## Nevada Ranks Near the Bottom in Preschool Access

*National report says it's a "time to choose," as states have bounced back unevenly from the pandemic when it comes to preschool enrollment and quality*

**NEW BRUNSWICK, N.J.** - A new national report released today ranks Nevada 40<sup>th</sup> in the nation for preschool enrollment for four-year-olds.

The National Institute for Early Education Research (NIEER) today released its annual *State of Preschool* report, which tracks preschool enrollment, funding, and quality across states. The 2023 *State of Preschool* Yearbook found that, in the 2022-2023 school year:

- Nevada served 7% of four-year-olds but did not enroll any three-year-olds in state-funded preschool.
- Total preschool enrollment was 2,481, an increase of 96 from the prior year.
- State spending totaled \$19,754,875, with an additional \$3,733,874 in federal COVID-19 relief funds supporting the program, up \$815,128 (4%), adjusted for inflation, since last year.
- State spending per child (including federal relief funds) equaled \$9,467 in 2022-2023, down \$39 from 2021-2022, adjusted for inflation.
- Nevada met 7 of 10 research-based quality standards benchmarks for minimum quality recommended by NIEER.

"Our report on the 2022-2023 school year found that Nevada leaders had work to do to improve preschool enrollment and quality. Nevada should be praised for increasing state funding for preschool in recent years," **said W. Steven Barnett, Ph.D., NIEER's senior co-director and founder.** "However, the state faces critical choices about the future of preschool. We encourage Nevada to provide high quality early learning opportunities to more children while maintaining an adequate per child funding level. Bold steps are needed to ensure more children have access to high quality early learning experiences."

Nationally, the report finds that this is a critical moment for preschool. The nation has emerged, albeit unevenly, from the COVID-19 Pandemic. States are poised to make new progress toward serving more three- and four-year-olds in high-quality, full-day preschool programs. How each state chooses to move forward – and whether the federal government helps – will determine how much real progress is made. Most states have not committed to serving all children, and even those states that have often fall short. Most states need to increase funding per child substantially to enable providers to meet minimal standards for a high-quality, effective program.

During the 2022-2023 school year, states enrolled over 1.63 million children in preschool, marking a 7% surge compared to the preceding year. Preschool enrollment reached 35% of 4-year-olds and 7% of 3-year-olds, with state expenditures reaching \$11.73 billion—an 11% increase from 2021-2022 when adjusted for inflation. Notably, state spending per child surpassed \$7,000 for the first time. However, despite this notable progress, most states still fell short of their pre-pandemic preschool enrollment. While several states made strides towards achieving universal preschool access, six states persisted in not allocating any funding for preschool programs.

"With the pandemic in the rear view, it is time for states to choose whether they are going to support high-quality preschool and how," **said Allison Friedman-Krauss, Ph.D., the report's lead author.** "Will states commit to serving all four-year-olds? Will states serve both three- and four-year-olds? Will states make the investments needed to ensure that programs are effective? Will states support an equitable mixed-delivery model for preschool incorporating both existing child care programs and public schools? How will states recruit, support, and retain preschool teachers? These decisions will impact millions of children for years to come."
