permitted to contract with Head Start, private agencies, and faith-based centers (without religious content), but very few do so.
- <sup>21</sup> To identify areas in need of support.
- <sup>22</sup> KEA participation is voluntary.
- <sup>23</sup> Districts can choose between Danielson and Marzano for their teacher evaluations. TPOT and ECERS are recommended but not required in ELLI districts.
- <sup>24</sup> PEG-supported programs and Preschool Education Expansion Aid (PEEA) districts are required to participate in the state's QRIS.

## NEW MEXICO - New Mexico PreK

- <sup>1</sup> Public school enrollment (PED) declined by from 5,849 to 5,405 from last year to this year due to districts converting half-day slots to full-day slots, which are funded at double the amount of half-day slots. The public school appropriation was level with the prior year, so no additional funds were available to increase awards. For the first time, PED Pre-K children were included in the public school data system, STARS, the Student-Teacher Accountability System. Some districts had issues with the first reporting periods, and this may also have impacted numbers of children in the system on October 1. In addition, programs were still enrolling children after this deadline.
- <sup>2</sup> There was an increase in special education enrollment in NM Pre-K due to more public school children being served in inclusive NM Pre-K settings rather than segregated special education settings.
- <sup>3</sup> The Children, Youth and Families Department funds NM Pre-K classrooms at Head Start sites. However, these Pre-K children are not enrolled in Head Start.
- <sup>4</sup> Public School families have the option to chose Hispanic as their child's race and 3,465 families chose this as an option. These children are noted in the Other Races category.
- <sup>5</sup> New Mexico funds two program schedules: half-day which is 450 total classroom hours; and NM Extended-day which is 900 total classroom hours. Half-day programs must operate at least 2.5 hours per day; and NM Extended-day programs must operate at least 5 hours per day.
- <sup>6</sup> Only programs funded by Children, Youth, and Families Department are allowed to serve 3-year-olds.
- <sup>7</sup> Funding priority is given to age-eligible children who live in the attendance zone of a Title 1 school.
- <sup>8</sup> Class sizes and staff to child ratios may be smaller in classrooms with children with IEPs, for example, one adult to four children.
- <sup>9</sup> One meal is required for half-day programs; two meals are required for NM Extended-day Pre-K and Early Pre-K programs.
- <sup>10</sup> All screenings must be completed by the third month of attendance. The components of a full physical exam are determined by the child's physician.
- <sup>11</sup> Nurses who provide health services for children are available in public school settings only.
- <sup>12</sup> In public school programs, up 40% of children may have IEPs if a percentage of those IEPs are for speech articulation only. If not, one third of the children may have IEPs.
- <sup>13</sup> New Mexico Pre-K has incorporated both Culture and Language into the Tiered Quality Rating System (TQRIS) as one of the components of Full Participation of Each Child.
- <sup>14</sup> Public School programs do not suspend or expel children.
- <sup>15</sup> Guidance for serving DLLs is included in the state's QRIS and in the NM Early Learning Guidelines. One of the essential elements of the QRIS is Culture and Language, Including the Support of Dual Language Learners.
- <sup>16</sup> CYFD: The Pre-K Comprehensive Consultation System provides monthly classroom visits, which include a 30-minute debriefing period with the teacher and educational assistant. PED: Moved from a consultation model to a practice based coaching model, providing 1 to 2 visits per month with a 30-minute debriefing period with teacher and educational assistant.
- <sup>17</sup> In order to ensure curriculum is implemented with fidelity, classroom walk-throughs and required weekly lesson plan forms are used as well as consultation, coaching, and monitoring.
- <sup>18</sup> Curricula are locally determined but must be aligned with the NM Early Learning Guidelines.
- <sup>19</sup> Teachers in nonpublic settings who do not yet possess a state-issued Early Childhood teaching license or BA degree must complete a minimum of six credit hours annually toward the degree or license. Teachers in public schools must hold at least a BA/BS and a teaching license in Early Childhood. If a public school teacher is hired who holds either a special education PreK-12 license or an Elementary K-8 license, that person must complete all requirements for an early childhood B-3rd grade or

- PreK-3rd grade teaching license within two years of hire.
- <sup>20</sup> Assistant teachers in both public and nonpublic settings are expected to have an AA in ECE, but may be hired without an AA with an approved PD plan to complete at least six college credits annually toward the requirement. New Mexico offers an Education Assistant license for P-12 in public settings only. For assistant teachers in nonpublic schools, training in ECE or CD is required upon hire.
  - <sup>21</sup> Health and safety PD is required and provided by Child Care Licensing and school districts.
  - <sup>22</sup> Average caseload for coaches is 14-20 classrooms. New teachers receive on-going additional support and caseloads are limited.
  - <sup>23</sup> Preschool program personnel benefits must include time for planning (at least two hours per week), daily classroom preparation, and any additional release time in compliance with teacher union contract, if applicable (see: [https://www.newmexicoprek.org/?page\\_id=1880&q=Program+Standards](https://www.newmexicoprek.org/?page_id=1880&q=Program+Standards)). Release time must include a minimum of 30 minutes to debrief following each Pre-K/FOCUS coaching visit.
  - <sup>24</sup> Minimum of 2 hours per week. For Public School Pre-K teachers, paid planning/PD must at least equal that to Kindergarten teachers.
  - <sup>25</sup> Faith-based programs cannot have religious content during Pre-K hours.
  - <sup>26</sup> The frequency of preschool assessments is dependent upon program setting and number of hours the program operated per year. For non-public schools twice annually for programs funded for 450 hours; three times annually for programs funded for 900 hours. For public schools, three times annually for all program types.
  - <sup>27</sup> The required assessment for all NM Pre-K is the New Mexico Preschool Observational Assessment, which is based on the New Mexico Early Learning Guidelines.
  - <sup>28</sup> Child growth data are used to evaluate the overall effectiveness of the state's Pre-K program to improve child outcomes.
  - <sup>29</sup> The Public Education Department requires all schools with kindergarten programs to conduct age-appropriate assessments to determine the placement of students at instructional level within the first 30 instructional days of the school year. Under the Race to the Top initiative, a state-wide Kindergarten Entry Assessment, the Kindergarten Observation Tool (KOT), was fully implemented in all public schools in the Fall of 2016. This assessment continues to be used in every public school kindergarten classroom. School districts and charter schools that receive Reads to Lead or K-3 Plus funding from the state must also conduct the 1st year literacy assessments. Other districts have local control of early literacy short-cycle assessments.
  - <sup>30</sup> All programs funded for NM Pre-K must participate in the state's QRIS. Public school programs must meet a STAR 5 level on the PED FOCUS QRIS within two years of funding.

### **NEW YORK - New York State Administered Prekindergarten Program**

- <sup>1</sup> New York State (NYS) has several separate pre-K funding streams, five of which are competitive awards. Universal Pre-K (UPK) is administered to school districts via an allocation grant award that is non-competitive. Of the approximately 700 school districts in NYS, roughly 440 districts have an award via this program. However, the funds and awardees for this program have been frozen for nearly a decade. For the last four years, school districts have been able to apply for additional funding via a competitive basis for five-year grant awards.
- <sup>2</sup> One competitive grant, the Expanded Prekindergarten Program, allowed school districts to apply to serve both 3- and 4-year olds as long as the number of slots for 3-year-olds did not exceed the number of slots for 4-year-olds in the district.
- <sup>3</sup> New York state has committed to including PDG funds in the state budget effective the 2019-2020 school year and going forward. The state is planning to roll the PDG funding and slots into allocations for the UPK program beginning in the 2019-2020 school year.
- <sup>4</sup> Both half-day and full-day programs are funded. Half-day programs must operate for a minimum of 2.5 hours per day. Full-day programs must operate for a minimum of 5 hours per day. Many programs opt to run a school-day or extended-day program using local funds or other funding sources.
- <sup>5</sup> Age-eligible children must be residents of the respective school district in order to enroll in state-funded Pre-K. For children served by the Federal Preschool Development Grant, eligibility is determined by an income requirement. Homeless children have priority for enrollment purposes.
- <sup>6</sup> The maximum class size for a Pre-K class is 20 children. For classes of up to 18 students, there must be one teacher and one paraprofessional assigned to each class. For classes of 19 or 20 students, there must be one teacher and two paraprofessionals assigned to each class.
- <sup>7</sup> Programs that are less than three hours require access to a nutritional meal or snack. Programs that are more than three hours require access to meals and snacks to ensure the nutritional needs of the children are met. When a school district participates in the National School Lunch or School Breakfast programs, Pre-K students who are on-site during the hours that meals are being served (whether half-day or full-day) must be offered breakfast and/or lunch, as applicable.
- <sup>8</sup> Regulations are being updated for the 2019-2020 school year.
- <sup>9</sup> Assessments must be valid and reliable and assess language, cognitive and social skills.
- <sup>10</sup> Other supports for curriculum implementation include the updated Planning for High-Quality Prekindergarten Programs, Summer Institute for Programs serving 3-year-olds in July 2018, released guidance for school districts operating Pre-K programs for 3-year-olds. Website tools include tip sheets for setting up the environment and checklists to ensure curriculum opportunities across domains.
- <sup>11</sup> Lead teachers in public school settings are required to have a BA if hired prior to 1978 and an MA if hired after 1978. Lead teachers in nonpublic settings hired prior to 2004 are required to have an AA or CDA. Since 2004, programs in nonpublic settings have been required to meet the same certification requirements as those in public settings. A legislative amendment allowed certain community-based organizations to be exempt from this requirement until at least 2013. These teachers must also have a plan to become certified within five years or by 2013. Effective July 1, 2010, all newly hired teachers in nonpublic settings must have a BA in Early Childhood Education or a related field and also have a written plan to earn a NYS teaching license or certificate valid for services in the early childhood grades within five years. Nonpublic programs lacking licensed/certified lead teachers must employ an onsite education director possessing a NYS teaching license or certificate in early childhood or childhood grades.
- <sup>12</sup> The Level I Teaching Assistant Certificate, the entry-level certificate for teacher assistants, permits the holder to provide direct instruction to students under the general supervision of a certified teacher. Assistant teachers in nonpublic settings are required to have a HSD or meet standards of the licensing or registering agency. Some nonpublic school settings require a temporary license, or continuing certificate, which permits the continued employment of an individual who has completed one year of experience under a temporary license and who has six semester hours of study in education.
- <sup>13</sup> Guidelines indicate that assistant teachers with the Level III Teaching Assistant certificate complete 75 hours per five years of in-service professional development in order to maintain certification. However, local public school districts make decisions regarding the appropriateness of activities to fulfill this requirement.
- <sup>14</sup> State policy does not specifically require ongoing classroom-embedded support but local districts can decide to provide it.
- <sup>15</sup> Targeted Pre-K: \$1.3 million, standalone appropriation; Universal Pre-K: \$415.6 appropriated with all of General Support for Public Schools; Statewide Universal Full Day Pre-K: \$1.5 billion, standalone re-appropriation; Expanded Pre-K: \$15 million plus another \$15 million, two re-appropriations shared with many other programs; Expanded Pre-K for 3 year olds: \$11 million plus another \$11 million, two re-appropriations shared with many other programs; Expanded Prekindergarten for Three-and Four-Year Old Students in High-Need School Districts (EPK2): \$5 million, standalone appropriation.
- <sup>16</sup> A half-day state aid rate is based on each school district's combined wealth ratio. The state aid formula takes into account several factors, including: foundation cost (the cost of providing the average student with an education that meets state learning standards), pupil need (the proportion of pupils eligible for free and reduced-price lunch), regional cost index, and expected local contribution. Five of the seven funding streams are determined by the state aid formula.
- <sup>17</sup> Agencies, other than public schools, who receive funds directly are not allowed to subcontract. School districts may subcontract with public schools, Head Start, Private agencies, Faith-based centers without religious content, family child care homes, and other agencies.
- <sup>18</sup> Preschool assessment is referred to as Progress Monitoring and is separate from assessment. Assessments must also include motor development in addition to language and cognitive development. Valid and reliable progress monitoring and assessment tools used are determined locally. Screening tools must cover language, cognitive and social skills. School districts are required to establish a screening process for assessing the developmental baseline whenever a new child enters the program. The ongoing progress of all children should be monitored at least three times per year in at least language, cognitive and social skill development.
- <sup>19</sup> Section 3602-e of Education Law has been amended for the 2017-2018 school year to require that all grantees receiving any State and/or federal prekindergarten grant must adopt approved quality indicators within two years, including, but not limited to, valid and reliable measures of environmental quality, the quality of teacher-student interactions and student outcomes.

<sup>20</sup> Some programs receive site visits annually, others have risk-based monitoring.

## **NORTH CAROLINA - North Carolina Pre-Kindergarten Program (NC Pre-K)**

- <sup>1</sup> Although the North Carolina Department of Health and Human Services has authority over the state's pre-K program standards and fiscal components, the North Carolina State Board of Education Policy oversees the teacher licensure process.
- <sup>2</sup> North Carolina's Pre-K program (NC Pre-K) is statewide and is available for families in every county. It is administered locally, but if a county agency chooses to not be a contractor, a different agency would be found in order to ensure that it was available in that county. All counties are not required to offer and administer the program, but it is required that the program is offered in every county.
- <sup>3</sup> The sum of enrollment by race is higher than total enrollment because multiple categories of race may be selected.
- <sup>4</sup> Wraparound services are determined locally. A few programs based in public schools may operate on a year-round calendar, but funding is limited to 10 months (36 weeks) of services.
- <sup>5</sup> State statute allows for a child's early entry into kindergarten using state-established guidelines and based on information submitted by the child's parent or guardian that the child is gifted and has the maturity to justify admission to school.
- <sup>6</sup> The child must be 4 years old on or before August 31st of the program year. A child that meets the age requirement is eligible for NC Pre-K if the child is from a family whose gross income is at or below 75% of the State Median Income (SMI). Children of certain military families are also eligible without regard to income. In addition, up to 20% of age-eligible children enrolled may have family incomes in excess of 75% SMI if they have documented risk factors in specific categories including developmental disability, Limited English Proficiency, educational need, or chronic health condition.
- <sup>7</sup> All children must meet at least one risk factor if they do not meet the income cut-off.
- <sup>8</sup> Classrooms that provide inclusive settings for children with disabilities may require an adult-to-child ratio lower than 1:9. For Local Education-administered public school exceptional children's preschool classrooms, ratios must be in compliance with the North Carolina Policies Governing Services for Children with Disabilities, Section 1508-2, (Appendix B) at: <http://ec.ncpublicschools.gov/policies/nc-policies-governing-services-for-children-with-disabilities>
- <sup>9</sup> Per the North Carolina Child Care Rules, each NC Pre-K child must be screened for developmental delays within 90 days of entering program. The screenings are used solely for the purpose of identifying children who should be referred for further evaluation and testing based on concerns in one or more developmental domains. State forms are provided to families for obtaining children's health assessments that include health care provider statements to refer children for further assessments and tests.
- <sup>10</sup> Other support services are provided as needed, such as family support and other types of health interventions (e.g., mental health, positive parenting services) for children with unique needs or challenging behaviors and their families.
- <sup>11</sup> The North Carolina Department of Public Instruction administers the state's exceptional children program (619 program) under the Office of Early Learning, which has other policies that guide services for exceptional children in public preschool/NC Pre-K classrooms. For additional information, see: <http://www.dpi.state.nc.us/earlylearning/ecprogram/>
- <sup>12</sup> The Division of Child Development and Early Education (DCDEE) has developed a plan to better serve ELLs, with additional efforts made at the local level to accommodate ELLs and to comply with Title VI laws. North Carolina Birth - K licensed teachers receive formal, needs-based mentoring/coaching support linked to child assessment and teacher evaluation to improve instructional practices for children served. Coaches/mentors who support Birth - K licensed teachers are required to use a variety of resources and strategies defined by the North Carolina Foundations for Early Learning and Development Standards (ELDS). North Carolina Mentor Teacher Standards align with the North Carolina Professional Teaching Standards. Program requirements state that sites serving children and families who do not speak English or have limited English proficiency are encouraged to hire staff that are fluent in the child's native language.
- <sup>13</sup> While not currently in practice, policy is under review to address chronic absenteeism in preschool programs.
- <sup>14</sup> The North Carolina ELDS are aligned with the state Standard Course of Study (Common Core State Standards and North Carolina's Essential Standards), the standards for what kindergarten children should know and be able to do. The focus of NC's ELDS is on the early precursor skills that research suggests are important or lay the foundation for what children learn later. The ELDS domains addressed in the standards include: Approaches to Play and Learning, Emotional-Social Development, Health and Physical Development, Language Development and Communication, and Cognition Development.
- <sup>15</sup> Birth - K licensed teachers are assigned mentors to support the implementation of curricula and formative assessments that is informed by and aligned with the ELDS to support children's development and learning needs.
- <sup>16</sup> As part of the mentor/evaluation process to support the Birth - K licensure process, teachers are trained in the implementation of curriculum and monitored for effective practices as aligned to the ELDS.
- <sup>17</sup> Additional information can be found here: <https://ncchildcare.ncdhs.gov/Services/NC-Pre-K-Program/Approved-Curricula-and-Formative-Assessments>
- <sup>18</sup> All lead teachers in NC Pre-K classrooms are required to hold a BA/BS in early childhood education/child development (ECE/CD) or a related field, as well as a NC Birth - K or PK/K add-on license. Teachers in public or nonpublic settings may begin in an NC Pre-K classroom with a minimum of a BA/BS in child development, early education or related field, and be eligible to hold a NC Lateral Entry Birth - K license while working to attain an NC Birth - K or Preschool initial and continuing license within three years. Teachers holding an NC Birth - K initial or continuing license are formally mentored and required to receive formative and summative evaluations annually and according to the licensure cycle. The AA degree in ECE/CD is permitted only as the minimum education/degree requirement for a long-term substitute teacher (up to 12 weeks).
- <sup>19</sup> All teacher assistants must have a high school diploma or GED and must hold, or be working toward, a minimum of an AA in ECE/CD or a Child Development Associate (CDA) credential. Teacher assistants working toward the AA or CDA shall make progress by completing a minimum of six documented semester hours per year. Teacher assistants employed by public schools may meet the employment requirements outlined by the federal Every Student Succeeds Act (ESSA) legislation and have one of the following: (1) Six documented semester hours of coursework in ECE, or (2) Two years of work experience in an early childhood setting.
- <sup>20</sup> Teachers holding a Lateral Entry license and working toward the NC Birth - K Continuing licensure requirements will participate in a minimum of six documented semester hours per year, prescribed by a Plan of Study, a professional development plan, and the three-year Beginning Teacher Support Program (BTSP). The BTSP requires mentoring/performance evaluation. The BTSP is a three-year, in-service PD requirement for any teacher holding less than a continuing license (initial or lateral entry). All DCDEE regulated (licensed) programs are required to meet health and safety training requirements as stipulated under the NC Child Care Rules, which would include any NC Pre-K Programs. Professional development for assistant teachers applies only to those working toward the AA in ECE or CDA degrees. For assistant teachers who are not working towards licensure, the annual hours are based on their educational attainment. The range is from 20 hours annually to 5 hours. CPR and First Aid would be completed in addition to those hours.
- <sup>21</sup> The amount of mentoring or coaching a NC Birth - K licensed teacher receives is based on formally assessed needs that result in different types of professional development plans, including specific strategies designed in collaboration with the teacher, evaluator, and site administrator (private sites). Teachers need different amounts of onsite coaching/mentoring (scaffolding, role modeling, etc.), based on each teacher's formally assessed needs. Approximately 50 contact hours are budgeted per teacher with less than a Birth - K Continuing License.
- <sup>22</sup> In last year's budget the Governor proposed a 10% rate increase for pre-K slots. This would have provided additional funding that could be directed towards lead teacher salaries. While this was not approved for the 2018-2019 year, it is a high priority for the department. Additionally, local contractors can require salary parity in private sites, and many add local dollars in order to support that happening.
- <sup>23</sup> When a pre-K program is in a public school, the same salary schedule is used which determines the pay based on education and years of experience. The same fringe benefit rates are used as well. It is recommended that contractors also implement this in private sites but is not required.
- <sup>24</sup> While the NC Pre-K policy does not require teacher paid time for professional responsibilities and/or PD days, pre-K teachers employed by the NC Public Schools are provided the same paid time for professional responsibilities and/or PD days as the public school. This decision is locally determined.
- <sup>25</sup> There are state policies for salaries and fringe benefits for assistant teachers in public schools, but not for assistant teachers in nonpublic schools.
- <sup>26</sup> Public salary is based on the 2017-2018 State Salary Schedule. Nonpublic salary is based on the 2015 Workforce Study.
- <sup>27</sup> This is locally determined.
- <sup>28</sup> While there are local communities that provide these support opportunities, the State does not require them.

- <sup>29</sup> North Carolina has a set rate of cost per child depending on the auspice (private site, public school site, or Head Start site). Allocation is determined by the number of available classrooms for each site.
- <sup>30</sup> Faith-based centers are allowed but cannot use religious content in the state pre-K classrooms.
- <sup>31</sup> The purpose of the current longitudinal study is to examine how different types of early learning experiences influence children's educational outcomes from preschool through third grade. The FPG study team is following 580 students from preschool through third grade using a randomized controlled trial (RCT) design. During the first year of the study (2017-2018), one group of children was randomly assigned to NC Pre-K (treatment) and the other group was randomly assigned to the waitlist (control) in two counties with large NC Pre-K waitlists. Each year the FPG study team will conduct individual assessments of students' language, literacy, math, and executive function skills in the fall and spring; conduct classroom observations; gather teacher ratings of students' social skills and brief surveys; and gather parent ratings of children's social skills and brief surveys. For Spanish-speaking dual-language learners in the sample, assessments will be done in both English and Spanish to examine their progress in both languages.
- <sup>32</sup> Staff are required to conduct ongoing (regular) formative assessments to gather information about each child's growth and skill development, as well as to inform instruction. All formative assessments used by the NC Pre-K Program must be approved by the NC Child Care Commission based on the assessment tool's ability to collect information on children's behaviors, development, skills, knowledge, strengths, needs and interests across all domains of development. Assessment tools are aligned with the NC ELDS to meet this requirement. Classroom staff may select from a list of approved formative assessments found under this link: [http://ncchildcare.nc.gov/pdf\\_forms/Approved\\_Formative\\_Assessments\\_For\\_Website\\_Update\\_6\\_17.pdf](http://ncchildcare.nc.gov/pdf_forms/Approved_Formative_Assessments_For_Website_Update_6_17.pdf)
- <sup>33</sup> The approved formative assessments have reliability measures for assessors built into the tools. Staff must demonstrate reliability on any instruments used and must be re-assessed periodically for reliability. Additionally, qualified non-classroom staff conduct periodic observational assessments to verify reliability.
- <sup>34</sup> Currently, the NC Legislature mandated DHHS and DPI to collaborate to develop a pre-K to kindergarten transition process, which includes sharing of preschool child assessment data to inform teaching practices of kindergarten teachers.
- <sup>35</sup> For additional information, see: <http://www.ncpublicschools.org/earlylearning/kea/>
- <sup>36</sup> All classroom observations are on a cycle; however, targeted observations are made if necessary. Observations are completed as part of licensing.
- <sup>37</sup> Teachers are required to be formally observed and assessed using the NC Professional Teaching Standards, as measured Rubric for Evaluating NC Teachers, based on a formal observation schedule determined by the NC Department of Public Instruction (per State Board of Education Policy). Teachers develop and follow an individual professional development plan, which may address classroom quality needs. Documentation of children's learning (formative) is collected by each local NC Pre-K program and DCDEE child care consultants monitor for classroom and site compliance with collection of data. Mentors and Evaluators (for Birth - K licensed teachers) check to ensure use of formative assessment data to inform child learning (includes families), teacher planning and professional development. Results of classroom quality (ECERS-R assessments) are collected and reported by an independent assessor to DCDEE.
- <sup>38</sup> If a classroom rates less than 5.0 on the ECERS-R, staff are given one year to make improvements per the improvement plan that is developed jointly with the site administrator and the state agency's regulatory consultant. The state regulatory consultants and local NC Pre-K contract administrative agency staff routinely observe classrooms for appropriate implementation of curriculum, formative assessments, early learning standards, staff/child ratios, group size, in and outdoor learning environments, and health and safety requirements, and provide feedback. Assigned mentors and evaluators work directly with teacher effectiveness, conducting formative assessments of practices that link to performance standards (environment, content knowledge, application and use of child data) to ensure classroom environments are responsive to teaching and child learning.
- <sup>39</sup> There are multiple State licensure visits, as well as local contractor monitoring visits.
- <sup>40</sup> For additional information, see: <https://www.ecids.nc.gov/ecids/>

## **NORTH DAKOTA - North Dakota Early Childhood Education Grant Program**

- <sup>1</sup> The funding of this program is to promote community collaboration and to include public, parochial and private daycares that may be eligible for funding.
- <sup>2</sup> The Head Start programs in the state have a maximum number of children funded for Head Start. The state funding is contributed to non-Head Start students who meet the eligibility requirements for state funds.
- <sup>3</sup> Programs must operate for at least 400 hours over the duration of at least 32 weeks, and incorporate at least 10 hours of research-based parental involvement.
- <sup>4</sup> Children who turn 5-years-old within the school year, but were 4-years-old prior to August 1, are still eligible for preschool funds.
- <sup>5</sup> Preschool programs may enroll 5-year-olds, but they cannot be supported by grant funding.
- <sup>6</sup> Programs are permitted to charge tuition to supplement state funding, but are not required to do so.
- <sup>7</sup> The North Dakota Department of Public Instruction (NDDPI) does not have state laws regulating child/adult ratios in publicly-funded preschool.
- <sup>8</sup> Programs are encouraged to provide meals, however they are not required to do so because of short programming hours.
- <sup>9</sup> The new 2018 version replaces the B-5 Early Learning Guidelines (ELGs), is aligned and mirrors the Early Learning Outcomes Framework (ELOF), and is aligned to the Kindergarten Standards.
- <sup>10</sup> The NDDPI and North Dakota Department of Human Services (NDDHS) collaborate to print, disseminate, and provide PD on the B-K Standards.
- <sup>11</sup> State-funded preschool programs must be approved through NDDPI to operate and must maintain teachers with an ND license qualifying them to teach pre-K.
- <sup>12</sup> A lead teacher with an Elementary Education degree must also obtain a Kindergarten Credential in order to teach pre-K in ND in both public and nonpublic settings.
- <sup>13</sup> There is not one set of hours required. ND offers different types of licenses, each of which has unique requirements for in-service professional development.
- <sup>14</sup> The state pays for two PD days for public school teachers, including teachers in state-funded preschool classrooms.
- <sup>15</sup> Mentoring is a local programming decision for both public school districts and nonpublic providers.
- <sup>16</sup> For nonpublic programs, this is a local business decision.
- <sup>17</sup> Total 2018 fiscal year spending is estimated as half the biennium allocation.
- <sup>18</sup> School districts may subgrant to Head Start sites that serve non-eligible Head Start children.
- <sup>19</sup> NDDPI was awarded a PDGB-5 grant and ECIDS is the prime activity in the grant.

## **OHIO - Ohio Early Childhood Education**

- <sup>1</sup> Since 2006-2007, grants have been awarded based on a poverty index. With new funds added in 2016-2017, grants were awarded to high-quality preschool programs located within district boundaries that have high needs (i.e., high poverty and low achievement). Ohio expanded its eligible providers to also include public districts, chartered nonpublic districts, charter schools, and child care programs.
- <sup>2</sup> Ohio funded 17,913 children with a per-child allocation of \$4,000. Although legislation says that children should not be age-eligible for kindergarten (age 5) when in pre-K, there are two locally determined school entrance dates in Ohio (August 1 or September 30), so 5-year-olds may enroll in the program if they are not age-eligible for kindergarten. Children can turn five after August 1 but before September 30, depending on the district of residence.
- <sup>3</sup> All Early Childhood Education programs must provide service for a minimum of 455 hours per academic year, approximately 12.5 hours/week.
- <sup>4</sup> House Bill 64 allows preschool to extend the day using publicly funded child care dollars for children who are eligible at or below 130% FPL.
- <sup>5</sup> Age eligibility requirements changed for the 2016-2017 school year such that 3-year-olds are no longer eligible without prior approval from ODE after October 1 for slots unfilled by four-year-old children.
- <sup>6</sup> Family income is the determining eligibility factor for this program. The program is free for families with incomes up to 100% FPL. Families between 101% and 200% FPL may pay a fee based on the district's sliding-fee scale.

- <sup>7</sup> All programs are required to participate in Ohio's QRIS, Step Up To Quality (SUTQ), and are given additional points for meeting a 1:10 staff-to-child ratio or maximum class size of 20. Most of these programs are meeting this requirement, rated four or five, and are receiving points for meeting these ratios.
- <sup>8</sup> Programs are required to provide breakfast, lunch, or snack depending on hours of attendance.
- <sup>9</sup> State rule implements Least Restrictive Environment requirement from IDEA for all preschool children with disabilities. Children with disabilities are allowed to enroll in state-funded preschool programs on their fourth birthday, as soon as they become age-eligible. State Support Teams are available regionally to support programs.
- <sup>10</sup> Ohio passed a new law that will make suspension and expulsion of preschoolers unlawful (HB 318). It is not yet in place, but will be starting with the upcoming school year, with a phased in approach over the next three years. It does not allow suspension or expulsion of any child in preschool, except in certain circumstances.
- <sup>11</sup> Programs are required to adopt a curriculum but the decision on which curriculum to use is determined locally.
- <sup>12</sup> In all programs, at least 50% of teachers must have a BA in Early Childhood Education. Teachers who have a K-3 or K-8 license are required to have 12 college credits in ECE. All teachers in ECE programs are required to complete a Professional Development certificate that gives extra points for exceeding the minimum number of contact training/PD hours.
- <sup>13</sup> Programs are now required to participate in SUTQ, and are given extra points for attaining 30 hours of PD every two years at the star four and five levels. Most programs are attaining these levels.
- <sup>14</sup> After being trained, each teacher must pass a content simulator at 80% or higher. If they do not pass, they can try again after some coaching and technical assistance.
- <sup>15</sup> In the Fall of 2014, Ohio began administering the Kindergarten Readiness Assessment (KRA) to assess all domains of school readiness for all first-time kindergarten students in public school. Ohio collaborated with the Maryland State Department of Education to develop the new KRA, which is administered annually between two weeks before the first day of school and November 1.

## **OKLAHOMA - Oklahoma Early Childhood Four-Year-Old Program**

- <sup>1</sup> An additional 1,917 3-year-olds were served but not supported with state funding.
- <sup>2</sup> Enrollment by program operating schedule includes 3-year-olds not supported by state funding.
- <sup>3</sup> Programs have the option of operating a part-day or a school-day program or a combination of both within each district. Most school districts operate five days per week. Programs must be offered at least 175 days per year or 1,080 hours per school year. Districts can choose to offer a longer day or year but will not receive additional state funding through the state aid formula.
- <sup>4</sup> Full-day programs provide breakfast and lunch. Part-day programs provide breakfast or lunch.
- <sup>5</sup> Current immunization records are required for pre-K entry. If a pre-K program is in collaboration with Head Start, they must meet Head Start requirements.
- <sup>6</sup> The Oklahoma State Department of Education recommends and provides resources for parenting support and training, health services for children, information about nutrition, and transition-to-kindergarten activities, but allows local districts to make these decisions. If a pre-K program is in collaboration with Head Start, they must meet Head Start requirements.
- <sup>7</sup> All learners must hear the voices of their own heritage in the literature they encounter. They must be given the opportunity to speak with the voices they choose for themselves in the writing they create. The language arts classroom is a place that is inclusive of race, ethnicity, culture, and all perspectives that reflect the richness of human experience. For additional information, see: [https://sde.ok.gov/sites/ok.gov.sde/files/documents/files/OAS-ELA-Final%20Version\\_0.pdf](https://sde.ok.gov/sites/ok.gov.sde/files/documents/files/OAS-ELA-Final%20Version_0.pdf)
- <sup>8</sup> The Oklahoma Curriculum Frameworks provide support for state standards: <http://sde.ok.gov/sde/oklahoma-curriculum-frameworks>. The statewide summer conference, EngageOK, provides PD to support the implementation of state standards.
- <sup>9</sup> At this time, Oklahoma does not require an assessment in Pre-K. Pre-K assessments are locally determined.
- <sup>10</sup> The Oklahoma State Department of Education supports the specific needs of school districts to provide resources for special education services and assistive technology along with curriculum interventions for low-performing schools.
- <sup>11</sup> Local districts and administrators monitor and make decisions regarding curriculum implementation.
- <sup>12</sup> All pre-K teachers are required to hold a BA in Early Childhood Education. There is a paraprofessional route to becoming an Early Childhood certified teacher in which a person holding a BA in any area of study can work for a minimum of a year as a paraprofessional in an early childhood classroom and pass the Oklahoma General Education Test, Oklahoma Professional Teaching Exam, and the Oklahoma Subject Area Test. Having a BA in Early Childhood or certification through the paraprofessional route are requirements for teaching in an Oklahoma pre-K classroom.
- <sup>13</sup> Teacher assistants are only required to hold a high school diploma or GED and pass the FBI criminal history check. Teacher assistants employed in a Title I school must be highly qualified using one of the following methods: (1) An associate's degree or higher; (2) At least two years or 48 credit hours of study at an institution of higher education; (3) Pass the Oklahoma General Education Test; or (4) Pass the ETS Para Pro Assessment Test or the Work Keys Assessment. About 69% of schools are Title I.
- <sup>14</sup> PD in the following areas is required for lead and assistant teachers: autism, blood borne pathogens, bullying prevention, child abuse, FERPA, hazardous communications, English Learners, and racial and ethnic education.
- <sup>15</sup> In the 2016-2017 school year, the Oklahoma State Department of Education developed policies for individualized PD plans. The program was piloted statewide in 2017-2018. Full participation by all districts and teachers will be required in 2018-2019. For additional information, see: <http://sde.ok.gov/sde/professional-learning-focus>
- <sup>16</sup> For additional information, see: <https://sde.ok.gov/state-minimum-teacher-salary-schedule>
- <sup>17</sup> For additional information, see: <https://sde.ok.gov/professional-development>
- <sup>18</sup> For additional information, see: <https://sde.ok.gov/notice-allocation>
- <sup>19</sup> Kindergartners are required to be assessed in literacy at the beginning and end of each year using a state approved literacy screener. Oklahoma requires an ELA beginning of the year and end of the year assessment of every kindergarten student. The state does not specify the test; districts are able to choose from a list of state approved assessments. The results are kept and follow the student from K to 3rd grade. Assessment results are used for instructional purposes.
- <sup>20</sup> Districts can choose a literacy screener to assess Kindergarten students from the list of approved screeners; DIBELS is on the list. For additional information see: [http://sde.ok.gov/sde/sites/ok.gov.sde/files/documents/files/RSA-K-3\\_FormativeAssessments\\_2.pdf](http://sde.ok.gov/sde/sites/ok.gov.sde/files/documents/files/RSA-K-3_FormativeAssessments_2.pdf)
- <sup>21</sup> Oklahoma just began integrating the state's education and other service provider data. The state anticipates further growth in and usage of the integrated data systems.

## **OREGON - Oregon Head Start Pre-Kindergarten**

- <sup>1</sup> Minimum required contact time is determined by the classroom hours combined with home-visit hours offered. School- and extended-day programs (more than 6 hours) are generally supported with other funding. Most programs operate 3.5 to 4 hours per day for a school year using state funding. Figures collected by the state do not fully align with NIEER definitions for part-, school-, and extended-day programs. Programs must offer at least 3.5 hours per day for a minimum of 32 weeks per year, plus required home visits which are 1.5 hours each.
- <sup>2</sup> The number of days per week is dependent on the service models/options adopted by the program and can range from no class days per week (home-based) to five days per week. Most programs operate 3.5 hours per day, 4 days per week, 32 weeks per year.
- <sup>3</sup> State pre-K children must meet the federal Head Start income guidelines. After priority is given to families whose income is at or below 100% FPL, up to 35% of children can be enrolled whose family income is between 100% FPL and 130% FPL. If a grantee has both state pre-K and federal Head Start funds, 90% of children must meet the income requirement. If a grantee has only state pre-K funding, 80% of children must meet the income requirement. Children in foster care or who are homeless are categorically eligible. A minimum of 10% of total enrollment must include children with disabilities. Locally determined risk factors determine priority for services. Risk factors are prioritized by local boards and policy councils.
- <sup>4</sup> Part-day programs: lunch and either breakfast or snack; Full-day programs: breakfast, lunch, and snack. Programs are required to offer meals and a snack that provide one-third to one-half of the daily nutritional needs for children in part-day programs.

- <sup>5</sup> Screenings are required to be completed within 45 days of enrollment, except immunizations which are required prior to enrollment. Requirements for screenings follow Head Start screening requirements.
- <sup>6</sup> Oregon Pre-Kindergarten programs follow federal Head Start Performance Standards, which include the Head Start Early Learning Outcomes Framework. Programs are required to develop procedures for identifying children who are limited English proficient, ensure that children make progress toward acquiring English through culturally and linguistically appropriate instructional services, and inform parents about instructional services used. If 50% or more children speak a language other than English, programs must ensure that non-English speaking children are provided language support as needed. Otherwise, DLL/ELL policies related to immersion, instruction, summer language programs, translators/bilingual staff, professional development (PD) or coaching provided to teachers of ELL/DLLs are locally determined.
- <sup>7</sup> While Oregon's Early Learning Standards do not address physical and motor development, the Head Start Early Learning Outcomes Framework does address physical and motor development. Both documents guide Oregon Pre-Kindergarten programs.
- <sup>8</sup> Under the Head Start Reauthorization Act of 2007, all lead teachers were required to have at least an AA by October 2011; by September 30, 2013, 50% must have earned at least a BA. Some programs have participated in local partnerships (e.g., school districts) where BA-level degrees and early childhood licensure with or without special education are required as locally determined. Teacher licensure options for public schools include Birth-3rd grade and Pre-K-K (Birth-K).
- <sup>9</sup> New Head Start Performance Standards require that all teachers have annual PD plans.
- <sup>10</sup> Per coaching requirements in the updated federal Head Start Performance Standards.
- <sup>11</sup> Some teachers who hold at least a CDA and who are enrolled in a program leading to at least an AA may receive a temporary waiver for the AA requirement. Programs with teachers that have a High School Diploma or GED would need to demonstrate that they are moving into compliance with the requirement.
- <sup>12</sup> Local grantees partnering with agencies may receive Title I and IDEA funding but are unable to directly access those funds. Faith-based programs free of religious content are eligible to receive funding.
- <sup>13</sup> Grantees required to ensure teachers have current reliability certification.

## **OREGON - Oregon Preschool Promise**

- <sup>1</sup> The Early Learning Division is housed in the Department of Education (DOE), but the DOE does not have authority over the Early Learning Division. The Director of the Early Learning Division is appointed by and reports to the Governor.
- <sup>2</sup> Early Learning Hubs are intermediaries between the state and providers created to ensure fiscal and specified performance metric accountability of providers.
- <sup>3</sup> Enrollment data by age is unavailable. However, the program served 3- and 4-year-olds.
- <sup>4</sup> Children receiving Preschool Promise services cannot be concurrently enrolled in a Head Start program. Yet, a child could potentially receive Preschool Promise services September through May and then participate in a summer Migrant/Seasonal Head Start program.
- <sup>5</sup> Not all providers captured the number of families that were 101-130% FPL, but this data will be available in the future.
- <sup>6</sup> Providers must offer, at minimum, 900 hours of service in a program year (July 1-June 30). Programs operate on the same schedule as kindergarten programs and most operate on a school-day, school-year schedule. Based on parent need, some providers choose to offer services year-round and other providers follow a September through early June schedule. These variations in program calendar create variations in the number of hours per day offered.
- <sup>7</sup> Some of the providers offer wrap-around child care services for extended-day services using state child care subsidies (employment related day care).
- <sup>8</sup> Based on parent need, some providers offer a 3- or 4-day per week option. Most providers offer a 5-day per week model.
- <sup>9</sup> Eligibility is valid for two years. For the 2017-2018 program year, income (0-200% FPL) and age (3- & 4-year-olds) are the only eligibility factors. Children who are in the foster care system are considered a family of one with no income, therefore they meet the income eligibility requirements. Early learning hubs develop regional priorities for selection. Children with disability or developmental delay are not considered categorically eligible but would be considered a priority for selection.
- <sup>10</sup> The state has identified priority populations that include children of color, children who are emergent bi/multilingual, and children with identified special education and health needs. Beyond the age and income requirements, additional risk factors are determined locally based on community assessments.
- <sup>11</sup> The staff-child ratio is based on the Oregon Child Care Licensing regulations. Preschool Promise providers must obtain a top two tier rating in the Oregon Quality Rating Improvement System (QRIS). The top two tiers require a class size of less than 20 and/or a staff-child ratio better than 1:10.
- <sup>12</sup> In order to meet licensing requirements, programs provide at least one meal and one snack or two meals. The number of meals and snacks is dependent upon daily service hours.
- <sup>13</sup> In future program years, the standards will include more required screenings. Currently, the required developmental screenings are: ASQ & ASQ-SE.
- <sup>14</sup> Early Education/Early Childhood Special Education providers utilize a consultation model of support for teachers who are serving children with identified special needs in their classroom.
- <sup>15</sup> Program standards include inclusionary practices, yet do not provide specifics on planned language approaches.
- <sup>16</sup> Preschool Promise promotes high attendance, tracks attendance, and works with families and providers if a child is absent more than 15% of the time. The program's goal is to have, at minimum, 85% average daily attendance.
- <sup>17</sup> The state's suspension and expulsion policy is under development, but Preschool Promise standards include requirements to eliminate suspensions and expulsions. This is an area that needs more development and TA for the providers/workforce.
- <sup>18</sup> While Oregon's ELDS do not address physical and motor development, the Head Start Early Learning Outcomes Framework does address physical and motor development. Both documents guide Oregon Pre-Kindergarten programs.
- <sup>19</sup> The state QRIS has an approved list of assessments and if a provider chooses to use a different assessment, it must be aligned with the ELDS and approved by QRIS evaluators.
- <sup>20</sup> This is an area of development for Preschool Promise. Future revisions to standards and monitoring protocols will include fidelity checks.
- <sup>21</sup> Additionally, the program may use a curriculum that supports all children's learning and development that: is based on theory and research; produces positive child outcomes; balances adult directed and child initiated activities; specifies outcomes for key areas of development; specifies instructional details for care and education provider/teacher to follow; includes content areas of math; includes content areas of science; includes content areas of literacy; includes content areas of social studies; and provides instructional detail on positive adult child interactions. All Preschool Promise providers must be on the top two tiers rated in QRIS, and if the provider does not select from the approved list, then they must submit documentation and the state approves the curriculum.
- <sup>22</sup> Lead teachers are required to have a BA in ECE or a related field, but waivers for this requirement are permitted if the teacher has submitted a plan to attain a BA and is demonstrating progress towards the BA degree. Approximately 50% of lead teachers have requested a waiver for the BA requirement. Teachers must have a minimum of a CDA.
- <sup>23</sup> The following related degrees -- sociology, psychology, social services -- require an examination of transcripts to determine content related to early learning core knowledge areas. Also, ongoing requirements for PD require training in inclusionary classrooms (preschool special education).
- <sup>24</sup> The minimum requirement for an assistant teacher is Step 3 in the Oregon Registry Online. Licensing regulations for an Aide II: (a) Be at least 18 years of age; (b) Have worked at least six months at the center where they are now employed; (c) Have current certification in first aid and CPR. Training must have practical hands-on instruction; therefore, online training is not acceptable.
- <sup>25</sup> Per Preschool Promise Operating Guidelines, all Preschool Promise teaching staff are required to participate in at least 20 hours of PD activities per Program Year.
- <sup>26</sup> If teachers and/or assistant teachers do not meet the minimum education requirements, a PD plan is required.
- <sup>27</sup> Providers are connected to a Quality Improvement Specialist to support continuous quality improvement related to QRIS standards. Some of the support includes job embedded PD opportunities. Coaching is not yet provided systematically, but the program is working towards this goal.
- <sup>28</sup> Other captures unspecified degrees, and no other details are available.

- <sup>29</sup> Preschool Promise requires pay parity and provides guidelines, but not all providers are able to implement due to collective bargaining agreements and existing salary structure for other non-Preschool Promise staff.
- <sup>30</sup> The same requirements apply to all teachers regardless of employer type. All Preschool Promise budgets are developed with fringe incorporated; not all provider types are able to offer this (in home providers specifically).
- <sup>31</sup> The program requirements include at minimum 20 PD hours each program year, in addition to preservice training. This is paid time. Whether or not that is equal to the K-3 teachers is locally determined based on their individual bargaining agreements.
- <sup>32</sup> Requirements for assistant teachers are expected in program year 2019-2020.
- <sup>33</sup> All staff are required to have a PD plan and the program offers scholarships or pays for the associated trainings/courses.
- <sup>34</sup> All funds for services are awarded to Early Learning Hubs (ELH) and the ELHs are required to subcontract with providers to implement the program services.
- <sup>35</sup> If children are emergent bilinguals, then English language acquisition is also assessed.
- <sup>36</sup> The state's QRIS provides the following options: Teaching Strategies Gold Assessment; Evaluation and Programming System (AEPS); Other assessments requires a written description of how assessment tool aligns with the Head Start Child Development and Early Learning Framework and/or the Oregon Early Learning Standards.
- <sup>37</sup> Child level assessments are used for formative purposes, not summative purposes.
- <sup>38</sup> All public schools are required to assess kindergarten students upon entry with the state designed Kindergarten Assessment (KA). Public schools are able to select their own ongoing kindergarten assessment tools after the KA has been completed (locally determined). A majority of Preschool Promise providers are using Teaching Strategies GOLD.
- <sup>39</sup> During the 2017-2018 program year, the expectation was to build capacity to implement CLASS observations during the 2018-2019 program year.
- <sup>40</sup> Programs may request a limited duration waiver for this requirement while they build capacity.

### **PENNSYLVANIA - Pennsylvania Ready to Learn Block Grant (RTL)**

- <sup>1</sup> Programs must operate 180 days per year.
- <sup>2</sup> Eligibility for RTL is locally determined.
- <sup>3</sup> The Office of Child Development and Early Learning (OCDEL) released a policy statement on inclusion in 2017. Although, RTL programs are not monitored by OCDEL like other state-funded programs, the supports for the policy are accessible by RTL classrooms (e.g. CONNECT hotline, site visits, coaching).
- <sup>4</sup> The state provides a Basic Education Circular (BEC) which details the policies regarding preschool DLLs in all school based programs.
- <sup>5</sup> Although OCDEL doesn't monitor school-based pre-K programs the supports to reduce suspension and expulsion are available to these programs.
- <sup>6</sup> The PA State Board of Education passed English Development Standards in 2017. OCDEL has partnered with WIDA Early Years to provide support, resources, and PD for English language instruction for young children.
- <sup>7</sup> Supports are available to districts, but districts need to request the services.
- <sup>8</sup> For more information, see: <https://www.education.pa.gov/Early%20Learning/Early%20Learning%20Standards/Pages/default.aspx>
- <sup>9</sup> The curriculum must be standards-based, but it is decided upon locally. The state provides a list of curricula which has shown alignment with PA ELS.
- <sup>10</sup> Beginning in 2009-2010, assistant teachers had to meet NCLB requirements and were required to have two years of post-secondary education/60 college credits, an AA or higher, or the ability to meet a rigorous standard of quality and to demonstrate through formal state or local assessments knowledge of the ability to assist in instruction.
- <sup>11</sup> First year instructionally certified teachers are required to participate in induction.
- <sup>12</sup> This is determined locally.
- <sup>13</sup> Ready to Learn funding is calculated based on a percentage of the school funding formula. Districts/schools then decide how to spend the funding. Pre-K is one of many options districts/schools can choose from.
- <sup>14</sup> Each school district that provides prekindergarten shall design an assessment system that includes prekindergarten and uses a variety of assessment strategies.
- <sup>15</sup> Child assessments are locally determined, but PDE provides listing of assessments aligned with PA ELS: <https://www.education.pa.gov/Early%20Learning/Early%20Learning%20Standards/Pages/default.aspx>
- <sup>16</sup> Evaluations of Instruction I certified teachers must occur two times per year; pre- and post-interviews occur with each evaluation.
- <sup>17</sup> Summaries of teacher evaluations are used as part of formal state teacher evaluation system.

### **PENNSYLVANIA - Pennsylvania Head Start Supplemental Assistance Program (HSSAP)**

- <sup>1</sup> Programs must operate according to federal Head Start Performance Standards, which require a minimum of 3.5 hours per day, four days per week. Full-day for HSSAP is considered more than 5.5 hours per day. Center-based programs can operate four or five days per week; home-based programs offer home visits once per week with socialization days. Most programs operate between 128 and 180 days per year with a few offering full-year services of approximately 240 days per year. Collaboration with other agencies and programs is required per program regulation, but implementation is locally determined.
- <sup>2</sup> Age eligibility follows federal Head Start eligibility requirements. Most children who are age-eligible for kindergarten will not be eligible for HSSAP. The recommended age cutoff is 5 by September 1, but this is determined locally. If a child with special needs remains in the pre-K program when they are age-eligible for kindergarten, they are not funded by HSSAP, but instead by other resources.
- <sup>3</sup> State pre-K children must meet the federal Head Start income guidelines. Effective as of December 2007, 35% of the enrollment may be children whose family incomes are between 100% and 130% FPL after priority is given to children at or below 100% FPL. In addition to income requirements, individual Head Start agencies determine eligibility requirements based on their community assessments and give priority based on multiple risk factors.
- <sup>4</sup> OCDEL released an inclusion policy in 2017. All state-funded programs must comply with the policy.
- <sup>5</sup> Programs would follow any federal Head Start policies in relation to DLLs, the state does not prescribe any additional policies.
- <sup>6</sup> The PA State Board of Education passed English Development Standards in 2017. OCDEL has partnered with WIDA Early Years to provide support, resources, and PD for English language instruction for young children.
- <sup>7</sup> Additional resources include face to face and asynchronous trainings in the ELDS.
- <sup>8</sup> For more information, see: <https://www.education.pa.gov/Early%20Learning/Early%20Learning%20Standards/Pages/default.aspx>
- <sup>9</sup> Under the Head Start Reauthorization Act of 2007, all lead teachers were required to have at least an AA by October 2011; by September 30, 2013, 50% must have had at least a BA. By September 30, 2013, all assistant teachers must have had at least a CDA or be enrolled in a program to receive a CDA, AA, or BA within two years. If teachers are employed by a school district, ECE certification is required.
- <sup>10</sup> Other includes other degrees, not specified, and unknown.
- <sup>11</sup> Coaching can be provided by the assigned preschool program specialist.
- <sup>12</sup> HSSAP is a supplement to federal Head Start funding. It is used to support the federal funding.
- <sup>13</sup> Per federal Head Start guidelines.
- <sup>14</sup> Participation in state QRIS is required for state funded HSSAP programs that are located within child care centers. This information is collected at time of application, and

when the rating is received. In addition, any non-child care Head Start location which also serves federal Head Start students receive STARS reciprocity and become a STAR 4 location.

### **PENNSYLVANIA - Pennsylvania Kindergarten for Four-Year-Olds (4K) & School-Based Pre-K (SBPK)**

- <sup>1</sup> Programs are required to operate 180 days per year. School code allows pre-K to be exempted from this requirement when approved, which is a locally determined decision.
- <sup>2</sup> The Office of Child Development and Early Learning (OCDEL) released an inclusion policy statement in 2017. Although K4 and school-based PK programs are not required to follow the policy statement, the information and supports would be available if requested.
- <sup>3</sup> PDE provides a Basic Education Circular (BEC) detailing policies for DLLs, including preschool policies.
- <sup>4</sup> Although OCDEL does not monitor these pre-K programs, supports related to reducing suspension and expulsion are available to these programs at their request
- <sup>5</sup> The PA State Board of Education passed English Development Standards in 2017. OCDEL has partnered with WIDA Early Years to provide support, resources, and PD for English language instruction for young children.
- <sup>6</sup> As of the 2009-2010 school year, assistant teachers in SBPK must meet NCLB requirements and are required to have two years of post-secondary education/60 college credits, an AA or higher, or the ability to meet a rigorous standard of quality and to demonstrate through formal state or local assessments knowledge of the ability to assist in instruction. There is no minimum degree required for K4 programs.
- <sup>7</sup> School code required that pre-K curriculum and instruction must be standards-based.
- <sup>8</sup> For more information, see: <https://www.education.pa.gov/Early%20Learning/Early%20Learning%20Standards/Pages/default.aspx>
- <sup>9</sup> Elementary (K-6) certification is allowed for teachers in public school settings.
- <sup>10</sup> Teachers with Instructional Certification are required to complete 180 hours per five years. This is required in public school classrooms (SBPK), but not nonpublic schools (K4). An induction plan is required for teachers with Instructional Certification.
- <sup>11</sup> An induction plan is required for new teachers with Instructional Certification.
- <sup>12</sup> New teachers with Instructional certification must undergo an induction program which include mentoring.
- <sup>13</sup> This is determined locally.
- <sup>14</sup> Data are not available to distinguish all the funding streams, however these programs use a multitude of funding sources to operate including: Title I, school funding formula, and other local sources.
- <sup>15</sup> Each school district that provides prekindergarten is required to design an assessment system that includes prekindergarten and uses a variety of assessment strategies.
- <sup>16</sup> Teacher evaluations are required twice a year for all teachers holding Instructional I certifications. Most use Danielson, but other tools can be approved by PDE for use as well.
- <sup>17</sup> Evaluators must conduct a pre-interview and a post-interview when a teacher evaluation is conducted.
- <sup>18</sup> Summaries of teacher evaluations are used as part of formal state teacher evaluation system.

### **PENNSYLVANIA - Pennsylvania Pre-K Counts**

- <sup>1</sup> These dual enrollments for Head Start only include children enrolled in Pennsylvania's Head Start Supplemental Assistance Program.
- <sup>2</sup> School-day programs operate for a full-day of programming which includes at least five instructional hours per day; part-day programs operate for a half-day program which includes at least 2.5 instructional hours per day.
- <sup>3</sup> Programs are required to operate 180 days per year.
- <sup>4</sup> Children must be at least 3 years old and no older than 5 years old by the beginning of the program year. Children who are kindergarten age-eligible are not eligible for Pre-K Counts. The recommended kindergarten age cutoff is 5 by September 1, but this is locally determined. In addition, local boards may decide exceptions for kindergarten. Children whose IEPs recommend an additional third year of pre-K may continue in the Pre-K Counts program, but they may not be funded through Pre-K Counts but rather by a non-state source.
- <sup>5</sup> Children must meet the state-specified income requirement. Prioritization based on additional risk factors beyond income and age is locally determined.
- <sup>6</sup> A class size of 17 students is recommended. The recommended staff to child ratio is 2:17; if the 1:10 ratio is used; other qualified staff must be present on-site in case of emergency.
- <sup>7</sup> Regulation guidance was updated in 2015 to include the meal requirement for half-day programs.
- <sup>8</sup> The program is required to share screening results with families and discuss/support referral options.
- <sup>9</sup> OCDEL released an inclusion policy in 2017, which PKC providers must follow.
- <sup>10</sup> A Program classroom should reflect the naturally occurring ratio of students with and without developmental delays and disabilities in the area served by the approved provider and should not contain more than 20 percent of students who have been identified by the start of the program year as having a developmental delay or disability. However, in attempting to promote inclusion in this way, approved providers may not deny students' admission to a classroom based on their disability or delay.
- <sup>11</sup> There is no specific DLL policy for PKC; school-based programs follow the Basic Education Circular (BEC) policies for PK programs provided by school districts.
- <sup>12</sup> The PA State Board of Education passed English Development Standards in 2017. OCDEL has partnered with WIDA Early Years to provide support, resources, and PD for English language instruction for young children.
- <sup>13</sup> Curriculum companies may choose to submit an alignment at any time. The state aligned list reflects those who have voluntarily undergone the alignment process.
- <sup>14</sup> For more information, see: <https://www.education.pa.gov/Early%20Learning/Early%20Learning%20Standards/Pages/default.aspx>
- <sup>15</sup> Lead teachers in all settings were required to have a BA and ECE certification by December 2011. The N-3 certification will no longer be issued, though teachers who currently have it will still be able to work in the program. Teachers who do not meet this requirement are considered not in compliance, which can lower the program score on the Program Review Instrument and affect future funding.
- <sup>16</sup> Assistant teachers must meet NCLB requirements and are required to have two years of post-secondary education/60 college credits, an AA or higher, or the ability to meet a rigorous standard of quality and to demonstrate through formal state or local assessments knowledge of the ability to assist in instruction.
- <sup>17</sup> First year teachers are required to have induction plans; teachers in child care centers are required to have PD plans as part of QRIS requirements.
- <sup>18</sup> Other includes other degrees, not specified, and unknown.
- <sup>19</sup> Scholarships, and bonuses are available for child care PKC employees as part of QRIS system; loan forgiveness is available to public school teachers in qualifying schools.
- <sup>20</sup> Fall 2018 Impact study; Spring 2019 Implementation Study.
- <sup>21</sup> Teacher evaluations are required and most programs use the Danielson Framework. One tool that assesses the classroom environment must be used, but programs may choose which tool to use.
- <sup>22</sup> Programs located in child care are required to participate in the QRIS.

### **RHODE ISLAND - Rhode Island State Prekindergarten Program**

- <sup>1</sup> The state's PDG funds are used to pay for children enrolled in State Pre-K that qualify under the federal guidelines. There are 1,080 children enrolled in the state Pre-K

- program that are funded with a mix of federal and state dollars. All income-eligible children are funded with PDG funds. Children at or over income are funded with state funds.
- <sup>2</sup> There is no formal partnership at the state level, but individual grantees are required to make extended-day services available either by providing such services directly or by partnering with another agency that offers such services.
  - <sup>3</sup> Children must reside in the district, town, or community in which the program is offered and be four on or before September 1st.
  - <sup>4</sup> Meals must be USDA compliant.
  - <sup>5</sup> The full physical exam includes a well visit check and copy of immunizations.
  - <sup>6</sup> Programs are required to offer these services utilizing existing state programs and systems.
  - <sup>7</sup> PD and TA are offered. Written policies to support children with disabilities are required in program documentation, and data are collected on how state Pre-K staff are involved with children during the referral/IEP process. Districts are also beginning to implement the Itinerant Early Childhood Special Education model within certain State Pre-K classrooms.
  - <sup>8</sup> Rhode Island defines Chronic Absenteeism as the percentage of students who miss 10% or more of school days during the year.
  - <sup>9</sup> Joint Policy Statement on Expulsion and Suspension Policy in Early Childhood Settings; It is written into Rhode Island's policy document with a link to the AS department of Health and Human Services and US Department of Education's joint policy statement.
  - <sup>10</sup> State Pre-K teachers are required to participate in comprehensive PD focused on understanding and using the Rhode Island Early Learning and Development Standards (RIELDS).
  - <sup>11</sup> State policy provides an approved list of child assessments aligned with the ELDS.
  - <sup>12</sup> The state does not monitor fidelity of implementation of a specific curriculum, but does monitor implementation of curricula through written frameworks as well as observations and interviews.
  - <sup>13</sup> All lead teachers must have a Pre-K-2 state teaching certification. Rarely, an approved, interim exception is given to complete the required courses by taking six credits per year. Teachers are also required to have a state certificate on the RIELDS.
  - <sup>14</sup> Beyond the required 20 hours per year, teachers may choose from numerous optional PD offerings based on their needs.
  - <sup>15</sup> The state contracts with a vendor who is available to provide in-program/classroom support as well as large group support. Monthly onsite visits are required, at a minimum, as is attendance at a portion of the group communities of practices.
  - <sup>16</sup> State Pre-K teachers in nonpublic schools are paid on par with 1st to 3rd step public school teachers. Budgets are reviewed each year to verify that annual increases are applied to those salaries.
  - <sup>17</sup> For additional information, see: <http://www.ride.ri.gov/Portals/0/Uploads/Documents/Instruction-and-Assessment-World-Class-Standards/early%20childhood/2019-2020-RI-PreK-RFP.pdf>
  - <sup>18</sup> All state funded Pre-K teachers must follow CECE regulations which require 20 hours of PD and 2 hours per week of paid planning time. This is above and beyond public school K-3 requirements.
  - <sup>19</sup> Nonpublic assistant teachers receive a higher salary than public school assistant teachers. The only difference is in the retirement benefits; though most nonpublic schools do offer retirement options such as 401K.
  - <sup>20</sup> All state funded Pre-K assistant teachers must follow CECE regulations which require 20 hours of PD. This is above and beyond public school K-3 requirements.
  - <sup>21</sup> The Rhode Island Education Aid Foundation Formula, approved in 2010, takes a phased-in approach to expanding access to high-quality pre-K, starting with communities that have a high proportion of children eligible for free- and reduced-price lunch. The phased-in approach, investing \$10 million over 10 years, will ensure that pre-K expansion creates high-quality learning programs, improves access for students who need it the most, and assures a smooth transition between early childhood and K-12.
  - <sup>22</sup> Child Trends is currently evaluating child outcomes of last year's cohort of children. ECERS and CLASS are some of the tools being used along with pre- and post-tests of children in Pre-K and in the control group.
  - <sup>23</sup> TS GOLD has a reliability training prior to the use of the tool that lead teachers are required to pass.
  - <sup>24</sup> The state participated in a pilot of a KEA, but has not received funding to continue this work at this time. In the absence of funding, the state selected Teaching Strategies Gold, after a RFP process, to provide a state Master Agreement price for those districts wishing to use a KEA.
  - <sup>25</sup> Feedback is given in the form of a written report that is reviewed with the program and the teaching team.
  - <sup>26</sup> A minimum level of quality is not required; however, if a program receives a low score (i.e., below 3 stars), the state works with them on concrete plans for program quality improvement.

### **SOUTH CAROLINA - South Carolina Child Early Reading Development and Education Program (CERDEP)/Education Improvement Act Child Development Program (EIA 4K)**

- <sup>1</sup> South Carolina's state-funded preschool programs are jointly administered. The South Carolina Department of Education (SCDE) oversees delivery within public school districts (CERDEP 4K and EIA 4K) and South Carolina First Steps to School Readiness oversees delivery of the CERDEP 4K program in private settings. Both public and private CERDEP classrooms must be licensed by the South Carolina Department of Social Services (DSS).
- <sup>2</sup> A total of 61 school districts participate in the South Carolina Early Reading Development and Education Program (CERDEP), and there are an additional three school districts that are eligible based on the 70% or higher poverty level but elect not to participate in the public program. Private child care programs in those three districts may participate, for a total of 64 districts. The remaining districts do not meet the poverty level to participate in CERDEP, but they must offer, at a minimum, one half-day EIA 4K class. Twenty-one school districts have at least one EIA 4K classroom.
- <sup>3</sup> While not included in Head Start enrollment counts, several Head Start grantees serve as private CERDEP 4K providers via SC First Steps. These students meet 4K eligibility requirements and are included in 4K enrollment counts (as opposed to Head Start enrollment counts).
- <sup>4</sup> Enrollment by eligibility for FRPL reflect data from a Poverty Indicator that is district-based and based on a student's socio-economic level.
- <sup>5</sup> EIA 4K classrooms must operate for at least 4 hours per day, but individual districts can choose to extend the number of hours per day. CERDEP programs operate a minimum of 6.5 hours per day, five days a week, for at least 180 instructional days. A state budget proviso introduced for the 2017-2018 school year permitted CERDEP providers to: a) extend the school day up to 8.5 hours per day, b) extend the school year to 220 days (6.5 hours daily), or c) extend the traditional school year with up to 10 weeks of summer programming at 8.5 hours daily. No districts opted to extend the school day during the 2017-2018 year; however, 36 CERDEP districts participated in the extended year program. More than 80% of participating private providers offered an extended day or extended, year-round model during 2017-2018.
- <sup>6</sup> Three-year-olds may enroll in EIA 4K when receiving special education services.
- <sup>7</sup> Children are eligible to enroll in CERDEP for one year only. A waiver of this requirement may be sought from the SCDE or SC First Steps in the rare event that a child is deemed unable to advance to kindergarten for developmental or other reasons. For EIA 4K, this determination is made at the district level based upon local school board policy.
- <sup>8</sup> Eligibility for CERDEP is based on residence in a CERDEP-eligible district, and family income at or below 185% of FPL or eligibility for Medicaid. Eligibility for EIA 4K is also based on qualifying for FRPL or Medicaid. Children with developmental delays documented through state approved screening assessments or children with medically documented disabilities who do not already qualify for special need services should also be considered for enrollment. If more students seek to enroll than available space permits, districts shall prioritize students (at the time of acceptance) on the basis of family income, with the lowest family incomes given the highest enrollment priority.
- <sup>9</sup> For CERDEP only: Providers maintain classrooms with at least ten 4-year-old children, but no more than twenty 4-year-old children, with an adult to child ratio of 1:10. Waivers of the minimum class size requirement may be granted by the SCDE or SC First Steps. Flexibility of this ratio requirement during naptime is allowed by DSS. Private providers adhere to the 1:10 ratio during the day, including rest time.

- <sup>10</sup> All CERDEP students shall be offered breakfast, lunch and a snack that meets USDA requirements daily.
- <sup>11</sup> South Carolina Department of Health and Environmental Control (DHEC) recommends vision and hearing screenings for all preschool children. Many state-funded programs comply with this recommendation. If CERDEP schools have resources for health screenings available, it is recommended that they should occur during the first 90 days of school. Children should be referred to an appropriate health-care provider or the local health department when a health problem is suspected or detected. All health-related referrals are noted in the child's health file on site and the results of all screenings are shared with parent(s)/guardian(s).
- <sup>12</sup> The State has adopted the EdFacts, a USED initiative to collect, analyze, and promote the use of high-quality, pre-kindergarten through grade 12 (PreK-12) data, definition to define chronic absenteeism: an absent student is one who misses 50% of the instructional day for any reason, regardless of whether the absence is excused or unexcused. A student is absent if he or she is not physically on school grounds and is not participating in instruction or instruction-related activities at an approved off-grounds location for the school day. A chronically absent student is one who misses 10% or more school days during the school year. The State has created chronic absenteeism reports to assist school districts with identifying preschool students who are chronically absent. Districts are also required to provide parents with written explanation of the unlawful and lawful absences as it relates to Regulation 43-274. The child's parent/guardian(s) should be contacted to determine the reasons for nonattendance, tardiness, or early departure. School district are encouraged to develop an attendance intervention plan to identify the underlying factors and to provide interventions to improve attendance.
- <sup>13</sup> SC First Steps 4K Regional Coordinators monitor chronic absenteeism in private CERDEP programs.
- <sup>14</sup> Proviso 1A.63: Each school district and private provider participating in a publicly funded prekindergarten program will administer one of the formative assessments selected by the department and SC First Steps to each child eligible for and enrolled in a publicly funded prekindergarten program during the first forty-five days of the school year and during the last forty-five days of the school year. Accommodations that do not invalidate the results of these assessments must be provided in the manner set forth by the student's IEP or 504 Accommodations Plan.
- <sup>15</sup> CERDEP districts: both public and private programs, are required to choose from a state-provided list of evidence-based curricula.
- <sup>16</sup> The SCDE conducts monitoring visits to all public 4K districts using ELLCO. This tool utilizes goal setting, monitoring, and feedback. First Steps conducts announced and unannounced visits to each private CERDEP 4K classrooms monthly, providing oversight and on-site technical assistance to teachers to ensure curricular fidelity to an evidence-based model. Coaching to Fidelity and The Fidelity Tool for Preschool, by Teaching Strategies, are used to promote individual growth with each teacher and improve child outcomes. ECERS-3 is used to raise classroom quality for continuous improvement.
- <sup>17</sup> First Steps' private CERDEP providers may select Creative Curriculum, HighScope or Montessori.
- <sup>18</sup> SC First Steps promotes the use of Conscious Discipline in classrooms to support social-emotional learning and development.
- <sup>19</sup> Programs electing to use Montessori as a curriculum model must have a Montessori-credentialed lead teacher.
- <sup>20</sup> In classrooms in private centers, the lead teacher must have at least a two-year degree in ECE or a related field and be enrolled and demonstrating progress toward the completion of a teacher education program within four years. For public teachers, the grade span for EC certification is Pre-K to Third grade.
- <sup>21</sup> Assistant teachers in both public schools and private centers are required to enroll in the ECD 101 TEACH college class within one year of being in the position.
- <sup>22</sup> CERDEP only: The 15 clock hours per year must be approved by the Center for Child Care Career Development, and must include at least five hours in curriculum, five hours in CD, and five hours in health and safety, guidance, or other related topics. All lead teachers and teaching assistants must complete PD with the Occupational Safety and Health Administration (OSHA) annually.
- <sup>23</sup> All CERDEP assistant teachers have individualized annual PD plans.
- <sup>24</sup> Coaching is focused on literacy. In addition to the various PD opportunities at the district and state levels, there are 22 literacy specialists, 6 early childhood specialists, and over 650 reading coaches across the state that provide job-embedded, on-going professional learning for teachers and administrators, including at the preschool level.
- <sup>25</sup> The frequency of coaching or mentoring in public schools varies based on district and teacher need. First year teachers are required to receive first year teacher induction and mentoring. SC First Steps makes announced and unannounced classroom monitoring and technical support visits to each classroom roughly twice monthly. All teachers participate in an individualized growth and development plan.
- <sup>26</sup> This number varies based on need and number of 4K classrooms per public school. SC First Steps' Regional 4K Coordinators are assigned caseloads of roughly 20 sites each.
- <sup>27</sup> The data include only CERDEP teachers. The teachers with Bachelor's count also includes Bachelor's + 18, and Master's includes teachers with Master's + 30. There are an additional 529 EIA 4K lead teachers. We are unable to obtain a count by educational level for EIA 4K lead teachers. All of EIA 4K lead teachers must have at least a Bachelor's degree in Early Childhood. Private CERDEP lead teachers are required to hold a minimum of an Associate's degree working towards a 4-year degree in ECE. The "other" in the count is one lead teachers from a nonpublic program who holds a Juris Doctorate, as well as SC certification in ECE with a BA degree.
- <sup>28</sup> South Carolina public 4K teachers receive the same contract as public K-3 teachers, which addresses a 190-day school year including PD and in-service days.
- <sup>29</sup> First Steps incentivizes an individualized growth and development plan for each lead teacher. TEACH scholarships are available for teachers to complete a 4-year degree in ECE.
- <sup>30</sup> Lead teachers in nonpublic schools who meet their semester goals qualify for a salary incentive.
- <sup>31</sup> Nonpublic school assistants are awarded a stipend for PD participation.
- <sup>32</sup> Public CERDEP: \$47,424,102; EIA 4K: \$15,513,846; First Steps: \$14,634,707 in state funding.
- <sup>33</sup> CERDEP funding comes from Proviso 1.58 of the 2017-2018 Appropriations Bill. Payments for students continuously enrolled since the start of the school year were calculated at the maximum funding of \$4,422 for the maximum number of authorized students, as adjusted for the pro rata enrollment. EIA 4K is funded through the state's Education Improvement Act, which comes from a dedicated sales tax. For the 2017-2018 school year, \$15,513,846 was distributed among the 21 EIA 4K districts.
- <sup>34</sup> EIA 4K's funding formula is dependent on the number of kindergarten students from the prior school year that qualify for FRPL. CERDEP is funded based on the number of eligible students enrolled.
- <sup>35</sup> CERDEP does not permit subcontracting. During the current fiscal year, South Carolina First Steps to School Readiness may extend four-year-old kindergarten provider eligibility to military child care settings regulated by the United States Department of Defense. State funds appropriated for use in military child care facilities must be used to expand service to CERDEP eligible children residing in school districts approved for participation during the prior fiscal year and may not be used to supplant any existing federal child care investment.
- <sup>36</sup> The Education Oversight Committee contracts the CERDEP evaluation through the University of South Carolina College of Education.
- <sup>37</sup> Each school district and private provider is required to administer one of the formative assessments selected by the department to each child eligible during the first 45 days of the school year and during the last 45 days of the school year. SC First Steps 4K teachers assess all private CERDEP students with TS Gold. All private CERDEP students have 3 or 4 progress checkpoint windows depending on whether it is a 180- or 220-day program.
- <sup>38</sup> Montessori classrooms may also use a Montessori assessment. Read to Succeed requires that all public pre-K students are given a readiness assessment upon entering school. Information on the chosen assessments can be found here: <https://ed.sc.gov/instruction/early-learning-and-literacy/assessments-in-early-learning/pre-k-readiness-assessments/>
- <sup>39</sup> Implemented in 2017-2018, the KRA (Kindergarten Readiness Assessment) determines each child's readiness level from an evaluation of four domains: Social Foundations, Language/Literacy, Mathematics, and Physical Well-Being. The KRA provides a snapshot of students' abilities at the beginning of the school year.
- <sup>40</sup> The Fidelity Tool Teacher Checklist and The Fidelity Tool for Administrators (by Teaching Strategies) provide reflective and observational based data for each teacher to develop skills based on an individualized plan in private CERDEP classrooms.
- <sup>41</sup> Annual site visits to all classrooms by the SCDE are not required, but the Early Learning office attempts to visit as many public classrooms as possible based on district and teacher need. All private CERDEP classrooms receive, at a minimum, once a month visits by their Regional 4K Coordinator.
- <sup>42</sup> The state's Early Childhood Advisory Council is working towards developing an ECIDS.

## TENNESSEE - Tennessee Voluntary Pre-K (VPK)

- <sup>1</sup> Authority over the Tennessee Voluntary Pre-K program (VPK) remained the same for 2017-2018, but the Office of Early Learning (OEL) became part of the newly created Division of Teaching and Learning within Tennessee Department of Education (DOE).
- <sup>2</sup> VPK is meant to serve 4-year-olds. Beginning in 2017-2018, 3-year-olds were not allowed to enroll in VPK without permission from the state.
- <sup>3</sup> A total of 184 classrooms have blended funding with VPK serving 3,579 children.
- <sup>4</sup> Programs are required to operate 5.5 hours per day, excluding nap time.
- <sup>5</sup> Although there is not a formal partnership for extended services, many districts provide extended care for the school-age children, which is open to 4-year-olds.
- <sup>6</sup> Tennessee operates on a 180 day per school year calendar.
- <sup>7</sup> The state must give permission for districts to enroll kindergarten-age children with documented disabilities in VPK.
- <sup>8</sup> VPK is targeted to low-income 4-year-olds.
- <sup>9</sup> If a district has exhausted all efforts to enroll 100% income eligible 4-year-olds, other children may enroll according to the established criteria set forth by the district's Community Pre-K Advisory Council (CPAC).
- <sup>10</sup> Tennessee has a 3-tier eligibility system. The first tier includes children whose income would qualify them for free or reduced-price lunch, as well as children who are homeless or in foster care. The second tier includes children who are not income eligible, but are screened and identified as at-risk due to an IEP, or who are ELLs. The third tier includes locally determined factors, which include (among other possibilities): parents with low education levels, parental substance abuse, risk that the child will not be ready for kindergarten, children born to teen parents, low birth weight or other health risk, or a parent on active military duty.
- <sup>11</sup> There are no preschool 3-year-old classes funded with VPK dollars. Multi-age classrooms may have up to 20 students with a ratio of 1:10, with a maximum of nine 3-year-olds. In order for a district to enroll 3-year-olds, they must request approval from the state.
- <sup>12</sup> Snack requirements depend on length of day.
- <sup>13</sup> The full physical exam includes vision, hearing, height/weight, BMI, blood pressure, immunizations, psychosocial/behavioral, and developmental screening.
- <sup>14</sup> Other comprehensive services are encouraged. Implementation of extra services varies by districts.
- <sup>15</sup> If the ratio of students with an IEP exceeds 50%, teachers are required to have a specialized license. If the ratio is under 50%, a general pre-K license is required and trainings and supports are provided.
- <sup>16</sup> In the VPK Scope of Services it states that districts must ensure that teachers have the training and support they need to meet the needs of DLL children.
- <sup>17</sup> Districts must provide a copy of their attendance policy for all state-funded pre-K classrooms. The state monitors that all districts have these in place.
- <sup>18</sup> In accordance with Chapter 0520-12-01, Standards for School-administered Child Care, each school is to provide a copy of their "Criteria for the disenrollment of children" or their expulsion policy.
- <sup>19</sup> Guidance documents and PD opportunities to support the use of the ELDS were provided and state training, guidance and support will continue with the implementation of the revised ELDS. The Portfolio assessment is required to follow Tennessee's ELDS.
- <sup>20</sup> The TN Pre-K Student Growth Portfolio is required for all teachers to complete and it must be aligned with the ELDS and developmental domains.
- <sup>21</sup> The state has revised the approved curricula from 37 to three in 2017-2018: Big Day for Pre-K, Creative Curriculum, and Connect 4 Learning. All districts were provided money to purchase a new curriculum as well as sponsored trainings and ongoing assistance with their new curriculum. A school may request a waiver from OEL in order to use a different curriculum. An example of this would be Montessori.
- <sup>22</sup> The districts are required to use the state-approved curriculum to fidelity, but the state does not currently have a process to monitor this. Currently the onus is on the school districts.
- <sup>23</sup> Tennessee requires that pre-K teachers in state funded classes are certified to teach pre-K. Any exceptions to this would require a one-year waiver from DOE.
- <sup>24</sup> State law passed in 2005-2006 requires that at least one educational assistant per classroom hold a CDA or Associate's Degree, or be actively working toward such credentials. If no person with this credentials is available, state law allows a person with a high school degree and relevant experience working with pre-K children or other early childhood programs to be employed. Assistants must demonstrate progress toward completion of a CDA to be rehired. There is no degree requirement for assistant teachers but they are required to receive a minimum of 30 hours of state approved PD on ECERS, ELLCO, Personal Safety, ELDS, Child Care Rules and Regulations, and Social Emotional Learning Foundations. At least six hours of the training must be in developmentally appropriate literacy practices. Training may occur prior to, or during employment.
- <sup>25</sup> In 2017-2018, the requirements increased to 24 clock hours per year for directors, teachers, and assistants. This requirement will increase to 30 hours in 2018-2019. Six of the 30 hours must be developmentally appropriate literacy practices.
- <sup>26</sup> According to the VPK Scope of Services, all teachers, directors, and assistant teachers are required to have a personal PD plan. All teachers are also required to participate in TEAM evaluations, which are used to coach and support teacher growth, and may be used to inform the personal professional development plan.
- <sup>27</sup> The PDG grant has provided ongoing training and coaching supports in Shelby and Davidson districts. In addition, the state is incorporating some professional learning that will provide ongoing supports for teachers. For example, the EL 2.0 training series provides directors, leaders, teachers, and assistant teacher with professional development on how to improve classroom practices.
- <sup>28</sup> Lead Teacher Other: Ed.S. (38) and unknown (20). Some of these numbers are duplicated due to lead teachers having multiple degrees. Total number of lead teachers in TN is 988.
- <sup>29</sup> Teachers are not required to be certified or endorsed in DLL/ELL, but the district is required to provide support to teachers on meeting the needs of these learners.
- <sup>30</sup> According to the VPK Scope of Services, "Salaries for personnel in community-based agencies shall be reasonably comparable to those currently in effect in the LEA where the respective VPK program is located. Reasonably comparable is defined as a range of compensation that would ordinarily be paid for like services within the school system. Final salaries within the range may be commensurate with qualifications and experience."
- <sup>31</sup> The state requires that nonpublic and public lead teachers' salaries are comparable. See VPK Scope of Services sections C.9 and C.10.
- <sup>32</sup> The VPK Scope of Services does not require these PD days to be paid, but does have specific requirements for PD.
- <sup>33</sup> This is a local level decision as not all districts "contract" teachers for employment.
- <sup>34</sup> While it is not required for PD to be paid time, both assistant teachers and lead teachers have the same number of PD hours (30) they have to obtain in a single year.
- <sup>35</sup> Total 2017-2018 spending does not include \$505,665 in funding from the Ounce of Prevention. Required local spending is estimated to be consistent with required local spending reported in 2016-2017.
- <sup>36</sup> The funding benchmark is \$117,490 per class. The amount provided by the state varies depending on the Basic Education Plan (BEP) funding formula used in all grades. The district is required to provide a local match for any portion not provided by the state. The local match amount is determined by the BEP funding formula, which is based on 45 different components. Districts may use local funds, federal funds, or in-kind services to meet their required match.
- <sup>37</sup> A total of 75 of 934 VPK classrooms are housed in community-based programs.
- <sup>38</sup> Because of the findings in the Vanderbilt study, the Pre-K Quality Act of 2016 was passed. To date the following items have been completed: 1) Revised the Tennessee ELDS; 2) Created a shared definition of quality early education; 3) OEL created and shared its vision for early learning at statewide district Early Learning 2.0 trainings; 4) Delivered Early Learning 2.0 training to support strong pre-K curriculum implementation; 5) Created TEAM pre-K Guidance Document to support district leaders in their evaluation of pre-K teachers; 6) Completed comprehensive curriculum review and narrowed state-approved list from 37 to three; 7) Successful shift to a competitive VPK grant based on quality; 8) Piloted CLASS observations in approximately 200 classrooms across the state; 9) Trained School-based Support Services program evaluators in CLASS, quality documentation, early literacy practices, and developmentally appropriate practice; and 10) Statewide implementation of Pre-K Student Growth Portfolios.
- <sup>39</sup> In 2017-2018, the state-developed Pre-K Student Growth Portfolio will be implemented, following the pilot. According to Tennessee's Pre-K Quality Act, Teachers and

districts must choose an assessment from a state-approved list to demonstrate student achievement. Student achievement scores count as 15% of a teacher's evaluation; 50% of the evaluation is based on classroom observation and the remaining 35% is based on student growth. The Pre-K Student Growth Portfolio measures English language arts and math only, but districts can choose to select other assessments to assess additional domains.

- <sup>40</sup> In 2017-18, the Kindergarten Entry Inventory (KEI) created by DRDP was piloted in PDG school districts and different tools were piloted in other kindergarten classrooms. In 2018-2019, only the KEI is used and only in PDG school districts.
- <sup>41</sup> Tennessee contracted with Teachstone to conduct a pilot of assessments in 2017-2018. In this pilot, approximately 200 classrooms were assessed. In addition, districts are required to have someone who is reliably trained in ECERS and ELLCO to do an assessment on all new teachers and/or teachers who have changed grade levels.
- <sup>42</sup> The state uses the CLASS data to inform districts and the department of trends so they can better develop PD for leaders, teachers, and assistants. The ECERS and ELLCO information is used to put teachers on a PD plan for improvement and provide teachers with feedback for quality improvements.
- <sup>43</sup> The state requires that all classrooms in community-based organizations must be licensed by the Tennessee Department of Human Services (DHS) and be a three-star facility.
- <sup>44</sup> The state does not require site visits by the LEA, but does require the LEA to ensure all classrooms are following the law, VPK Scope of Services, and the Standards for School-administered Child Care. It is a local decision on how they monitor those processes. All classrooms receive a minimum of two visits per year by their program evaluator and an additional six visits by their educational consultant in the PDG districts.

## TEXAS - Texas Public School Prekindergarten

- <sup>1</sup> A district shall offer half-day pre-K classes if the district identifies 15 or more eligible children who are at least 4 years of age by September 1 of the current school year. A school district may offer half-day pre-K classes if the district identifies 15 or more eligible children who are at least 3 years of age.
- <sup>2</sup> Children enrolled in Head Start are automatically eligible for pre-K. However, they are not required to be enrolled in both.
- <sup>3</sup> The state requires 180 minutes per day or 32,400 minutes per year.
- <sup>4</sup> Additional eligibility criteria include: (1) Being unable to speak and comprehend the English language; (2) Being educationally disadvantaged (eligible to participate in the national free or reduced-price lunch program); (3) Homelessness; (4) Child of an active duty member of the armed forces of the United States; (5) Child of a member of the armed forces of the United States who was injured or killed while serving on active duty; (6) In, or have been in, the conservatorship of the Department of Family and Protective Services (DFPS) following an adversary hearing; or (7) Child of a person eligible for the Star of Texas Award.
- <sup>5</sup> There is no rule regarding pre-K class size or staff-to-child ratio, though school districts are encouraged to follow the requirements for kindergarten. If a school district contracts with a private entity to operate the district's pre-K program, the program must comply with child care licensing standards. The recommendation is a child to staff ratio of 11:1 with a limit of 22 children per classroom, but this is not required.
- <sup>6</sup> Some districts serve either breakfast or lunch, and some offer both meals. Districts offering full-day pre-K are required to provide lunch.
- <sup>7</sup> Other health screenings are determined locally.
- <sup>8</sup> 19 Texas Administrative Code 89.63 requires instructional arrangements/settings to be determined based on the individual needs and IEPs of eligible students receiving special education services.
- <sup>9</sup> House Bill 674 passed in the 85th legislative session.
- <sup>10</sup> Approaches to Learning is covered throughout the ELDS, but not an explicit, separate chapter.
- <sup>11</sup> For a full list of curricula see: [https://tea4avfaulk.tea.texas.gov/ematevi/EMATREPORTS/RptInst/EM\\_CURR\\_ADPN.pdf](https://tea4avfaulk.tea.texas.gov/ematevi/EMATREPORTS/RptInst/EM_CURR_ADPN.pdf)
- <sup>12</sup> Paraprofessionals serve as Educational Aides I, II, and III. Educational Aide I requires at least a HSD and experience working with students or parents. Educational Aide II requires at least a HSD and one of the following requirements: two creditable years of experience; a minimum of 15 college credit hours with emphasis on CD or related subject areas; demonstrated proficiency in a specialized skill area, as determined by the school district; or experience working with students or parents. Educational Aide III requires at least a HSD and one of the following: three creditable years of experience; 30 college credit hours with some emphasis on child growth and development or related subject areas; or experience working with students or parents. There are no specific requirements for lead teachers or assistant teachers in nonpublic school settings.
- <sup>13</sup> In the High-Quality Prekindergarten program that covers approximately 85% of preschool children, the teachers are required to have 30 hours each year in ECE including 15 hours of mentoring or instructional coaching.
- <sup>14</sup> Public schools must follow a minimum salary schedule. Nonpublic schools would not be subject to this schedule. Public schools and nonpublic school fringe benefits are determined locally.
- <sup>15</sup> The CCDF funds are made available through the Texas Workforce Commission. An Interagency Agreement is established to pass a small portion of CCDF funds through to the Texas Education Agency (TEA). Funds are awarded to UHealth, Children's Learning Institute.
- <sup>16</sup> Pre-K students generate formula funding based on average daily attendance (ADA), in the same manner as K-12 students, with the provision that they are eligible for a maximum of one half-day ADA.
- <sup>17</sup> Districts are required to administer a kindergarten reading instrument from a list adopted by the commissioner or by the district-level committee. Children are assessed in kindergarten at the beginning, middle, and/or end of the year, and programs are required to submit beginning-of-the-year data to the TEA.
- <sup>18</sup> Nonpublic providers must be accredited by a research-based, nationally recognized, and universally accessible accreditation system approved by the commissioner; be a Texas Rising Star Program provider with a three-star certification or higher; be a Texas School Ready! participant; have an existing partnership with a school district to provide a pre-K program not provided under this subchapter; or be accredited by an organization that is recognized by the Texas Private School Accreditation Commission.
- <sup>19</sup> No site visits were conducted, but districts were required to submit data directly into the TEA's data system.

## VERMONT - Vermont Universal Prekindergarten Education (Act 166)

- <sup>1</sup> There are a number of additional state employees involved in the public pre-K program part-time but an estimate of their hours is not available at this time.
- <sup>2</sup> Act 166 requiring Universal Prekindergarten was partially implemented during the 2015-2016 school year. Full implementation of Act 166 was required in the 2016-2017 school year, making the 2017-2018 school year the second year of full implementation of Act 166. In 2017-2018, school districts developed agreements with private prequalified pre-K programs in towns/communities including 146 public prequalified pre-K programs and 261 private prequalified pre-K programs.
- <sup>3</sup> Districts must provide the resources or tuition to families, but they do not need to offer a program.
- <sup>4</sup> Age was not identified for 89 children.
- <sup>5</sup> Decisions to maintain PDG-funded classrooms are made at the district level.
- <sup>6</sup> Although there is no formal partnership at the state-level with other agencies designed to extend the program day, it is important to note that school districts work at the local-level with their community-based child care programs, or using local education dollars, to extend pre-K options for families.
- <sup>7</sup> Programs operate up to 5 days per week, determined locally.
- <sup>8</sup> Act 166 requires school districts to offer pre-K to all 3-, 4- and 5-year-olds not enrolled in kindergarten for 10 hours per week for 35 weeks over the academic year.
- <sup>9</sup> Vermont child care licensing regulations stipulate that the interior space licensed for use by children shall provide a minimum of 35 square feet of safe usable space per child for the maximum number of children using the space at one time.
- <sup>10</sup> Many of the programs provide snacks, breakfast, and/or lunch.
- <sup>11</sup> As part of Child Find, programs screen children on their developmental growth. Vision and hearing screenings are required under child care regulations as well. Screening information is not collected at the state level. Child Find must be conducted annually by all school districts. Child Find activities to locate, identify, and evaluate if

- warranted (such as pre-K screening) is planned, offered and conducted by local school districts.
- <sup>12</sup> Referral to social services is part of mandated reporting to the Department of Children and Families.
  - <sup>13</sup> The state anticipates developing a state guidance document to support serving children who are DLL during the 2018-2019 school year.
  - <sup>14</sup> All private and public prequalified pre-K programs must comply with the Child Development Department's (CDD) expulsion criteria as defined in Childcare Licensing Regulations 6.2.8.4 (1)(2)(3). The licensee shall support continuity of care and education. In the event that a child's continued enrollment is at risk the following shall apply: 1) consult with child's parents, 2) provide parents written notice at least five days prior to expulsion, 3) when child is expelled, a full copy of child's file must be provided to family and documentation retained by program. In addition, Vermont outlines discipline practices specific to the use of restraint and seclusion in Rule 4500: <https://education.vermont.gov/sites/aoe/files/documents/edu-state-board-rules-series-4500.pdf>
  - <sup>15</sup> Vermont has adopted TS GOLD as its child progress monitoring measure. TS GOLD is aligned with Vermont Early Learning Standards (VELS). The Vermont Agency of Education (VAE) is providing technical assistance and training to school districts and private pre-K programs on VELS, TS GOLD, CLASS, ASQ-3, ASQ-SE, curriculum, etc.
  - <sup>16</sup> Detailed guidance and materials developed by the state and made available to local providers; Direct training or technical assistance by state or regional staff; Direct training or technical assistance provided by vendors paid by the state and/or a federal grant.
  - <sup>17</sup> Vermont has a newly developed pre-K Monitoring System to ensure that all programs are meeting Act 166 standards, including curriculum alignment with the VELS.
  - <sup>18</sup> Curricula are locally determined but must provide alignment with the VELS across the nine domains.
  - <sup>19</sup> In nonpublic settings, at least one teacher who holds a bachelor's degree/master's degree and a valid VAE educator license with an endorsement in either ECE or early childhood special education, must be on site and physically present to oversee and ensure that curriculum is aligned with the VELS and pre-K instruction is provided by the classroom teacher during designated pre-K hours.
  - <sup>20</sup> A private prequalified pre-K program operated in a licensed, center-based program shall employ, or contract for the services of, at least one teacher who has a bachelor's degree and holds a valid Vermont educator license with an endorsement in either ECE or early childhood special education. The 10 hours the licensed teacher is present shall coincide with the hours of pre-K education paid for by tuition from districts.
  - <sup>21</sup> Vermont has teacher associates and teacher assistants, both of whom are required to have a high school diploma or GED and preservice training in early childhood development or education.
  - <sup>22</sup> Additional PD hours may be required by specific schools on a locally determined basis.
  - <sup>23</sup> Vermont does not currently require coaching as a PD component, however, it is frequently utilized within VT's PD system and teachers who are identified as specifically in need of coaching support are required to utilize it. There are multiple PD offerings that include coaching to support and increase implementation of evidence-based practices in the early childhood setting.
  - <sup>24</sup> All teachers in public settings are required to have a Bachelor's of Arts or Science (BA/BS) at a minimum. We do not collect statewide data on how many teachers have advanced degrees beyond the BA/BS. The number reported for lead teachers with a BA (n=208) represents teachers who are on salary with an operating school district. Teachers in nonpublic settings are not included in this number, thus it does not represent the total number of lead teachers in our UPK programs.
  - <sup>25</sup> Vermont has teacher endorsements in the area of ELL, and some of these teachers work with pre-K students and families. However, currently, this endorsement is not required statewide.
  - <sup>26</sup> This is a decision made at the local level.
  - <sup>27</sup> Incentives are not provided directly to the teacher, however, programs receive incentives for achieving program quality benchmarks (QRIS Ratings).
  - <sup>28</sup> A total of \$70,002,759 was used to support the program. Other than federal PDG, Vermont could not break this amount into state, local, and federal spending. NIEER estimated the breakdown based on K-12 spending. Budgets, including district costs for pre-K, are determined and approved at the local level and then funded through the Education Fund. The state's Education Fund provides funding for pre-K-12 education spending.
  - <sup>29</sup> A total of \$65,289,078 was used to support Vermont's Act 166 Program. Budgets including district costs for pre-K are determined and approved at the local level and then funded through the Education Fund. The state Education Fund provides funding for PreK-12 education spending. The state was unable to break this down into state, local, and federal sources. This figure likely includes funding from the State Education Fund's school funding formula and state Essential Early Education (early childhood special education) funds. Approximately 25% of all districts also use Title I dollars to support pre-K, however, given districts do not report revenues by grade level, actual amounts are unknown.
  - <sup>30</sup> Act 166 requires school districts to fund school-operated pre-K programs as well as make payments to offset tuition costs for families whose children attend a private pre-K program.
  - <sup>31</sup> There are two different formal evaluations of pre-K done in Vermont. First, is the annual pre-K evaluation commissioned by the legislature. This evaluation reports on enrollment in publicly-funded pre-K, broken down by demographic and geographic information, as well as financial expenditures and child outcome data. An additional, larger, evaluation was mandated by the state legislature, which is currently being conducted by the Education Development Center.
  - <sup>32</sup> Ready For Kindergarten! Survey (R4KIS) is administered in fall of the kindergarten year to assess school readiness. <https://education.vermont.gov/student-support/early-education/assessment>
  - <sup>33</sup> Teachers complete an interrater reliability training on the TS GOLD website.
  - <sup>34</sup> Vermont conducts statewide and regional trainings for both the ECERS and the CLASS. These tools are incorporated into annual PD training opportunities targeted toward both public and private programs.

## **VIRGINIA - Virginia Preschool Initiative (VPI)**

- <sup>1</sup> Virginia Preschool Initiative (VPI) funds are available to school divisions where there are at-risk 4-year-olds not served by Head Start. School divisions can choose whether or not to take the funds.
- <sup>2</sup> A total of 1,441 children were served in classrooms fully funded by VPI+ (PDG) funds in the 2017-2018 school year.
- <sup>3</sup> A minimum of three hours per day is required for part-day programs. School-day programs are required to operate for a minimum of 5.5 hours per day.
- <sup>4</sup> Eligibility for VPI is based on: (1) family income at or below 200% of FPL, (2) homelessness, (3) student's parents or guardians are school dropouts, or (4) family income is less than 350% of FPL in the case of students with special needs or disabilities. A total of 15% of slots can be filled using locally determined criteria.
- <sup>5</sup> The Appropriation Act language does not mandate meals. All programs are encouraged to provide access to healthy meals and snacks to all students.
- <sup>6</sup> It is a local decision as to who screens and refers and when. The state does not specifically require but encourages the programs to refer for services as needed.
- <sup>7</sup> All programs follow state pre-elementary statute and regulations. School districts partnering with Head Start programs must follow federal Head Start requirements. Support services include parenting support or training, health services for children, and nutrition information.
- <sup>8</sup> The Early Learning Standards are being updated to include college and career ready standards for preschoolers.
- <sup>9</sup> The State mandates the use of the Phonological Awareness Literacy Screening tool.
- <sup>10</sup> The State is in the process of selecting a short list of nationally vetted comprehensive curriculum. No timeline for implementation has been set as of this date.
- <sup>11</sup> Nonpublic employers determine required credentials and specializations. In Virginia, all teachers have at least a CDA and 97% of teachers have a BA or higher. School divisions determine training and specialization requirements for assistant teachers. The instructional lead, who must hold a BA and appropriate specialized training, supervises the classroom teachers and is responsible for management and oversight of the program curriculum and instructional practices.
- <sup>12</sup> The teacher qualification state report provides the total number of teachers (1238): 93% BA (with PK/NK License); 5% Other (BA or higher); 1% CDA; 1% AA
- <sup>13</sup> State funded VPI teachers are required to attend 15 hours of PD each year. In public schools this is part of their paid professional responsibilities.
- <sup>14</sup> The total spending reported may not fully represent actual total VPI spending as these figures account for the state contribution plus the local required match. Localities

can spend more local funds on VPI than their match requires, but data are not available. The state funding formula for the VPI provides a per-pupil rate of \$6,125, of which the state pays a portion and requires a local match based on the composite index of local ability to pay. The local match is capped at half the per-pupil amount. Funds are provided to localities based on the number of at-risk 4-year-olds not served by Head Start.

- 15 Only PALS-PreK is required by the state for all programs. Other domains are assessed through locally determined curriculum assessment which are regulated by the state through desk monitoring and site visits. Approaches to learning are embedded in Social and Emotional Development.
- 16 A literacy screening is required in kindergarten. All but one school division used PALS-PreK. The state provides PALS-K free of charge to all school divisions. However, if a school division chooses to use an alternative assessment, it must be approved by the DOE.
- 17 Once every four years or on a schedule that the VDOE establishes based on need.

## WASHINGTON - Early Childhood Education and Assistance Program (ECEAP)

- 1 During the 2017-2018 school year, ECEAP was administered by the Washington Department of Early Learning. As of July 1, 2018, that department merged into Washington's new Department of Children, Youth, and Families.
- 2 Of the three counties not served by this program, two are served by Head Start and the other is sparsely populated.
- 3 Slots are awarded through open competitive RFPs. The criteria include prioritizing new slots in communities that are currently underserved by ECEAP and Head Start.
- 4 A total of 36% of ECEAP children are at or below 50% FPL; 58.5% are at or below 80% FPL; 76.3% are at or below 100% FPL.
- 5 Washington has four operating schedule options: (1) old part-day model at 2.5 hours per day minimum and 320 hours per year; (2) new part-day model (beginning with slots awarded in 2015) at 3 hours per day minimum and 360 hours per year; (3) full school-day model at 5.5 or more hours per day and 1,000 hours per year; and (4) extended day at 10 or more hours per day and 2,370 hours per year. Full school-day programs must be four or five days per week and extended-day programs must be five days per week. A typical part-day program operates three hours per day, three or four days per week for the school year. Many children in wrap around child care at the same site are not counted in the school day category because ECEAP program standards are not in operation during those hours.
- 6 In 2017-2018, 25 classes met two days per week (part-day model, with longer hours and a three-day class sharing the room). A total of 90 classes met three days per week, 598 classes met four days per week, and 174 classes met five days per week.
- 7 Children are eligible for ECEAP if they are at least 3-years-old, but not yet 5-years-old, by August 31 of the school year, and meet one of the following criteria: (1) Returning to the same ECEAP Contractor from the previous school year; (2) Qualified by their school district for special education services (All children with a school district IEP meet this requirement); (3) Receiving Child Protective Services or Family Assessment Response Services; (4) From a family with income at or below 110% FPL; (5) From a family with income that exceeds 110% FPL and is impacted by specific developmental or environmental risk factors determined by DEL to be linked by research to school performance.
- 8 Beginning in summer 2015, ECEAP served kindergarten-eligible children in the summer before kindergarten in extended-day programs. They are not eligible after public kindergarten begins.
- 9 A priority point system based on a combination of income and other risk factors is used to determine eligibility. Additional risk factors include: expulsion due to behavior, in kinship care, single parent, transferring from Head Start or Early Head Start, parent deployed to combat zone in last year, parent incarcerated, mental illness, health care access, or migrant status.
- 10 Contractors offering sessions lasting less than three hours must provide breakfast or lunch. An additional snack or meal must be offered when round-trip transportation extends the time children are away from home by an hour or more. Contractors providing sessions lasting three or more hours must provide breakfast or lunch, and a snack.
- 11 If a child is identified as having special needs, ECEAP providers must work with the Local Education Agency (LEA) to develop an Individualized Education Program (IEP) that identifies and plans for needed services. For all children with an IEP, contractors must: (1) Request that the LEA invite the ECEAP teacher to IEP meeting, (2) Support the participation of ECEAP teachers to attend IEP meeting, (3) Obtain a copy of the IEP, and (4) Include the child's IEP goals in individualized planning.
- 12 Contractors must ensure a culturally relevant curriculum that supports ongoing development of each child's home language, while helping each child learn English. Contractors must ensure teaching staff: (1) Use Teaching Strategies GOLD Online for their child assessment tool. Staff must enter and maintain accurate information in GOLD; (2) Complete the Home Language Survey on all ECEAP children, and assess the child's English language acquisition, if indicated, using GOLD objectives 37-38. Contractors must have written policies and procedures for recruitment and selection of staff and encourage applicants who reflect the ethnicity, culture, and language of children and families served. Materials and equipment must: (1) Reflect the daily life, family culture, and language of enrolled children (for example, in books, music, photos, dolls, toys, and household items); and (2) Reflect the diversity found in society -- including gender, age, language, and abilities -- while being respectful of the cultural traditions, values, and beliefs of enrolled families.
- 13 If a contractor's average daily attendance falls below 85% for any month, contractors must analyze the causes and patterns of absenteeism and develop a plan to improve attendance. If any child has three or more consecutive absences and staff are not aware of the reasons, staff must contact the family to offer support and help address obstacles to attendance.
- 14 ECEAP Performance Standards stipulate "No Expulsion." Contractors may not expel ECEAP children for behavioral reasons. Contractors must write and implement a policy to address the needs of children with challenging behaviors and prohibit expulsion. The policy includes strategies appropriate to the community served and timeframes for implementation. These four topics must be addressed: (1) Supporting classroom teachers, (2) Planning to meet individual needs of the child, (3) Engaging community resources, and (4) Choosing an alternative schedule or setting. Transitions to an alternative setting, planned jointly by staff and parents, are not considered expulsion. Short-term suspension must not be used as punishment, though receiving temporary services at home may be part of a child's behavioral support plan. If contractors have implemented their usual strategies and the classroom is still unsafe or excessively disrupted, they are encouraged to contact the State ECEAP Office for technical assistance.
- 15 Contractors must use an approved, comprehensive, research-based curriculum (Creative Curriculum or HighScope). The state purchases full sets of either curriculum for each classroom. If an ECEAP contractor wishes to use an alternative research-based curriculum they must complete the Alternative Curriculum Approval Form. The Contractor must ensure staff supporting teachers implementing Creative Curriculum attend a Coaching to Fidelity training provided by UW Cultivate Learning staff. The Contractor must ensure ECEAP lead teachers participate in the state's in-person curriculum training.
- 16 Staff supporting teachers implementing Creative Curriculum (95% of ECEAP sites) must attend a Coaching to Fidelity training provided by UW Cultivate Learning staff. For the .008% of ECEAP sites using HighScope, fidelity is built into training and teacher/trainer feedback. The state purchases full sets of Creative Curriculum - 6th edition or High Scope for each classroom.
- 17 There are multiple ways to meet the teacher requirements: All persons serving in the role of ECEAP lead teacher must meet one of the following qualifications: (1) An associate's or higher degree with the equivalent of 30 college quarter credits in early childhood education. These 30 credits may be included in the degree or in addition to the degree; or (2) A valid Washington State Teaching Certificate with an endorsement in Early Childhood Education (Pre-K-Grade 3) or Early Childhood Special Education.
- 18 There are multiple ways to meet the assistant teacher requirements: All persons serving in the role of ECEAP assistant teacher must meet one of the following qualifications: (1) Employment as an ECEAP assistant teacher in the same agency before July 1, 1999; (2) The equivalent of 12 college quarter credits in early childhood education; (3) Initial or higher Washington State Early Childhood Education Certificate (a 12 credit module equivalent to a CDA); or (4) A current Child Development Associate (CDA) credential awarded by the Council for Early Childhood Professional Recognition.
- 19 Lead teachers and family support specialists must complete a minimum of 15 hours of professional development (PD) per year, such as workshops or classes, but not including individual mentoring.
- 20 The state requires individualized annual PD plans for any lead or assistant teacher who does not yet fully meet the required qualifications for their position.
- 21 Each ECEAP contractor must provide, or have access to, a practice-based coach trained on the Early Achievers Coach Framework to: (1) Support rating readiness and ongoing continuous quality improvement. (2) Assist the Contractor in identifying goals and making quality improvement plans to achieve goals. (3) Assist the Contractor in completing remedial activities within the identified timeline, when applicable. Whether assistant teachers are involved with the coach may vary by local decision. Coaches are required to do what is necessary to support each site to attain or maintain a level 4 or 5 in Early Achievers-Washington's QRIS.
- 22 Varies by ECEAP contractor and site needs; not specified in statewide requirements

- <sup>23</sup> Coaches may also be assigned to Head Start and/or child care classes in addition to their ECEAP classes.
- <sup>24</sup> The other category includes teachers for whom qualifications are not known as well as those currently working on an AA.
- <sup>25</sup> The state convened a child care workforce development technical workgroup that is required to develop recommendations for the legislature to support increased child care workforce wages, reduce turnover, enable child care providers to recruit more qualified educators, and maintain the diversity of the current workforce.
- <sup>26</sup> Programs must support the professional development of classroom staff by providing regularly scheduled time for curriculum planning and reflective practice with coaches, supervisors and peers.
- <sup>27</sup> Professional Development Achievement Awards are given to early learning professionals when they earn each of these credentials: GED, High school diploma, Associate's degree, Bachelor's degree, Master's degree, Doctoral degree, ECE Major (up to the four different degrees), and ECE Certificates & Credentials.
- <sup>28</sup> Washington received a Gates Grant for an expansion consultation project, of which \$352,848 was spent in 2017-2018. This was not included in total spending.
- <sup>29</sup> General Fund - State (ECEAP Proviso) - spent \$57,799,596; General Fund - State (Tiered Reimbursements) - spent \$750,815; Opportunity Pathways (lottery) - spent \$40,000,000; Education Legacy Trust Account (ELTA - from estate taxes & interest earnings) - spent 12,044,430.
- <sup>30</sup> Assessments are required once per quarter. Children in part-day or full-day models are assessed three times a year. Children in extended-day ECEAP are assessed four times a year.
- <sup>31</sup> The remaining TS GOLD objectives (Science and Technology, Social Studies, and The Arts) are optional.
- <sup>32</sup> Lead teachers must complete interrater reliability certification for TS GOLD within six months of hire and every three years thereafter. This is monitored four times a year and followed-up closely with Contractors to ensure compliance.
- <sup>33</sup> Child assessment data are also used to individualize instruction and support for each child (done at the local level).
- <sup>34</sup> The Washington Kindergarten Inventory of Skills (WaKIDS) is a subset of the TS GOLD objectives.
- <sup>35</sup> The formal observations by the UW are done as part of our QRIS rating, every three years, using ERS and CLASS. Coaches conduct structured observations at their discretion in between formal QRIS ratings using these same tools. Coaches are strongly encouraged to attend reliability training in ERS and CLASS.
- <sup>36</sup> For additional information on the QRIS, please see: <https://www.dcyf.wa.gov/services/earlylearning-childcare/early-achievers>
- <sup>37</sup> The state is in process of requiring child care licenses for all ECEAP sites. This was partially implemented in 2017-2018. Licensed sites are visited annually. Other ECEAP sites are visited based on risk assessment, which may indicate an annual visit or less frequent (including some that are "more than every 5 years" because a representative sample of Contractor sites are visited). In the future, all sites will be visited annually by child care licensors.
- <sup>38</sup> Beginning July 1, 2018, the new state Department of Children, Youth, and Families integrated child welfare and early learning programs. DCYF is currently planning an in-house data warehouse. There have been discussions to integrate child health information but those are not currently moving forward. There is extensive health information in the internal ECEAP data.

## WEST VIRGINIA - West Virginia Universal Pre-K

- <sup>1</sup> The West Virginia Department of Education (WVDE) is responsible for the West Virginia Board of Education (WVBE) Policy 2525 overseeing WV Universal Pre-K; however, the WVDE Office of Early & Elementary Learning works collaboratively with the West Virginia Department of Health and Human Resources (WVDHHR) and the West Virginia Head Start State Collaboration Office to implement WVBE Policy 2525.
- <sup>2</sup> In West Virginia's collaborative model, all students are considered enrolled in public settings. The total count includes 3-year-olds in pre-K who are enrolled, but not age eligible, including 913 3-year-olds with IEPs. An additional 1,386 3-year-olds (also referred to as in the exclusion category) enrolled in pre-K through collaborative programs (such as Head Start or child care) were not included in the enrollment total. Children in the exclusion category are funded by a collaborating partner but participate in pre-K funded classrooms when space is available. Children under 3 are those who transition into the pre-K program through IEP eligibility and usually transition from a Birth to Three program. These children are 3 after the September 1st age eligibility.
- <sup>3</sup> Each pre-K classroom, including special needs classrooms, must provide at least 1,500 minutes of instruction per week and 48,000 minutes of instruction annually. The number of hours per day is determined locally with a minimum of 25 hours per week and 128 days per year. Programs must operate no fewer than four days per week to meet annual and weekly operational requirements. No programs are part-day; however, children may attend part-day, as determined by IEP teams. The totals do not include 61 children under 3 years old.
- <sup>4</sup> There is no formal partnership at the state level to provide extended-day services through collaboration with other agencies and programs (e.g., Head Start, child care); however, partnerships are required at the local level in state policy.
- <sup>5</sup> Children who are 5 years old prior to September 1 shall be enrolled in kindergarten, unless assessment data can determine that kindergarten placement for that child is not in the child's best interest. The WV Pre-K Child Assessment System data can be utilized for 5-year-old children previously enrolled in WV Pre-K; alternative assessment data will be necessary for 5-year-old children who are newly enrolled. Local school districts can allow for early entrance to kindergarten based on an assessment.
- <sup>6</sup> The maximum class size is 20 children as long as there is 35 square feet of useable space per child available. The maximum staff-child ratio is 1-10; however, two adults must be present with children regardless of class size.
- <sup>7</sup> For children enrolled in a WV Pre-K classroom, breakfast and lunch must be provided. Meals in community programs may include lunch and snack, rather than breakfast and lunch if a classroom's regular operation times occur when breakfast is not required.
- <sup>8</sup> The full physical exam must examine neurological functions, head, eyes, nose, lungs, abdomen, back, strabismus, ears, heart, skin, reflexes, neck, throat, and pulse.
- <sup>9</sup> Regulations for the Education of Students with Exceptionalities includes requirements for programs to support children with disabilities in WV Universal Pre-K.
- <sup>10</sup> No more than half of the children with an IEP, including speech/language, can be enrolled in an inclusive classroom. An additional aide must be provided when there are 10 children with an IEP in a pre-K classroom.
- <sup>11</sup> WVBE Policy 2525 Section 126-28-6: Attendance requires a countywide attendance policy that includes provisions for working with families whose children are chronically absent and/or tardy. Each county must establish and implement a provision for working with families whose children are chronically absent and/or tardy that does not penalize the family for acting in the best interest of the child. Provisions for children with documented chronic medical conditions must be included as defined in the state attendance policy.
- <sup>12</sup> This document was updated as of July 1, 2019. For more information, see: <http://apps.sos.wv.gov/adlaw/csr/readfile.aspx?DocId=49932&Format=PDF>
- <sup>13</sup> Content related to cultural awareness and supports for children's home language is in the Foundations of Early Learning Standards Framework chart: <http://wvde.state.wv.us/policies/policy.php?p=2520.15>
- <sup>14</sup> The West Virginia Pre-K Early Learning Standards Framework (WV ELSF) Professional Development System is a statewide PD system designed for all early childhood educators, administrators and families as part of WV Universal Pre-K. The system provides content which is research-based and aligned with the WV Early Learning Standards Framework and the WV Pre-K Child Assessment System. This system is available in the following domains: Language and Literacy, Math and Science, Arts and Physical Development, and Social and Emotional.
- <sup>15</sup> The Early Learning Scale is required in WVBE Policy 2525, as part of the WV Pre-K Child Assessment System.
- <sup>16</sup> Teachers employed by nonpublic schools must hold a minimum of a BA and either certification or a Community Program Permanent Authorization. A small percentage of teachers hired before 2013 (when policy changed to require all new teachers hold a BA) have an AA; the remainder of teachers have a BA.
- <sup>17</sup> All assistant teachers must have a CDA or equivalent, determined by the WVBE. The Early Childhood Classroom Assistant Teacher Authorization is a license required for all pre-K and kindergarten assistant teachers who complete a CDA or state equivalent.
- <sup>18</sup> State policy requires all county WV Pre-K staff, including teachers and teacher assistants/aides/paraprofessionals, to participate in 15 hours of staff development annually, based on the needs determined in the county continuous quality improvement process.
- <sup>19</sup> The WV Educator Evaluation System was developed using The Framework for Teaching (Danielson Group). All public school principals must complete the ongoing annual process with teachers in accordance with WVBE Policy 5310: Performance Evaluation of School Personnel. Assistant Teachers must have a PD plan that is linked

- to predetermined needs, reflect program goals and policies, and include a systemic evaluation process. All classroom staff employed by collaborating child care centers must have a PD plan that includes staff evaluation in the process in accordance with state child care licensing regulations. PD and evaluation formats are designed by the Child Care Directors. Head Start Performance Standards require grantees to maintain a system of training and PD for all collaborative staff employed by Head Start. Tools are determined by each partnering Head Start Grantee.
- <sup>20</sup> All teachers (lead and assistant) employed as Public School employees are required by state code to receive the same salary and fringe benefits as K-12 lead teachers. Nonpublic school employees in collaborative programs receive salaries and fringe benefits according to program with which they are employed.
  - <sup>21</sup> WVBE Policy 2525, West Virginia's Universal Access to a Quality Early Education System, requires that all county WV Pre-K staff, including teachers and teacher assistants/aides/paraprofessionals, shall participate in 15 hours of professional learning annually, based on needs determined in the county continuous quality improvement process. Policies that address paid time for professional responsibilities and/or PD days include WV Child Care Licensing Regulations and Head Start Performance Standards. All licensed child care centers and Head Start centers must have policies in place that include performance evaluations and individual Professional Development plans, and support 15 hours of PD annually.
  - <sup>22</sup> Free E-Learning Courses are offered to meet certification and renewal requirements.
  - <sup>23</sup> Policy 5500.02 County Service Personnel Staff Development Councils provides guidance for the support and delivery of PD for service personnel, including pre-K assistant teachers. The policy requires coordination of 18 hours of job related staff development annually. Additionally, West Virginia's Universal Access to a Quality Early Education System, requires that all county WV Pre-K staff, including teachers and teacher assistants/aides/paraprofessionals, shall participate in 15 hours of professional learning annually, based on needs determined in the county continuous quality improvement process.
  - <sup>24</sup> State-aid funding for pre-K is allocated as part of the K-12 state aid funding process.
  - <sup>25</sup> Faith-based centers must exclude religious content during designated public pre-K hours.
  - <sup>26</sup> The WV Universal Pre-K Longitudinal Study, conducted jointly by NIEER and Marshall University, is a multi-year study designed to assess the effects of participation in the state pre-K program. The timeline of the study spans from 2015 to 2020.
  - <sup>27</sup> Counties may use PALS in addition to the ELS. West Virginia requires assessment reports for physical health and development and the arts based on the WV Early Learning Standards Framework: Content Standards and Learning Criteria for West Virginia Pre-Kindergarten. West Virginia offers PALS to all counties who wish to utilize it for pre-K in addition to the ELS. The state pays costs of PALS training and materials.
  - <sup>28</sup> West Virginia Early Learning Reporting System: Kindergarten (ELRS:K) is an educator-developed series of standards-focused reporting rubrics. Teachers are required to report on the ELRS:K at the end of school year in the areas of English Language Arts and Mathematics. Districts can require use of the ELRS:K more frequently throughout the year. Pre-K end-of-year checkpoints can be utilized for kindergarten entry; however, not all children attend pre-K.
  - <sup>29</sup> The West Virginia Universal Pre-K Health and Safety Checklist must be conducted in all pre-K classrooms within 45 calendar days of the first day of school, annually. Additionally, state policy requires each county to develop and maintain a continuous quality improvement process that utilizes annual classroom observations such as ECERS or CLASS, and aggregated child assessment data in programmatic decision-making. Some use their curriculum implementation checklists (High/Scope PQA or the Creative Curriculum Fidelity Tool Administrator Checklist) and alternate years with CLASS or ECERS. Classroom observation tools are locally determined.
  - <sup>30</sup> Results from annual classroom observations are utilized as data sources in the district continuous quality improvement process. The continuous quality improvement process and program records are reviewed by the state pre-K steering team at a minimum of once every three years through the WV Universal Pre-K Program Review Process. The CQI process includes provisions for supports with individual teachers.
  - <sup>31</sup> Results from annual classroom observations are utilized as data sources in the district continuous quality improvement process. The CQI process must include annual results from county aggregated child outcome and classroom observation data.

## **WISCONSIN - Wisconsin Four-Year-Old Kindergarten (4K)**

- <sup>1</sup> School districts can contract with Head Start programs to implement 4K.
- <sup>2</sup> Each district reports their own data so the total may not equal the total enrollment for the program. Currently, DPI captures data related to Race/Ethnicity as only one category.
- <sup>3</sup> The state funds a total of 437 hours per year. Districts determine how many days per week the program operates. Districts must provide a minimum of 437 hours of direct instruction per year, or 349.5 hours of instruction plus 87.5 hours of parent outreach. Most programs are part-day, four to five days per week, but an increasing number of rural districts may offer school-day programs two or three days per week. State policies support partnerships with child care and Head Start to extend the number of hours per day or weeks per year. The 4K community approach models allow district contracts with child care, Head Start, and private schools. Additionally, most operating schedules are school year, but some districts extend the program through Head Start partnerships or local calendars.
- <sup>4</sup> Districts may contract with child care, Head Start and parochial schools (with assurances that the program is absent of religious information) to implement 4K. State policies also support partnerships with child care and Head Start to extend the number of hours per day or weeks per year.
- <sup>5</sup> The state law is that children are eligible for 4K if they are 4 years of age on or before September 1 of the school year, but it does allow districts to have early entrance policies. Districts that do allow this usually only enroll children who are 3 years of age by October or November upon parental request. Sometimes children with disabilities who are under 4 years of age are also counted if they were placed in 4K. Districts are also allowed to establish policies for maximum ages.
- <sup>6</sup> If a district offers 4K, it is open for all age-eligible children. No wait lists can exist.
- <sup>7</sup> There are no state requirements for class size or staff-child ratio. 4K programs partnering with child care or Head Start follow those requirements.
- <sup>8</sup> Head Start programs must follow Head Start requirements. If a school-based program operates more than 2.5 hours per day, it must provide a meal or snack through the school nutrition program.
- <sup>9</sup> Literacy screening is a state requirement. Children are required (with exceptions) to have immunizations and a medical examination that may include vision, hearing, blood pressure, etc. Developmental and psychosocial screenings are routine practice. Some districts provide vision screening.
- <sup>10</sup> If there are concerning screening results, it is recommended that follow-up information and possible referrals be made. Parents have a choice in deciding if they would like to pursue next steps.
- <sup>11</sup> Requirements depend on how the services are defined. Parent involvement is required when districts obtain additional funds for parent outreach. Referrals for special education are required as needed. State law requires referral to social services in case of abuse or neglect. When districts partner with Head Start, they must provide services per Head Start federal standards.
- <sup>12</sup> Programs are required to follow each child's IEP providing supports as defined with in the programs.
- <sup>13</sup> For additional information, see: <https://dpi.wi.gov/sspw/pupil-services/school-social-work/contents/attendance-truancy-dropout/resources#aeg>
- <sup>14</sup> The state does not have policies in place; however, it does have recommended practices to reduce suspension and/or expulsion.
- <sup>15</sup> The state does not have stand alone K-3 or college and career ready early grades standards. Infant and toddler standards are included in Wisconsin Model Early Learning Standards.
- <sup>16</sup> The state has a training and technical assistance system that includes cross sector trainers, a 15-hour training, and a variety of resources. For additional information, see: <http://www.collaboratingpartners.com/wmels/trainings/>
- <sup>17</sup> The state does not require child assessments; however, districts are encouraged to actively assess development to support and plan for ongoing learning. Districts are encouraged to align chosen assessment with the WI Model Early Learning Standards.
- <sup>18</sup> Provision of information is through early learning standards training, at conferences, through some technical assistance providers, and through web-based resources.
- <sup>19</sup> While the 4K programs are all under the administrative authority of the school, the school can contract with child care, Head Start, and/or private schools for 4K. The teachers in these community programs need to follow the public school requirements for personnel.
- <sup>20</sup> Assistant teachers can meet one of three requirements: (1) at least two years of higher education, (2) an AA or higher, or (3) meet a rigorous standard for quality through a state or local academic assessment regardless of degree. The requirements for assistant teachers in nonpublic settings reflect child care licensing regulations. School

districts that are federal Head Start grantees may require assistant teachers to have an AA and assistant teacher license.

- 21 There are no statewide required hours for PD. Districts, however, may have their own requirements. These are not submitted to the DPI. Licensed teachers have the option of doing a performance-based system that includes writing PD plans, working with a mentor, and having a team review and approval. Educator effectiveness practices for licensed teachers involve individualized PD plans. For assistant teachers, requirements for individualized PD plans depend on the employing agency. If they are employees of the public school districts, then they do need to have individualized PD plans. If a Community partner hires them, then evaluation is required, but the employer defines the format. It does not have to be an individualized PD plan.
- 22 For public schools, coaching and mentoring may be built into the state teacher effectiveness process, for those who choose to access the resources. For non-public schools, state policy requires that programs provide support as identified by the authorizing agency. For example, some programs are required to have embedded supports based on their Head Start Performance Standards or based upon the state child care QRIS.
- 23 Salaries and benefits are local decisions. Public school teachers are part of the WI Retirement System. Nonpublic school teachers are not.
- 24 This is determined locally.
- 25 Educator effectiveness may provide coaching and mentoring for lead teachers. This is determined locally with the lead teacher and district personnel.
- 26 A total of \$290,200,000 supported WI 4K. The state could not break this amount into state and local funding, so NIEER estimated the breakdown based on the 2016-2017 breakdown.
- 27 There is one, discreet, appropriation that supports 4K students: 4K Start Up Grants for school districts that are just implementing 4k programming (two-year grants). The total is \$1,350,000.
- 28 Spending figures are estimates as 4K is part of the overall state school funding formula, and it is difficult to break out costs for only one grade level. Funding for 4K is 0.5 of the funding level for other grade levels. Districts can provide 0.6 if they provide parent outreach in addition to the full 437 hours of instructional time. Additional information can be found here: <http://dpi.wi.gov/sfs/aid/general/equalization/formula>
- 29 There is no flat dollar or percent match for a school district to receive funding to support for 4K, either for general equalization state aid, or for the categorical aid 4K Start-Up Grant program. The general equalization aid formula provides state aid to districts, in the form of reimbursement for prior year "shared costs" (the total of the districts expenditures that are paid for with state general aid and local property taxes). The amount of state aid depends on each districts' spending levels and the district's "ability to pay," as measured by local property value per member (pupil).
- 30 Districts are free to establish their own screening window.
- 31 The state requires screening for early literacy development; however, no specific tool is required. Screening instruments are a local decision.
- 32 The state requires a literacy screening in 4K through 2nd grade. The state Response to Intervention and the Comprehensive Screening and Assessment Blueprint both promote ongoing assessment. For additional information, see: [http://www.collaboratingpartners.com/wp-content/uploads/2017/CPlinkedDocs/Healthy\\_Children\\_Blueprint\\_9\\_28\\_16\\_FINAL-1.pdf](http://www.collaboratingpartners.com/wp-content/uploads/2017/CPlinkedDocs/Healthy_Children_Blueprint_9_28_16_FINAL-1.pdf)
- 33 If the 4K site is in a Child Care center, child care licensing rules apply. If it is in Head Start, Head Start monitoring occurs as per the federal schedule.
- 34 Site visits depend upon where the 4K program is located. WI had 4K Community approach sites. Based on location (such as child care or Head Start)-programs may be monitored via the locations required regulations.
- 35 Currently, WI has an ECIDS systems which can match data from the DPI, Department of Children and Families (DCF) and the Department of Health Services (DHS).

## WISCONSIN - Wisconsin Head Start State Supplement

- 1 These numbers include Tribal and Migrant Head Start programs all receiving state supplemental Head Start funds.
- 2 Funds are available to federal Head Start grantees choosing to implement the program.
- 3 The Wisconsin Head Start Supplement provided services for 767 children including 627 children in Head Start and 140 children in Early Head Start.
- 4 Programs follow the federal Head Start performance standards and the grant-approved program design.
- 5 Head Start can partner with a public school to provide public 4-year-old kindergarten.
- 6 Programs follow the federal Head Start Performance Standards and the grant-approved program design.
- 7 Wisconsin Head Start follows Federal Head Start age eligibility requirements.
- 8 Programs follow federal Head Start eligibility requirements and local selection criteria. Children must meet the federal Head Start income guidelines. Effective as of 2007, 35% of enrollment may be children whose family incomes are between 100% and 130% FPL after priority is given to children at or below 100% FPL. Income is the primary determinant of eligibility. However, children in foster care, as well as those who are experiencing homelessness, are also eligible. With a federal waiver, children eligible for free lunch are also eligible for the program. Regulations also allow 10% of the children to be over income and 10% with disabilities to be enrolled. Each Head Start grantee can prioritize risk in their selection process. Children with more risk factors have greater priority for enrollment. Head Start grantees establish their eligibility priorities.
- 9 Per federal Head Start requirements.
- 10 The federal Head Start Performance Standards require that part-day programs provide children with at least one-third of their daily nutritional needs and school-day programs provide one-half to two-thirds of daily nutritional needs, depending on the length of the program day.
- 11 follow federal Head Start requirements. Medical screening is done by a physician that may be the family physician or arranged by Head Start. Referrals can include medical follow-up or referrals for evaluations under IDEA.
- 12 Services follow federal Head Start Performance Standards and local practices.
- 13 IEP's need to be implemented as written to support children in the least restrictive educational environment that is appropriate to meet their plan.
- 14 Head Start State Supplement Grantees are required to follow the Head Start Performance Standards.
- 15 WIDA the Early Years are aligned with the WI Model Early Learning Standards.
- 16 The standards are utilized in the state's Child Care Quality Rating system.
- 17 The state has a training and technical assistance system that includes cross sector trainers, a 15-hour training, and a variety of resources. For additional information, see: <http://www.collaboratingpartners.com/wmels/trainings/>
- 18 Head Start's assessment align with the Head Start Early Learning Outcomes Framework.
- 19 Provision of information is through early learning standards training, at conferences, through some technical assistance providers, and through web-based resources.
- 20 Teachers in the Head Start State Supplement programs are employees of the Head Start grantee and they must follow the federal Head Start requirements and local policies.
- 21 All benefits for non public lead and assistant teachers are determined locally per Federal Head Start guidelines.
- 22 The state requires a literacy screening in 4K through 2nd grade. The state Response to Intervention and the Comprehensive Screening and Assessment Blueprint both promote ongoing assessment. For additional information, see: [http://www.collaboratingpartners.com/wp-content/uploads/2017/CPlinkedDocs/Healthy\\_Children\\_Blueprint\\_9\\_28\\_16\\_FINAL-1.pdf](http://www.collaboratingpartners.com/wp-content/uploads/2017/CPlinkedDocs/Healthy_Children_Blueprint_9_28_16_FINAL-1.pdf)
- 23 The state of WI has and ECIDS system, however the Head Start Supplement is not part of the agencies sharing data.

## GUAM - Guam Department of Education Pilot Prekindergarten Program

- 1 The Guam Department of Education (GDOE) is a unitary school district, comprised of four regions. There is one Pilot Prekindergarten School in each of the regions.

- <sup>2</sup> The Pilot Prekindergarten Program is voluntary.
- <sup>3</sup> All children enrolled in pre-K must complete a registration form, which includes a physical examination and a TB Clearance.
- <sup>4</sup> Each child registered in the Prekindergarten Program must have a home language screening form completed. Teachers may avail themselves of ESL Coordinators if there needs to be assistance for DLL support.
- <sup>5</sup> The "Food Friends & Mighty Moves Program," a curriculum that addresses health and nutrition, is being implemented in pre-K with support from the Nutrition Program at the University of Guam.
- <sup>6</sup> Pilot Prekindergarten teachers meet monthly to talk about both instructional practices as well as program issues.
- <sup>7</sup> The GDOE allows for Pilot Prekindergarten teachers with an Associate's ECE Degree ECE to be pre-K teachers and therefore, the entry level salary differs from a Bachelor's Degree Early Childhood Certified Teacher. Fringe benefits are similar with the public schools.
- <sup>8</sup> The GDOE allows for paid PD days throughout the school year. This is reflective of the Guam Education Board approved School Year Calendar.
- <sup>9</sup> The GDOE supports monthly meetings and attendance at district-lead PD for the Pilot Prekindergarten Program staff.
- <sup>10</sup> Fringe benefits are available to all the Pilot Prekindergarten Program staff (teachers and Instructional aides).
- <sup>11</sup> Generally, the PD that the district facilitates is for the Pilot Prekindergarten teachers. However, on occasion the instructional aides participate in meetings and will be provided administrative leave (paid leave) for their attendance to these specific training sessions.
- <sup>12</sup> The Guam Federation of Teachers has a collective bargaining agreement for the school aides (teacher assistants), however, the individual may decide to join the union or not.
- <sup>13</sup> The state developed a Progress Report that identifies the various components that must be assessed on a semester basis. These include: Language Arts/Literacy; Mathematical Thinking, Scientific Thinking; and Physical Development & Health. Preschool Brigance Assessments are administered twice a year: a pre-assessment in August and a post-assessment in May.
- <sup>14</sup> District staff provide training on the use of the Preschool Brigance Assessments, and lead teachers administer the Brigance Assessments.

## APPENDIX B: HEAD START DATA (continued)

### DATA SOURCES

- a Data are from the Education Commission of the States Trends in Pre-K Education Funding: 2017-18 report, NIEER's survey of state supplements to Head Start, and the NIEER Yearbook survey.
- b Head Start enrollment supported by state match from the Administration for Children and Families (ACF) or as reported in NIEER's survey of state supplements to Head Start or the NIEER Yearbook survey.
- c Federal spending and enrollment data from the Administration for Children and Families (ACF). ACF did not provide enrollment by single year of age. Therefore, enrollment by age was estimated based on enrollment and proportions of all enrollees who were age 3 or age 4, as reported in the 2017-2018 Head Start PIR.
- d Data from Head Start Program Information Reports (PIR) for 2017-2018.

### NOTES

Several state's Head Start state supplements also meet the requirements for inclusion as state-funded pre-K programs in this report. The state-funded Head Start enrollment and spending numbers reflected here match those in the state pre-K section of the report for these states: Minnesota Head Start, Oregon Head Start Pre-kindergarten, Pennsylvania Head Start program, Wisconsin Head Start.

- 1 Some programs in these states meet some or all of the required non-federal share requirement for 20% of the total costs of the program to come from non-federal sources through state funds to support children. This does not represent all state funds that may be used for Head Start but those funds used to meet the federally required match. ACF did not provide enrollment by single year of age. Therefore, enrollment by age was estimated based on enrollment and proportions of all enrollees who were age 3 or age 4, as reported in the 2017-2018 Head Start PIR.
- 2 Funded enrollment was not available by single age of year. Data shown here are estimated based on the percentage of all 3- and 4-year-olds enrolled, as reported in the 2017-2018 Head Start PIR, and the total enrollment by state as reported by ACF. These numbers do not include children funded by state match. Migrant & Seasonal and American Indian/Alaska Native (AIAN) enrollment and funding are attributed to the state where the program is headquartered, although many programs serve children across state lines throughout the year. The sum for federal Head Start funding only represents the portion of funding provided to states and does not include funding for programs in U.S. territories, but does include AIAN and Migrant & Seasonal programs. Total federal Head Start funding, including U.S. territories, was \$6,742,724,687.
- 3 The percent of children enrolled in full-day, five day per week programs includes AIAN and Migrant & Seasonal Head Start.
- 4 National salary averages include data from programs in the U.S. territories, including Puerto Rico, as well as AIAN and Migrant & Seasonal Head Start.

## APPENDIX C: U.S. CENSUS POPULATION ESTIMATES

### NUMBER OF 3- AND 4-YEAR-OLDS, BY STATE 2017

STATE	3-year-olds	4-year-olds	Total 3- and 4-year-olds
Alabama	59,050	58,109	117,159
Alaska	10,709	10,743	21,452
Arizona	88,552	88,283	176,835
Arkansas	38,300	37,893	76,193
California	497,302	497,580	994,882
Colorado	67,449	66,949	134,398
Connecticut	37,250	37,532	74,782
Delaware	11,066	10,942	22,008
District of Columbia	8,282	8,550	16,832
Florida	229,078	226,397	455,475
Georgia	132,767	132,362	265,129
Hawaii	18,082	18,414	36,496
Idaho	23,216	23,730	46,946
Illinois	154,130	153,561	307,691
Indiana	84,649	85,231	169,880
Iowa	40,244	39,968	80,212
Kansas	39,001	39,094	78,095
Kentucky	55,710	55,498	111,208
Louisiana	62,585	61,053	123,638
Maine	13,069	13,206	26,275
Maryland	73,256	73,405	146,661
Massachusetts	72,330	72,665	144,995
Michigan	116,480	115,562	232,042
